

Microsoft.MB-700.vAug-2024.by.Unsano.151q

Number: MB-700
Passing Score: 800
Time Limit: 120
File Version: 5.0

Exam Code: MB-700

Exam Name: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect

Topic 1: Architect solutions Case Study

Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements.

If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Qbutton to return to the question.

Background City Power and Light is a publicly traded electric utility company. The company has a corporate office, four regional field offices, two subsidiary companies that produce solar energy, and one wind power subsidiary. City Power and Light has 50 percent ownership in the solar energy company. The company fully owns the wind power company but operates it separately from other businesses.

City Power and Light currently operates with varying integrated legacy systems and has difficulty assembling company financials. Migrating these systems and workloads to a common platform would improve visibility into the business and inform decision making. The company plans to implement Dynamics 365.

Legacy systems

- The legacy system does not have audit capability of configurable workflow based on business logic
- The legacy paper-based purchasing system does not allow parent-child relationships for vendors.

Two signatures are required for purchase requisitions.

- Purchase orders are entered into the system manually based on signed purchase requisitions printed to PDF and then emailed to the vendor.
- The legacy procurement system does not have a parent-child relationship for master data management.

Financials

- All financial consolidate up to City Power and Light Holding, LLC.
- The finance department employees are currently able to create as well as pay invoices.

Customers

Sales orders from the website are uploaded into the system manually once a day .

International and domestic customers currently post to the same receivable account. At the end of the month, these have to be separated into domestic and international receivable accounts.

Other information

- There are multiple active acquisitions expected during the implementation timeline.
- The item master data for solar panel configurations has multiple variables and variants. As a complex.

General

- Flexible implementation approach to support frequently changing business needs and requirements.
- A phased roll-out is needed due to the complexity of the business.
- Any offsite Travel meals submitted on an expense report without corresponding flight and hotel expenses need to be reviewed.
- Ten percent of vendor invoices should be reviewed to ensure they meet company policy.
- Testing of business processes needs to be automated.
- Customer surveys must be sent out after email customer service interactions. Surveys must contain a rating system and a way for customers to add comments.
- Employees require one central tool for internal communication, phone calls, and file sharing.
- Sales representatives need an enterprise quoting tool for solar panel customers.

Technical

- A cloud-based financial and operational system, accessible on mobile devices.
- The ability to keep a legacy meter reading application with the ability to use the data in aggregated operating reports.
- Business processes should be tested with different variables for the same process as part of the testing plan.

Functional

- Establish and document business processes to assist with on-boarding new employees more efficiently.
- Parent-child relationships need to be established for vendors with regional offices. Purchasing locations vary from invoicing locations.
- The ability to create automated wire payments.

Requisitions

- All purchase requisitions over \$50 need to be approved by a manager.
- All purchase requisitions over \$1,000 require senior manager approval.
- Multiple purchase requisitions to the same vendor should be combined.

Sales

The item master data for solar panel configurations have multiple variables and variants. This leads to complex quoting and sales orders.

Sales representatives must be able to create automated wire payments.

Issues

- A limited number of users are available for testing.
- User1 reports that the date fields are not saving during formula entry with saved variables functionality in the RSAT tool.
- The purchasing department is seeing duplicate vendor records during data conversion.
- Audit notes from the prior year indicate improvement is needed in roles and responsibilities related to financial management and security roles.
- User2 reports that parts ordered on P0123 were never received and the vendor has said they never received the PO.
- User3 provides feedback that important steps during journal entry are being forgotten and new users need hands-on guidance.
- Service technicians report that they do not always have the appropriate tools or parts with them requiring multiple service calls.

QUESTION 1

You need to recommend an appropriate implementation methodology.

Which methodology should you recommend?

- A. Spiral
- B. Lean
- C. Waterfall
- D. Agile

Correct Answer: D

Section:

QUESTION 2

HOTSPOT

You need to correctly structure the master data.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Issue

Vendors with multiple ship to addresses.

Option

	▼
Business address	
Invoice-to account	
Vendor group	
Vendor posting profile	

International and domestic customer receivables.

	▼
Customer group	
Customer segment	
Default dimensions	
Financial dimensions	

Answer Area:

Answer Area	Issue	Option
	Vendors with multiple ship to addresses.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right;">▼</div> <div style="background-color: #e0ffe0; padding: 2px;">Business address</div> <div style="padding: 2px;">Invoice-to account</div> <div style="padding: 2px;">Vendor group</div> <div style="padding: 2px;">Vendor posting profile</div> </div>
	International and domestic customer receivables.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right;">▼</div> <div style="padding: 2px;">Customer group</div> <div style="padding: 2px;">Customer segment</div> <div style="background-color: #e0ffe0; padding: 2px;">Default dimensions</div> <div style="padding: 2px;">Financial dimensions</div> </div>

QUESTION 3

DRAG DROP

You need to recommend Microsoft solutions for City Power and Light's business requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area		
Solutions	Requirement	Solution
Microsoft Forms Pro	Customer surveys	
Microsoft Power Automate		
Microsoft Teams	Centralized tool for all employee communication and file sharing	
Dynamics 365 Field Service		
Microsoft SharePoint	Manage part inventory and tools on trucks for customer support appointments	
PowerApps		
Dynamics 365 Customer Service		

Correct Answer:

Answer Area		
Solutions	Requirement	Solution
	Customer surveys	Microsoft Forms Pro
Microsoft Power Automate		
	Centralized tool for all employee communication and file sharing	Microsoft Teams
Microsoft SharePoint	Manage part inventory and tools on trucks for customer support appointments	Dynamics 365 Field Service
PowerApps		
Dynamics 365 Customer Service

QUESTION 4

DRAG DROP

You need to recommend solutions for City Power and Light's new system.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Tools	Requirement	Tool
ISV	Solar panel quoting	
Custom	Wire payments	
Standard	Audit requirements	

Correct Answer:

Answer Area

Tools	Requirement	Tool
	Solar panel quoting	Custom
	Wire payments	ISV
	Audit requirements	Standard

Section:

Explanation:

QUESTION 5

HOTSPOT

You need to recommend solutions to streamline the business processes.

Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Tool
E-commerce sales orders	<div data-bbox="1288 898 1359 949">▼</div> <ul style="list-style-type: none"><li data-bbox="887 961 1219 1012">Dynamics 365<li data-bbox="887 1031 1110 1081">Logic app<li data-bbox="887 1100 1130 1150">Power App

QUESTION 6

DRAG DROP

You need to determine which system functionality meets the business requirement.

What should you recommend? To answer, drag the appropriate functionalities to the correct requirements. Each functionality may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

NOTE: Each correct selection is worth one point.

Select and Place:

Functionalities	Requirement	Functionality
Workflow	Approve purchase requisitions over \$50.	Functionality
Purchasing policy	Review offsite travel expenses.	Functionality
Audit policy	Enforce vendor invoice compliance.	Functionality

Correct Answer:

Functionalities	Requirement	Functionality
	Approve purchase requisitions over \$50.	Workflow
	Review offsite travel expenses.	Purchasing policy
	Enforce vendor invoice compliance.	Audit policy

Section:

Explanation:

QUESTION 7

You need to recommend a solution for the business process testing plan. What should you recommend?

- A. LCS Business process library
- B. SysTest framework
- C. Chain test cases
- D. Derived test cases

Correct Answer: D

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/rsat/rsat-derivedtest-cases>

QUESTION 8

You need to recommend a purchasing process based on the requirements.

Which three system capabilities should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. procurement categories
- B. signing limits
- C. workflow
- D. purchasing policies
- E. security roles

Correct Answer: C, D, E

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/procurement/purchase-policies>

QUESTION 9

You need to manage the roles and responsibilities for security and financial management to address concerns found in the prior year's audit. What should you do?

- A. Use security roles with segregation of duties.
- B. Implement a security group for all users in finance department.
- C. Use security roles with audit workbench.
- D. Grant multiple security roles per user.

Correct Answer: A

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/sysadmin/tasks/set-upsegregation-duties>

QUESTION 10

You need to recommend a toolset to assist with User3's feedback about the issues with journal entry and new user training. What should you recommend?

- A. RSAT tool with LCS
- B. Task Recorder with RSAT
- C. Task Recorder with BPM library
- D. RSAT tool with Asset library

Correct Answer: C

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/bpmoverview>

QUESTION 11

You need to recommend a solution to resolve the issues reported with the company's legacy systems. Which functionality should you recommend?

- A. Vendor groups
- B. Financial dimensions
- C. Vendor posting profile
- D. Invoice-to account

Correct Answer: B

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/organizationadministration/plan-organizational-hierarchy>

Topic 2: Define solution strategies Case Study

Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements.

If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Qbutton to return to the question.

Overview CoHo Vineyard and Winery is based in the United States. The company has a single vineyard. The company distributes full pallets of wine worldwide and sometimes sells wine by using a private label.

Grape growing and wine production operations are owned and operated by a third-party company.

The company uses bottles, accessories, and other disposables from a company in China.

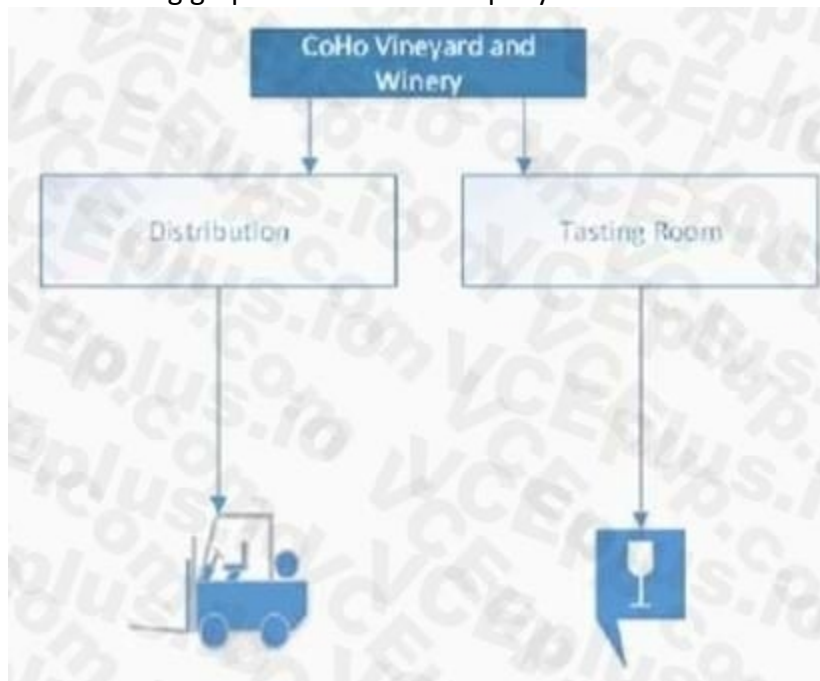

CoHo Vineyard and Winery opens a second location. This location manages inventory for Wine Club members and includes a wine tasting room. The location also includes a warehouse and distribution center.

The wine club currently has 200 members. The company hopes to increase this number.

The company holds events for club members in the tasting room and ships both full cases and individual bottles to members. The tasting room is not treated as a retail store. All sales to club members only and purchases must be made on-account.

Company structure

The following graphic shows the company structure:

Organization

The current organizational chart and roles as follows:

The logo for Vdumps.com, featuring a stylized orange 'V' followed by the word 'dumps' in a grey, lowercase, sans-serif font.

