Exam Code: H11-851_V3.0
Exam Name: HCIA-Video Conference V3.0

QUESTION 1
Radio and television is a one-way transmission and cannot communicate with each other, while video conferencing can be transmitted in both directions and communicate with each other "face to face". ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 2
In the six-point conference held using the 96XX series MCU, the venues T1, T2, and T3 form a threescreen, and the venues T4 and T5 are held , T6 is not in multiviewer, when T1, T2 leave, T4, T5 or T6 Two of the venues cannot replace the multi-screen T1 and T2 venues. ()

A. True
B. Error

Correct Answer: B
Section:

QUESTION 3
In the case of multiple MCUs cascading, the ( ) feature enables the upper venue to browse the lower venue screen across levels.

A. End-cloud collaboration
B. Intelligent secondary flow adaptation
C. Channel cascading
D. Network Remote Recording

Correct Answer: C
Section:

QUESTION 4
Address resolution is when an SC performs a translation of the IP address of an entity ( ) .

A. Entity number
B. Entity name
C. Entity domain name
D. Region Name

Correct Answer: A, B
Section:

QUESTION 5
Regarding MCU scheduling multipoint meetings, is the following description correct?

A. The participating terminal types must be the same.

B. Regardless of the call scenario, both the MCU and the endpoint need to be registered on the GK.

C. The participating terminal types can be different.

D. In some calling scenarios, the MC and endpoint do not need to be registered on the GK.

Correct Answer: B, C
Section:

QUESTION 6

A. 323 is a standard developed by ( ).

B. ITU_T

C. IEEE

D. NSI

E. ISO

Correct Answer: A
Section:

QUESTION 7
The recording of the RSE6500 includes only the AV stream information generated by the system recording, and the conference-related attachments cannot be archived together. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 8
When 2 MCUs are cascaded, a meeting is scheduled, and the upper and lower MCUs join the meeting as a virtual venue. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 9
In scheduling a meeting in the SMC, if the Primary MCU selects Automatic, the SMC schedules the meeting in the service area to which it belongs MCU. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 10
Regarding the H323 protocol, is the following description correct?

A. The secondary stream data transmission protocol is not present.
B. 323 in the protocol stack.
C. The terminal control management class protocol is responsible for the transmission of audio and video code streams.
D. Video encoding protocol, audio encoding protocol, and media transmission protocol belong to the media control class.
E. Media control class protocol is responsible for conference control and terminal calls.

Correct Answer: C
Section:

QUESTION 11
Response message "1xx" indicates?

A. The server must take further action to complete the request.
B. The request cannot be implemented on any SIP server.
C. The request message contains a syntax error or the STP server cannot complete processing of the request message.
D. The server has received the request message and is processing it.

Correct Answer: D
Section:

QUESTION 12
() Support for creating meetings and joining meetings via IVR.

A. VP9850
B. VP9860
C. VP9660
D. CloudMCU

Correct Answer: C
Section:

QUESTION 13
When SHC2.0 adds TE Series endpoints in a manageable manner, the Username and Password and Terminal () in the authentication information. The user's user name and password are consistent.

A. Web interface
B. api
C. test
D. debug

Correct Answer: B
Section:

QUESTION 14
Regarding the gallery view in a multi-stream meeting, what is the following description incorrect? ()

A. In a multi-stream meeting, if you select Gallery View, the screens are presented in the following order of precedence: broadcast venue video> speaker video> other venue videos.
B. In a multi-stream meeting, if you select Gallery view, you can display up to 16 videos or share a presentation.
C. In a multi-stream conference, if you select gallery view, the picture is presented in a large number of small ways.
D. In a multi-stream meeting, if you select Gallery View, the video and shared presentation of each venue are displayed equally.

Correct Answer: A, D
Section:

QUESTION 15
() is a function of the whiteboard.

A. Move
B. Zoom
C. Erase
D. Write

Correct Answer: A, B, C, D
Section:

QUESTION 16
IdeaHub provides a whiteboard feature, and the background of the whiteboard can be set to () color.

A. Dark green
B. Black
C. Gray
D. White

Correct Answer: A, C, D
Section:

QUESTION 17
() is a multiviewer mode supported by the CloudMCU.

A. Divided into 16 screens equally
B. Divided into 24 screens
C. A large number of small Ontable modes
D. Equally 9 Screen

Correct Answer: A, B, C, D
Section:

QUESTION 18
By default, the SMC3.0 system supports three roles, namely ().

A. Meeting Administrator
B. Meeting Organizer

C. System Administrator

D. Regular User

Correct Answer: A, C, D
Section:

QUESTION 19
McUs are registered with H.323 and need to make a request to Gk when calling a terminal using a number. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 20
SIP alone can not complete multimedia calls, must be together with other protocols to form a complete multimedia communication system, and RTP/RTCP, SDP and other protocols to complete the multimedia session process.

A. True

B. False

Correct Answer: A
Section:

QUESTION 21
A CANCEL transaction can only be sent after receiving a temporary response from INVITE (including 100), before the final response. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 22
IdeaHub's negative welcome message can be configured on the web interface.

A. True

B. False

Correct Answer: A
Section:

QUESTION 23
In cascading meetings, meeting control operations on subordinate venues are not supported. ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 24
SMC2.0 supports both separate deployment on a server and co-location with SC and EUA on a single server. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 25
When you add a service area on SMC3.0, you must specify a registration sc or you cannot create this service are a. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 26
The function of a proxy server is to forward requests or responses to clients. You can act as both the server and the client to decide on the next hop to forward the request message. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 27
SIP is an application layer protocol, independent of the following transport layer protocols, can be carried on different transport protocols, such as UDP/TCP/TLS, currently the most commonly used TCP. ()

A. True
B. False

Correct Answer: B
**Section:**

QUESTION 28
When the GE port and optical port of the VP96 series MCUs are plugged in at the same time, the GE port is preferred, but the cable is not inserted at the same time. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 29
By logging in to the SMC3.0 admin admin as a conference administrator , you can add an MCU. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 30
SMC2.0 can manage Huawei devices, such as TE series hard terminals, CloudLink series hard terminals, and VP98 series MCUs, but cannot manage friendly devices. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 31
In a dual-stream conference, you can transmit images from two video sources at the same time or see images from two video sources at the far end at the same time.

A. True
B. False

Correct Answer: A
Section:

QUESTION 32
The H323 protocol is divided into two categories: terminal control and media control.

A. True
B. False

Correct Answer: B
Section:

QUESTION 33
SIP messages are encoded as text.

A. True
B. False

Correct Answer: A
Section:

QUESTION 34
Transactions are mainly divided into four categories: INVITE transactions, non-INVITE transactions, ACK transactions and CANCEL transactions.

A. True

B. False

Correct Answer: A
Section:

QUESTION 35
In the case of unstable network environment and packet loss, packet loss recovery is carried out by SVC technology to ensure the normal progress of the conference.

A. Right

B. False

Correct Answer: A
Section:

QUESTION 36
Use a Type-C cable to connect your Touch and a power adapter to charge your Touch.

A. True

B. False

Correct Answer: A
Section:

QUESTION 37
IdeaShare screen mirroring supports reverse control, in the scene that supports collaboration, the user can control the computer being screened through the keyboard, mouse, and touch screen on the terminal side.

A. True

B. False

Correct Answer: A
Section:

QUESTION 38
IdeaHub wireless access supports 2×2 dual Wi-Fi technology, dual antenna support, and supports 2.4GHz and 5GHz dual-band wireless Wi-Fi communication mode that supports enabling both client and hot-spot.

A. True

B. False

Correct Answer: A
Section:

QUESTION 39
One-click trace diagnostic files include module log files, error reports, trace information , CHR data files, etc.

A. True

B. False

Correct Answer: A
Section:

QUESTION 40
SMC2.0 supports customizing organizational relationships according to the enterprise structure, but resources such as users, MCUs, and venues can only belong to one organization at the same time. ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 41
SMC3.0 system administrators support not only creating new meeting administrators and regular users, but also creating new system administrators.

A. True

B. False

Correct Answer: A
Section:

QUESTION 42
Users can download videos in MP4 file format online, and when the video is accompanied by a presentation of conference materials, the user cannot download the video of the presentation ().

A. True

B. False

Correct Answer: A
Section:

QUESTION 43
The brush face assist check-in function is realized through face detection and recognition technology. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 44

A. 323 Protocols are divided into two categories: terminal control and media control. ()

B. True

C. False

Correct Answer: B
Section:

QUESTION 45

SIP is an abbreviation for Session Initialization Protocol and is used for initialization.)), altering and terminating sessions of one or more participants, including multimedia conferencing, video, network calls, etc. ().

A. True

B. False

Correct Answer: A
Section:

QUESTION 46

A CANCEL transaction can only be sent after receiving an ad hoc response from INVITE (including 100), before the final response. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 47

IdeaHub's negative welcome message can be configured on the web interface.

A. True

B. False

Correct Answer: A
Section:

QUESTION 48

SIP is an application layer protocol, independent of the following transport layer protocols, can be hosted on different transport protocols, such as UDP/TCP/TLS, currently the most commonly used TCP. ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 49

The maximum number of hops specifies the maximum number of routes for a given IP traffic, with fewer routes in a meeting and greater latency. ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 50

IdealHub Pro 65" requires at least two people to install. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 51
By logging in to the SMC3.0 admin admin as a conference administrator, you can add an MCU. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 52
The following are characteristics of high-volume meetings ().

