

Microsoft.MS-900.vOct-2024.by.David.121q

Number: MS-900
Passing Score: 800
Time Limit: 120
File Version: 42.0

Exam Code: MS-900
Exam Name: Microsoft 365 Fundamentals

Exam A

QUESTION 1

You are the Microsoft 365 administrator for a company.

You need to track scheduled maintenance events in Microsoft 365 admin center.

Where can you track these events?

- A. Reports
- B. Support
- C. Service Health
- D. Message Center

Correct Answer: A

Section:

QUESTION 2

You are the Office 365 administrator for a company.

You encounter a problem in your tenant. You launch the Microsoft 365 admin center and select Create a new service request. You need to get help resolving your problem through the admin center.

Which three actions can you perform from the admin center? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Receive a Microsoft technical support phone number to speak with a Microsoft support technician.
- B. Request a Microsoft service technician to contact you by using email.
- C. Use the query text box to type information about your problem and receive links to help documentation.
- D. Schedule a time for a Microsoft service technician to call you.
- E. Chat with a live Microsoft service engineer.

Correct Answer: B, C, D

Section:

QUESTION 3

You are the Microsoft 365 administrator for a company.

Which two admin roles can purchase more licenses? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. service administrator
- B. user management administrator
- C. global administrator
- D. billing administrator

Correct Answer: C, D

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/office365/admin/subscriptions-and-billing/buy-licenses?view=o365-worldwide>

QUESTION 4

A company plans to purchase Microsoft 365 Enterprise licenses.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. through a Cloud Solution Provider (CSP)
- B. from the Microsoft website using a corporate credit card
- C. from the Microsoft retail store
- D. with an Enterprise Agreement (EA) subscription from Microsoft

Correct Answer: A, D

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/microsoft-365/business/get-microsoft-365-business> <https://www.microsoft.com/en-us/licensing/licensing-programs/enterprise?activetab=enterprise-tab%3aprimar2>

QUESTION 5

Your company plans to purchase a Microsoft 365 subscription.

The company requires intranet and team sites.

You need to select a Microsoft 365 subscription that provides the required features.

Which two subscriptions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Office 365 Home
- B. Office 365 Business Premium
- C. Office 365 Business
- D. Office 365 Business Essentials

Correct Answer: B, D

Section:

Explanation:

Reference: <https://products.office.com/en-gb/compare-all-microsoft-office-products?activetab=tab:primaryr2>

QUESTION 6

A company deploys Windows 10 to all devices.

Feature updates to Windows as a service must be installed as frequently as possible.

Which Windows 10 service channel installs updates most frequently?

- A. Windows Insider Program Servicing channel
- B. Long-term Servicing channel
- C. Semi-Annual Servicing channel

Correct Answer: A

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

QUESTION 7

A company uses Microsoft 365.

The company wants to provide workflows of business tasks that connect to Microsoft Outlook and Microsoft Teams. You need to choose a solution that meets the requirement.

Which solution should you choose?

- A. Power Automate
- B. Microsoft Bookings
- C. Microsoft Planner
- D. Power BI

Correct Answer: A

Section:

QUESTION 8

A company plans to migrate to Microsoft 365.

You need to advise the company about how Microsoft provides protection in a multitenancy environment. What are three ways that Microsoft provides protection? Each correct answer presents part of the solution. (Choose three.) NOTE: Each correct selection is worth one point.

- A. Customer content at rest is encrypted on the server by using BitLocker.
- B. Microsoft Azure AD provides authorization and role-based access control at the tenant layer.
- C. Customer content at rest is encrypted on the server by using transport-layer security (TLS).
- D. Microsoft Azure AD provides authorization and role-based access control at the transport layer.
- E. Mailbox databases in Microsoft Exchange Online contain only mailboxes from a single tenant.
- F. Mailbox databases in Microsoft Exchange Online contain mailboxes from multiple tenants.

Correct Answer: A, B, F

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/office-365-isolation-in-office-365>

QUESTION 9

You are the Microsoft 365 administrator for a company.

Your company plans to open a new office in the United Kingdom.

You need to provide penetration test and security assessment reports for the new office.

Where can you locate the required reports?

- A. Data Governance page of the Security and Compliance portal
- B. Compliance Manager page of the Services Trust portal
- C. Data Loss Prevention page of the Security and Compliance portal
- D. Regional Compliance page of the Services Trust portal

Correct Answer: D

Section:

QUESTION 10

You are the Microsoft Office 365 administrator for a company.

You need to perform security and compliance reviews before new updates are distributed to the entire company. What should you implement?

- A. standard releases
- B. Microsoft 365 Enterprise Test Lab

- C. targeted releases
- D. FastTrack

Correct Answer: C

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/office365/admin/manage/release-options-in-office-365?view=o365-worldwide>

QUESTION 11

A company has a Microsoft 365 subscription that includes Office apps.

A user has identified a new issue while working with an app. When the user attempts to create a support request, the following message displays:

`You don't have permission to access this page or perform this action.`

You need to determine the cause of the error message.

What is the cause?

- A. The user account is disabled.
- B. The user does not have a license assigned for the app.
- C. The user account is not a member of the global admin role.
- D. The company does not have Premier support.

Correct Answer: C

Section:

QUESTION 12

Your company purchases Microsoft 365 E3 and Azure AD P2 licenses.

You need to provide identity protection against login attempts by unauthorized users.

What should you implement?