Current environment CoHo Vineyard and Winery currently uses manual processes for most of its operations. The company stores names and phone numbers for club members and prospective club members in a Microsoft Excel workbook. The sales team currently tracks club membership in a separate system. Sales team stock awards are granted on a three-year basis. The solution for the sales Team cannot be replaced for three years.

- The types of wine, such as cabernet sauvignon and red blends are tracked as separate items. Each item will have a year associated with it such as Red Blend 2017, 2018, 2019, etc. The items are updated for the year association annually.
- Peak times for order entry could be in the hundreds. This typically happens when first and second shift workers overlap and all users are on the system, as well as orders imported in.
- Packaging materials, bottles, and accessories are received in the warehouse FOB Destination from the manufacturer in China.
- Each retailer has individual item numbers, barcode placement descriptions and other additions such as pictures and details of the wine year and flavor notes.

CoHo Vineyard and Winery has outgrown their legacy ERP system and plans to implement Dynamics 365 Finance. CoHo wants to use out-of-the-box tools which are linked to the system where possible and not create new tools.

Licensing and organization

- Only the President/CEO, CFO, COO, Controller and VP Operations users must be able to access finance and warehouse features.
- Warehouse users must only have access to warehouse function. All other users must have access to finance functions.
- The distribution center must have mobile scanners for the warehouse. The tasting room will not have mobile scanners.
- The inventory cost must be tracked separately by distribution center or tasting room.

Club membership events

- You must ensure the members created in their existing system are also customers in Dynamics 365 Finance and that the customers do not exist in both systems under multiple record numbers.
- When tasting events are planned, text notifications must be sent out to the club members.
- text notifications must sent out to non-club members to encourage the non-members to join the club.
- During tasting events. CoHo will need access to place orders during the event but will not have the need for cash registers.

Warehouse and shipping

- The system must be able to track inventory throughout the whole warehouse process.
- A Certificate of Origin must accompany each shipment.
- Private label items that are shipped to retailers must be stored and costed as a single item number at CoHo.
- The system must be able to compare year-to-year performance of a single wine type.

Implementation

- Business processes must be documented as step-by-step processes and must align with the process flows in a visual format
- Data will be migrated and is a requirement for order entry.
- Data migration must be completed prior to testing.
- You must track each step of process validation so that the users have ownership for their individual functional areas. The tracking system used should be integrated with the system where possible.

Issues

- Users are struggling to understand the new system's processes.
- CoHo is concerned that the go-live will may not go smoothly.

Current environment CoHo Vineyard and Winery currently uses manual processes for most of its operations. The company stores names and phone numbers for club members and prospective club members in a Microsoft Excel workbook. The sales team currently tracks club membership in a separate system. Sales team stock awards are granted on a three-year basis. The solution for the sales Team cannot be replaced for three years.

QUESTION 8

You need to create a plan that meets the following requirements:

- Migrate the data to the new system.
- Implement a standardized method for creating items.
- Prevent items from being created in different ways going forward.

Which two actions should you recommend? Each correct answer presents a complete answer. NOTE:

Each correct selection is worth one point.

- A. Migrate item data in the cutover plan after the annual updates of items,
- B. Suggest creating a Power BI report to identify like-items after migration.
- C. Migrate items in the cutover plan before the annual update of items.
- D. Suggest a Master Data Management team who standardizes the item master.
- E. Migrate existing items as-is.

Correct Answer: B, D

Section:

QUESTION 9

You need to recommend a solution to manage the wine bottle label requirements for the private brand. What should you recommend?

- A. Use an add-on solution for barcode and label report printing.
- B. Create notes on the item and print for the customers.
- C. Implement Advanced Warehouse label printing.
- D. Recommend Dynamics 365 Retail.

Correct Answer: A

Section:

QUESTION 10

You need to recommend the appropriate number of production instances and the hosting location.

What should you recommend?

- A. One production instance in China.
- B. Two on-premises production instances hosted in both China and the United States.
- C. One on-premises production instance hosted in United States and one cloud production instance hosted in China.
- D. Two production instances hosted in China and the United States.
- E. One production instance hosted in the United States.

Correct Answer: E

Section:

QUESTION 11

You need to recommend a solution for tracking business process test steps. What should you recommend?

- A. Microsoft Azure DevOps
- B. Data Migration Framework
- C. Selenium Automation Framework
- D. Microsoft SharePoint

Correct Answer: A

Section:

QUESTION 12

You need to ensure that the customer records remain synchronized in both systems.
What should you recommend?

- A. Write a Power BI report.
- B. Integrate the third-party application into Dynamics 365 Finance
- C. Replace the sales system with Dynamics 365 Sales.
- D. Use Microsoft Power Automate

Correct Answer: B

Section:

Explanation:

<https://www.pragmatiqsolutions.co.uk/blog/frequently-asked-questions/can-dynamics-365-integrate-with-our-existing-business-systems/>

Exam C

QUESTION 1

A company uses Dynamics 365 Supply Chain Management. The company has offices in several geographic regions.
Users must only be allowed to access the system from IP addresses that are associated with the regions where the company has offices.
You need to set up security for the company.
What should you set up?

- A. Enable Session management
- B. Azure Active Directory Conditional Access
- C. Extensible Data Security policies (XDS)
- D. Security policy
- E. Assign user roles

Correct Answer: B

Section:

Explanation:

You can limit access to users with block access by location to reduce unauthorized access. By using Conditional Access policies, you can apply the right access controls when needed to help keep your organization secure and stay out of your user's way when not needed. Conditional Access analyses signals such as user, device, and location to automate decisions and enforce organizational access policies for resources.

For example, when location restrictions are set in a user's profile and the user tries to sign in from a blocked location, access to customer engagement apps (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field

Service, Dynamics 365 Marketing, Dynamics 365 Project Service Automation), and Finance and Operations apps are denied.

Reference: <https://docs.microsoft.com/en-us/power-platform/admin/restrict-access-online-trustedip-rules>

QUESTION 2

Fourth Coffee plans to implement Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The company owns and operates the following divisions:

Division	Action
Production	Packages and roasts coffee beans
Distribution	Delivers products to market

You need to ensure that Fourth Coffee can report financial results by division. Which strategy should you recommend?

- A. Create two legal entities, create one warehouse and associate the financial dimension to the warehouse.
- B. Create one legal entity with one site that has two warehouses. Associate the financial dimensions to the warehouses.
- C. Create two legal entities, create one site and associate a financial dimension per company.
- D. Create one legal entity with two sites. Associate financial dimensions to sites.

Correct Answer: D

Section:

Explanation:

Reference:

<https://www.nexsoftsys.com/articles/financial-dimensions-in-dynamics-365-services.html>

QUESTION 3

A company plans to implement Dynamics 365 Finance ? Operations (on-premises).

The company has system compliance requirements that must be addressed. You need to design the solution for the company. What should you address in the design?

- A. job-protected family and medical leave
- B. workers' compensation
- C. employee retirement
- D. data privacy

Correct Answer: D

Section:

QUESTION 4

A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. You create a security role named ReadOnlyUserAR and add the role to users. You create a custom duty named CustomerViewList.

You need to recommend how to implement the privileges.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add the Customers privilege to the CustCustomer.
- B. Add the CustCustomerMasterInquire duty to ReadOnlyUserAR.
- C. Add the Customers privilege to CustCustomerMasterInquire.
- D. Add CustomerViewList to ReadOnlyUserAR.
- E. Add ReadOnlyUserAR to users.

F. Add the Customers privilege to CustomerViewList.

Correct Answer: B, D, E

Section:

QUESTION 5

A company uses Dynamics 365 Finance and Supply Chain Management.

The company would like to add a third-party solution for scheduling appointments.

You need to recommend a solution to transfer critical schedule information.

Which two actions should you perform to make a recommendation? Each correct answer presents part of the solution NOTE: Each correct selection is worth one point.

- A. Analyze the impact of the new system in each business unit.
- B. Categorize business requirements for functional consultants to identify gaps in functionality.
- C. Describe the new functionality that is missing in the current system.
- D. Identify business processes that must be added, removed, or modified by functional consultants.

Correct Answer: B, D

Section:

QUESTION 6

A company is moving financial workloads to Dynamics 365 Finance.

Balance sheet accounts do not require department dimension postings while profit and loss accounts require department dimensions.

You need to determine which functionality achieves the goal.

What should you recommend?

- A. Legal entities
- B. Financial dimensions
- C. Account structures
- D. Financial dimension sets

Correct Answer: C

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/finance/general-ledger/configure-account-structures>

QUESTION 7

A German company is implementing a cloud-based Dynamics 365 system.

The company needs to determine the best data storage solution for the following requirements:

Data must be stored in the European Union.

Data cannot be viewed by the United States government under the Patriot Act.

Data transfer exceptions can be made but must be authorized by the corporate legal team.

You need to determine which cloud services may have to transfer data to the United States.

Which three services should you review? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Lifecycle Services
- B. Technical support

- C. Usage data
- D. Power BI dashboard
- E. Data center failover

Correct Answer: A, B, C

Section:

QUESTION 8

A company that rents photocopiers is implementing Dynamics 365 Supply Chain Management.

Technicians carry spare parts in their trucks to use during maintenance visits.

You need to determine how to capture the parts consumed.

Where should you capture this information?

- A. Fixed Assets module
- B. Service module
- C. Service agreement
- D. Sales order

Correct Answer: A

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/asset-management/setup-for-objects/object-types>

QUESTION 9

A company uses Dynamics 365 Finance. An ISV provides a fix for an issue with a solution that the company uses.

You must deploy the fix to the production environment.

You need to schedule the deployment.

What should you do?

- A. Open an extensibility support request.
- B. Open a hotfix request.
- C. Create a service request in Lifecycle Services (LCS).
- D. Create a support request in Lifecycle Services (LCS).

Correct Answer: A

Section:

Explanation:

Extensibility requests

Finance and Operations applications exclusively use extensions to customize the product.

We've been working toward an extension-based customization model for some time. Over the past several releases we have been gradually sealing models. As of Dynamics 365 for Finance and Operations release 8.0, this completes the sealing. From this release forward, only extension-based customizations are allowed.

In future releases, we will be adding even more extensibility capabilities to enable independent software vendors (ISVs) and value-added resellers (VARs) to deliver complete business solutions. We will prioritize these on a customer-by-customer basis with frequent releases.

Reference: <https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/devitpro/extensibility/extensibility-requests>

QUESTION 10

DRAG DROP

A company is implementing these Microsoft solutions;

- * Dynamics 365 Finance
- * Dynamics 365 Supply Chain Management
- * Dynamics 365 Commerce
- * Power Apps

All users will require finance capabilities, but the other solutions will vary per user.

You need to identify the license types required to build a quote.

What should you select? To answer, drag the appropriate license types to the correct solutions. Each license type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

QUESTION 11

A company plans to implement Dynamics 365 Finance and Supply Chain Management. The company uses passwords to manage access. The company wants to replace passwords with Microsoft Azure security features. You need to recommend a security solution for the company. What should you recommend?

- A. Microsoft Entra ID Conditional Access
- B. Windows security
- C. Microsoft Entra ID Privileged Identity Management
- D. Windows Hello

Correct Answer: A

Section:

QUESTION 12

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goal. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is implementing Dynamics 365 Finance and Operations applications.

