Number: Desktop Certified Associate
Passing Score: 800
Time Limit: 120
File Version: 1.0

Exam Code: Desktop Certified Associate

Exam Name: Tableau Desktop Certified Associate

Exam A

QUESTION 1

Connect to the 'Global Superstore' data source and use the Orders table. Create a view showing sales over continuous months, find out which trend line model type provides the lowest R-squared value?

- A. Linear
- B. Exponential
- C. Polynomial, Degree 2
- D. Polynomial, Degree 3

Correct Answer: A

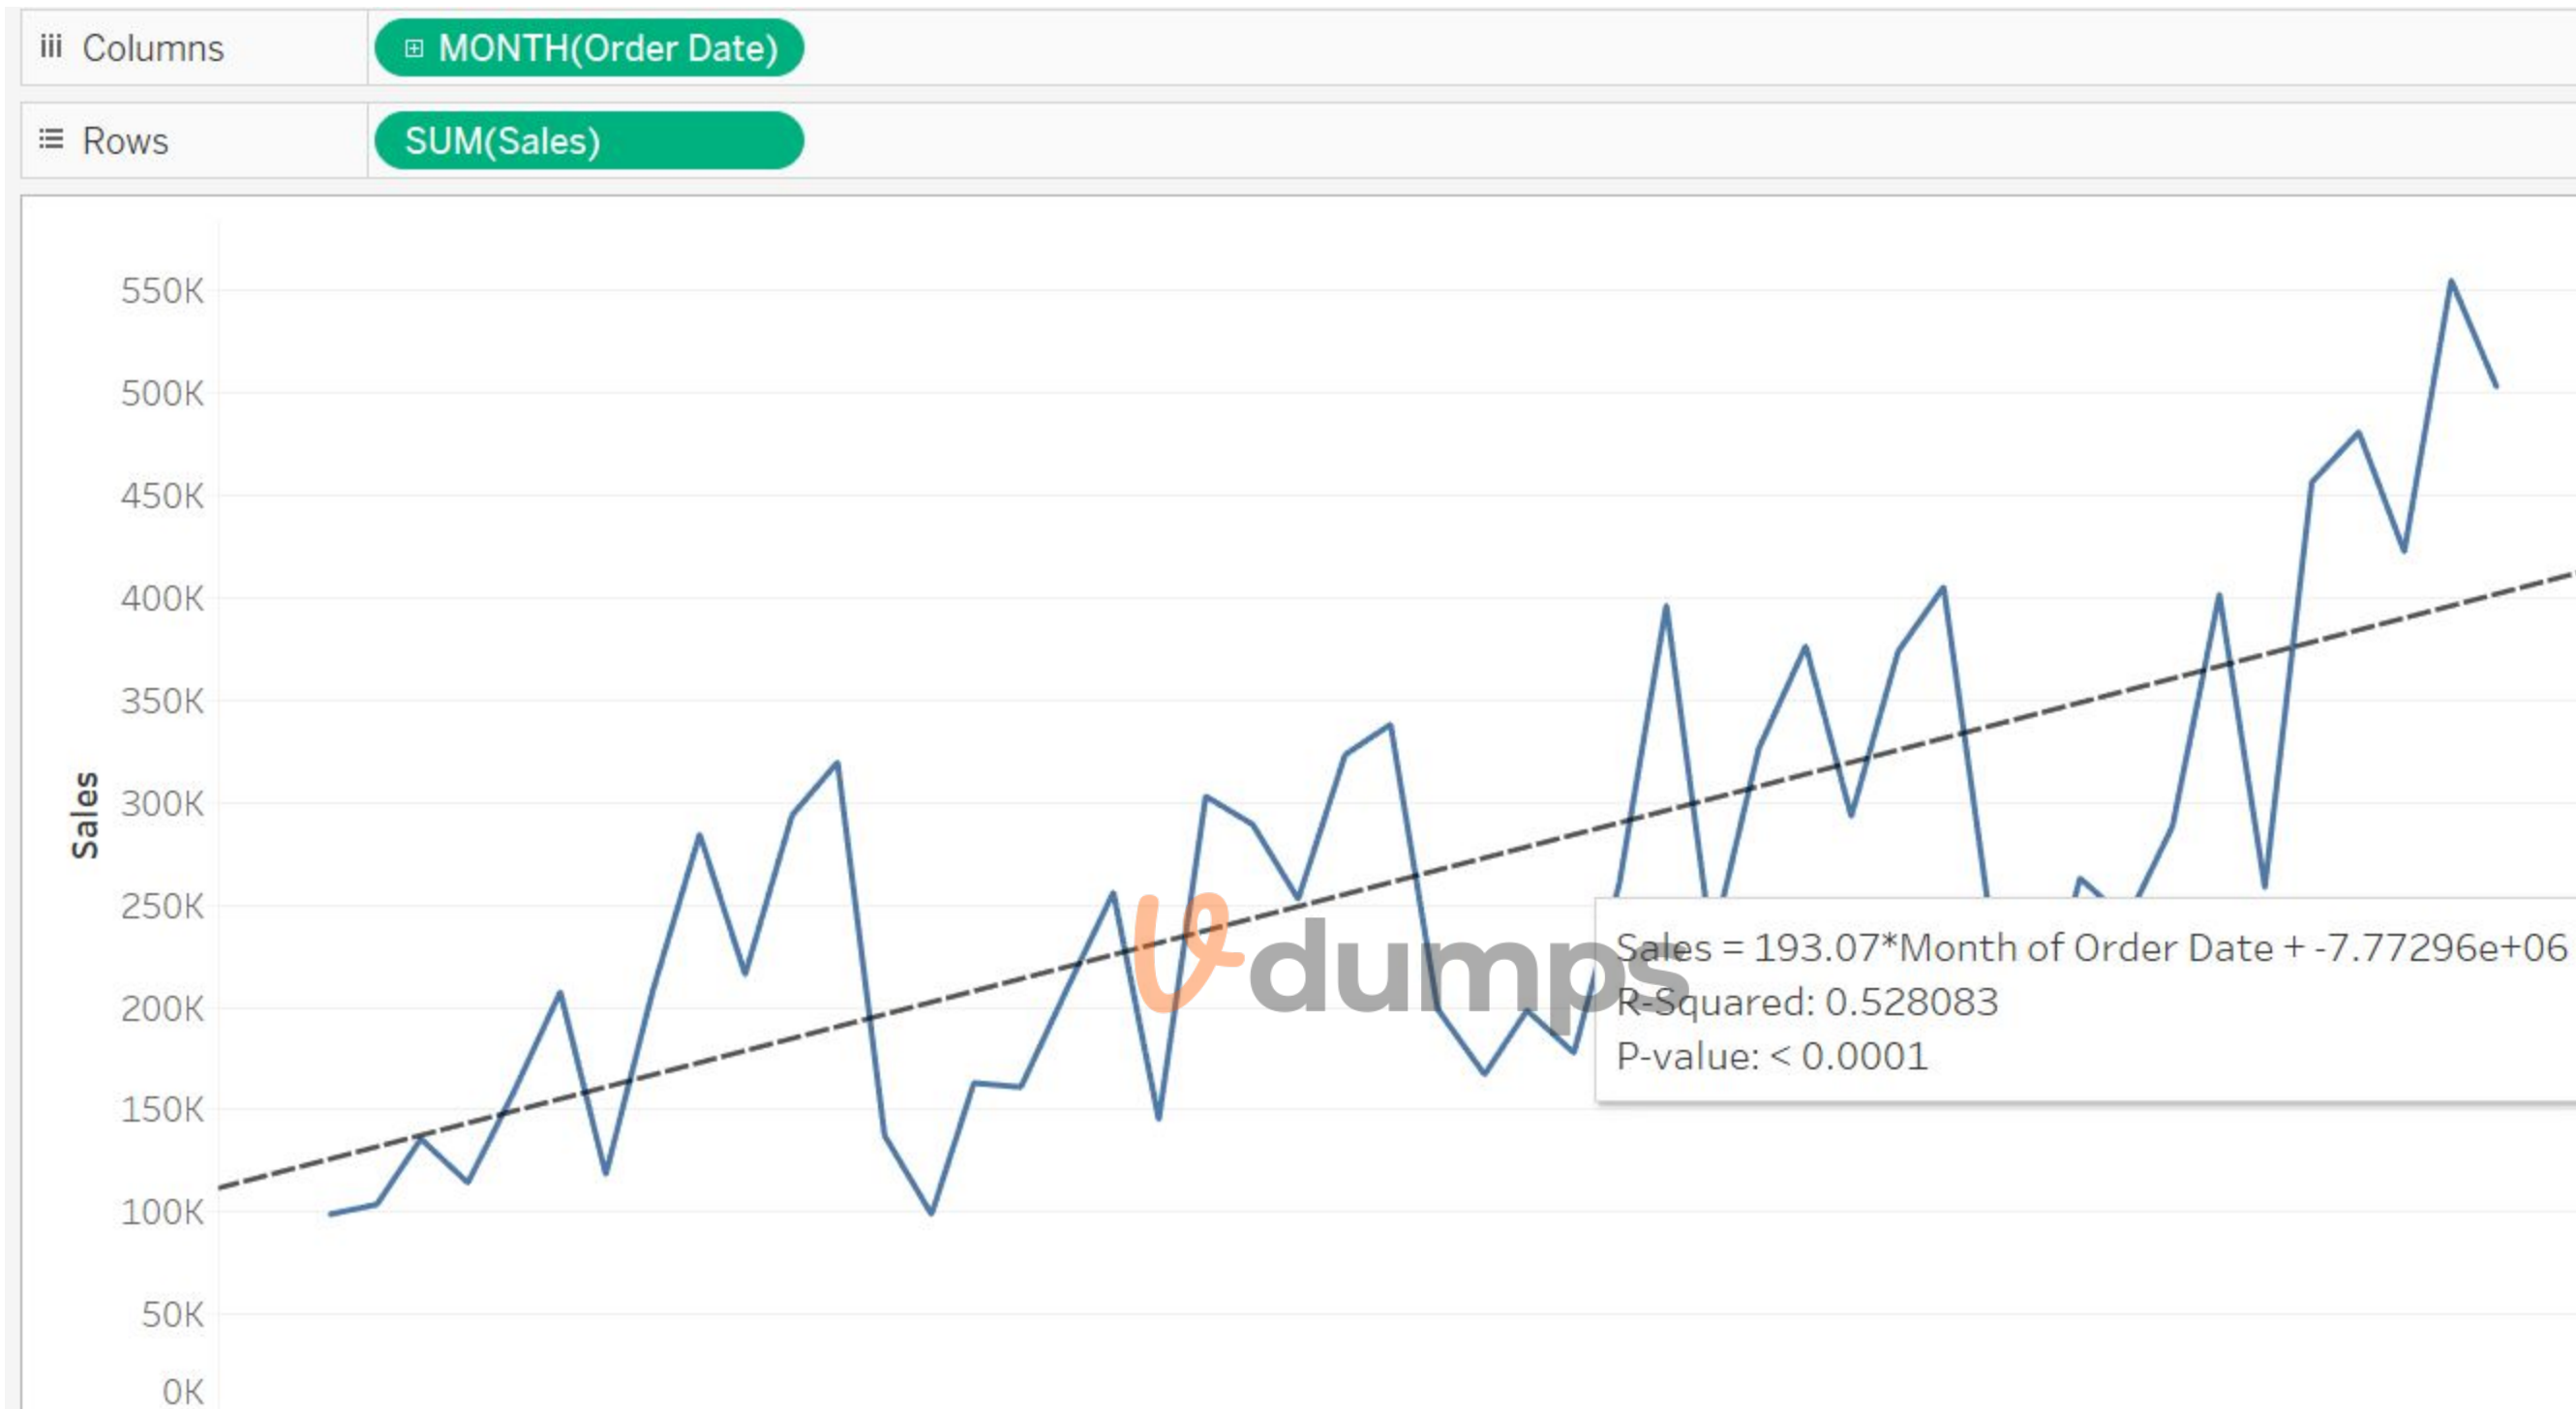

Section:

Explanation:

Drop Order Date to the Columns and change it to continuous month. Drop sales to the rows.

Go to Analytics and drop the trend line. Check for all trend lines, Linear is having the lowest R Square.

QUESTION 2

Connect to the 'Covid data' source. Create a line chart using continuous months and new deaths. Find the Excess Kurtosis for the sum of new deaths.