- A. Azure AD Identity Protection
- B. Azure AD Privileged Identity Management
- C. Azure Information Protection
- D. Azure Identity and Access Management

Correct Answer: A

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/overview>

QUESTION 13

You are a Microsoft 365 administrator for a company. Employees use Microsoft Office 365 ProPlus to create documents. You need to implement document classification and protection by using Microsoft Azure Information Protection. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add an Azure subscription to your Microsoft 365 tenant
- B. Install the Azure Information Protection client
- C. Create a custom Azure Information Protection policy with the Confidential label
- D. Enable the default Azure Information Protection policy

E. Install the Rights Management Service client

Correct Answer: A, D

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/azure/information-protection/requirements> <https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-default>

QUESTION 14

A company deploys Microsoft Azure AD. You run the Identity Secure Score report. The report displays five security items. Which three security items on the report have the most impact on the score? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Enable policy to block legacy authentication.
- B. Enable user risk policy.
- C. Require multi-factor authentication for all users.
- D. Delete/block accounts not used in last 30 days.
- E. Do not expire passwords.

Correct Answer: A, B, C

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender/microsoft-secure-score?view=o365-worldwide>

QUESTION 15

A company deploys Microsoft Azure AD. You enable multi-factor authentication. You need to inform users about the multi-factor authentication methods that they can use. Which of the following methods is NOT a valid multi-factor authentication method in Microsoft 365?

- A. Receive an automated call on the desk phone that includes a verification code.
- B. Use the Microsoft Authenticator mobile application to receive a notification and authenticate.
- C. Receive a call on a phone.
- D. Enter a Windows 10 PIN code when prompted.

Correct Answer: D

Section:

QUESTION 16

You deploy Enterprise Mobility + Security E5 and assign Microsoft 365 licenses to all employees. Employees must not be able to share documents or forward emails that contain sensitive information outside the company. You need to enforce the file sharing restrictions. What should you do?

- A. Use Microsoft Azure Information Protection to define a label. Associate the label with an Azure Rights Management template that prevents the sharing of files or emails that are marked with the label.
- B. Create a Microsoft SharePoint Online content type named Sensitivity. Apply the content type to other content types in Microsoft 365. Create a Microsoft Azure Rights Management template that prevents the sharing of any content where the Sensitivity column value is set to Sensitive.
- C. Use Microsoft Azure Information Rights Protection to define a label. Associate the label with an Active Directory Rights Management template that prevents the sharing of files or emails that are marked with the label.
- D. Create a label named Sensitive. Apply a Data Layer Protection policy that notifies users when their document contains personally identifiable information (PII).

Correct Answer: A

Section:

QUESTION 17

You manage a local Active Directory Domain Services environment. Your company purchases an Enterprise E1 license for all users. You need to implement self-service password reset. You want to achieve this goal while minimizing costs. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Upgrade your subscription to Azure AD Premium P2.
- B. Deploy Azure AD Connect.
- C. Deploy Azure Information Protection.
- D. Upgrade your subscription to Azure AD Premium P1.

Correct Answer: B, D

Section:

QUESTION 18

You are a Microsoft 365 administrator for a company.

What are two ways that you can ensure data security? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. service-level encryption using customer-provided key
- B. tenant-dedicated Microsoft Azure AD encryption using customer-provided key
- C. single-tenant infrastructure partitions for sensitive data
- D. data transfer using transport-layer security (TLS)

Correct Answer: A, D

Section:

QUESTION 19

You are a Microsoft 365 administrator for a company.

You need to identify security vulnerabilities by using the Office 365 Attack Simulator.

Which three attack simulations are available? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Brute-force password
- B. Cross-site scripting
- C. Password-spray
- D. Denial-of-service
- E. Display name spear-phishing

Correct Answer: A, C, E

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/attack-simulator>

QUESTION 20

Your organization plans to deploy Microsoft 365 in a hybrid scenario.

You need to ensure that employees can use a smart card for authentication.

Which hybrid identity solution should you implement?

- A. password hash synchronization with single sign-on
- B. Active Directory Federation Services (AD FS)
- C. PingFederate and federation integration
- D. pass-through authentication and single sign-on

Correct Answer: B

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

QUESTION 21

You need to ensure that the process by which users sign in to Microsoft 365 confirms the identity of the user. Which feature should you use?

- A. mobile application management (MAM)
- B. Advanced Threat Protection (ATP)
- C. Multi-Factor Authentication (MFA)
- D. data loss prevention (DLP) policies

Correct Answer: C

Section:

Explanation:

Multi-Factor Authentication (MFA) is a two-step identity verification system that can be used to authenticate users.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-mfa-howitworks>

QUESTION 22

You are a Microsoft 365 administrator for a company.

You need to ensure that company documents are marked as confidential. You must prevent employees from sharing documents with people outside the company. What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Validate outbound emails by using DomainKeys Identified Mail (DKIM)
- B. Create sensitive information types
- C. Configure Secure/Multipurpose Internet Mail Extensions (S/MIME) settings for Outlook
- D. Create a data-loss prevention policy
- E. Apply sensitivity labels to documents

Correct Answer: B, E

Section:

Explanation:

B: Sensitive information types can also be used with the Azure Information Protection scanner to classify and protect files on premises. Sensitive information types define how the automated process recognizes specific information types such as health service numbers and credit card numbers.