A. The back-to-back meeting format is mostly policy presentation, report
B. Generally requires multiple MCUs for cascading
C. High reliability requirements
   D Interactivity requires a low

Correct Answer: A, B, C
Section:

QUESTION 53
The VPT300 Smart Tracking Camera includes a () function.

A. Adaptive panoramic view
B. Automatically identify and track speaker
C. Voice image dual positioning
D. 360 Degree Smart Rotation

Correct Answer: A, B, C, D
Section:

QUESTION 54
Regarding te series terminal products, the following description is incorrect ().

A. Te10 video output has a maximum resolution of 720p.
B. Te20 video output has a low maximum resolution.
C. Te40/E50 video capture requires an external camera.
D. TE60 is a box terminal.

Correct Answer: B
Section:

QUESTION 55

In the following video, the smoothest picture is ().

A. Video with a frame rate of 30f/s

B. Video with a frame rate of 60f/s

C. Video with a frame rate of 50f/s

D. Video answer at a frame rate of 25f/s

Correct Answer: B
Section:

QUESTION 56

In a video conference, attendees share the whiteboard to another venue, which is done by the H.323 ( ) agreement.

A. Terminal Control Class

B. Media Control Class

C. Data Application Class

D. None of the above

Correct Answer: B
Section:

QUESTION 57

() The device is responsible for sending the broadcast venue screen to other venues.

A. GK

B. ??

C. ??

D. MCU

Correct Answer: D
Section:

QUESTION 58

The SIP response message contains the () element.

A. Request line

B. Message body

C. Message header

D. Status line

Correct Answer: B, C, D
Section:

QUESTION 59

Regarding SIP registration, the following description is incorrect?

A. Registration information must be refreshed periodically, and typically Register saves registration information to Location Server.
B. Users need to register with the server each time they power on the system.
C. Re-registration is required when the address of SIP C1ient changes.
D. The purpose of SIP registration is to bind the AOR address to a Contact address so that the Proxy can find the address of the caller when calling.

Correct Answer: D
Section:

QUESTION 60
In the header field, () is used to identify the initiator of the request.

A. CSeq
B. To
C. Via
D. From

Correct Answer: D
Section:

QUESTION 61
TE30's built-in microphone supports radio up to () within the radius.

A. 5 meters
B. 3 meters
C. 7 meters
D. 6 meters

Correct Answer: D
Section:

QUESTION 62
With regard to the President of the Conference and ordinary participants, the following description is correct ().

A. The president of the meeting supports modifying the screen layout, which is not supported by ordinary participants.
B. The president of the meeting supports turning on voice-activated switching, which is not supported by regular attendees.
C. The president of the meeting supports setting and sending subtitles, which is not supported by ordinary participants.
D. The district meeting chairman supports setting up multiple screens, which is not supported by ordinary participants.

Correct Answer: A, B, C, D
Section:

QUESTION 63
Intelligent voice assistants can perform actions.

A. Call/Cancel Call Venue
B. Join a meeting
C. Turn up/down the volume of the local venue

D. Watch the venue and multi-screen

Correct Answer: A, B, C, D
Section:

QUESTION 64
Regarding the AutoFrame feature, the following description error is ().

A. The AutoFrama feature enables automatic camera adjustments when the number of people in a meeting increases to make the camera the best field of view, and cannot automatically adjust the camera if someone leaves during the meeting.
B. When autoFrame is turned on, the camera is automatically adjusted as the number of people in a meeting increases, so that all attendees are covered in a panoramic view, eliminating the need for manual adjustments.
C. When AutoFrame is turned on, if someone leaves in the meeting, you can dynamically adjust the camera so that the remaining attendees are in the middle of the frame.
D. In AutoFrame mode, the camera PTZ is automatically adjusted to the optimal position with builtin binocular camera panorama detection.

Correct Answer: A
Section:

QUESTION 65
IdeaHub requires () information to be filled in when configuring SMC parameters.

A. Activation code
B. Server address
C. Account
D. Terminal Type

Correct Answer: A, B, D
Section:

QUESTION 66
IdeaHub's control method does not include ().

A. Touch screen
B. Touch
C. Web page
D. Remote Control

Correct Answer: D
Section:

QUESTION 67
IdeaHub has an HDMI output interface for extending dual screens and presenting venue images. The maximum resolution of the output of this interface is ().

A. 4K60
B. 1080p30
C. 1080p60
D. 4K30

Correct Answer: C
Section:

QUESTION 68
Media veneer can be inserted into the () slot of the VP9660 frame.

A. 1
B. 0
C. 10
D. 2

Correct Answer: D
Section:

QUESTION 69
TE30 has a built-in camera and microphone, which is more powerful than the average split terminal. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 70
The essence of the MCU call local terminal is the peer-to-peer call process. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 71
TE60's microphone and camera can be connected in cascade. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 72
TE Desktop supports master call sets to convene meetings. ()

A. True
B. False

Correct Answer: B

QUESTION 73

The 192.720i 60 is an intermediate way to balance the smoothness of 60 frames with the relatively low transmission load of 30 frames.

A. True

B. False

Correct Answer: A
Section:

QUESTION 74

The 96XX series MCUs default to DTME operations that support number keys. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 75

During a point-to-point number call, the called terminal does not send a call request to GK until it receives setup signaling. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 76

The SMC2.0 Unified Access number defaults to 168

A. True

B. False

Correct Answer: B
Section:

QUESTION 77

After a call set meeting is successfully held, information about the meeting will be available in the SMC's meeting list. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 78

SMC2.0 can simultaneously access Zhizhen, HD terminal venue, pad, mobile phone, wired phone, desktop UC soft terminal and so on to hold meetings together. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 79
The log files for the RSE6500 include four types: operation, system, security, and debug. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 80
TE HD endpoints do not support E1 links. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 81
E1 line dedicated, stable and reliable performance, high security, low price, simple wiring.

A. True
B. False

Correct Answer: B
Section:

QUESTION 82
The SMC supports adding a network address book on the GK, which is stored on the FTP server. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 83
After a single call establishes a media connection, two media streams are transmitted between the two H.239 terminals, and the two media streams do not share the call bandwidth.

A. True

B. False

Correct Answer: B
Section:

QUESTION 84
SEC's powerful error correction function can automatically adjust the conference rate in the case of insufficient network bandwidth, reduce data packet loss, and ensure the quality of the meeting. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 85
The meeting message of the cascade conference is sent from the master MCU to the slave MCU through the cascade port.

A. True
B. False

Correct Answer: A
Section:

QUESTION 86
In the process of main video capability negotiation, the codec protocol is an important factor affecting the choice of video format. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 87
The SMC2.0 system supports adding MCUs in three ways: auto-discovery, manageable, and unmanageable. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 88
The RSE6500 supports 1080P 60 dual-stream recording, live streaming, and on-demand ().

A. True
B. False

Correct Answer: A

QUESTION 89
TE30 does not support the miniMCU feature. ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 90
The caller set does not require a GK to call directly with an IP address.

A. True

B. False

Correct Answer: B
Section:

QUESTION 91
MCU system backup can be divided into hardware backup and data backup. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 92
There are many types and models of Huawei Zhizhen products, the first two digits of the product name are used to indicate the functional mode, and at present, TP represents immersive Zhizhen, and RP represents multi-functional Zhizhen.
()

A. True

B. False

Correct Answer: A
Section:

QUESTION 93
The HD terminal turns on the multi-view function, connects two cameras as video inputs, and the terminal mixes the two videos into one video. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 94
Large-capacity multi-point conferences are generally large-scale conferences with cross-regional and large levels, and generally need to cascade multiple MCUs to ensure sufficient capacity, and the meetings are more of a communication style between the superior and the lower level.

A. Right
B. False

Correct Answer: A
Section:

QUESTION 95
The terminal calls the conference access number, activates an ad hot conference, and the MCU allocates conference resources to start the conference, waiting for other terminals to join.

A. True
B. False

Correct Answer: B
Section:

QUESTION 96
SMC2.0 holds a configured conference access number, which is divided into a conference service number and a unified access IVR. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 97
The SMC can manage settings such as the MCU, venue, and recording server.

A. True
B. False

Correct Answer: A
Section:

QUESTION 98
By loading licenses, you can expand the capacity of the MCU and extend the functionality with business features. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 99
Huawei's Zhizhen products can be used in scenarios such as distance education, remote courtrooms, and telemedicine. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 100
Without I frames, P and B frames cannot be decoded. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 101
The 220.96XX Series MCUs support setting the IVR access number, and the participating terminals can call the IVR access number or directly call the IP address of the MCU, depending on the system The audio and video IVR guidance provided by the system can easily create a meeting or join the meeting that has been held.