The company has the following security requirements:

- * Employees working from home must use company-managed devices only to access the applications
- * Users with administrative roles must use multi-factor authentication (MFA).

You need to implement a security solution.

Solution: Create conditional access policies

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

Section:

QUESTION 13

DRAG DROP

A company implements Dynamics 365 Commerce. The company has 200 retail stores. The company has a retail store custom solution and a third-party e-commerce solution. Dynamics 365 Commerce will replace the custom retail point of sale (POS) solution. Dynamics 365 Commerce must integrate with the company's third-party e-commerce solution. The third-party e-commerce solution must meet the following requirements:

- * Integrate with Microsoft Dynamics 365 for in-store order pickups.
- * Store orders in XML file format.
- * Send the XML order files to an FTP file location.

Dynamics 365 Commerce must meet the following requirements:

- * Serve as the inventory system of record.
- * Serve as the retail sales and financial system of record.
- * Provide point-of-sale (POS) capabilities in store.
- * Provide the ability for e-commerce customers to pick up orders in store.
- * Update the status of the sales order to prevent it from being fulfilled multiple times.

The custom retail POS solution must meet the following requirements:

- * Import retail transactions from all stores into Dynamics 365 Commerce.
- * Produce a single pipe-delimited file of all daily sales transactions by store.
- * Continue to operate for six months before it is deprecated.

You need to create data integrations for the business processes.

Which integration patterns should you use? To answer, drag the appropriate patterns to the correct requirements. Each pattern may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Patterns

Synchronous

Asynchronous

Answer Area

Requirement

Send third-party e-commerce orders to Dynamics 365 Commerce.

Retrieve customer orders in retail stores for orders created online in real time.

Synchronize all custom retail POS solution transactions to Dynamics 365 Commerce.

Update sales order status following in store pickup.

Pattern

Section:

Explanation:

QUESTION 14

A company uses Dynamics 365 finance and operations apps.

The company is creating a detailed One Version strategy for applying updates to different environments through Lifecycle Services (LCS).

You need to identify which environment can receive automatic updates from Microsoft.

Which environment should you select?

- A. Microsoft Azure-hosted VHD development environment downloaded from LCS
- B. Local VHD development environment downloaded from OneDrive
- C. Multiple box testing environment hosted in Microsoft Azure
- D. Customer-managed environment deployed through LCS

Correct Answer: D

Section:

QUESTION 15

A company is implementing Dynamics 365 Supply Chain Management.

You are helping the company use Subscription Estimator in Lifecycle Services (LCS).

You need to import data for the usage profile.

Which data source should you use?

- A. Data Migration Framework
- B. Azure Data Lake connector
- C. Performance SDK
- D. Business process modeler (BPM)

Correct Answer: D

Section:

Explanation:

Usage profiler (Lifecycle Services, LCS), Import business processes from BPM.

We recommend that you start by importing data from Business process modeler, and then add additional data manually.

Go to Lifecycle Services.

Configure your organization in Business process modeler.

On the project home page, click the Usage profiler tile, and then on the Usage profiler page, click Import from BPM. The system displays the message Retrieving BPM data. When it has finished importing the data, you will be returned to the

Usage profiler page.

Reference: <https://learn.microsoft.com/en-us/dynamicsax-2012/appuser-itpro/usage-profilerlifecycle-services-lcs>

QUESTION 16

A company implements Dynamics 365 Supply Chain Management for inventory operations.

When a server that runs the document routing service restarts, a user must manually sign in to start the Document Routing Agent.

The configuration delays outbound operations.

You need to configure the Document Routing Agent to automatically start when the server restarts.

Which technology should you use?

- A. Microsoft store application
- B. Windows application
- C. Windows service
- D. Azure service
- E. Desktop application

Correct Answer: C

Section:

Explanation:

Run the Document Routing Agent as a Windows service.

The Document Routing Agent includes an option that lets you select the mode of execution. The process can run as either a desktop application or a Microsoft Windows service. When the application runs as a Windows service, it can be started automatically after a computer restart.

Note: Configure and start the Windows service

In Windows, start Service Manager.

In the list, select Microsoft Dynamics 365 Finance Document Routing Service.

Right-click the name, and then select Properties.

On the Log On tab, select the This account option, and then supply the AD DS credentials that are used to run the service.

Select OK.

Start the service.

The Document Routing Agent is now running as a Windows service.

Reference: <https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/installdocument-routing-agent>

QUESTION 17

A company manufactures and distributes sporting goods. The company uses Dynamics 365 Finance and Project Operations.

A user's primary role is managing projects. The user must also have access to trial balances and journal entries.

You need to determine the correct license assignment for this user.

Which two licenses should you assign to the user? Each correct answers presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Finance attach
- B. Finance base
- C. Project Operations base
- D. Project Operations attach

Correct Answer: B, D

Section:

Explanation:

Base licenses and cost savings opportunities for "attach" licenses Microsoft provides a cost-effective way for a single Dynamics 365 user to obtain full user licensing for multiple products. Licenses for products that provide core business functionality qualify as base licenses. (See the table below.) Each has one or more additional applications that are frequently used by people in the same roles and that qualify as attach licenses for that user.

(These are sometimes referred to as subsequent qualifying applications.) To take advantage of the special attach license pricing:

1. Buy the first base user license at standard pricing.
2. Review which attach licenses are available for that base. (See the qualifying products for each base license below.)
3. Buy attach licenses for the same user at an attach license price. You may buy as many attach licenses as are available for that base license.

Reference: <https://go.microsoft.com/fwlink/p/?LinkId=866544> (Dynamics 365 Licensing Guide)

QUESTION 18

A company is implementing Dynamics 365 Finance. The company plans to use Business process modeler (BPM) tool to align their business processes with industry-standard processes.

You need to help the company get started using BPM.

Which prerequisite should the company install?

- A. A. Business events catalog
- B. Asset library
- C. American Productivity and Quality Center (APQC) membership
- D. Azure DevOps project

Correct Answer: D

Section:

Explanation:

Business process modeler (BPM) in Lifecycle Services (LCS), prerequisites To effectively use BPM, you must have Microsoft Office 2010 and a Microsoft Azure DevOps project.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/bpm-overview>

QUESTION 19

A company is implementing Dynamics 365 Finance. The company plans to implement a self-service environment.

The golden configuration and master data have been copied to the user acceptance testing (UAT) environment. The company is ready for a cutover.

You need to move the UAT configuration and master data to the production environment.

What should you do?

- A. Import the database from Lifecycle Services (LCS).

- B. Create a service request to move the sandbox environment to the production environment.
- C. Refresh the database from Lifecycle Services (LCS).
- D. Create a service request for the environment deployment.

Correct Answer: C

Section:

Explanation:

Perform master data migration

Now that the UAT environment is hydrated with the golden configuration, you can begin to migrate master data.

Self-service

In LCS, open the Full details for the production environment to load the Environment page.

In the Maintain menu, select Move database.

For the operations options, select Refresh database.

In the Source environment, select the sandbox where your golden configuration is. Note the important instructions found on the Refresh database page for this operation.

Select the check box to confirm that you understand this operation will overwrite the production database. The operation starts immediately after submitting the request.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/devitpro/database/dbmovement-scenario-goldenconfig#perform-master-data-migration>

QUESTION 20

A company uses a third-party enterprise resource management tool. The company plans to implement Dynamics 365 Finance.

You need to recommend a tool that reduces the learning curve for employees.

Which tool should you recommend?

- A. Microsoft Azure DevOps
- B. Task Recorder
- C. Regression suite automation tool
- D. Lifecycle Services

Correct Answer: D

Section:

Explanation:

Lifecycle Services (LCS) for Microsoft Dynamics is a collaboration portal that provides an environment and a set of regularly updated services that can help you manage the application lifecycle of your implementations of Finance and

Operations apps.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycleservices/lcs>

QUESTION 21

A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management.

The company's main priorities are uninterrupted factory and distribution center operations, master data management financial global reporting, and integration with analytics tools.

You need to design the infrastructure.

Solution: Implement the manufacturing factories' operations and distribution center operations onpremises and the center data repository in the cloud.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section:

QUESTION 22

A company is implementing a new Dynamics 365 cloud deployment. The stakeholders need to confirm that performance testing meets their expectations. The single-user test procure-to-pay scenario is complete. You need to successfully complete the multi-user load test. Which tool should you recommend?

- A. Microsoft Azure DevOps
- B. Microsoft Dynamics Lifecycle Services
- C. PerfSDK
- D. Visual Studio

Correct Answer: C

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/perfsdk-multi-usertesting>

QUESTION 23

A company currently using Dynamics AX 2009 plans to upgrade to Dynamics 365. You need to recommend a data migration tool to transfer critical data. Which two data migration tools should you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Microsoft Dynamics AX 2009 Data migration tool (DMT)
- B. Data upgrade
- C. Data Import/Export Framework (DIXF)
- D. Data Management Workspace

Correct Answer: C, D

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/migration-upgrade/ax2009-upgrade-export-package>

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/migration-upgrade/ax2009-upgrade-import-package>

QUESTION 24

A company uses Dynamics 365 Supply Chain Management and has two legal entities that distribute the same items. One of the legal entities uses advanced warehouse management. New items that are created must meet the business needs of both companies and allow for consolidated analytics. You need to recommend a master data management strategy to standardize the item master and meet the business requirements. What should you recommend?

- A. Create the product record and release to each company where setup variations are completed.
- B. Use Common Data Management to create the item templates for both legal entities.
- C. Create an item in each company with different item numbers.
- D. Use an advanced warehouse setup for the product and release to both companies.
- E. Create an item in each company with the same item number.

Correct Answer: B

Section:

QUESTION 25

You are planning to implement Dynamics 365 Finance.
Accountants in your organization need to be able to enter multiple lines into payment journals.
You need to recommend a tool for expediting data entry.
What should you recommend?

- A. Use the desktop version of Microsoft Excel to use the Excel Data Connector app.
- B. Use the Data migration tool.
- C. Use an aggregate data entity to expose data to the Microsoft Excel Data Connector app.
- D. Use Microsoft Excel online to use The Excel Data Connector app.

Correct Answer: A

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/office-integration/use-exceladd-in>

QUESTION 26

A company produces automotive components. The company uses Microsoft Excel to track the quantity of parts on hand. The company wants to automate processes to track inventory using Dynamics 365 Supply Chain Management. You need to ensure that the company can track supplies and determine when to purchase new inventory. Which two features should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Demand forecasting
- B. Master planning
- C. Purchase requisitions
- D. Purchase agreements
- E. Purchase policies

Correct Answer: A, B

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/master-planning/planningoptimization/demand-forecast>

QUESTION 27

A local art school is considering a new Dynamics 365 Finance cloud implementation.
The school needs to select a system authentication type.
Which two setup options does the implementation require? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Use a valid Azure Active Directory (Azure AD) account.
- B. Use a valid Active Directory account
- C. Use OAuth.
- D. Use assigned roles.
- E. Use an enabled Dynamics 365 Finance user.

Correct Answer: A, D

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/sysadmin/tasks/create-newusers>

QUESTION 28

A company has a Dynamics B65 Finance environment.

The company's architect is working with a developer to perform multi-user testing with the Performance SDK.

You need to ensure the environment is prepared to achieve the goal.