E: With sensitivity labels you can classify and help protect your sensitive content. Protection options include labels, watermarks, and encryption.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/protect-information>

QUESTION 23

You are the Microsoft 365 administrator for a company.
An employee requests personal data under General Data Protection Regulation (GDPR) guidelines.
You need to retrieve data for the employee.
What should you do?

- A. Create a data subject request case.
- B. Create a retention policy.
- C. Create a data-loss prevention policy.
- D. Create a GDPR assessment.

Correct Answer: A

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/microsoft-365/compliance/gdpr-dsr-office365>

QUESTION 24

A company has a Microsoft 365 subscription. Employees are permitted to use devices that the company does not own to access company data in the cloud. You need to restrict employees from copying data to personal OneDrive folders. What should you use?

- A. Information Rights Management
- B. Microsoft Azure Security Center
- C. Microsoft Defender for Office 365
- D. Microsoft Endpoint Manager

Correct Answer: D

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/intune/app-protection-policy>

QUESTION 25

You are the network administrator of a company.
The Microsoft 365 tenant contains sensitive information. Employees must verify their identities when they sign into Microsoft 365 by providing information in addition to their Azure AD password. You need to select the tools that employees can use to verify their identities.
Which two tools should you select? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Customer Lockbox for Office 365
- B. Azure Security Center
- C. Windows Hello for Business
- D. Microsoft Authenticator

Correct Answer: C, D

Section:

Explanation:

Two-step authentication can be implemented by using Windows Hello for Business or Microsoft Authenticator.

Reference:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-in-organization> <https://support.microsoft.com/en-us/help/4026727/microsoft-account-how-to-use-the-microsoft->

authenticator-app

QUESTION 26

You need to move videos to a Microsoft 365 tenant and ensure that the contents are automatically transcribed. Which Microsoft 365 service should you use?

- A. Yammer
- B. Stream
- C. Flow

Correct Answer: B

Section:

Explanation:

Microsoft Stream is used for video services, and includes deep search within automatic audio transcription.

Reference:

<https://docs.microsoft.com/en-us/stream/office-365-video-feature-breakdown>

QUESTION 27

An organization uses Microsoft 365 Business to secure their data.

Many users install the organization's data on their personal tablets and phones.

You need to protect the organization's data stored on users' devices.

Which three features support device security? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Remotely wiping company data
- B. Enabling Advanced Threat Protection for users
- C. Disabling the device remotely
- D. Automatically deleting files after 90 days of inactivity
- E. Requiring users to have a PIN on their device

Correct Answer: A, D, E

Section:

Explanation:

You can manage many of the Microsoft 365 Business security features in the admin center, which gives you a simplified way to turn these features on or off. In the admin center, you can do the following:

Set application management settings for Android or iOS devices.

These settings include deleting files from an inactive device after a set period, encrypting work files, requiring that users set a PIN, and so on. Set application protection settings for Windows 10 devices.

These settings can be applied to company data on both company-owned, or personally owned devices. Set device protection settings for Windows 10 devices. You can enable BitLocker encryption to help protect data in case a device is lost or stolen, and enable Windows Exploit Guard to provide advanced protection against ransomware. Remove company data from devices. You can remotely wipe company data if a device is lost, stolen, or an employee leaves your company.

Reset Windows 10 devices to their factory settings.

You can reset any Windows 10 devices that have device protection settings applied to them.

Reference: <https://docs.microsoft.com/en-us/microsoft-365/business/security-features>

QUESTION 28

This question-requires that you evaluate the underlined text to determine if it is correct.

You use Microsoft Intune for device management. You must determine how many devices run each operating system. You must launch Intune and navigate to the Mobile Apps blade.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. Device configuration

- B. Device compliance
- C. No change is needed
- D. Devices

Correct Answer: D

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/intune/device-inventory>

QUESTION 29

You are the Microsoft 365 administrator for a company.

You need to ensure that users receive a warning message if they select links in emails that might be unsafe. What should you do?

- A. Use Windows PowerShell to install the latest antimalware engine updates
- B. Enable Microsoft Office 365 Advanced Threat Protection
- C. Use the Microsoft Exchange Admin Center to configure a new spam-filter policy
- D. Use the Microsoft Exchange Admin Center to create a new antimalware policy

Correct Answer: B

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/office365/securitycompliance/atp-safe-links>

QUESTION 30

A business acquaintance from another company sends you a document that is encrypted by Azure Information Protection (AIP). You are unable to open the document because the user account cannot be authenticated by the company's Azure Active Directory. You need to access the document.

What should you do?

- A. Implement Azure Rights Management (RMS) for individuals for the user account.
- B. Implement Information Rights Management (IRM) for the Office application.
- C. Upgrade your account to include AIP for Office 365.

Correct Answer: A

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/azure/information-protection/rms-for-individuals>

QUESTION 31

You are a company's Microsoft 365 administrator.

You need to retrieve the following information:

an assessment of your tenant's security status for a given regulation a list of audit and assessment reports on Microsoft's cloud services Which two portals have this information? Each correct answer presents a partial solution.

NOTE: Each correct selection is worth one point.