A. True

B. False

Correct Answer: A
Section:

QUESTION 102
The main indicator that describes the clarity of the video is the resolution, and the main indicator that describes the fluency of the video is the frame rate. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 103
You need to set the GK name when making a point-to-point call . ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 104
On the same TV, the human eye watches 720P video, and it must not be as clear as 1080P video. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 105
The 1080P image on a 60-inch TV does not look as sharp as the 1080P image on a 42-inch TV. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 106
TE50's PSTN interface is on the PBX, te50 can get a phone number, and TE50 can also connect to voice calls while video conferencing. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 107
The 226.Q.931 protocol is transmitted on a TCP layer basis. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 108
Te Desktop dial pads can only dial numbers. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 109
When we look at the local image output of the terminal on the TV, it is the original video source image that has not been codeced. ()

A. True
B. False

Correct Answer: A

QUESTION 110
T1, a high-definition terminal that supports a built-in MCU, convenes a 3-party meeting, with T1 and T2 establishing a peer-to-peer conference before T1 calls T3 After T3 joins the meeting, the original conference resolution of T1 and T2 may be reduced. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 111
When the multiviewer setting is not performed on the venue after a meeting, the HUAWEI VP9630/50/60 does not support the automatic multiviewer function. ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 112
The 231.96XX series MCUs support a variety of common firewall traversal technologies such as standard H.460, static NAT, Huawei SNP, and dual-network port wall riding, ensuring that they are suitable for various network environments. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 113
Te Terminal can make voice calls through secondary dialing. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 114
Remote video loopback, loopback video stream through the far end of the codec processing. ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 115
Administrative meetings and popular science lectures, etc. use RSE6500 to virtually become live programs, and through the IPTV system, the conference can be broadcast live to every household in real time. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 116
SMC2.0 can manage devices such as TE terminals, MCUs, etc., but cannot manage friendly devices. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 117
There are 4 common meeting initiation methods of TP series Zhizhen , in addition to address book calls, dial call methods, there are also 2 ways of meeting records and common meetings. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 118
MCU is an AV processing and forwarding device based on the H.323 protocol, and its full name is Multi-Point Control Unit. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 119
The IMS Converged Video Solution does not include the Zhizhen system. ()

A. That's right
B. False

Correct Answer: B
Section:

QUESTION 120
TE Mobile needs to register the server before it can make a call after logging in. ()

A. True

B. False

Correct Answer: B
Section:

QUESTION 121
In a dual-stream conference, you can transmit two images of the local end at the same time or see the images of the two video sources at the far end at the same time. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 122
RSE6500 supports hot-spot videos and their sorting, hot-spot videos will be scrolled in the homepage hot-spot area, highlighting key and highlight videos, convenient for users to quickly view.

A. True

B. False

Correct Answer: A
Section:

QUESTION 123
TE Mobile can be installed on phones and tablets. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 124
The VGA loopback function of TE HD terminals is still valid in the shutdown state. ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 125
A frame of 1080P has twice the pixels of a frame of 1080i . ()

A. True

B. False

Correct Answer: A
Section:

QUESTION 126
In the 245.96XX series MCUs, the service processing board is mainly responsible for system multiscreen processing, media stream processing, and mixing processing. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 127
Multi-channel cascading, 3 terminals on the main MCU 2Mbps join, from the MCU 3 terminals 3Mbps join, each cascaded channel bandwidth is 2Mbps()

A. True
B. False

Correct Answer: B
Section:

QUESTION 128
When SMC2.0 adds a manageable venue, the SNMP V3 user authentication parameters must be consistent with here on the venue side, otherwise the venue will fail to go live. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 129
The point-to-point call rate is 2M, if the bandwidth is not reserved, the bandwidth of the main video is close to 2M before sending the dual stream, and after the dual stream is sent, the main video bandwidth is reduced, and part of the bandwidth is shared with the dual stream. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 130
The video conferencing system is generally composed of several parts, such as terminals, MCUs, gateways, and management platforms. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 131

When signaling encryption is used, the video packet of the conference is intercepted on the network, and the video data of the conference cannot be played without the key ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 132

The RAS signaling port is the UDP port. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 133

During a peer-to-peer call under different GKs, LRQ uses GK to route prefixes to the neighbor GK to query the information of the called node. ()

A. True
B. False

Correct Answer: A
Section:

QUESTION 134

The fully adapted MCU supports venue access of any protocol, format, and bandwidth, and each venue can be accessed with maximum video capabilities. ()

A. True
B. False

Correct Answer: B
Section:

QUESTION 135

() is an extension request.

A. NOTIFY
B. OFTIONS
C. MESSAGE
D. PUBLISH

Correct Answer: A, C, D
Section:

QUESTION 136

RAS (Registration Admission and Status) is a collection of signaling for interactions between ( ) .

A. Database
B. Entity
C. SMC
D. SC

Correct Answer: A, B, C, D
Section:

QUESTION 137
In the intelligent collaboration stage, what are the functional features of the video conferencing system? ()

A. The electronic name tag of the attendee can be displayed on the terminal.
B. Participants can control the terminal via voice.
C. The terminal supports whiteboard collaboration and smart writing.
D. The terminal supports intelligent guidance, providing more accurate and flexible tracking and positioning through sound source detection and sound source positioning.

Correct Answer: A, B, C, D
Section:

QUESTION 138
IdeaHub provides a whiteboard feature where the background of the whiteboard can be set to () color.

A. Dark green
B. Black
C. Gray
D. White

Correct Answer: A, C, D
Section:

QUESTION 139
Once IdeaHub is successfully activated, you can join a scheduled meeting with () one click.

A. Call Recent Call Log
B. The main caller is called the call set
C. Agenda of the session
D. Call Endpoint IP

Correct Answer: C
Section:

QUESTION 140
Regarding the 0.931 call flow, the following description is correct ().

A. ALERTING - CALL PROCEEDING - CALL SETUP (SETUP) - CONNECT - RELEASE COMPLETE)

B. ALERTING - CALL PROCEEDING - CONNECTION (CONNECT) - Setup - Release COMPLETE)

C. Call Setup (SETUP) - Call Progression (CALL PROCEEDIN) - Ringing (ALERTIN) - CONNECT - RELEASE COMPLETE)

D. CALL PROCEEDING - ALERTING - CONNECT Call Setup - Release COMPLETE

Correct Answer: C
Section:

QUESTION 141
Is the following description of a multi-stream hybrid meeting correct? ()

A. In SVC mode, each terminal only sends a small full-screen code stream to the MCU, and after the MCU receives the code stream, according to the viewing needs of each venue, the received code stream is decoded, reduced, and spliced, and each code stream is finally sent to the venue that needs to be watched.

B. CloudMCU and VP98 series MCUs support multi-stream hybrid conferencing.

C. Multi-stream hybrid conferencing supports access to SVC conference terminals and MCU conference terminals.

D. In AVC mode, each terminal sends multiple streams of different sizes to the MCU, and after the MCU receives the stream, it will receive multiple streams of different sizes in different venues according to the viewing needs of each venue. Forward directly to the venue for viewing multiple screens at the same time.

Correct Answer: A, B, C, D
Section:

QUESTION 142
Is the following description of the VP96 Series MCU correct? ()

A. HCCA is the main control board of VP9660, which can be inserted into two slots of Number 0/1 to form an active-standby relationship.

B. The VP96 series MCUs support L2654K30 video codec processing.

C. The maximum media processing power supported by a single VP9660 is 256 channels and 1080p30.

D. The VP96 series MCUs support both full switching and full adaptation modes.

Correct Answer: B, C, D
Section:

QUESTION 143
Idealub local cannot call the remote end through the venue number, and the remote cannot call the local through the venue number, which may be caused by ().

A. The call protocol is inconsistent with the registration agreement

B. The network is not connected

C. IdeaHub is not registered with the SIP/GK server

D. The call rate of the caller is higher than the maximum call rate of the called

Correct Answer: A, B, C
Section:

QUESTION 144
IdeaHub has the ultimate whiteboard experience, which mainly includes ().

A. Scan the minutes of the meeting to save

B. Handwritten fonts are automatically converted to printed

C. The writing delay is as low as 100ms

D. Meeting minutes automatically email the

Correct Answer: A, B
Section:

QUESTION 145
Regarding the smart sound screen, is the following description correct? ()

A. Click "Settings> Advanced Settings > Smart Sound Screen" to enable the Smart Sound Screen function, and you can adjust the pickup range of the Smart Sound Screen after enabling it. B. When the smart

B. screen is turned on, Ideaub automatically blocks the sound inside the sound screen, and the remote attendees only hear the members outside the sound screen.

C. The pickup range of the smart sound screen is available in 2 selectable configurations, large and small.

D. When the smart screen is turned on, Idealhb automatically blocks the sound outside the sound screen, and the remote participants only hear the members inside the sound screen to avoid noisy environmental interference.

Correct Answer: C, D
Section:

QUESTION 146
No setup () is required for point-to-point calls

A. The IP address of the peer or venue number

B. The line type

C. Speed

D. GK Name

Correct Answer: D
Section:

QUESTION 147
MCU user levels include ().

A. Meeting Operator

B. Meeting Administrator

C. System Administrator

D. General User

Correct Answer: A, B, C
Section:

QUESTION 148
In the CloudLink Edge1000 networking scenario, the maximum number of concurrent conferences supported by the system is ().

A. 150

B. 100

C. 250

D. 50

Correct Answer: C
Section:

QUESTION 149
() Only unmanageable additions to SMC2.0 are supported.