Which two prerequisites must be met? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Visual Studio 2019 Enterprise Edition
- B. Visual Studio 2015 Professional Edition
- C. Tier-2 Sandbox
- D. Tier-1 Sandbox

Correct Answer: A, C

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/perfsdk-multi-usertesting>

QUESTION 29

A company is using Dynamics 365 Finance.

You need to ensure that latest service updates from Microsoft are always installed in the production environment.

What should you recommend?

- A. Run the upgrade analysis tool.
- B. Run the code upgrade service to analyze the code.
- C. Request updates by using a service request.
- D. Run through the project onboarding checklist
- E. Configure continuous updates.

Correct Answer: E

Section:

Explanation:

Reference:

<https://blog.bhsolutions.com/upgrading-to-microsoft-d365/continuous-updates>

QUESTION 30

A travel agency is implementing Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The agency must validate and perform these tasks during each regression cycle.

- Purchase and sales processes
 - Payment gateway functionality to third-party integration
 - Vendor payment
 - Notifications
 - Chart control
 - Page refresh data consistency
- You need to determine which tasks can be performed using the Regression suite automation tool (RSAT). Which three tasks can be performed? Each Correct answer presents a complete

solution.

NOTE: Each correct selection is worth one point

- A. chart control
- B. notifications
- C. page refresh data consistency
- D. configure vendor payment settings
- E. purchase and sales processes

Correct Answer: B, C, E

Section:

QUESTION 31

A local bookstore plans to offer online ordering with in-store pickup by using a third-party ecommerce site.

Credit card authorizations are required for online sales.

You need to recommend options to ensure that customers who place online orders are not charged until the merchandise is picked up in the store.

What are three possible ways to achieve this goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Pass a credit card token from Dynamics 365 Retail POS to e-commerce.
- B. Pass sales data from e-commerce to Dynamics 365 Finance.
- C. Configure Dynamics 365 Finance and Dynamics 365 Retail.
- D. Replace e-commerce with a link to Dynamics 365 Retail POS so users can enter their own credit card data.
- E. Pass a credit card token from e-commerce to Dynamics 365 Retail POS.

Correct Answer: B, C, E

Section:

QUESTION 32

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is planning to implement Dynamics 365 Supply Chain Management with three locations.

Two locations must use United States currency (USD) as the default currency. The third location must use Canadian currency (CAD).

One US facility and the Canadian facility must use advanced warehouse functionality. The other US facility must use basic warehousing.

You need to configure the legal entity, site, and warehouse architecture to meet the requirements.

Solution: Create three legal entities, one for each facility.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

Section:

Explanation:

Default currency is configured per legal entity. Advanced warehouse is configured per warehouse.

QUESTION 33

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is planning to implement Dynamics 365 Supply Chain Management with three locations.

Two locations must use United States currency (USD) as the default currency. The third location must use Canadian currency (CAD).

One US facility and the Canadian facility must use advanced warehouse functionality. The other US facility must use basic warehousing.

You need to configure the legal entity, site, and warehouse architecture to meet the requirements.

Solution: Create two legal entities, one for advanced warehouse and one for basic warehouse.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Section:

Explanation:

You cannot have two default currencies in the same legal entity.

QUESTION 34

A manufacturing company uses Dynamics AX 2012 R3 for high-volume transactions. The company needs to upgrade to Dynamics 365 finance and operations apps.

You must establish performance metrics using a quantitative baseline in the Dynamics AX 2012 R3 environment by using the Microsoft Performance Benchmark Software Development toolkit (SDK).

You must use the latest and official version of the tool. Microsoft must provide the tool directly.

You need to launch Microsoft Performance Benchmark Software Development toolkit (SDK) for Dynamics AX 2012 R3 to establish Baseline.

Where should you navigate?

A. Lifecycle Services (LCS)

B. Azure DevOps Services

C. Microsoft PartnerSource

D. Microsoft AppSource

E. Microsoft Developer Network (MSDN)

Correct Answer: A

Section:

Explanation:

As of November, 2014, the Benchmark SDK has been moved. It is now available from the Downloadable tools section of Microsoft Dynamics Lifecycle Services.

Reference: <https://docs.microsoft.com/en-us/dynamicsax-2012/appuser-itpro/what-s-newperformance-benchmark-software-development-toolkit-sdk-for-microsoft-dynamics-ax-2012>

QUESTION 35

A company is implementing Dynamics 365 Finance. The company is in the FastTrack program.

User experience is a high priority for this implementation. The company wants to design the solution for ease of use, aesthetics, and consistency of experience.

You need to determine in which session user experiences are designed.

What is the appropriate session?

A. Project kickoff meeting

B. Implementation workshop

C. Go-live Readiness workshop

D. Solution Blueprint Review workshop

Correct Answer: B

Section:

Explanation:

The Implementation workshops includes User experience design:

Identify key goals and design elements the customer is leveraging to deliver an optimal user experience.

Agenda topics:

Ease of use – legacy system mapping

Ease of use – simplicity/efficiency

Aesthetics – ISV alignment

Aesthetics – corporate branding

Performance – speed

Consistency of experience Mandatory attendees are solution architects, functional leads, and technical leads. Recommended attendees include stakeholders from the customer and partner team

Reference: <https://docs.microsoft.com/en-us/dynamics365/fasttrack/success-by-design-overview>

QUESTION 36

A customer is preparing to upgrade to a new version of Dynamics 365 Finance.

Unit testing is required prior to the upgrade.

You need to recommend a testing tool for unit testing.

Which tool should you recommend?

- A. Regression suite automation tool
- B. Business process modeler
- C. SysTest
- D. Data task automation

Correct Answer: C

Section:

Explanation:

Use SysTest Framework to author unit/component test code.

SysTest framework is Unit Test framework in Dynamics 365 for Finance and Operations, Enterprise edition. SysTest framework was available in the earlier version as well, and it provides developers the ability to write unit test code for the business logic.

Reference: <https://www.oreilly.com/library/view/implementing-microsoftdynamics/9781787283336/772e7e5f-a600-426f-ace2-3b8f73bb0c70.xhtml>

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/testing-validation>

QUESTION 37

A company uses Dynamics 365 Finance. The company experiences performance issues with several forms in production.

You need to use Live View SQL performance metrics to identify potential issues that occur in real time.

You need to recommend a solution to troubleshoot performance issues.

Which two performance metrics should the company use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Blocking statements
- B. Batch requests
- C. Database File I/O
- D. Executing statements
- E. Executing indexes

Correct Answer: A, D

Section:

Explanation:

AD: Live View – Shows executing statements and blocking statements.

A: Sample flow Scenario: Users report slow performance when using the system. One issue could be a blocking statement. Blocking by itself is typical in a healthy system and is only a problem when it becomes excessive or starts degrading business activities.

Go to the Live View tab and check if there are any blocking statements. If there is a blocking statement, copy the blocking query ID.

Open the Queries tab and select the Current Blocking Tree query. This will return the root blocker that is blocking the SQL operation.

Etc.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycleservices/performance/troubleshooting>

QUESTION 38

DRAG DROP

A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. It must be accurately reported during a security audit.

You need to recommend how to implement the privileges.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Add the **CustCustomerMasterInquire** duty to the **ReadOnlyUserAR** role.
- Create a new security role named **ReadOnlyUserAR**.
- Add the **Customers** privilege to the **CustCustomerMasterInquire** duty.
- Add the custom role **ReadOnlyUserAR** to users.
- Create a custom duty named **CustomerViewList**.
- Add the **Customers** privilege to the **CustomerViewList** duty.
- Add the **CustomerViewList** duty to the **ReadOnlyUserAR** role.

Answer area

Empty answer area boxes for drag-and-drop.

Correct Answer:

Actions

- Add the **CustCustomerMasterInquire** duty to the **ReadOnlyUserAR** role.
-
- Add the **Customers** privilege to the **CustCustomerMasterInquire** duty.
-
-
-

Answer area

- Create a new security role named **ReadOnlyUserAR**.
- Create a custom duty named **CustomerViewList**.
- Add the **Customers** privilege to the **CustomerViewList** duty.
- Add the **CustomerViewList** duty to the **ReadOnlyUserAR** role.
- Add the custom role **ReadOnlyUserAR** to users.

QUESTION 39

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is planning to implement Dynamics 365 Supply Chain Management with three locations.

Two locations must use United States currency (USD) as the default currency. The third location must use Canadian currency (CAD).

One US facility and the Canadian facility must use advanced warehouse functionality. The other US facility must use basic warehousing.

You need to configure the legal entity, site, and warehouse architecture to meet the requirements.

Solution: Create two legal entities, one for the US facilities and one for the Canadian facility.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

Section:

Explanation:

Reference:

<https://stoneridgesoftware.com/warehouse-management-options-dynamics-365-operations/>

QUESTION 40

A company plans to apply updates to a Dynamics 365 Finance environment. The environment has custom code.

You need to determine the impact of updates to the custom code.

What is the impact?

- A. Updates are runtime backward compatible only.
- B. Updates are backward compatible from both a design time and runtime perspective.
- C. Updates are design-time backward compatible only.
- D. Updates are not backward compatible from either a design-time or runtime perspective.

Correct Answer: B

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycleservices/oneversion-isv>

QUESTION 41

A company is implementing Dynamics 365 Supply Chain Management for multiple legal entities.

Each legal entity will be rolled out in a phased approach over a 24-month period. Some customizations will be required.

You need to define how to test Microsoft's continuous updates throughout the implementation lifecycle.

What should you recommend?

- A. Use the SysTest Framework in a build or test environment.
- B. Use the Performance software development kit (Perf SDK) in a build or test environment.
- C. Use the SysTest Framework in a production environment.
- D. Use the Regression suite automation tool (RSAT) with DevOps in a build or test environment.

Correct Answer: D

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/rsat/rsat-overview>

QUESTION 42

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Create a non-unique index on a table.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycleservices/performancetroubleshooting>

QUESTION 43

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Disable and enable page locks and lock escalation.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycleservices/performancetroubleshooting>

QUESTION 44

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Check for blocked queries and high DTU.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/performance-troubleshooting>

QUESTION 45

A company implements Dynamics 365 Supply Chain Management.

The company uses a third-party analytics software solution for reporting. The solution requires permissions to ensure T-SQL code can access data.

The company must include Dynamics 365 Supply Chain Management data in the analytics software solution to display data in a single view with other data.

You need to identify the correct data analytics approach.

Which solution should you use?

- A. Dual-write
- B. Microsoft Dataverse
- C. Bring your own database (BYOD)
- D. Entity store
- E. Power BI

Correct Answer: C

Section:

QUESTION 46

A distribution company is evaluating license requirements for a Dynamics 365 Supply Chain Management cloud-based implementation. The warehouse must maximize uptime for running sales order waves to reduce latency and service interruptions. You need to determine a licensing strategy for the company. Which license type should you recommend?

- A. Loss Prevention
- B. Dynamics 365 Supply Chain Management base
- C. Dynamics 365 Supply Chain Management attach
- D. Account Protection
- E. Cloud Scale Unit

Correct Answer: E

Section:

Explanation:

Dynamics 365 Supply Chain Management, Warehouse execution with scale units in the cloud Business value Companies can execute mission-critical manufacturing processes at scale and build resilience into key warehouse processes.

Feature details With the Cloud Scale Unit Add-in for Dynamics 365 Supply Chain Management, warehouse resilience is accomplished by placing scale units at, or near, each warehouse. The scale units operate independently and allow the warehouses to remain operational during a connectivity failure, maintenance outage, and other events that might disrupt operations.