- A. Service Trust Portal
- B. Azure portal
- C. Compliance Center
- D. SharePoint admin center

Correct Answer: A, C

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust-portal?view=o365-worldwide> <https://docs.microsoft.com/en-us/microsoft-365/compliance/microsoft-365-compliance-center?view=o365-worldwide>

QUESTION 32

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

| Statements | Yes | No |
|---|-----------------------|-----------------------|
| Microsoft Service Trust Portal provides audit reports. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Service Trust Portal provides penetration test reports. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Service Trust Portal allows for the configuration of conditional access policies. | <input type="radio"/> | <input type="radio"/> |

Answer Area:

| Statements | Yes | No |
|---|----------------------------------|----------------------------------|
| Microsoft Service Trust Portal provides audit reports. | <input checked="" type="radio"/> | <input type="radio"/> |
| Microsoft Service Trust Portal provides penetration test reports. | <input type="radio"/> | <input checked="" type="radio"/> |
| Microsoft Service Trust Portal allows for the configuration of conditional access policies. | <input type="radio"/> | <input checked="" type="radio"/> |

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trustportal?view=o365-worldwide>

QUESTION 33

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

| Statements | Yes | No |
|--|-----------------------|-----------------------|
| Microsoft Defender for Cloud Apps integrates with the Intelligent Security Graph to generate Microsoft Defender for Identity alerts. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Defender for Cloud Apps integrates with Secure Score to report the available security features that may reduce risk. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Defender for Cloud Apps integrates with Microsoft Power BI to automate a response when alerts are triggered. | <input type="radio"/> | <input type="radio"/> |

Answer Area:

| Statements | Yes | No |
|--|----------------------------------|-----------------------|
| Microsoft Defender for Cloud Apps integrates with the Intelligent Security Graph to generate Microsoft Defender for Identity alerts. | <input checked="" type="radio"/> | <input type="radio"/> |
| Microsoft Defender for Cloud Apps integrates with Secure Score to report the available security features that may reduce risk. | <input checked="" type="radio"/> | <input type="radio"/> |
| Microsoft Defender for Cloud Apps integrates with Microsoft Power BI to automate a response when alerts are triggered. | <input checked="" type="radio"/> | <input type="radio"/> |

Section:

<https://docs.microsoft.com/en-us/partner-center/enrolling-in-the-csp-program>

QUESTION 35

A company deploys Microsoft Azure AD. You enable multi-factor authentication. You need to inform users about the multi-factor authentication methods that they can use. Which of the following methods is NOT a valid multi-factor authentication method in Microsoft 365?

- A. Receive an automated call on the desk phone that includes a verification code
- B. Insert a small card in to a desktop computer and provide a PIN code when prompted
- C. Receive a call on a mobile phone and select the pound sign (#) when prompted

D. Receive an SMS text message that includes a verification code

Correct Answer: B

Section:

Explanation:

Reference: <http://techgenix.com/multifactor-authentication-office-365/>

QUESTION 36

You are a Microsoft 365 administrator for a company.

Several users report that they receive emails which have a PDF attachment. The PDF attachment launches malicious code. You need to remove the message from inboxes and disable the PDF threat if an affected document is opened. Which feature should you implement?

- A. Microsoft Exchange Admin Center block lists
- B. Sender Policy Framework
- C. Advanced Threat Protection anti-phishing
- D. zero-hour auto purge
- E. DKIM signed messages with mail flow rules

Correct Answer: D

Section:

Explanation:

In Microsoft 365 organizations with mailboxes in Exchange Online, zero-hour auto purge (ZAP) is an email protection feature that retroactively detects and neutralizes malicious phishing, spam, or malware messages that have already been delivered to Exchange Online mailboxes.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/zero-hour-auto-purge?view=o365-worldwide>

<https://docs.microsoft.com/en-us/office365/securitycompliance/atp-anti-phishing>

QUESTION 37

You are the Microsoft 365 administrator for a company.

All staff must use Microsoft Outlook to access corporate email. When users access Outlook on mobile devices, they must use a PIN to open the application. You need to implement a Microsoft Intune policy to enforce the security requirements.

Which policy should you use?

- A. device compliance
- B. device configuration
- C. app protection
- D. app configuration

Correct Answer: C

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/intune/app-protection-policy>

QUESTION 38

A company deploys Exchange Online and SharePoint Online.

You must audit and assessment reports for the Microsoft 365 cloud services that the company uses.

You need to provide the required documents.

Which Microsoft site should you use to obtain this information?

- A. Compliance Manager
- B. Service Trust Portal
- C. Office 365 Security and Compliance Center
- D. Azure portal

Correct Answer: B

Section:

Explanation:

Reference: https://servicetrust.microsoft.com/ViewPage/TrustDocumentsV3?docTab=7f51cb60-3d6c-11e9-b2af-7bb9f5d2d913_FAQ_and_White_Papers

QUESTION 39

A company is planning to use Microsoft 365 Defender.

The company needs to protect Windows 10 client computers from malicious viruses. The company also needs to identify unauthorized cloud apps that are used by end users.

You need to identify the Microsoft 365 Defender solutions that meet the requirements.

Which two solutions should you choose? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Defender for Identity
- B. Microsoft Defender for Endpoint
- C. Microsoft Defender for Office 365
- D. Microsoft Cloud App Security

Correct Answer: B, D

Section:

QUESTION 40

A company has Microsoft 365.

The company needs to secure their environment. They start by identifying the highest risks to security according to Microsoft. You need to identify the security changes that are recommended by Microsoft 365.

Which tool should you choose?

- A. Microsoft Intune
- B. Microsoft Secure Score
- C. Azure Information Protection scanner
- D. Advanced Threat Analytics
- E. Microsoft 365 compliance center

Correct Answer: B

Section:

QUESTION 41

A company uses Microsoft 365.

The company wants users to be prompted for additional verification when they access a federated third-party application. However, users must not be prompted for additional verification when they access Microsoft Outlook.