A. TE10
B. Box300
C. TP3206
D. RP100

Correct Answer: A
Section:

QUESTION 150
After IdealHub joins the conference, the remote venue cannot hear the sound of the local venue, what is the error in the following troubleshooting methods? ()

A. One-click trace diagnostic
B. Remote audio loopback
C. Local audio loopback
D. Local Video Ring Case

Correct Answer: D
Section:

QUESTION 151
The data for NLOG V2 is derived from ().

A. SMC
B. GK
C. ？？
D. MCU

Correct Answer: D
Section:

QUESTION 152
When SMC2.0 adds TE series endpoints in a manageable manner, the "username" and "password" and terminal () in the authentication information The user's user name and password are consistent.

A. web
B. api
C. debug
D. test

Correct Answer: B
Section:

QUESTION 153
A process called () is called () for return-to-recorded meetings through various platforms such as Web/pad/mobile phone/terminal

A. Live
B. On-demand
C. Recording
D. Offline transcoding

Correct Answer: B
Section:

QUESTION 154
The media processing layer includes ()

A. ??
B. SC
C. Recording server
D. Mobile Terminal

Correct Answer: A, C

QUESTION 155
AAC-LD()KHz sampled high-fidelity CD sound quality supports two channels

A. 7
B. 16
C. 48
D. 64

Correct Answer: C
Section:

QUESTION 156
The possible reason for the meeting scheduled by SMC is that it cannot be held normally( ).

A. The MCU used for the scheduled meeting is offline
B. The MCU resources used for the scheduled meeting were insufficient
C. The network failure of part of the venue for the scheduled meeting
D. Partial venue registration for the scheduled meeting GK Failed

Correct Answer: A, B
Section:

QUESTION 157
The main role of the 281.H.245 protocol is ().

A. Real-time transmission
B. Competency Consultation
C. Video encoding
D. Media Encoding

Correct Answer: B, D
Section:

QUESTION 158
SMC2.0 has a user type of ().

A. Administrator
B. Conference administrator
C. Operator
D. Admin

Correct Answer: A, B, C
Section:

QUESTION 159

A. 323 Which organization developed the standard ().
B. ITU_T
C. IEEE
D. NSI
E. ISO

Correct Answer: A
Section:

QUESTION 160
Which protocol is it part of? ()

A. H225
B. H239
C. H245
D. H281

Correct Answer: A
Section:

QUESTION 161
The default H.323 call monitoring port ().

A. 1719
B. 1720

C. 1721

D. 1729

Correct Answer: B
Section:

QUESTION 162
Ip address calls mainly include what processes ().

A. RRQ

B. Setup

C. RCF

D. Connected

Correct Answer: B, D
Section:

QUESTION 163
A down-level MCU can have () a higher-level MCU at the same time

A. 4

B. 3

C. 2

D. 1

Correct Answer: D
Section:

QUESTION 164
Switch Center is located in the video product stack at ().

A. User Access Layer

B. Media Processing Layer

C. Service support layer

D. Business Management

Correct Answer: D
Section:

QUESTION 165
TE30 and TE40 support () multiple visions respectively?

A. 1-way, 2-way

B. 2-way, 2-way

C. 2-way, 3-way

D. 3-way, 3-way

Correct Answer: B
Section:

QUESTION 166
The range of sound frequencies that the human ear can recognize is ().

A. 10~10KHZ
B. 20~20KHZ
C. 30~30KHZ
D. 90~40KHZ

Correct Answer: B
Section:

QUESTION 167
The format of the upgrade file for the MCU using the built-in web management interface is ().

A. .dat
B. .bin
C. .xml
D. .txt

Correct Answer: B
Section:

QUESTION 168
RAS is a set of signaling for interactions between ( ). Multi-select

A. SC
B. SMC
C. Section
D. Database

Correct Answer: A, C
Section:

QUESTION 169
Which of the following audio formats works best? ()

A. Has. G711
B. G722
C. G719
D. AAL_LD

Correct Answer: D
Section:

QUESTION 170
The default RAS signaling port is ().

A. 1719
B. 1720
C. 1721
D. 1729

Correct Answer: A
Section:

QUESTION 171
() Frames per second have reached basic fluency for the human eye.

A. 20
B. 30
C. 50
D. 60

Correct Answer: B
Section:

QUESTION 172
Which of the following is not a feature of TE HD terminals. ()

A. The main caller is Call set
B. Wireless dual-stream
C. Video Recording
D. Multi-vision

Correct Answer: C
Section:

QUESTION 173
In the conference call flow, the tasks of the H.245 Competency Negotiation section are ().

A. Negotiate meeting bandwidth
B. Negotiate whether to negotiate the H.323 protocol or the SIP protocol
C. Negotiate the video codec protocol
D. Negotiate video resolution

Correct Answer: C, D
Section:

QUESTION 174
() Frames per second is the limit of human eye resolution.

A. 20

B. 30

C. 50

D. 60

Correct Answer: D
Section:

QUESTION 175
In peer-to-peer meetings, the distal image of T1 is blue and T2 is normal, possibly because of ().

A. Decoding problem with T1

B. Encoding issues for T2

C. Coding issues with T1

D. Decoding question answer for T2

Correct Answer: A, B
Section:

QUESTION 176
The MCU8650C has a height of ()U

A. 1

B. 2

C. 3

D. 4

Correct Answer: A
Section:

QUESTION 177
In H.323, the Terminal Control and Management class functions as a multi-selector

A. Sending an AV stream

B. Call signaling

C. Control of the terminal

D. Negotiated to AV Capabilities

Correct Answer: B, D
Section:

QUESTION 178
HUAWEI TP3206 is mainly composed of () and () two parts.

A. Rack

B. Office chair

C. Multi-functional conference table

D. television set

Correct Answer: A, C
Section:

QUESTION 179
LRQ means ().

A. Node registration request
B. Node exit request
C. Node Positioning Request
D. Node logout request

Correct Answer: C
Section:

QUESTION 180
The reason for the RSE6500 transcoding is () multiple selection

A. The recorded video and audio protocol of the recorded meeting and the video and audio protocol of the playback are inconsistent
B. The video-audio format of the recorded meeting and the video-audio format of the playback are inconsistent with
C. Hardware requirements for recording and broadcasting servers
D. MCU Hardware Requirements

Correct Answer: A, B
Section:

QUESTION 181
Which of the following boards is the main control board of the VP9630 . ()

A. ECCA
B. ECCB
C. ECCC
D. GCCD

Correct Answer: C
Section:

QUESTION 182
The SMC2.0 server's Ethernet port LED flashes. ()

A. Corresponding to the Gigabit Ethernet port
B. of the back panel The Network Port connection is normal
C. The ethernet port is transmitting data
D. The network port is not used

Correct Answer: C

Section:

QUESTION 183
The RSE6500 is a boxed multimedia video conferencing server that looks like an MCU().

A. VP9620

B. VP9630

C. VP9650

D. VP9660

Correct Answer: B
Section:

QUESTION 184
The DTMF function of the 310.96XX Series MCU Numeric Keys can be changed by using the following () keys to change the multiviewer mode of the venue port. ()

A. 2

B. 4

C. 6

D. 8

Correct Answer: A, D
Section:

QUESTION 185
The following is a video system audio codec protocol. ()

A. WMA

B. MP3

C. AAA_LD

D. G728

Correct Answer: C, D
Section:

QUESTION 186
Ad hot meeting rooms are a way to activate a meeting and join a meeting via the () side.

A. MCU B. SMC

B. Terminal

C. GK

Correct Answer: C
Section:

QUESTION 187
The sample rate of the G728 audio algorithm is (KHZ).

A. 7

B. 8

C. 16

D. 48

Correct Answer: B
Section:

QUESTION 188
The format of the log exported by the MCU is ().

A. dat

B. bin

C. xml

D. txt

Correct Answer: A
Section:

QUESTION 189
The maximum resolution supported by TE Desktop is ().

A. 4CIF

B. 1024 768

C. 720P

D. 1080P

Correct Answer: D
Section:

QUESTION 190
The default value for the conference service number is ()

A. 9000

B. 168

C. 8000

D. 1000

Correct Answer: B
Section:

QUESTION 191
GK issues an address resolution request to other GKs, and the signaling sent is ().

A. GRQ

B. RRQ

C. URQ

D. LRQ

Correct Answer: D
Section:

QUESTION 192
By default, enter the IP address of the () port when logging on to the MCU's web page.

A. FE

B. RS232

C. GE0

D. GE1

Correct Answer: C
Section:

QUESTION 193
The format of the License file is ().

A. .txt

B. .Cape

C. .dat

D. .xml

Correct Answer: C
Section:

QUESTION 194
The 320.H.323 standard belongs to the () network

A. Light Exchange

B. Packet-switched

C. Link Switching

D. Circuit-switched

Correct Answer: B
Section:

QUESTION 195
The business boards for mcUs of the 321.96XX series include ().

A. GCCA

B. GPUX

C. Media

D. ISDN

Correct Answer: B, C, D
Section:

QUESTION 196
The main encryption methods of video systems are ().

A. Signaling encryption
B. User Encryption
C. Line Encryption
D. Media Encryption

Correct Answer: A, C, D
Section:

QUESTION 197
Huawei Video MCU accesses the network in the following ways ( ).