Reference: <https://docs.microsoft.com/en-us/dynamics365-release-plan/2021wave1/financeoperations/dynamics365-supply-chain-management/warehouse-execution-scale-units-cloud>

<https://cloudblogs.microsoft.com/dynamics365/bdm/2020/01/14/introducing-dynamics-365-account-protection-and-loss-prevention/>

QUESTION 47

A company uses out-of-the-box functionality in Dynamics 365 Supply Chain Management.

You identify a bug in the app.

You perform a Lifecycle Services (LCS) issue search. The search results show the bug. The status of the bug is resolved.

You need to implement the Microsoft-supported resolution into a development environment.

What should you do?

- A. Copy code changes for manual insertion into the SYS layer.
- B. Copy code changes for manual insertion into the VAR layer.
- C. Download a hotfix for installation into the VAR layer.
- D. Download a hotfix for installation into the SYS layer.

Correct Answer: B

Section:

QUESTION 48

A client plans to implement Dynamics 365 Finance.

The client is unsure whether to use a cloud-based or on-premises implementation.

For which scenario should the client install the on-premises version of the app?

- A. The client needs to comply with data sovereignty rules in a region where Microsoft Azure Data Centers are limited.
- B. The client wants direct access to production environments.
- C. The client has integrations that depend on direct Microsoft SQL access.
- D. The client already has a significant infrastructure investment.

Correct Answer: D

Section:

QUESTION 49

A company is upgrading their AX 2012 R3 environment to Dynamics 365 Finance. The company plans to upgrade the data store by using a phased approach. You need to define the strategy to migrate master data and opening balances.

Which tool should you recommend?

- A. Data upgrade tool
- B. Business process modeler
- C. Usage profiler
- D. Microsoft Dynamics AX Intelligent Data Management Framework

Correct Answer: A

Section:

Explanation:

QUESTION 50

You are a solution architect for a company that uses Dynamics 365 finance and operations apps. The company does not have a centralized reporting strategy. You create a solution design document. The out-of-the-box reports and workspaces do not meet the company's reporting needs. The company needs to use available Power BI dashboards to report against Dynamics 365 data. You need to recommend a data source to use for the Power BI reports-What should you recommend?

- A. Azure Data Lake database
- B. Microsoft Dataverse
- C. Transactional database
- D. Entity store database
- E. Bring your own database (BYOD)

Correct Answer: A

Section:

QUESTION 51

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Get table fragmentation details and index rebuild suggestions.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section:

Explanation:

Instead check for blocked queries and high DTU.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/performance-troubleshooting>

QUESTION 52

A company with multiple legal entities implements Dynamics 365 Finance.

You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create separate departments to manage functional areas.
- B. Create separate business units.
- C. Create separate cost centers to manage operations.
- D. Create separate value streams for item management.

Correct Answer: B, C

Section:

Explanation:

Operating units An operating unit is an organization that is used to divide the control of economic resources and operational processes in a business. People in an operating unit have a duty to maximize the use of scarce resources, improve processes, and account for their performance.

The operating units in finance and operations apps are:

(B) Business unit - A semi-autonomous operating unit that is created to meet strategic business objectives. It is used for financial reporting that is based on industries or product lines that the organization serves independently of legal entities.

(C) Cost center - An operating unit in which managers are accountable for budgeted and actual expenditures. It is used for the management and operational control of business processes that span legal entities.

Reference: <https://learn.microsoft.com/en-us/training/modules/plan-implement-legal-entities-finance-operations/4-org-hier-units>

QUESTION 53

A company is deploying a Microsoft Power Platform solution.

You need to grant access to the solution based on the following requirements:

- Users must be able to customize the environment.
- Users must be able to view rows only for the tables they create.

Which role should you assign?

- A. System Customizer
- B. Common Data Service User
- C. Environment Maker
- D. System Administrator

Correct Answer: A

Section:

Explanation:

The System Customizer:

Has full permission to customize the system.

Can only view rows for system tables that they create.

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/privilegesrequired-customization>

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

QUESTION 54

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is planning to implement Dynamics 365 Supply Chain Management with three locations.

Two locations must use United States currency (USD) as the default currency. The third location must use Canadian currency (CAD).

One US facility and the Canadian facility must use advanced warehouse functionality. The other US facility must use basic warehousing.

You need to configure the legal entity, site, and warehouse architecture to meet the requirements.

Solution: Create one legal entity and differentiate capabilities by warehouse.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section:

Explanation:

Instead create three legal entities, one for each facility.

Default currency is configured per legal entity. Advanced warehouse is configured per warehouse.

QUESTION 55

A company uses Dynamics 365 Finance.

Which environment or environments are eligible for continuous updates?

- A. All sandbox, development, and production environments are eligible for continuous updates.
- B. All sandbox environments and the production environment are eligible for continuous updates.
- C. Only the production environment and one sandbox environment are eligible for continuous updates.
- D. Only the production environment is eligible for continuous updates.

Correct Answer: B

Section:

Explanation:

Reference: <https://www.sikich.com/insight/dynamics-365-update-policy/>

QUESTION 56

A company with multiple legal entities implements Dynamics 365 Finance. The company does not want to purchase additional licensing or incur development costs.

The company's controller notes that vendors exist in multiple companies. The system does not apply and does not post payments to the correct company.

The controller notes that a company-specific report exists for vendor payment journals.

You must replace the single company-specific report with a global report that displays the vendor payment journal status across all companies in the organization for a single vendor.

You must minimize development and creation of new reports.

You need to identify a tool to create the report.

What should you recommend?

- A. Financial Reporter
- B. Electronic reporting tool
- C. View
- D. SQL Server Reporting Services (SSRS)
- E. Power BI

Correct Answer: A

Section:

Explanation:

Financial reporting for the application allows financial and business professionals to create, maintain, deploy, and view financial statements. It moves beyond traditional reporting constraints to help you efficiently design various types of reports.

Financial reporting includes dimension support. Therefore, account segments or dimensions are immediately available. No additional tools or configuration steps are required.

Reference: <https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/devitpro/analytics/financial-reporting-intro>

QUESTION 57

A company implements Dynamics 365 Commerce.

The company creates an integration to query customer loyalty points from Dynamics 365 Commerce by a third-party application.

The third-party application must manually retrieve loyalty points. The loyalty point totals must reflect the real-time amount.

You need to identify the correct integration technology.

Which technology should you use?

- A. Postman
- B. FTP
- C. Data packages
- D. Entity store
- E. OData

Correct Answer: E

Section:

Explanation:

OData

Odata is also a very simple and easy way to get access to Dynamics 365 F&O data.

Loyalty overview, Loyalty capabilities: In the 10.0 release, we introduced a data entity named Retail loyalty other activity type lines. This data entity enables the retailers to use either Data Import/Export Framework (DIXF) or OData API to record the activities that should award customers with loyalty points. The data entity stores the activities in a journal named Loyalty lines for other activities, which can be used for review and modification

purposes. After the data has been reviewed, the IT user can either manually post the activity lines or run a job named Process other activity type for loyalty lines, which will post all the unposted activity lines and award the points to the customers based on the earning rules.

In the above scenario, the event registration application would call OData API to send the customer information to Commerce. However, the IT user can post the activity lines for only those customers who attended the workshop and delete the activity lines for the other customers.

Reference: <https://learn.microsoft.com/en-us/dynamics365/commerce/set-up-customer-loyaltyprogram>

<https://learn.microsoft.com/en-us/dynamics365/commerce/dev-itpro/consume-retail-server-api>

QUESTION 58

A distribution company uses Dynamics 365 Supply Chain Management.

The company has one buyer group for paper products and another buyer group for chemicals. Each buyer group purchases from separate vendors.

The buyers print individual purchase order confirmations to PDF files and then send the PDF files to their desktop printer.

The company purchases two network printers. Each buyer group receives one printer.

Each buyer group must send PDF files to their own printer.

You need to configure Dynamics 365 Supply Chain Management to support the requirement.

Which two features should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Document Routing Agent
- B. Power Automate
- C. Print management
- D. Electronic reporting tool
- E. Power BI

Correct Answer: A, C

Section:

Explanation:

A: Install the Document Routing Agent to enable network printing.

The Document Routing Agent is a downloadable application that you can use to enable network printing scenarios. You can enable network printers for specific companies by using in-client administrative pages.

C: Print management is the framework in Dynamics 365 Finance and Operations that allows users to configure print settings for various business documents, including sending emails and archiving. Print management setups are typically separated by module and include nodes for all business documents that are available to be printed.

Reference: <https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/installdocument-routing-agent>

<https://dynamics-tips.com/print-management/>

<https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/bi-reportinghome-page>

QUESTION 59

A company uses Dynamics 365 Supply Chain Management.

The system has a slow response time when sales orders are entered.

You need to identify any blocking SQL statements.

Which Lifecycle Services (LCS) tool should you use?

- A. SQL Insights - Live View
- B. SQL Insights - Index Analysis
- C. Telemetry data monitoring
- D. Performance SDK

Correct Answer: A

Section:

Explanation:

All SQL performance tools in LCS are available under the SQL Insights tab on the Environment Monitoring page for a specific environment. The following tabs are available:

Live View – Shows executing statements and blocking statements. The current SQL Now page that shows performance issues will be replaced with Live View.

Index Analysis – Shows aggregated index and table information, based on user scans, user seeks, user updates, and row count. Like performance metrics, this tool shows the trend for the selected index along with additional table metrics.

This feature is not available in self-service environments.

Queries – Shows a list of predefined queries that can be used to retrieve metrics on demand.

Examples of queries include a current blocking tree, a list of active plan guides, and a list of most expensive queries.

Etc.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/performance-troubleshooting>

QUESTION 60

HOTSPOT

A United States-based company has a cloud-based Dynamics 365 Finance implementation. The company plans to open a new location in Mexico.

Electronic invoicing is mandated in Mexico.

You need to recommend a solution that meets Mexican localization reporting requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Action
Implement localization	Create a new cloud-based instance of Dynamics 365 Finance in Mexico.
	Select Mexico for the localized functionality region field.
	Select United States for the localized functionality region field.
	Create a new on-premises instance of Dynamics 365 Finance in Mexico.
Configure company	Create a new legal entity with MEX as the country code.
	Create a new site in the existing legal entity with an address in Mexico.
	Create a new warehouse in the existing legal entity with an address in Mexico.
	Copy the current legal entity into a new legal entity and change the site address to Mexico.
Identify gaps	Identify the reporting format requirement and analyze Dynamics 365 for supporting functionality.
	Recommend using current reporting methods.
	Recommend using out-of-the-box sales invoice report and send in the required format.
	Identify fields in the localization that are relevant and remove the rest to simplify the report.

Answer Area:

Answer Area**Requirement****Action**

Implement localization

- Create a new cloud-based instance of Dynamics 365 Finance in Mexico.
- Select Mexico for the localized functionality region field.
- Select United States for the localized functionality region field.
- Create a new on-premises instance of Dynamics 365 Finance in Mexico.

Configure company

- Create a new legal entity with MEX as the country code.
- Create a new site in the existing legal entity with an address in Mexico.
- Create a new warehouse in the existing legal entity with an address in Mexico.
- Copy the current legal entity into a new legal entity and change the site address to Mexico.