You need to identify a solution that meets the requirements.

Which solution should you choose?

- A. Conditional Access

- B. Multi-factor authentication (MFA)
- C. Active Directory Federation Services (AD FS)
- D. Self-service password reset (SSPR)

Correct Answer: A

Section:

QUESTION 42

You are the Microsoft 365 administrator for a company.

Your company wants to learn more about what happens if the availability terms of the Microsoft Office 365 services are not met. Where can you find this information?

- A. Service Level agreement
- B. Microsoft Services agreement
- C. Microsoft Cloud agreement
- D. Microsoft Products and Services agreement
- E. Microsoft Enterprise agreement

Correct Answer: A

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-level-agreement>

QUESTION 43

A company is purchasing a Microsoft 365 subscription to replace the current on-premises IT infrastructure. You need to identify the impacts of subscribing to Microsoft 365. Which three outcomes can the company expect? Each correct answer presents a complete solution. (Choose three.) NOTE: Each correct selection is worth one point.

- A. Predictable Microsoft licensing costs
- B. Increased Exchange Server Client Access License (CAL) costs
- C. Increased Windows Server Client Access License (CAL) costs
- D. Increased service scalability
- E. Decreased on-premises infrastructure maintenance

Correct Answer: A, D, E

Section:

QUESTION 44

Your organization plans to deploy a subscription-based licensing model of Microsoft Office to devices. You must use group policy to enforce Office application settings.

You need to deploy Office to the enterprise. Which version of Office should you deploy?

- A. Office 365 ProPlus
- B. Office Professional Plus 2016
- C. Office Online
- D. Office Home and Business 2016

Correct Answer: A

Section:

Explanation:

Reference: <https://products.office.com/en-za/business/compare-more-office-365-for-business-plans>

QUESTION 45

An organization plans to deploy Microsoft Office 2019 or Office 365 ProPlus.

What are two advantages of Office 365 ProPlus? Each correct answer presents a complete solution. (Choose two.) NOTE: Each correct selection is worth one point.

- A. Features remain constant through the lifetime of the applications.
- B. Office 365 ProPlus includes downgrade rights.
- C. A single license may be deployed to multiple devices.
- D. Fully functional Office mobile apps are free to install and use.

Correct Answer: C, D

Section:

Explanation:

A single subscription of Office 365 ProPlus allows you to install Office 365 on up to 5 devices.

Office 365 ProPlus includes a fully functional, cloud-based online version that is free to use, though it does not require any installation. Incorrect Answers:

Office 365 subscriptions (E3, E5, etc.) do not allow for downgrading.

Office 365 ProPlus is updated automatically. Updates include updates to existing features as well as new features being added to the product.

QUESTION 46

A company plans to migrate to Microsoft 365.

Firstline employees need to be able to collaborate by using Microsoft Yammer, SharePoint Online, and Teams. You must minimize costs. Which subscription type should you use?

- A. E3
- B. ProPlus
- C. F3
- D. Personal

Correct Answer: A

Section:

QUESTION 47

A company plans to purchase Microsoft 365.

You need to give management an overview of the Microsoft 365 pricing model.

Which of the following describes how the company will be billed for Microsoft 365?

- A. The company will be billed according to the amount of computing resources it uses each month across all users.
- B. The company will make a single payment for Microsoft 365, after which it owns the license for Microsoft 365 and can use it in an unlimited fashion.
- C. The company will be billed annually for a single Microsoft 365 license that can be shared among all employees.
- D. The company will be billed according to the number of user licenses acquired.

Correct Answer: D

Section:

QUESTION 48

You use Microsoft Business Products.

When you try to create a support request, you receive the following message:

You don't have permission to access this page or perform this action.
You need to determine the cause of the error message.
What is the cause?

- A. Your password is expired
- B. Your account is disabled
- C. Your company does not have Premier support
- D. Your account is not a member of the global admin role

Correct Answer: D

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/office365/admin/add-users/about-admin-roles?view=o365-worldwide>

QUESTION 49

A company experiences a Microsoft 365 outage that affects an entire region.

You check the Service Health Dashboard and observe that the service is healthy.

After the incident is resolved, you need to find information in Service Health Dashboard that describes what happened during the outage. What should you use?

- A. Message Center
- B. incident closure summary
- C. Post-Incident Review (PIR)
- D. service request

Correct Answer: C

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-health-and-continuity>

QUESTION 50

A company is a Microsoft 365 reseller. The company does not provide managed services or direct customer support. You need to provide licenses for customers and earn commissions for each license sold.

What should you do?

- A. Buy licenses for customers by using the Microsoft admin portal.
- B. Sign up as a Cloud Solution Provider direct reseller.
- C. Sign up as a Cloud Solution Provider indirect reseller.
- D. Buy licenses for customers from a Microsoft Authorized distributor.

Correct Answer: C

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/partner-center/enrolling-in-the-csp-program>

QUESTION 51

A company has a Microsoft 365 subscription and a Microsoft Azure support plan.

You need to implement only Azure services for which Microsoft provides technical support.

Which two types of services and features can you implement? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. general availability
- B. targeted release
- C. public preview
- D. private preview

Correct Answer: A, C

Section:

QUESTION 52

A company that has 50 employees plans to purchase a Microsoft 365 Business subscription.

Which two payment methods are available? Each correct answer presents a complete solution. (Choose two.) NOTE: Each correct selection is worth one point.