A. IP
B. E1
C. 4E1
D. 3G

Correct Answer: A, B, C
Section:

QUESTION 198
Increase the audio sample rate and will ().

A. Requires more load bandwidth
B. Requires more codec resources
C. Reduces sound latency
D. Closer to the original sound effect

Correct Answer: A, B, D
Section:

QUESTION 199
The network traversal modes supported by the 96XX series MCUs are ().

A. H460
B. Static NAT
C. Huawei SNP
D. GRE Tunnel

Correct Answer: A, B, C
Section:

QUESTION 200
The MCU is in () in the video product stack

A. User Access Layer
B. Media Processing Layer
C. Service support layer
D. Business Management

Correct Answer: B
Section:

QUESTION 201
Regarding the frame rate of the image, the following statement is correct ().

A. When the frame rate reaches 20fps , the picture seen by the human eye is continuous.
B. The human eye does not perceive the difference between a frame rate of 60fps and a frame rate of 30fps.
C. The human eye does not perceive the difference between a frame rate of 90fps and a frame rate of 60fps.
D. When the frame rate reaches 30fps, the picture seen by the human eye is continuous.

Correct Answer: C, D
Section:

QUESTION 202
Device management is achieved by communicating with the SMC and the device (venue, MCU) via the () protocol.

A. IP
B. TCP
C. SNMP
D. H323

Correct Answer: C
Section:

QUESTION 203
The main functions of GK ().

A. Address Translation
B. Conference Control
C. Bandwidth Management
D. Access Control

Correct Answer: A, C, D
Section:

QUESTION 204
When the RSE6500 is recording on a single point, the terminal implements the recording function by calling ().

A. Venue number
B. Unified Recording Number
C. Recording server IP
D. Venue name

Correct Answer: B
Section:

QUESTION 205
H323 nodes include the following types ( ) .

A. ??
B. MCU
C. ??
D. GK

Correct Answer: A, B, C
Section:

QUESTION 206
The advanced user rights for the RSE6500 include ().

A. Watch all videos
B. Download all videos
C. Upload the video
D. Post video

Correct Answer: A, B
Section:

QUESTION 207
The following is the () that belongs to the Framework Agreement on Video Systems

A. H323
B. H320
C. SIP
D. BFCP

Correct Answer: A, B, C
Section:

QUESTION 208
The MCU VP9630-8 has a processing capacity of 8-way 1080P30 full adaptation, which can be connected to () channel 1080P60 fully adaptable, and can also be connected to () channel 720P fully adapted to the venue.

A. 4.6
B. 4.8
C. 4.16

D. 4.10

Correct Answer: C
Section:

QUESTION 209
The product type selected when upgrading the codec of Huawei TP Series Zhizhen products is ().

A. VCT
B. TP
C. MCU
D. GK

Correct Answer: A
Section:

QUESTION 210
The MCU node number after the meeting, consisting of () and ().

A. MCU prefix
B. Subconference No.
C. Service area code
D. Venue Number

Correct Answer: A, B
Section:

QUESTION 211
Among the following application modes, () video conferencing has the highest interactivity requirements.

A. Peer-to-peer mode
B. Small-capacity multipoint conferencing
C. High-capacity multipoint conferencing
D. Cascading meetings

Correct Answer: A
Section:

QUESTION 212
The 338.96XX family of MCUs can be upgraded using ().

A. Built-in web upgrade
B. Command line upgrade
C. USB upgrade
D. SMC Management Interface Upgrade

Correct Answer: A, B, D

Section:

QUESTION 213
Te Desktop and TE Mobile support protocols are ().

A. H323
B. SIP
C. H264
D. BFCP

Correct Answer: B, C, D
Section:

QUESTION 214
The sample rate used by the 340.G.728 audio algorithm is () KHZ.

A. 7
B. 8
C. 16
D. 48

Correct Answer: B
Section:

QUESTION 215
The TP3206 represents a third-generation () screen six-seat immersive conference system.

A. 2
B. 3
C. 4
D. 5

Correct Answer: B
Section:

QUESTION 216
Which of the following ways can you schedule a recorded meeting ().

A. Video telephony direct dispatch
B. SMC direct dispatch
C. Zhizhen venue scheduling
D. MCU scheduling

Correct Answer: B, C, D
Section:

QUESTION 217

96XX Series MCUs When configured to support FECC DTMF remote control, you need to press the () key before you can control the camer a.

A. Confirm key
B. Dial key
C. Hang up key
D. Magnification key

Correct Answer: D
Section:

QUESTION 218
The 96XX series MCUs support different multiviewers for each venue in the same meeting, a feature called ().

A. Auto Multiviewer
B. Manual multiviewer
C. Multi-screen
D. per port Venue multi-screen

Correct Answer: C
Section:

QUESTION 219
Terminal T1 calls terminal T2's number 002 and cannot successfully establish the call for possible reasons ().

A. Terminal T1 or terminal T2 is not registered with GK
B. Terminal T1 is set up to Do Not Disturb
C. Terminal T1 is on the public network, and terminal T2 is on the private network
D. Terminal T2 goes to sleep

Correct Answer: A, C
Section:

QUESTION 220
The MCU ride-on mode usually needs to be configured with ().

A. GE0 operating mode
B. GE0 network parameters
C. GE1 network parameters
D. GE1 Working Mode

Correct Answer: B, C, D
Section:

QUESTION 221
On the Call Status page of the TE terminal, the information that can be queried is ().

A. Video Rate

B. Audio Rate

C. Video Frame Rate

D. Audio Protocol

Correct Answer: A, B, C, D
Section:

QUESTION 222
Call set is a way to convene a meeting provided by Huawei's video system, allowing users to define and hold a multi-point meeting like a phone call.

A. Platform side

B. Terminal side

C. MCU

D. Multipoint Management Resource Center

Correct Answer: B
Section:

QUESTION 223
Syslog format for SMC2.0 export is ().

A. EXCEL

B. TXT

C. CSV

D. XML

Correct Answer: C
Section:

QUESTION 224
Which of the following interfaces can transmit AV signals simultaneously. ()

A. DVI

B. HDMI

C. VGA

D. S-video

Correct Answer: B
Section:

QUESTION 225
The advantages of IP over E1 are ().

A. Stable bandwidth

B. QOS is guaranteed

C. Data confidentiality, better security

D. low cost, line shareable

Correct Answer: D
Section:

QUESTION 226
The integration of H.323-based video conferencing systems with PSTN systems requires ().

A. GW
B. GK
C. MCU
D. Terminal

Correct Answer: A
Section:

QUESTION 227
The FE port on the front panel of the MCU is ().

A. Maintaining the ethernet port
B. Service Network Port
C. Back up the network port
D. Master control network port

Correct Answer: A
Section:

QUESTION 228
After SMC Server adds a built-in GK, the GK cannot go live for possible reasons ().

A. The address of SMC Server changes
B. GK connection passwords are inconsistent
C. Multiple IP addresses exist in SMC Server , resulting in GK addresses not being unique
D. No GK prefix added

Correct Answer: A, B, C
Section:

QUESTION 229
U is a unit that represents the external dimensions of the server, is an acronym for unit, and 1U equals () centimeters.

A. 4.356
B. 4.445
C. 5.675
D. 5.245

Correct Answer: B
Section:

QUESTION 230
The number of meetings required for automatic cascading is ().

A. 1
B. 2
C. 3
D. 4

Correct Answer: A
Section:

QUESTION 231
The forms of subtitles supported by TE Series terminals are ().

A. Center
B. Bottom
C. Banner
D. Top

Correct Answer: A, B, C
Section:

QUESTION 232
After the meeting is recorded, the system automatically transcodes the live streaming resources when there is room for them, so that the resources of the RSE6500 are fully utilized, a process known as this ()?

A. Live
B. Recording
C. Offline transcoding
D. On demand

Correct Answer: C
Section:

QUESTION 233
The call list is divided according to the call mode. ()

A. Peer-to-peer talk list
B. Original Talk List
C. Multi-order
D. Final call

Correct Answer: A, C
Section:

QUESTION 234
In SMC2.0 Template Management, the types of templates that can be added are included. ()

A. MCU templates
B. GK Template
C. Venue templates
D. Recording server

Correct Answer: A, C
Section:

QUESTION 235
In the MCU built-in web page of the Settings Management Export item, the following cannot be exported is ().

A. ？？
B. License
C. Gateway/MCU Configuration
D. Status table

Correct Answer: D
Section:

QUESTION 236
The following belongs to HD resolution is ()

A. 2560*1440
B. 1024*768
C. 720P
D. 1080P

Correct Answer: B, C, D
Section:

QUESTION 237
The following is the dual-stream protocol that is ().

A. H225
B. H245
C. H239
D. BFCP

Correct Answer: C
Section:

QUESTION 238
What are the advantages of Huawei's video system compared to video chat software? ()

A. Perfect management platform
B. Customized system solutions
C. Provides dual streaming for desktop sharing

D. Large conference capacity

Correct Answer: A, B, D
Section:

QUESTION 239
At present, the resolution of video systems can be up to ().

A. 1280*720
B. 1080P
C. 1920*1080
D. 2560*1440

Correct Answer: B, C
Section:

QUESTION 240
Which of the following interfaces supports audio signals ().