Identify gaps

- Identify the reporting format requirement and analyze Dynamics 365 for supporting functionality.
- Recommend using current reporting methods.
- Recommend using out-of-the-box sales invoice report and send in the required format.
- Identify fields in the localization that are relevant and remove the rest to simplify the report.

Section:**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/dynamics365/finance/localizations/latam-mex-cfdi-electronic-invoices>

QUESTION 61**HOTSPOT**

A company is determining which reporting tools to use as part of a Dynamics 365 Finance implementation.

Scenario A: Power users must use a free form tool to allow other power users to leverage transactional data to be consumed externally.

Scenario B: Developers must use a modeling tool to allow all users to leverage aggregated data to be consumed internally.

Scenario C: Developers must use a free form tool to allow all users to leverage transactional and aggregated data to be consumed internally and externally.

Scenario D: Power users must use a free form tool to allow all users to leverage aggregated data to be consumed internally and externally.

Scenario E: Power users must use a modeling tool to allow other power users to leverage transactional data to be consumed externally.

You need to recommend which tool should be used for each scenario.

Which tool should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area	
Scenario	Reporting Tool
A	<input type="text"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter
B	<input type="text"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter
C	<input checked="" type="checkbox"/> <input type="text"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter
D	<input type="text"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter
E	<input type="text"/> ▼ Microsoft Excel Embedded BI SSRS report Power BI Management reporter

Answer Area:

Answer Area	
Scenario	Reporting Tool
A	<div style="border: 1px solid black; padding: 2px;"> <div style="border-bottom: 1px solid black; padding: 2px;">Microsoft Excel</div> <div style="border-bottom: 1px solid black; padding: 2px;">Embedded BI</div> <div style="border-bottom: 1px solid black; padding: 2px;">SSRS report</div> <div style="border-bottom: 1px solid black; padding: 2px;">Power BI</div> <div style="padding: 2px;">Management reporter</div> </div>

QUESTION 62

DRAG DROP

You need to determine user licensing options for Dynamics 365 Finance + Operations (on-premises).

Which type of license should you recommend? To answer, drag the appropriate licenses to the correct users. Each license may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Licenses

- Device user
- Team member
- Enterprise user
- Name user

Answer Area

User

- Warehouse employee using scanners to count inventory
- Company controller
- Worker entering expenses only

License

- License
- License
- License

Correct Answer:

Licenses

-
-
-
- Name user

Answer Area

User

- Warehouse employee using scanners to count inventory
- Company controller
- Worker entering expenses only

License

- Device user
- Enterprise user
- Team member

Explanation:

QUESTION 63

DRAG DROP

A customer is planning to migrate to Dynamics 365 Finance.

You need to recommend a cloud or on-premises solution based on the customer's business requirements.

Which deployment type should you recommend? To answer, drag the appropriate deployment types to the correct requirements. Each deployment type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Deployment types

- On-premises only
- Cloud only
- Cloud or on-premises

Answer Area

Requirement

- Vendor collaboration
- Office integration
- Warehousing Power BI reports

Deployment type

- Deployment type
- Deployment type
- Deployment type

Correct Answer:

Deployment types

- On-premises only
- Cloud only
- Cloud or on-premises

Answer Area

Requirement

- Vendor collaboration
- Office integration
- Warehousing Power BI reports

Deployment type

- Cloud only
- Cloud or on-premises
- Cloud only

Section:

Explanation:

QUESTION 64

DRAG DROP

A winery is considering using Dynamics 365 Finance to implement a large-scale ERP application and needs to understand the differences between cloud-based and on-premises deployments.

You need to recommend deployment options for the company.

What should you recommend? To answer, drag the appropriate deployment types to the correct features. Each deployment type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Deployment types

- Cloud only
- On-premises only
- Both cloud and on-premises

Answer Area

Feature

- General journals
- Sales orders
- Lifecycle Services monitoring
- Document Routing Agent

Deployment type

- Deployment type
- Deployment type
- Deployment type
- Deployment type

Correct Answer:

Deployment types

- Cloud only
- On-premises only
- Both cloud and on-premises

Answer Area

Feature

- General journals
- Sales orders
- Lifecycle Services monitoring
- Document Routing Agent

Deployment type

- Both cloud and on-premises
- Both cloud and on-premises
- Both cloud and on-premises
- Cloud only

Explanation:

QUESTION 65

DRAG DROP

A company plans to implement Dynamics 365 Supply Chain Management.

The company has the following requirements:

Use mobile devices for warehouse activities including cycle counting.

Set up automatic cycle counting work IDs and assign the IDs to workers.

Ensure that workers can group work IDs that are specific to a particular location, zone, or work pool.

Ensure that workers can specify a cycle counting work ID that has a status of Open.

Ensure that workers can count items in a warehouse location at any time.

You need to recommend cycle counting options that meet the company's requirements.

What should you recommend? To answer, drag the appropriate counting options to the correct requirements. Each counting option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Cycle count options

- User directed
- System directed
- Cycle count grouping
- Spot cycle count

Answer Area

Requirement

- Specify a cycle counting work ID that has a status of **Open**.
- Automatically assign a cycle counting work ID to a worker.
- Group work IDs that are specific to a particular location, zone, or work pool.
- Count items in a warehouse location at any time.

Cycle count option

- Cycle count option
- Cycle count option
- Cycle count option
- Cycle count option

Correct Answer:

Cycle count options

-
-
-
-

Answer Area

Requirement

- Specify a cycle counting work ID that has a status of **Open**.
- Automatically assign a cycle counting work ID to a worker.
- Group work IDs that are specific to a particular location, zone, or work pool.
- Count items in a warehouse location at any time.

Cycle count option

- User directed
- System directed
- Cycle count grouping
- Spot cycle count

QUESTION 66

DRAG DROP

A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).

Development environments must be licensed for the duration of the implementation.

You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements.

Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Solutions	Answer Area
Azure Subscription Environment	
Enterprise Agreement (EA)	
Server and Cloud Enrollment (SCE)	

Requirement	Solution
Determine environment licensing.	Solution
Manage development environment costs.	Solution

Correct Answer:

Solutions	Answer Area
Enterprise Agreement (EA)	

Requirement	Solution
Determine environment licensing.	Server and Cloud Enrollment (SCE)
Manage development environment costs.	Azure Subscription Environment

Section:

Explanation:

Box 1: Server and Cloud Enrollment (SCE) The Server and Cloud Enrollment (SCE) is a licensing vehicle under the Microsoft Enterprise Agreement that enables organizations to standardize on one or more Microsoft Server and Cloud technologies.

To enroll, an installed base-wide commitment, or monetary commitment in the case of Azure, is required to one or more of the following four SCE components:

- Core Infrastructure
- Application Platform
- Developer Platform
- Microsoft Azure

Enrolling in SCE requires the following:

- Enterprise Agreement: Although you need to sign an Enterprise Agreement, an Enterprise Enrollment for Desktop is not needed to qualify.
- Annuity coverage: 100 percent Software Assurance or Subscription coverage is required on your install base for each product family that you commit to. This includes those licenses that were not covered by Software Assurance when you entered the program.

Box 2: Azure Subscription Environment

Reference: <https://www.microsoft.com/licensing/docs/view/Enterprise-Agreement-EA-EAS-SCE>

QUESTION 67

HOTSPOT

A company uses Dynamics 365 Supply Chain Management.

A user reports an error on a transaction in the production environment that occurred 30 days ago.

You need to move the current data from the production environment to the sandbox environment to troubleshoot the transaction error. You must back up the sandbox environment before you copy data to the production environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Action				
Back up the current sandbox environment data.	<table border="1"><tr><td>Export database</td></tr><tr><td>Import database</td></tr><tr><td>Point-in-time restore</td></tr><tr><td>Refresh database</td></tr></table>	Export database	Import database	Point-in-time restore	Refresh database
Export database					
Import database					
Point-in-time restore					
Refresh database					
Move data from the production environment to the sandbox environment.	<table border="1"><tr><td>Point-in-time restore</td></tr><tr><td>Refresh database</td></tr><tr><td>Rollback</td></tr></table>	Point-in-time restore	Refresh database	Rollback	
Point-in-time restore					
Refresh database					
Rollback					

Answer Area:

Requirement	Action				
Back up the current sandbox environment data.	<table border="1"><tr><td>Export database</td></tr><tr><td>Import database</td></tr><tr><td>Point-in-time restore</td></tr><tr><td>Refresh database</td></tr></table>	Export database	Import database	Point-in-time restore	Refresh database
Export database					
Import database					
Point-in-time restore					
Refresh database					
Move data from the production environment to the sandbox environment.	<table border="1"><tr><td>Point-in-time restore</td></tr><tr><td>Refresh database</td></tr><tr><td>Rollback</td></tr></table>	Point-in-time restore	Refresh database	Rollback	
Point-in-time restore					
Refresh database					
Rollback					

Section:

Explanation:

Box 1: Export database

Export a database

Dynamics Lifecycle Services (LCS) to export a database from a sandbox user acceptance testing (UAT) environment to the Asset library.

After the export operation completes successfully, sign out of the servicing operation on your Environment details page. You can then see the asset in your Asset Library in the Database backups section.

The .bacpac files are stored here and can be manually downloaded to your Tier 1 developer environments for import.

Box 2: Refresh database

Refresh database You can use Microsoft Dynamics Lifecycle Services (LCS) to perform a refresh of the database to a sandbox user acceptance testing (UAT) environment. A database refresh lets you copy the transactional and financial reporting databases of your production environment into the target, sandbox UAT environment. If you have another sandbox environment, you can also copy the databases from that environment to your target, sandbox UAT environment.

Reference: <https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/database/exportdatabase>

<https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/database/database-refresh>

QUESTION 68

HOTSPOT

A company is implementing Dynamics 365 Supply Chain Management. The company is enrolled in the FastTrack program.

A project manager who is building a project plan needs to know which workshops discuss specific topics.

You need to identify the workshops in which each topic discussed. Which workshop is used for each topic? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Topic	Workshop
Business process	<input type="text" value="Business process"/> ▼ Go-live Readiness Implementation Solution Blueprint Review
Integration	<input type="text" value="Integration"/> ▼ Go-live Readiness Solution Blueprint Review
Cutover	<input type="text" value="Cutover"/> ▼ Go-live Readiness Implementation Solution Blueprint Review

Answer Area:

Topic	Workshop
Business process	<ul style="list-style-type: none"> Go-live Readiness Implementation Solution Blueprint Review
Integration	<ul style="list-style-type: none"> Go-live Readiness Solution Blueprint Review
Cutover	<ul style="list-style-type: none"> Go-live Readiness Implementation Solution Blueprint Review

 Vdumps

Section:

Explanation:

Box 1: Solution Blueprint Review

A Solution Blueprint Review workshop serves as the starting point of Success by Design.

The Solution Blueprint Review workshop covers the following topics:

Program strategy

Application strategy

Data strategy

Integration strategy

Test strategy

*-> Business process strategy

Security strategy

Application lifecycle management strategy

Environment and capacity strategy

Intelligence strategy

Box 2: Go-live Readiness

The Go-live Readiness workshop is designed to help guarantee a successful go-live for Dynamics 365 projects.

Here are some of the topics the workshop is likely to cover:

Confirmation of the go-live date and scope

Solution acceptance and user training

Performance

*-> Integrations

Code management

Configuration management
Review of blocking issues
Cutover plan and final data migration
Risk and mitigation review
Customer go/no-go criteria
Support process and hyper-care plan
Box 3: Implementation
Cutover is part of Implementation.