- A. PayPal
- B. automatic bank transfer
- C. Enterprise Agreement
- D. credit card or debit card

Correct Answer: B, D

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/office365/admin/subscriptions-and-billing/pay-for-your-subscription?view=o365-worldwide>

QUESTION 53

A small advertising company has 250 employees.

You need to migrate all users to Microsoft 365 and meet the following requirements:

Provide a user-centric licensing solution for all users.

Manage devices from a single location.

Minimize licensing costs.

Which licensing model should you use?

- A. Microsoft 365 Business
- B. Microsoft 365 Education
- C. Microsoft 365 Enterprise E3
- D. Microsoft 365 Enterprise E5

Correct Answer: A

Section:

Explanation:

Reference: <https://products.office.com/en-za/compare-all-microsoft-office-products?tab=2> <https://docs.microsoft.com/en-us/microsoft-365/business/support/microsoft-365-business-faqs>

QUESTION 54

You are the Microsoft 365 administrator for a company.

A user experiences an issue with SharePoint Online.

You need to resolve the issue.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Go to the SharePoint admin center and create a support request.

- B. Contact Microsoft technical support by telephone.
- C. Create a new service request from the Microsoft 365 admin center.
- D. Create a service request from the SharePoint portal.

Correct Answer: B, C

Section:

Explanation:

Reference: <https://www.thewindowsclub.com/microsoft-support-chat-phone-number> <https://blogs.technet.microsoft.com/praveenkumar/2013/07/17/how-to-create-service-requests-to-contact-office-365-support/>

QUESTION 55

A company uses Microsoft 365.

Users who are based on-premises must be able to reset their own passwords.

The company plans to purchase Azure Active Directory (AD) licenses.

You need to identify the Azure AD licenses that meet this requirement.

Which two Azure AD licenses should you choose? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Azure AD Premium P2
- B. Azure AD Free
- C. Office 365 apps
- D. Azure AD Premium P1

Correct Answer: A, D

Section:

Explanation:

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-licensing>

QUESTION 56

A company uses Microsoft 365.

The company must identify which cloud apps and services are used in the company.

You need to identify which service can be used to find this information.

Which service should you use?

- A. Microsoft Defender for Office 365
- B. Microsoft Cloud App Security
- C. Azure Security Center
- D. Azure Active Directory

Correct Answer: B

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/cloud-app-security/what-is-cloud-app-security>

QUESTION 57

A company uses Microsoft cloud services.

You need to change the update channels for the Microsoft 365 Apps for enterprise by using a Microsoft supported method.

Which two methods can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Windows 10 Update Assistant
- B. Group Policy
- C. Client app
- D. Office Deployment Tool
- E. Readiness Toolkit

Correct Answer: B, D

Section:

Explanation:

After deploying Microsoft 365 Apps, you can change the update channel with Group Policy or the Office Deployment Tool (ODT).

Reference:

<https://docs.microsoft.com/en-us/deployoffice/change-update-channels>

QUESTION 58

A company uses Azure Active Directory.

The company requires that authentication requests from client applications that do not support modern authentication are blocked.

You need to identify the policy that meets the requirement.

Which policy should you select?

- A. Conditional Access
- B. Multi-factor authentication registration
- C. Sign-in risk
- D. User risk

Correct Answer: A

Section:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview>

QUESTION 59

A company plans to migrate on-premises infrastructure to the cloud.

What are three benefits of migrating to the cloud? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Reduce configuration requirements on desktop computers.
- B. Reduce on-site network latency.
- C. Automate data backup and disaster recovery.
- D. Scale and extend applications.
- E. Eliminate the cost of buying server hardware.

Correct Answer: C, D, E

Section:

Explanation:

C: Most cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities. Some providers also offer the ability to store backups in different geographic regions. D: When

demand spikes or the organization needs more powerful compute resources, organizations can alter their resources instantly on demand. E: There are significant savings in resource, maintenance, and real estate costs, in addition to the ability to optimize workloads so that they cost less to run.

Reference:

<https://azure.microsoft.com/en-us/overview/cloud-migration-benefits-challenges/#overview>

QUESTION 60

HOTSPOT

You are evaluating Office 365 ProPlus for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

| Statements | Yes | No |
|--|-----------------------|-----------------------|
| Employees must use a browser to co-author documents, spreadsheets, and presentations. | <input type="radio"/> | <input type="radio"/> |
| Employees can edit documents, spreadsheets, and presentations by using a browser or the desktop app. | <input type="radio"/> | <input type="radio"/> |
| Employees can use mobile devices, tablets, and laptops to edit documents, spreadsheets, and presentations. | <input type="radio"/> | <input type="radio"/> |

Answer Area:

Answer Area

| Statements | Yes | No |
|--|----------------------------------|----------------------------------|
| Employees must use a browser to co-author documents, spreadsheets, and presentations. | <input type="radio"/> | <input checked="" type="radio"/> |
| Employees can edit documents, spreadsheets, and presentations by using a browser or the desktop app. | <input checked="" type="radio"/> | <input type="radio"/> |
| Employees can use mobile devices, tablets, and laptops to edit documents, spreadsheets, and presentations. | <input checked="" type="radio"/> | <input type="radio"/> |

QUESTION 64

HOTSPOT

A company uses Microsoft 365.

The company requires the sales team to record all live demonstrations for training purposes.

You need to select the Microsoft tool that the sales team should use for each requirement.