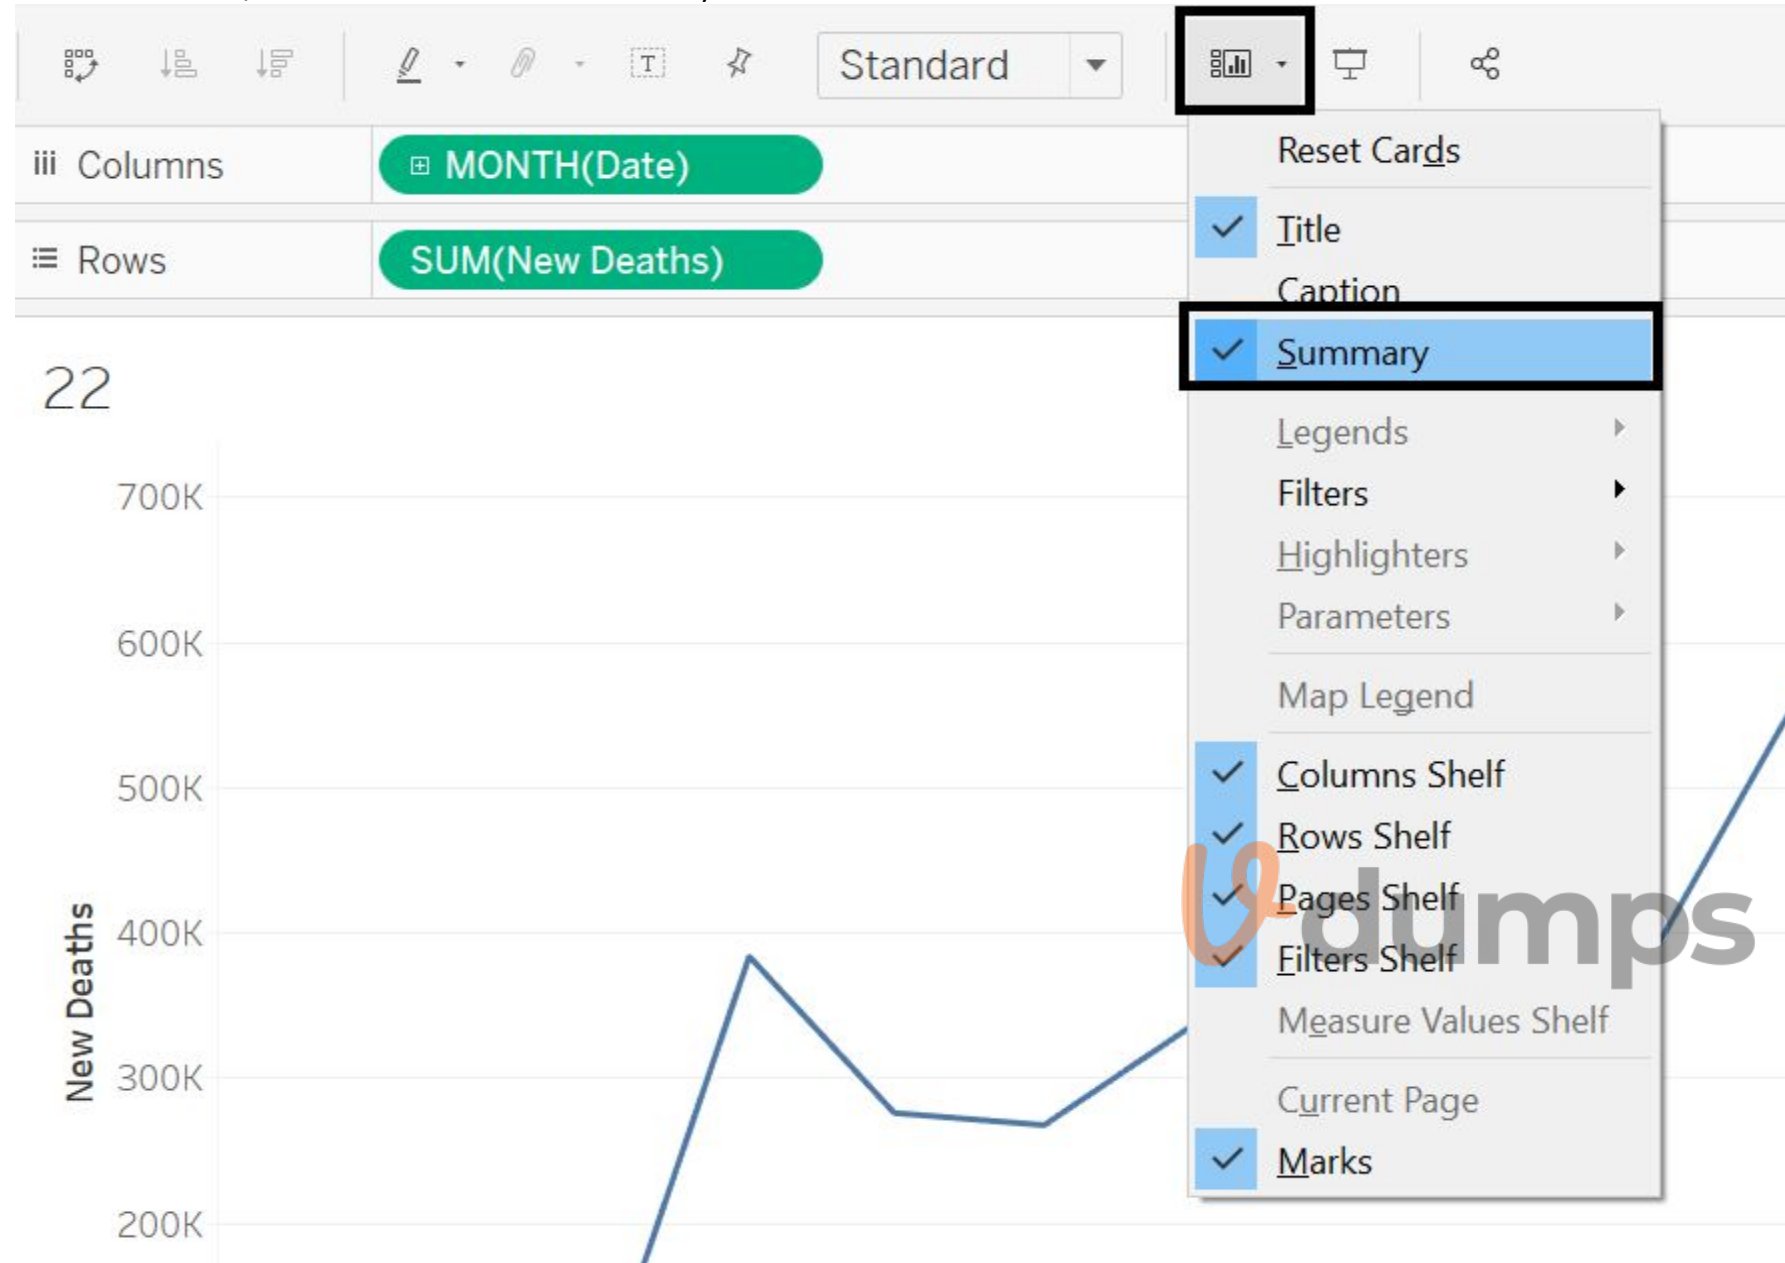

- A. -0.56
- B. -0.67
- C. -0.69
- D. -0.58

Correct Answer: B

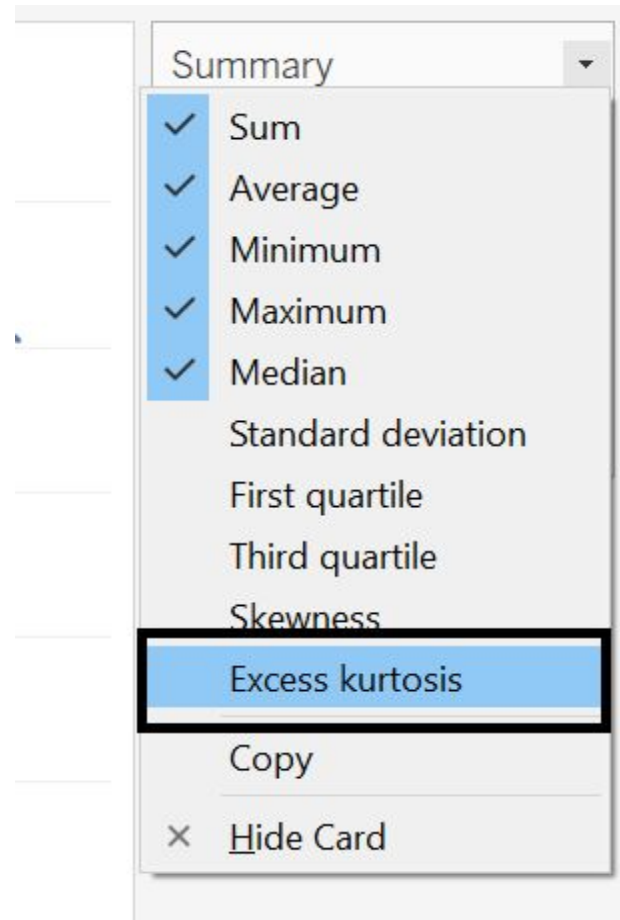

Section:

Explanation:

Drop the Date to the columns and select the continuous month. Drop New Deaths to rows. Click on the Show/Hide card and enable the Summary Card.