Note: Cutover strategy Ensure that the cutover strategy provides a good approach and plan to deliver a well-defined, welltested, reliable, and safe transition from current systems to the new production systems.

Agenda topics:

Cutover vision and strategy

Cutover project plan

Go-live cutover plan

Post go-live plan Mandatory attendees are cutover lead, solution architect, data migration lead, and project manager roles. Recommended attendees include stakeholders from the customer and partner teams.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fasttrack/solution-workshops>

<https://docs.microsoft.com/en-us/dynamics365/fasttrack/go-live-workshops>

<https://docs.microsoft.com/en-us/dynamics365/fasttrack/implementation-workshops#cutoverstrategy>

QUESTION 69

HOTSPOT

A company is implementing Dynamics 365 Finance. The company has an adjusted annual revenue to one million U.S. dollars. The company engages with the FastTrack program.

You need to advise on workshop content to aid their implementation.

Which workshop covers each implementation element? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Implementation element	Workshop
Security model design	<ul style="list-style-type: none">Go-live ReadinessImplementationProject Kick-off
Application lifestyle management strategy	<ul style="list-style-type: none">Go-live ReadinessProject Kick-offSolution Blueprint Review

Answer Area:

Implementation element	Workshop
Security model design	<div style="border: 1px solid gray; padding: 2px;">▼</div> <div style="border: 1px solid gray; padding: 2px;">Go-live Readiness</div> <div style="border: 1px solid gray; padding: 2px; background-color: #e0ffe0;">Implementation</div> <div style="border: 1px solid gray; padding: 2px;">Project Kick-off</div>
Application lifestyle management strategy	<div style="border: 1px solid gray; padding: 2px;">▼</div> <div style="border: 1px solid gray; padding: 2px;">Go-live Readiness</div> <div style="border: 1px solid gray; padding: 2px;">Project Kick-off</div> <div style="border: 1px solid gray; padding: 2px; background-color: #e0ffe0;">Solution Blueprint Review</div>

Section:

Explanation:

Box 1: Implementation

Implementation workshops provide timely guidance across the functional, technical, and implementation aspects of the solution. This includes:

Data migration strategy

Security model design

Etc.

Box 2: Solution Blueprint Review

The Solution Blueprint Review workshop covers the following topics:

Program strategy

Application strategy

Data strategy

Integration strategy

Test strategy

Business process strategy

Security strategy

* -> Application lifecycle management strategy

Environment and capacity strategy

Intelligence strategy Note: A Solution Blueprint Review workshop serves as the starting point of Success by Design. It is a mandatory workshop that sets the stage for the FastTrack engagement and provides a baseline to plan other Success by Design activities and workshops. The primary purpose of this workshop is to ensure that the fundamentals for project success are in place and the overall solution design approach is sound and aligned to the product best practices and direction.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fasttrack/implementation-workshops>

<https://docs.microsoft.com/en-us/dynamics365/fasttrack/solution-workshops>

QUESTION 70

HOTSPOT

The company uses Lifecycle Services (LCS) environment monitoring tools to assess the health of their production environment.

The environment administrator must be able to do the following:

- View tasks performed during a browser session.
- Verify that interactive users are not connecting to servers allocated for batch jobs.

You need to determine which environment monitoring tools meet the requirements.
 Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Tool
View tasks performed during a browser session.	<input type="checkbox"/> Activity load <input type="checkbox"/> User activity <input type="checkbox"/> User load
Verify that interactive users are not connecting to servers allocated for batch jobs.	<input type="checkbox"/> SQL insights <input type="checkbox"/> User activity <input type="checkbox"/> User load

Answer Area:

Requirement	Tool
View tasks performed during a browser session.	<input type="checkbox"/> Activity load <input checked="" type="checkbox"/> User activity <input type="checkbox"/> User load
Verify that interactive users are not connecting to servers allocated for batch jobs.	<input type="checkbox"/> SQL insights <input type="checkbox"/> User activity <input checked="" type="checkbox"/> User load

Section:

Explanation:

Box 1: User activity

The User activity grid shows the various activities that users performed, based on their session timestamp.

Box 2: User Load

The User load section shows all the system users. Each chart shows the time that the user spent on a specific machine.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/monitoring-diagnostics>

QUESTION 71

HOTSPOT

A company is evaluating licensing for Dynamics 365 Finance.

The company requires expense management functionality that enables expense reports to be submitted by various users. Expense approvals will be a back-office function.

You need to determine the license type for each role.

Which license types are required? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Role	License type
Expense creator	<input type="checkbox"/> Device <input type="checkbox"/> Dynamics 365 Finance <input type="checkbox"/> Team Member
Expense approver	<input type="checkbox"/> Dynamics 365 Finance <input type="checkbox"/> Dynamics 365 Project Operations <input type="checkbox"/> Dynamics 365 Supply Chain Management

Answer Area:

Role	License type
Expense creator	<input checked="" type="checkbox"/> Device <input checked="" type="checkbox"/> Dynamics 365 Finance <input type="checkbox"/> Team Member
Expense approver	<input checked="" type="checkbox"/> Dynamics 365 Finance <input type="checkbox"/> Dynamics 365 Project Operations <input type="checkbox"/> Dynamics 365 Supply Chain Management

Section:

Explanation:

QUESTION 72

HOTSPOT

You are a solution architect that implements Dynamics 365 finance and operations apps.

An advanced scenario in master planning includes a product bug.

You need to create a modification to avoid the scenario with the product bug, but Microsoft has not created the required extension capabilities.

You need to recommend a solution to log the product bug and request the extension capabilities.

Which tools should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Action	Tool
Open support ticket.	<input type="checkbox"/> Lifecycle Services (LCS) <input type="checkbox"/> FastTrack <input type="checkbox"/> Azure DevOps <input type="checkbox"/> Dynamics 365 Application Ideas
Request extension capabilities.	<input type="checkbox"/> Lifecycle Services (LCS) <input type="checkbox"/> FastTrack <input type="checkbox"/> Azure DevOps <input type="checkbox"/> Dynamics 365 Application Ideas

Answer Area:

Action	Tool
Open support ticket.	<div style="border: 1px solid #ccc; padding: 5px;"> <div style="text-align: right; font-size: 0.8em;">▼</div> <div style="background-color: #e6f2ff; padding: 2px;">Lifecycle Services (LCS)</div> <div style="padding: 2px;">FastTrack</div> <div style="padding: 2px;">Azure DevOps</div> <div style="padding: 2px;">Dynamics 365 Application Ideas</div> </div>
Request extension capabilities.	<div style="border: 1px solid #ccc; padding: 5px;"> <div style="text-align: right; font-size: 0.8em;">▼</div> <div style="background-color: #e6f2ff; padding: 2px;">Lifecycle Services (LCS)</div> <div style="padding: 2px;">FastTrack</div> <div style="padding: 2px;">Azure DevOps</div> <div style="padding: 2px;">Dynamics 365 Application Ideas</div> </div>

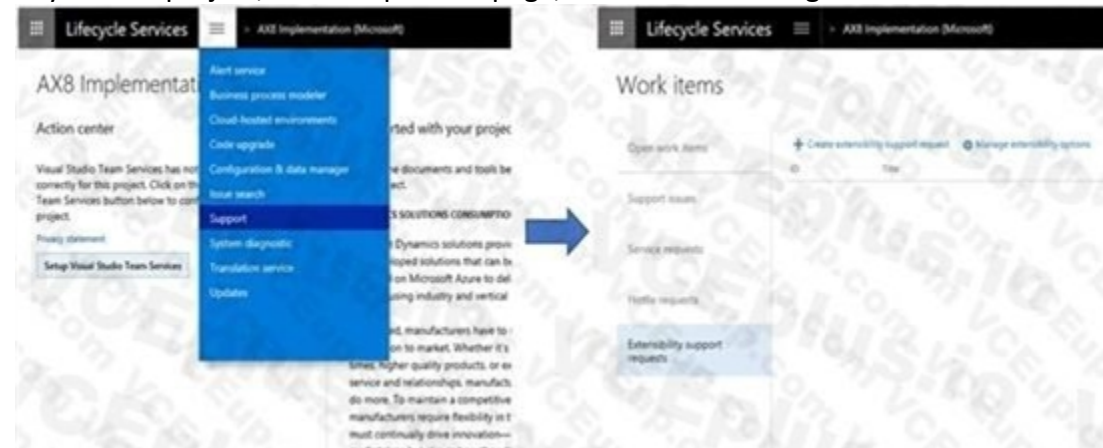

Section:

Explanation:

Box 1: Lifecycle Services (LCS) To open a support ticket with the Microsoft Support team, in LCS, the Support tile opens a tool that helps you manage support incidents. To submit issues directly to Microsoft, select the Support tile in your LCS project.

Box 2: Lifecycle Services (LCS) Extensibility requests are logged using a specific project in LCS. Logged requests are collected under that same project. We recommend that you log related requests under the same LCS project as this helps maintain a holistic view on all requests for a specific solution or an implementation. Microsoft then further identifies logged requests by the organization name that is associated with the LCS account.

In your LCS project, at the top of the page, select the hamburger icon and then click Support menu item.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycleservices/lcs-support>
<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/extensibility/extensibilityrequests>

QUESTION 73

A company implements Dynamics 365 Finance to replace a legacy enterprise resource planning (ERP) system. A proprietary customer relationship management (CRM) system must be integrated with Dynamics 365 Commerce. The integration must be asynchronous. You need to use a tool to integrate the CRM system. Which tool should you recommend?

- A. Data Integrator
- B. Batch data API

- C. Data
- D. Dual-write

Correct Answer: B

Section:

QUESTION 74

A Dynamics 365 user is enrolled in the FastTrack program. The user begins the Success by Design framework and is in the first phase of workshops. You need to plan the subsequent phases.

What are the three remaining phases? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Operate
- B. Implement
- C. Prepare
- D. Solution Blueprint Review
- E. Initiate

Correct Answer: A, B, C

Section:

QUESTION 75

HOTSPOT

An asset management company is implementing Dynamics 365 Finance. The company is eligible for and has enrolled in the FastTrack program. Business users and consultants want to prepare for each FastTrack workshop.

You need to identify when each requirement will be discussed.

Which workshop should you select for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point. Answer:

Hot Area:

Answer Area

Requirement	Workshop
Ensure that only company-managed devices can access the system.	Security model design
Incorporate Power Platform elements as part of the solution.	Test strategy

QUESTION 76

DRAG DROP

A company is implementing Dynamics 365 Supply Chain Management

You have two test scenarios. Both scenarios have the same functional steps. The outputs for the scenarios can differ based on the values entered for parameters.

You need to create a single derived test case in the Regression suite automation tool (RSAT).

Which test case type should you use? To answer, drag the appropriate test case types to the correct actions. Each test case type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Test case types	Answer Area
RSAT chain	
DevOps child	
DevOps parent	

Action	Test case type
Attach a task recording.	
Attach a Microsoft Excel parameters file.	

Correct Answer:

Test case types	Answer Area
RSAT chain	

Action	Test case type
Attach a task recording.	DevOps parent
Attach a Microsoft Excel parameters file.	DevOps child

Section:

Explanation:

QUESTION 77

A company uses Dynamics 365 Finance. The company has several integrations with Dynamics 365 Finance that use REST web services.