A. DVI
B. HDMI
C. S-VIDEO
D. RCA

Correct Answer: B, D
Section:

QUESTION 241
In SMC2.0, the permissions of a normal user do not include ().

A. Meeting Control
B. Venue Management
C. MCU Management
D. Meeting scheduling

Correct Answer: C
Section:

QUESTION 242
The RSE6500 repackaged the corresponding high/standard-clear on-demand files and sent them to the conference terminal via the () protocol. ()

A. H323
B. H239
C. RTP
D. SIP

Correct Answer: C

Section:

QUESTION 243
When there is a secondary stream of Zhizhen single-point meeting recording, RSE6500 records the () of Zhizhen venue

A. Left screen stream
B. Medium screen code stream
C. Right screen stream
D. Secondary flow

Correct Answer: B, D
Section:

QUESTION 244
Te Mobile supports the following calling methods: ().

A. Call
B. from the address Call history
C. Dial pad
D. Voice call

Correct Answer: A, B, C
Section:

QUESTION 245
The MCU 8650C supports the types of networking. ()

A. IP
B. E1
C. 4E1
D. All of the above

Correct Answer: A
Section:

QUESTION 246
Which of the following modes of the HD camera is used to configure whether the camera forwards the infrared signal to the terminal. ()

A. IR
B. VIDEO
C. FLIP
D. MCU

Correct Answer: A
Section:

QUESTION 247

The single board of the 373.96XX series MCUs includes ().

A. GCCA
B. GCCB
C. ECCA
D. ISDN

Correct Answer: C, D
Section:

QUESTION 248
The main role of the gateway is ()

A. Streams and Protocol Conversion
B. Node management
C. Audio Codec
D. Meeting Control

Correct Answer: A
Section:

QUESTION 249
Enterprise construction of conference television system, MCU and business system in the private network, public network terminal access, at this time if the realization of two different network segments of the terminal equipment between the multi-media communication, you can set the MCU GE1 working mode as ().

A. Back up
B. Ride the wall
C. Dynamically switch
D. Load sharing

Correct Answer: B
Section:

QUESTION 250
For a registration request initiated by a terminal to GK, the signaling sent is ().

A. GRQ
B. RRQ
C. URQ
D. ARQ

Correct Answer: B
Section:

QUESTION 251
In the 86XX series MCU clipboard, the gusset responsible for the system's AV signal stream processing is ().

A. HDPA

B. POEA

C. GWBA

D. VOBA

Correct Answer: A
Section:

QUESTION 252
In T1, T2, T3, T4 four-point meetings using the 96XX Series MCUs, manually set up the venue T1 After T2 and T3 form three screens, after the venue T1 leaves the meeting, the position of the atomic screen T1 will be ().

A. Replace with T4

B. Remain unchanged

C. Black screen

D. Replace with T2

Correct Answer: C
Section:

QUESTION 253
Te HD terminals support upgrades. ()

A. Local upgrade

B. USB flash drive upgrade

C. SMC Bulk Upgrade

D. Minimum System Upgrade

Correct Answer: A, C, D
Section:

QUESTION 254
Hardware backups of the MCU are included. ()

A. Main control board

B. Business Board

C. Power supply

D. Fan

Correct Answer: A, B, C
Section:

QUESTION 255
In SMC2.0, the permissions of a meeting administrator include ().

A. Meeting Control

B. Venue Management

C. MCU Management

D. User Management

Correct Answer: A, B, C
Section:

QUESTION 256
The video output of TE40, the output GUI interface is ().

A. Video output 1
B. Video output 2
C. Video output 3
D. S-video

Correct Answer: A, B, C
Section:

QUESTION 257
What are the public and private network crossing methods of video systems? ()

A. Static NAT mode
B. H460 mode
C. SIP mode
D. H323ALG Method

Correct Answer: A, B, D
Section:

QUESTION 258
The protocol that can implement media control is ().

A. H225
B. H239
C. H245
D. H281

Correct Answer: C
Section:

QUESTION 259
Among the following end products, there are all-in-one designs (integrated microphones, cameras, codecs, etc.).

A. TE10
B. Box600
C. TE20
D. Bar300

Correct Answer: B, D

Section:

QUESTION 260
Regarding the video conferencing mode, the following description is correct?

A. In the high-volume conference mode, meeting management personnel are generally not required.
B. In the peer-to-peer conference mode, the number of participants is small and the interactivity is high.
C. Small-capacity conferencing requires the MCU to provide media resources.
D. In general, the interactivity requirements of peer-to-peer meetings and small-capacity conferences are higher than those of large-capacity conferences.

Correct Answer: C, D
Section:

QUESTION 261
The new generation of RoomPresence series terminals uses Huawei's unique AAC-LD three-channel technology and co-optical core technology.

A. True
B. False

Correct Answer: A
Section:

QUESTION 262
Large-capacity meetings are attended by a large number of people, so the need for interactive communication is the highest.

A. True
B. False

Correct Answer: B
Section:

QUESTION 263
When the terminals deployed on the private and public networks need to communicate, they need to be done through the ( ) device.

A. Recording server
B. SMC
C. Terminal
D. SC

Correct Answer: D
Section:

QUESTION 264
Among the following terminal products, ( ) belongs to Zhizhen terminal.

A. Bar300
B. TE10

C. RoomPresence 65S

D. IdeaHub

Correct Answer: C
Section:

QUESTION 265
The role of the RTCP protocol is ( ).

A. Streaming

B. Ability set

C. Call Signaling

D. Transmission Control

Correct Answer: D
Section:

QUESTION 266
( ) The device is responsible for sending the broadcast venue screen to other venues.

A. Terminal

B. MCU

C. ??

D. GK

Correct Answer: B
Section:

QUESTION 267
( ) belongs to the extension request.

A. PUBLISH

B. OPTIONS

C. NOTIFY

D. MESSAGE

Correct Answer: B
Section:

QUESTION 268
A message is the basic unit of the SIP protocol, the basic unit of interaction between the client and the server.

A. True

B. False

Correct Answer: A
Section:

QUESTION 269
Response messages are used in response to request messages that indicate the success or failure status of the call. The different types of response states are distinguished by a status code that contains a three-digit integer, the first bit of which defines the response type, and the other two digits for further detailed description of the response.

A. True
B. False

Correct Answer: A
Section:

QUESTION 270
Of the six basic request messages, ( ) is used to query server capabilities.

A. INVITE
B. REGISTER
C. ACK
D. OPTIONS

Correct Answer: D
Section:

QUESTION 271
The SIP protocol is a ( ) protocol.

A. Application layer
B. Data Link Layer
C. Transport layer
D. Network Layer

Correct Answer: A
Section:

QUESTION 272
Regarding the voice call feature, what is the following description error?

A. After a voice call, the call is automatically initiated if there is only one recognition result, and if there are two or more recognition results, it appears in the list and is not initiated until the user selects it.
B. Voice call mode supports point-to-point calling, multipoint calls need to be operated on the terminal Veb interface.
C. Speech recognition technical support Chinese point-to-point voice calls under the interface, which can recognize the name of the venue spoken by the user.
D. Voice call mode not only supports peer-to-peer voice calls, but also supports initiating multipoint meetings through conference templates.

Correct Answer: B
Section:

QUESTION 273
Regarding voice switching, is the following description correct?

A. Voice-activated switching is mostly used in educational lecture scenarios.

B. When the voice switching function is turned on, the screen of all venues will automatically switch to the venue with the loudest volume.

C. In the meeting, you can adjust the sensitivity of the voice switching without turning off the voice switching function.

D. Voice control switching is mostly used for discussion or debate scenes.

Correct Answer: A, C, D
Section:

QUESTION 274
Regarding the operation of the Mic 500 , is the following description correct?

A. Press and hold the button in the center of the Mic 500 disc for more than 10 seconds to turn the microphone on or off.

B. When multiple Hic 500s are cascaded, press the key in the center of one of the Mic 500 discs and the other Mic 500s cascaded on or off at the same time.

C. The microphone can be turned on or off via the remote control of the video conferencing terminal, Touch or Tob interface configuration.

D. Before the video conferencing terminal is used with a single Mic 500, the HD-VI interface of the video conferencing terminal needs to be connected to the interface marked "IN" of the Mic 500.

Correct Answer: B, C, D
Section:

QUESTION 275
Through the COM port cable to connect the RS-232 control interface of the HD camera and the COM port of the HD terminal , it can realize the remote control of the camera pan/tilt/zoom, preset position, etc. of the HD terminal, COM The length of the port cable is fixed and cannot be extended.

A. True

B. False

Correct Answer: B
Section:

QUESTION 276
Regarding the wired sharing method, is the following description correct?

A. The wired sharing mode supports access to the computer through the HDMT interface and the sharing of the computer desktop.

B. After the plug and play function of shared materials is enabled, regardless of whether there is a venue in the meeting or not, you need to select the shared materials to the remote venue according to the interface prompts.

C. The wired sharing mode supports access to the computer through the HD-VI interface and the sharing of the computer desktop.

D. When shared materials plug and play is turned on, you can share your computer desktop content without additional action, regardless of whether there is a meeting where materials are being shared.

Correct Answer: A
Section:

QUESTION 277
Regarding the VPT300 auto-tracking mode, what is the error described below?