Which tool should you select for each requirement? To answer, select the appropriate tools in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Tool

Host and record a live event for customers to discuss new product offerings.

| | |
|--------------------|---|
| | ▼ |
| Dynamics 365 Sales | |
| Microsoft Teams | |
| Microsoft Sway | |

Store recorded presentations and create searchable closed captions and speech-to-text information for the files.

| | |
|--------------------|---|
| | ▼ |
| Microsoft Stream | |
| Microsoft Sway | |
| Power Automate | |
| Microsoft OneDrive | |

Answer Area:

Answer Area

Requirement

Tool

Host and record a live event for customers to discuss new product offerings.

| | |
|--------------------|---|
| | ▼ |
| Dynamics 365 Sales | |
| Microsoft Teams | |
| Microsoft Sway | |

Store recorded presentations and create searchable closed captions and speech-to-text information for the files.

| | |
|--------------------|---|

QUESTION 69

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Microsoft 365 applications can access Dynamics 365 data by using existing connectors.

Yes

No

Microsoft Teams allows you to access customer information in Dynamics 365.

Power Platform allows you to build custom apps to automate processes in Dynamics 365.

Answer Area:

Answer Area

Microsoft 365 applications can access Dynamics 365 data by using existing connectors.

Yes

No

Microsoft Teams allows you to access customer information in Dynamics 365.

Power Platform allows you to build custom apps to automate processes in Dynamics 365.

Section:

Explanation:

Box 1: Yes

The Microsoft Dataverse connector is used to connect to Dynamics 365 data

Box 2: Yes

Microsoft Teams users get license-free access to Dynamics 365 data

Box 3: Yes

The Microsoft Dataverse connector allows you to connect Power Platform to Dynamic 365 data

Reference:

<https://docs.microsoft.com/en-us/power-platform/important-changes-coming#dynamics-365-connector-is-deprecated>

<https://docs.microsoft.com/en-us/connectors/commondataserviceforapps/>

QUESTION 70

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

| | Yes | No |
|---|-----------------------|-----------------------|
| Dynamics 365 is an infrastructure as a service (IaaS) solution. | <input type="radio"/> | <input type="radio"/> |
| A Microsoft 365 subscription includes a free subscription to Dynamics 365. | <input type="radio"/> | <input type="radio"/> |
| Dynamics 365 has an integrated customer relationship management (CRM) application that uses Microsoft 365 Apps. | <input type="radio"/> | <input type="radio"/> |

Answer Area:

Answer Area

| | Yes | No |
|---|-----------------------|----------------------------------|
| Dynamics 365 is an infrastructure as a service (IaaS) solution. | <input type="radio"/> | <input checked="" type="radio"/> |
| A Microsoft 365 subscription includes a free subscription to Dynamics 365. | <input type="radio"/> | <input checked="" type="radio"/> |
| Dynamics 365 has an integrated customer relationship management (CRM) application that uses Microsoft 365 Apps. | <input type="radio"/> | <input checked="" type="radio"/> |

Section:

Explanation:

Box 1: No

Dynamics 365 is SaaS

Box 2: No

Dynamics 365 is not part of Microsoft 365

Box 3: No

A connector can be used to connect to Dynamics 365 data but Dynamics 365 does not have Microsoft 365 apps.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/get-started/developers>

QUESTION 71

DRAG DROP

You are the Microsoft 365 administrator for a company.

You need to identify the different features of MyAnalytics and Workspace Analytics.

What are the different features? To answer, drag the appropriate applications to the correct features. Each application may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

| Applications | Feature | Application |
|---------------------|--|-------------|
| MyAnalytics | Included in office 365 E5 license | Application |
| Workspace Analytics | Can be purchased only as an add-on license | Application |
| | Provides employee work and collaboration metrics | Application |
| | Permits upload of custom organizational data | Application |
| | Provides team work and collaboration metrics | Application |

Correct Answer:

Answer Area

Applications

Feature

Application

- MyAnalytics
- Workspace Analytics

- Included in office 365 E5 license
- Can be purchased only as an add-on license
- Provides employee work and collaboration metrics
- Permits upload of custom organizational data
- Provides team work and collaboration metrics

- MyAnalytics
- Workspace Analytics
- MyAnalytics
- Workspace Analytics
- Workspace Analytics

- Microsoft Yammer
- Office 365 ProPlus

Answer Area

Description

- A chat-based workspace that facilitates real-time collaboration and enables members of an organization to have conversations and create work plans.
- A cloud service that enables you to store and protect files, share files with others, access files from anywhere using an app or a web-browser, and restore all files to a previous date and time.
- A cloud service that enables you to store, organize, add third-party apps, access information from almost any device, allow sharing with external people by default, all by using a web-browser.
- A private social network that you can use to efficiently resolve support issues and gather feedback on projects and documents.

QUESTION 74

DRAG DROP

A company plans to deploy Microsoft 365.

You need to identify differences between the features in Exchange Online and Exchange Server.

Match the appropriate features to the corresponding supported environments. To answer, drag the appropriate environments to the correct features. Each environment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

| Supported environments | Feature | Supported environments |
|-------------------------------------|---|------------------------|
| Exchange Server only | Exchange Web Services (EWS) access to accounts | Supported environment |
| Exchange Online only | Custom EWS throttling settings | Supported environment |
| Exchange Server and Exchange Online | Information rights management, archiving, and legal holds | Supported environment |

Correct Answer:

| Supported environments | Feature | Supported environments |
|-------------------------------------|---|-------------------------------------|
| Exchange Server only | Exchange Web Services (EWS) access to accounts | Exchange Server and Exchange Online |
| Exchange Online only | Custom EWS throttling settings | Exchange Server only |
| Exchange Server and Exchange Online | Information rights management, archiving, and legal holds | Exchange Server and Exchange Online |

QUESTION 77

DRAG DROP

A company plans to migrate from a Microsoft volume licensing model to a subscription-based model.