You must perform unit testing on the web services before you promote the web services to the main build environment.

You need to recommend solutions to manually unit test the web services.

Which two tools should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Soap UI
- B. Dynamics 365 task recordings
- C. Postman
- D. Azure DevOps
- E. Regression suite automation testing (RSAT)

Correct Answer: A, C

Section:

QUESTION 78

A company has identified a bug in Dynamics 365 Supply Chain Management
The bug has been found in the Lifecycle Services (LCS) Issue search tool with an open status and no hotfix attached.
You need to determine how the company should respond to this situation.
What should you recommend?

- A. Update to the latest platform version.
- B. Enter a support ticket
- C. Pause updates

Correct Answer: B
Section:

QUESTION 79

A company is planning a Dynamics 365 Supply Chain Management implementation. The existing system will be shut down after go-live of the new enterprise resource planning (ERP) system. The company requires that all transactional and master data from the existing ERP be stored in a single location. The company also requires that the master data connect to Dynamics 365 Supply Chain Management for updates throughout the lifecycle of the implementation and at go-live. You need to determine which tool meets the requirements. Which tool should you select?

- A. Azure Data Lake
- B. GitHub Repository
- C. Data Management Framework (DMF)
- D. Microsoft Supply Chain Center
- E. Lifecycle Services (LCS)

Correct Answer: C
Section:

QUESTION 80

A company implements Dynamics 365 Finance.
The company must view data from Dynamics 365 Finance in an Excel document. The data must refresh every time a user opens the Excel file.
You need to identify the feature the user should use to open the Excel document.
Which feature should you recommend?

- A. List Page
- B. SQL Server Reporting Services (SSRS) report
- C. Mobile workspace
- D. Workspace

Correct Answer: D
Section:

QUESTION 81

A company implements a Microsoft Power Platform solution
The company must be able to merge all newly created hotfixes to the existing solution and generate a new version. Components that are not included in the new version must be deleted.
You need to recommend an action that meets the requirements.
Which action should you recommend?

- A. Update
- B. Create
- C. Upgrade
- D. Patch

Correct Answer: C

Section:

QUESTION 82

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is implementing Dynamics 365 Finance. The company uses Microsoft 365 apps. The company wants to integrate Microsoft Word and Excel into Dynamics 365 Finance. You need to identify the underlying technology that is required.

Solution: Lifecycle Services (LCS)

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section:

QUESTION 83

A company with multiple legal entities implements Dynamics 365 Finance.

The company's financial controller needs a single global report that displays vendor aging across all companies.

The report must meet the following requirements:

* Leverage standard functionality as much as possible.

* Minimize development time.

* Minimize configuration time.

You must identify a tool to create the report. Which tool should you use?

- A. Business document management
- B. SQL Server Reporting Services (SSRS)
- C. Financial Reporter
- D. Electronic reporting tool

Correct Answer: D

Section:

QUESTION 84

A distribution company plans to implement Dynamics 365 Supply Chain Management.

The company wants to understand how licensing works for users and devices.

You need to recommend licensing solutions to the company.

What should you recommend?

- A. Assign either a device license or a user license for the device.
- B. Assign a device license to a user.

- C. Assign both a device license and a user license to the device.
- D. Assign a user to the device

Correct Answer: A

Section:

QUESTION 85

DRAG DROP

A company is implementing Dynamics 365 Supply Chain Management. The company is enrolled in the FastTrack program.

You need to determine when specific tasks occur within the Success by Design framework.

In which stage does each task take place? To answer, drag the appropriate stages to the correct tasks. Each stage may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Stages

- Initiate
- Implement
- Prepare
- Operate

Answer Area

Task	Stage
Assess implementation partner readiness.	
Assess system and operational readiness for go-live.	

Correct Answer:

Stages

-
- Implement
-
- Operate

Answer Area

Task	Stage
Assess implementation partner readiness.	Initiate
Assess system and operational readiness for go-live.	Prepare

QUESTION 88

A utility company has the financial users. Two of the users need access to supply chain functionality. You need to provide a licensing strategy for the utility company. Which two licensing options should you recommend? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Purchase 18 Dynamics 365 Finance base licenses.
- B. Purchase 18 Dynamics 365 Finance attach licenses.
- C. Purchase two Dynamics 365 Supply Chain Management attach licenses.
- D. Purchase two Dynamics 365 Supply Chain Management base licenses.
- E. Purchase 20 Dynamics 365 Finance base licenses.

Correct Answer: A, C

Section:

QUESTION 89

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. A company is implementing Dynamics 365 Finance. The company uses Microsoft 365 apps. The company wants to integrate Microsoft Word and Excel into Dynamics 365 Finance. You need to identify the underlying

technology that is required.

Solution: Microsoft Entra ID.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

Section:

QUESTION 90

DRAG DROP

A company implements Dynamics 365 Finance in a self-service environment. The company plans to deploy code changes to the production environment.

You need to recommend methods to deploy the changes.

What should you recommend? To answer, drag the appropriate deployment methods to the correct code types of changes. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE Each correct selection is worth one point.

Select and Place:

Types of changes

All-in-one deployable package

Binary package

Data package

Standard deployable package

Answer Area

Type of change

Deploy a custom fix for an independent software vendor (ISV) solution.

Deploy Dynamics 365 updates that were downloaded from Lifecycle Services (LCS).

Deployment method

Correct Answer:

Types of changes

Data package

Standard deployable package

Answer Area

Type of change

Deploy a custom fix for an independent software vendor (ISV) solution.

Deploy Dynamics 365 updates that were downloaded from Lifecycle Services (LCS).

QUESTION 114

A company implements Dynamics 365 Finance.

The company needs to create balance statements for customers by using a SQL Server Reporting Services (SSRS) report. The report must contain custom branding that users can choose through print management capabilities. The branding must be created by a user that does not have the ability to access a Microsoft Visual Studio environment. You need to recommend a solution. What should you recommend?

- A. Financial report designer
- B. SSRS Report Designer
- C. Document templates
- D. Modern report design templates
- E. Electronic reporting

Correct Answer: C

Section:

QUESTION 115

A company creates a canvas app in a development environment.

The technical team wants to move the app from the development environment to a test environment. You need to provide a recommendation. What should you propose?

- A. Export and import a patch.
- B. Use a configuration migration tool.
- C. Export and import a managed solution.
- D. Use a package deployer.

Correct Answer: C

Section:

QUESTION 116

A company is implementing Dynamics 365 Finance.

The company needs to streamline the customer collections specialist's daily activities with the application.

The daily activities must consist of the following actions which must be performed in a single location:

* View specific metrics in a dashboard about invoice aging and revenue to date by using graphics.

* View all invoices past due for 15, 30, 60, and 90 days in separate grids.

* Navigate to the past due invoices directly when selecting the invoice records.

You need to identify the feature that meets the requirements. What should you select?

- A. Forms
- B. Form personalization
- C. Power BI dashboard
- D. Workspaces
- E. Electronic reporting

Correct Answer: B

Section:

QUESTION 117

DRAG DROP

A company uses Dynamics 365 finance and operations apps. The company creates its performance monitoring strategy.

The implementation has complex modifications and data intensive processes that create deadlocks.

You need to recommend tools for the company to use to monitor performance.

Which tools should you recommend? To answer, drag the appropriate tools to the correct

performance questions. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Security diagnostics tool

Form information form

Section:**Explanation:****QUESTION 121**

A company uses the vendor collaboration functionality within Dynamics 365 Supply Chain Management.

You must grant an external vendor permission to collaborate with the company. The system must send the vendor an invitation email. Emails must be sent to work email addresses only.

You need to configure user access

Which two actions should you perform? Each correct answer presents part of the solution

NOTE Each correct selection is worth one point.

- A. Create a new Azure Active Directory tenant
- B. Set up separation of duties
- C. Provision a vendor user.
- D. Assign user roles.

Correct Answer: C, D

Section:**QUESTION 122**

A company is implementing Dynamics 365 Finance and discussing solutions for data analytics. The company has the following business requirements:

* Use data from external sources in addition to Dynamics 365 finance data.

* Collect data from devices for reporting.

* Continuously export data from Dynamics 36S without user intervention.

You need to recommend a solution.

What should you recommend?

- A. Power BI
- B. Bring your own database (BVOO)
- C. Azure Data lake
- D. Entity store

Correct Answer: D

Section:

QUESTION 123

DRAG DROP

A company is implementing Dynamics 365 Supply Chain Management. The company is planning load testing.

The implementation team reports that performance is slow when sales orders are confirmed.

You need to evaluate load testing by using the Performance SDK tool.

Which types of load tests can you perform? To answer, drag the appropriate load test types to the correct components. Each load test type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Load test types

- Multi-user only
- Single user only
- Single user and multi-user

Answer Area

QUESTION 125

DRAG DROP

A company is implementing Dynamics 365 Supply Chain Management. A user reports a bug in the test environment.

You need to determine whether anyone has reported the bug to Microsoft.

Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- Issue search
- Active issues
- Submit incident
- Severity A support

Answer Area

Requirement

Determine if the bug was reported by a user within your Lifecycle Services (LCS) projects.

Determine if the bug was reported by a user outside of your Lifecycle Services (LCS) projects.

Tool

Correct Answer:

Tools	Requirement	Tool
<input type="text"/>	Determine if the bug was reported by a user within your Lifecycle Services (LCS) projects.	<input type="text" value="Active issues"/>
<input type="text"/>	Determine if the bug was reported by a user outside of your Lifecycle Services (LCS) projects.	<input type="text" value="Issue search"/>

QUESTION 126

A company is upgrading its existing operational software to an enterprise resource planning (ERP) system and is evaluating Dynamics 365 Finance. The company is setup with the following:

- * One parent company based in the US and three fully owned subsidiaries that use US dollars (USD) for the accounting currency.
- * Two partially owned subsidiaries that use Canadian dollars (CAD) for the accounting currency.
- * Distribution facilities in both Canada and the US.
- * Project managers travel to customer locations.
- * Intercompany sales are transacted between the US subsidiaries.
- * E-commerce business-to-business (B2B) sales.
- * A call center that receives customer orders.

The company has the following requirements:

- * Must provide an asset maintenance capability.
- * Must provide a purchase requisition approval process.
- * Must provide an invoice approval process.

You need to identify which functional component of Dynamics 365 Finance to implement.

Which functional component should you use?

- A. Call center sales
- B. Site and warehouse setup
- C. Invoice approval workflow
- D. Purchase requisition workflow

Correct Answer: B

Section:

QUESTION 127

Your company has a Microsoft 365 subscription.

You need to prevent temporary employees from using the chat feature in Microsoft Teams.

Solution: You create a meeting policy and assign the policy to the users.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section:

Explanation:

Creating a meeting policy in Microsoft Teams controls the features available during meetings, such as who can bypass the lobby or whether recording is allowed, but it does not control the ability to use chat outside of meetings. To prevent temporary employees from using the chat feature, a messaging policy would need to be configured instead.

QUESTION 128

Your company has a Microsoft 365 subscription.

You need to prevent temporary employees from using the chat feature in Microsoft Teams.

Solution: You create an app permission policy and assign the policy to the users.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Section:

Explanation:

An app permission policy in Microsoft Teams is used to control which apps are available to users. This policy allows you to block or allow certain apps, but it does not specifically control the chat feature within Teams. For controlling chat capabilities, a messaging policy would be more appropriate.