A. The VPT300 automatically tracks panoramas, parts, or speakers in auto-track mode and combines picture-in-picture settings to deliver the best picture results.

B. In the auto track mode, the VPT300 automatically recognizes the two-person dialogue, and the bipartition screen displays the interlocutor.

C. VPT300 In auto-track mode, close-up speakers when speaking alone or in an orderly manner by multiple people.

D. In auto-track mode, the VPT300 features speakers when speaking simultaneously over a wide range or speaking quickly alternately.

Correct Answer: D
Section:

QUESTION 278
After Joining IdeaHub , the remote images seen locally are blurry, mosaic, solidified, discontinuous, etc., which of the following reasons may be caused?

A. The terminal example network egress is busy, resulting in only a relatively low video bandwidth obtained locally.
B. The video camera on this end is malfunctioning.
C. Packet loss exists in the network between the endpoint and the MCU.
D. The far-end video camera is malfunctioning.

Correct Answer: A, B, C, D
Section:

QUESTION 279
Before the meeting, a basic check of the Idealub is generally required to ensure that it can be used normally. Basic pre-sessional checks include ( ).

A. Network status check
B. Server registration status check
C. Output port status check
D. Input port status check

Correct Answer: A, B, C, D
Section:

QUESTION 280
IdeaHub supports a variety of troubleshooting methods, through the Web diagnostic function can achieve network detection, route testing, sound testing, color bar testing and other functions, you can quickly locate problems.

A. True
B. False

Correct Answer: A
Section:

QUESTION 281
The ultra-low writing latency of whiteboards is one of 1deaHub's key competencies.

A. True
B. False

Correct Answer: A
Section:

QUESTION 282
When giving a functional demonstration to the customer, the ( ) function is not necessary.

A. Version upgrade

B. App Marketplace

C. Whiteboard and mirror

D. Negative one screen wallpaper

Correct Answer: A
Section:

QUESTION 283
IdeaHub has ( ) HDMI input and output interfaces.

A. 1

B. 3

C. 2

D. 4

Correct Answer: B
Section:

QUESTION 284
After IdeaHub is successfully activated, you can join the scheduled meeting with the click of ( ).

A. Call Recent Call Log

B. Call Terminal IP

C. Caller Call Set

D. Meeting Schedule

Correct Answer: D
Section:

QUESTION 285
In a fully adapted MCU conference, the MCU allocates image codec resources to each venue individually.

A. True

B. False

Correct Answer: A
Section:

QUESTION 286
Is the following description of the VP96 Series MCU network access characteristics correct?

A. When the electrical port and the optical port are plugged in at the same time, the electric port is used preferentially.

B. The FE port and the GEO port are mutually backup, providing network port backup function.

C. GEO is a service network port that is used for signaling and media streaming communications in the MCU.

D. When the MCU is connected to the network, the network cable needs to be connected to the FE port.

Correct Answer: C

Section:

QUESTION 287
Is the following description of the VP98 Series MCUs correct?

A. The VP9850 provides a 4*GE ethernet card and an outgoing 1000Mbps Ethernet port.
B. The VP98 series is a box MCU that supports "1+1" power module backup.
C. The VP98 series MCUs provide a 1000Mbps Ethernet port for server device management.
D. Huawei VP98 series MCUs have 4K full-edit and full-solution processing capabilities.

Correct Answer: A, B, C, D
Section:

QUESTION 288
In a one-way live meeting scenario, TE60 can be connected to the meeting as an auditor.

A. True
B. False

Correct Answer: A
Section:

QUESTION 289
The VP98 series MCUs are multimedia switching platforms based on Huawei's self-developed Kunpeng chips and () operating systems.

A. VxWorks
B. Yindows
C. Linux
D. openEuler

Correct Answer: D
Section:

QUESTION 290
A large training institution intends to build a new set of Huawei video conferencing system, according to the construction plan, the system should be able to provide one-way live conference function for remote training, in the MCU equipment selection, you can consider ( ).

A. VP9650
B. VP9660
C. VP9860
D. VP9630

Correct Answer: D
Section:

QUESTION 291
The system structure of SMC2.0 mainly consists of ( ).

A. Background service
B. Third-party application
C. Database
D. Web Server

Correct Answer: A, C, D
Section:

QUESTION 292
SMC2.0 deployment requires a ( ) database.

A. Microsoft SQL Server
B. Oracle
C. MySQL
D. GaussDB

Correct Answer: A
Section:

QUESTION 293
What is the following statement about KU resource pools correct?

A. When the resources of a single MCU in the region are insufficient, the two MCUs with the most abundant resources in the priority area are cascaded.
B. In the same service area, the system will preferentially select the MCU with the same prefix and the most abundant resources for venue access.
C. SUC3.0 unifies the management and scheduling of MCUs to achieve load balancing, sharing, and redundant backup of MCU resources.
D. The system matches the number prefix of the service area with the terminal number and determines the NCU resource pool that the terminal preferentially accesses.

Correct Answer: A, B, C, D
Section:

QUESTION 294
After the free discussion mode is enabled on the SMC3.0 conference interface, what is the following description incorrect?

A. Microphones and loudspeakers for all meeting rooms or attendees will be turned on.
B. In addition to the Chair's Room, microphones from other conference rooms or attendees will be turned off.
C. Turn off the microphones of all conference rooms or participants.
D. In addition to the speech venue, the microphones of other conference rooms or participants will be muted.

Correct Answer: A, C, D
Section:

QUESTION 295
System administrators and meeting administrators log in to SMC3.0 by entering the IP address/sysportal of https://SMC3.0 in the address bar of the browser and logging in.

A. True
B. False

Correct Answer: A
Section:

QUESTION 296
Regarding the SMC3.0 Backup Service Area, is the following description correct?

A. Multiple backup service areas can be configured for a service area.
B. When the conference resources in this service area are insufficient, the system will use the conference resources in the corresponding backup service area.
C. Each service area must be configured with a backup service area.
D. The default Default service area of the system must be configured with the backup service area.

Correct Answer: B
Section:

QUESTION 297
Regarding C1oudRSE's on-demand and live streaming capabilities, is the following description correct?

A. When users want to play dual-stream video, support one-click layout switching, and can switch between video and conference materials.
B. CloudRSE cannot switch video formats (HD or SD) when watching live or on-demand.
C. Users do not need to install a plug-in to watch live and on-demand videos on CloudRSE.
D. CloudRSE supports video and conferencing materials in a full-screen, picture-in-picture layout.

Correct Answer: A, B, C, D
Section:

QUESTION 298
In a video conference, the camera ( ) feature is used to close-up a participant.

A. Pangraphic localization
B. WDR
C. Large wide angle
D. Lens zoom

Correct Answer: A, B, D
Section:

QUESTION 299
In settled networking, SC can provide ( ) functions.

A. Media processing
B. H.323 Register
C. Bandwidth Management
D. SIP Register

Correct Answer: B, C, D
Section:

QUESTION 300
The terminal uses VME technology to adapt to different network conditions and carry out data transmission.

A. True
B. False

Correct Answer: A
Section:

QUESTION 301
Users cannot initiate a multipoint conference through huawei video conferencing terminals.

A. True
B. False

Correct Answer: B
Section:

QUESTION 302
Regarding the image resolution, what is wrong with the following statement?

A. The "p" in 0p indicates interlacing.
B. The more pixels the image displayed on the screen, the sharper the image effect.
C. 4CIF belongs to the SD resolution.
D. 1080p resolution images contain approximately 2 megapixels.

Correct Answer: B
Section:

QUESTION 303
The main features of Gatekeeper are ( ).

A. Conference Control
B. Access Control
C. Bandwidth Management
D. Address Translation

Correct Answer: B, C, D
Section:

QUESTION 304
Regarding the RAS message, is the following statement correct?

A. Endpoint registration messages can be used for terminal switching capabilities, encryption, and so on.
B. Call acceptance information is used for terminal call request authentication.
C. Status queries are used by GK to query the current state of an entity.
D. Endpoint positioning is used to confirm address information across multiple GKs.

Correct Answer: A, B, C, D
Section:

QUESTION 305
In the SMC2.0 networking scenario, the meeting control message of the cascade conference is sent from the primary MCU to the slave MCU through the cascade port.

A. True
B. False

Correct Answer: A
Section:

QUESTION 306
In a cascade meeting, the media flow from the lower venue to the higher venue is ( ).

A. Broadcast venue - superior MCU - subordinate MCU - superior venue
B. Broadcast venue - subordinate MCU - superior MCU - superior venue
C. Broadcast venue - Superior MCU - Superior venue
D. Broadcast Venue - Subordinate MCU - Superior Venue

Correct Answer: B
Section:

QUESTION 307
The terminal needs to determine the destination address of the media transmission before transmitting the video information, which is completed by H.245 () signaling.

A. Competency consultation
B. Close logical channel
C. Master-slave decision
D. Open Logical Channel

Correct Answer: A
Section:

QUESTION 308
For a rejection response to a registration request sent by GK to the terminal, the signaling sent is ( ).

A. ARJ
B. GRJ
C. RRJ
D. URJ

Correct Answer: C
Section:

QUESTION 309
SDP It is not a transport protocol, it uses the appropriate protocol to get the job done, including protocols such as ( ).