Updates to devices must meet the following requirements:

| Team | Requirement |
|-------------|---|
| Engineering | Application deployments and operating system updates to laptop computers and mobile phones must start from an on-premises server. |
| Sales | Laptop computers and mobile phones must be updated periodically and not require an on-premises server. |
| Finance | Laptop computers and mobile phones must be updated periodically and monitored by using a single system. The ability to approve updates is not required. |
| Developers | Choose when updates are installed and not require an on-premises server. |

You need to recommend the appropriate servicing models to update employee laptop computers and mobile phones.

Which servicing models should you recommend? To answer, drag the appropriate servicing models to the correct teams. Each servicing model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

| Team | Servicing model |
|----------------|-----------------|
| Engineering | |
| Sales | |
| Finance | |
| App developers | |

Servicing models

- Windows Update (stand-alone)
- Windows Update for Business
- Windows Server Update Services
- System Center Configuration Manager

Correct Answer:

Answer Area

| Team | Servicing model |
|----------------|-------------------------------------|
| Engineering | Windows Server Update Services |
| Sales | Windows Update for Business |
| Finance | System Center Configuration Manager |
| App developers | Windows Update (stand-alone) |

Servicing models

- Windows Update (stand-alone)
- Windows Update for Business
- Windows Server Update Services
- System Center Configuration Manager

QUESTION 78

DRAG DROP

You are the Microsoft 365 administrator for a company. The company plans to upgrade client operating systems to Windows 10.

You need to explain the concepts of Windows as a Service (WaaS) to the management team.

Match each term to its definition. To answer, drag the appropriate terms from the column on the left to its definitions on the right. Each term may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Terms

Windows Insider previews

Servicing channels

Deployment rings

Definition

Early build that are released to the public during the feature-development phase

A method for controlling the frequency at which organizations deploy Windows 10 features

A method of gradually deploying Windows 10 features by using multiple sets of targeted devices

QUESTION 81

DRAG DROP

An organization plans to deploy Microsoft 365 in a hybrid scenario.

You need to provide a recommendation based on some common identity and access management scenarios. The solution must minimize costs.

Match each solution to its appropriate scenario. To answer, drag the appropriate solutions from the column on the left to the scenarios on the right. Each item may be used once, more than once, or not at all. NOTE: Each correct selection is worth one point.

Select and Place:

- Active Directory Federation Services (AD FS)
- PingFederate and federation integration
- Password hash synchronization with single sign-on
- Pass-through authentication and single sign-on

Answer Area

- Enable a federation option for authentication in a hybrid environment.
- Allow administrators to reset user passwords in Microsoft Azure AD.
- Support nonfederated users authenticating with on-premises AD and supports multi-factor authentication.

Solution

- Solution
- Solution
- Solution

Correct Answer:

-
- PingFederate and federation integration
-
-

Answer Area

- Enable a federation option for authentication in a hybrid environment.
- Allow administrators to reset user passwords in Microsoft Azure AD.
- Support nonfederated users authenticating with on-premises AD and supports multi-factor authentication.

Solution

- Active Directory Federation Services (AD FS)
- Password hash synchronization with single sign-on
- Pass-through authentication and single sign-on

QUESTION 82

DRAG DROP

You have a hybrid environment that includes Microsoft Azure AD. On-premises applications use Active Directory Domain Services (AD DS) for authentication. You need to determine which authentication methods to use. Match each feature to its authentication source. To answer, drag the appropriate authentication sources from the column on the left to the features on the right. Each authentication source may be used once, more than once, or not at all. NOTE: Each correct selection is worth one point.

Select and Place:

Authentication sources

- AD DS only
- Azure AD only
- AD DS and Azure AD

Answer Area

Client feature

- Log on to devices by using Windows Hello.
- Log on to devices that are managed by Microsoft Intune.
- Sign in to Outlook on the web by using multi-factor authentication.

Authentication sources

- Authentication sources
- Authentication sources
- Authentication sources

Correct Answer:

Authentication sources

- AD DS only

QUESTION 98

DRAG DROP

You are the Microsoft 365 administrator for a company.

You identify the following requirements:

| Department | Office desktop products required | Requirements |
|------------------|----------------------------------|--|
| acquisitions | Yes | Users require Office desktop products and must be able to schedule audio conferencing calls. |
| customer service | No | Users must be able to collaborate with other users and view their work schedules each week. |
| finance | Yes | You must automate investigation and response to threats against finance department content. |
| purchasing | Yes | Users require Office desktop products but do not require audio-conferencing capabilities. |

You need to purchase Office 365 subscription based on the requirements for each department.

Which type of subscription should you use for each department? To answer, drag the appropriate license types to the correct departments. Each license type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

License types

- Microsoft 365 F1
- Microsoft 365 E3
- Microsoft 365 E5

Department

- acquisitions
- customer service
- finance
- purchasing

License type

-
-
-
-

Correct Answer:

Answer Area

License types

- Microsoft 365 F1
- Microsoft 365 E3
- Microsoft 365 E5

Department