A. SIP

B. H.323

C. HTTP

D. SAP

Correct Answer: A, B, C, D
Section:

QUESTION 310
In the Client/Server model, the primary function of request proxy server is to decide where to send signaling messages.

A. True

B. False

Correct Answer: A
Section:

QUESTION 311
SDP (Session Description Protocol) is a transport layer control protocol used to describe multimedia sessions.

A. True

B. False

Correct Answer: A
Section:

QUESTION 312
In the header domain, ( ) is used to represent the SIP entity through which the request passes and the route response.

A. From

B. To

C. Via

D. CSeq

Correct Answer: A
Section:

QUESTION 313
Multi-stream forwarding conference only completes video forwarding on the MCU side, and does not need to perform video codec conversion, and the video codec and multi-screen layout are completed by the terminal side.

A. True

B. False

Correct Answer: A
Section:

QUESTION 314

Te terminals hold 1080p 30fps conferences and require at least ( ) bandwidth.

A. 1Mbps
B. 2Mbps
C. 512Kbps
D. 1.5lMbps

Correct Answer: C
Section:

QUESTION 315
What checks do I need to do if I see a black screen in a meeting?

A. Check whether the HD-AI cable is working properly.
B. Whether the monitor cable is loose.
C. Check if the HDMI cable is working properly.
D. Check whether the status of the video access source is normal.

Correct Answer: A, B, C, D
Section:

QUESTION 316
When SVC conferencing, the terminal sends up to 4 video streams to the CloudMCU/VP98 series MCU, including ( ).

A. Subflow 1 way, mainstream 3 way
B. Secondary 3-way, mainstream 1-way
C. Mainstream 4-way
D. Secondary 2-way, mainstream 2-way

Correct Answer: A
Section:

QUESTION 317
In IdeaHub's whiteboard interface, the whiteboard content can be erased by means of ( ).

A. Finger Erase
B. One-click Screen Clearing
C. Palm Erase
D. Fist Erase

**Correct Answer: A, B, C, D**
Section:

QUESTION 318
IdeaHub local cannot call the remote end through the venue number, and the remote cannot call the local through the venue number, which may be caused by ( ).

A. The call rate of the caller is higher than the maximum call rate of the called

B. Idealub is not registered with the SIP/GK server

C. The call protocol is inconsistent with the registration protocol

D. The network is not connected

Correct Answer: B, C, D
Section:

QUESTION 319
Idealub has the ultimate whiteboard experience, which mainly includes ( ).

A. Scan the minutes of the meeting to save

B. Meeting minutes are automatically emailed

C. Handwritten fonts are automatically converted to printed body

D. The writing delay is as low as 100ms

Correct Answer: A, C
Section:

QUESTION 320
The pickup range of the IdeaHub Smart Sound Screen is not adjustable.

A. True

B. False

Correct Answer: B
Section:

QUESTION 321
Keytrace diagnostic files include module log files, error reports, trace information, CHR data files, and so on.

A. True

B. False

Correct Answer: A
Section:

QUESTION 322
For endpoints within the same subnet, Idealub can use IP directly for point-to-point calls.

A. True

B. False

Correct Answer: A
Section:

QUESTION 323
IdeaHub S 86 "Touch screen maximum resolution rate ( ).

A. 1080p30

B. 4K60

C. 4K30

D. 1080p60

Correct Answer: B
Section:

QUESTION 324
The IdeaHub Pro 65" touchscreen has a maximum resolution of ( ).

A. 4K60

B. 1080p60

C. 4K30

D. 1080p30

Correct Answer: A
Section:

QUESTION 325
Regarding the feature description of IdeaHub's openness, is the following description correct?

A. Idealub does not support open SDKs

B. The industries that IdeaHub can apply do not include smart finance, smart teaching, smart healthcare, etc.

C. IdeaHub supports optional OPS modules to extend Windows

D. Third-party applications may not access IdeaHub hardware peripherals and audio and video codec capabilities.

Correct Answer: C
Section:

QUESTION 326
Regarding IdeaHub Configuration Backup and Restore, what is the following description error?

A. IdeaHub supports exporting backup files from a USB flash drive.

B. IdeaHub supports configuration file backup export via web pages.

C. IdeaHub only supports backing up one copy of the configuration file, if you have backed it up before, the previous backup file will be overwritten when you back up again.

D. IdeaHub click on"maintenance>Configuration management>Backup & Maintenance>backup", the backup configuration file is automatically stored in the terminal file system.

Correct Answer: B
Section:

QUESTION 327
After IdeaHub starts, it cannot successfully register with GK The following possibility analysis error is ( ).

A. The registered account or password is incorrect

B. Register server address or port error

C. SIP option off

D. H.323 Option Close

Correct Answer: C
Section:

QUESTION 328
The venue network is normal, the MCU can be connected normally through the IP address of the MCU, but the MCU IVR access number cannot be accessed by dialing the MCU, the possible reason is that the MCU cannot be accessed.

A. No meeting time.
B. CU Insufficient resources.
C. The venue is not registered with GK.
D. The MCU IVR access number has changed.

Correct Answer: A, B, C, D
Section:

QUESTION 329
The Media board of the VP96 series MCUs can complete the adaptation of audio and video media, and the single Media board supports ( ) 1080p30 media processing capacity up to a maximum of 1080p30.

A. 32
B. 64
C. 24
D. 12

Correct Answer: A
Section:

QUESTION 330
( ) is a multiviewer mode supported by cloudMCU.

A. Divided into 24 screens
B. A large number of small Ontable modes
C. Divided into 9 screens
D. Divided into 16 screens equally

Correct Answer: A, B, C, D
Section:

QUESTION 331
After modifying the "networking mode", the VP98 series MCU requires a server restart to take effect.

A. True
B. False

Correct Answer: A
Section:

QUESTION 332
During SVC conferences, the terminal sends up to the MCU( ) code stream, including secondary streams and mainstream streams, with resolutions between 90p and 720p.

A. 2
B. 4
C. 6
D. 8

Correct Answer: B
Section:

QUESTION 333
What is the following description of the VMR meeting incorrect?

A. A VRM number can only support one meeting at a time.
B. All VMR meetings require the meeting to be activated before the other venues can be enrolled.
C. VMR conferencing does not consume the MCU's resources when it is not activated.
D. When adding a venue on SMC2.0, you can configure the VMR number directly for the terminal.

Correct Answer: A
Section:

QUESTION 334
SMC2.0 supports inspection types of devices including ( ).

A. Terminal
B. SC
C. MCU
D. Recording

Correct Answer: A, C, D
Section:

QUESTION 335
SMC2.0 scheduled meetings can not be held normally, what are the possible reasons?

A. Registration for GK at some venues for the scheduled meeting failed.
B. Some of the venue network failures for the scheduled meeting.
C. The MCU resources used for this scheduled meeting are insufficient.
D. The MCU used for the scheduled meeting is offline.

Correct Answer: A, B, C, D
Section:

QUESTION 336
( ) Only unmanageable additions to SMc2.0 are supported.

A. TE10

B. P3206

C. Box300

D. RP100

Correct Answer: A
Section:

QUESTION 337
A company is now going to hold a provincial seminar that requires the City A Convention Center and the City B Conference Center to join in. A City Convention Center commonly uses the A meeting template to hold meetings, and the center commonly uses the B meeting template to hold meetings.
From the perspective of feasibility and ease of operation, ( ).

A. Adhoc

B. VR dial-up to

C. The main caller is called the call set

D. Multi-level conference

Correct Answer: D
Section:

QUESTION 338
SMC3.0 supports multiple ways to create meetings, including ( ).

A. SMC Platform Call

B. Adhoc

C. OA Plugin

D. Call set

Correct Answer: A, B, C, D
Section:

QUESTION 339
Regarding SMC3.0 conference room distribution, is the following description correct?

A. SMC3.0 supports managing meeting rooms in both organizational and regional ways.

B. SMC3.0 supports the provisioning of new meeting rooms in both manageable and unmanageable ways.

C. Manage meeting rooms by organizational mode, which by default can only be viewed by users under the organization and the parent organization.

D. By default, meeting rooms are managed organizationally and are available as public meeting rooms for all users.

Correct Answer: A, B, C
Section:

QUESTION 340
When you create a normal user on SMC3.0 , you must bind a soft terminal to the user.

A. True

B. False

Correct Answer: B
Section:

QUESTION 341
SMC3.0 provides the function of terminal management, and the communication protocol used between the SMC and the terminal is ( ).

A. Telnet
B. TR069
C. CMIP
D. SNMP

Correct Answer: D
Section:

QUESTION 342
SMC3.0 provides device management capabilities that can manage up to ( ) SPs.

A. 64
B. 128
C. 256
D. 32

Correct Answer: A
Section:

QUESTION 343
Regarding CloudRSE, is the following description correct?

A. CloudRSE can provide video conferencing single-stream, dual-stream (video image + conference data sharing) recording and broadcasting.
B. The CloudRSE power supply supports 1+1 hot backup, seamlessly switching to a backup power source in the event of a failure, ensuring consistent and reliable recording.
C. CloudRSE supports resource pool management, and the CloudRSE in the resource pool is mutually backupable, and the resource pools cannot be backed up to each other.