You will see the Summary Card on the right, if Excess Kurtosis is not enabled, click on the drop-down and select the Excess Kurtosis.

QUESTION 3
Connect to the 'Global Superstore' data source and use the Orders table. Create a hierarchy of Segment, Category, Region. Create a crosstab using this hierarchy and add profit, profit ratio fields. Which of the following are true from the below options?

- A. The overall lowest profit ratio is of Central Asia region in Furniture Category and Corporate segment (among all the segments)
- B. The Southern US is having the third-lowest profit ratio in Technology Category in Home Office Segment and it is having a profit value of \$765
- C. The Central Africa region is having a profit value of \$10,709 in the Office Supplies category in the Corporate Segment
- D. The overall highest profit ratio is of North Africa region in Technology Category and Corporate segment (among all the segments)

Correct Answer: A, B

Section:

Explanation:

Create a hierarchy of Segment, Category, Region and drop it into the rows.

▼ Region, Segment

Abc Segment

Abc Category

Abc Region

Create profit ratio calculated field:

profit ratio

Orders (global_superstore)

SUM([Profit])/SUM([Sales])

Drop the profit and profit ratio fields to the view, your view will look like this:

Segment	Category	Region	Profit	profit r..
Consumer	Furniture	Eastern Europe	10,423	26.62%
		Eastern Africa	4,337	25.17%
		Central Africa	6,316	24.85%
		Southern Africa	2,515	23.41%
		Canada	1,658	22.42%
		North Africa	7,365	22.32%
		Eastern Asia	25,984	17.78%
		Southern Asia	26,530	16.93%
		Northern Europe	11,979	14.29%
		Southern Europe	10,079	11.25%
		Oceania	20,045	9.06%
		Central America	17,945	7.72%
		Caribbean	4,346	7.30%
		Western Europe	18,274	7.26%
		Southern US	4,611	6.51%
		Western US	4,266	3.57%
		Eastern US	2,002	1.75%
		South America	1,390	1.04%
		Southeastern As..	-1,491	-0.91%
		Central US	-3,990	-4.63%
		Central Asia	-275	-18.85%
		Western Asia	-9,080	-20.93%
		Western Africa	-11,598	-57.34%
Office		Canada	4,456	26.23%
Supplies		Eastern Europe	12,591	24.85%
		North Africa	11,662	24.67%
		Central Africa	6,813	23.98%

Now let's go through each answer option.

1) The overall lowest profit ratio is of Central Asia region in Furniture Category and Corporate segment - The profit ratio is -142.26% which is lowest overall so it is true.

- 2) The Southern US is having the third-lowest profit ratio in Technology Category in Home Office Segment and it is having a profit value of \$765 - It is true, the profit ratio is 2.06%, which is third-lowest.
- 3) The Central Africa region is having a profit value of \$10,709 in the Office Supplies category in the Corporate Segment - False, it is having a \$2,245 profit.
- 4) The overall highest profit ratio is of North Africa region in Technology Category and Corporate segment - False
- Note: This is an easy question but time consuming, so attempt these types of questions in the end.

QUESTION 4

How can we add Visualization in a tooltip?

- A. Go to the Tooltip on the marks card, and click insert -> sheets
- B. Go to the Worksheet menu, click on Tooltip and click Insert -> sheets
- C. Go to the Format menu, click on Tooltip and click Insert -> sheets
- D. Right Click on the view, Tooltip and add insert -> sheets

Correct Answer: A, B

Section:

Explanation:

Only 1 and 2 options are correct.

For these types of questions, please take the help of the Tableau software during your exam.

QUESTION 5

Connect to the 'Significant Volcano Eruption' data source. How many volcano eruptions took place in Luzon island of the Philippines in the 21st century in the first six months of each year?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: C

Section:

Explanation:

Add year and location filter as:

Filter [Year]

Range of values At least At most Special

Range of values

2,000 2,014

-4360 2014

Show: Only Relevant Values Include Null Values

So, 3 volcano eruptions took place in Luzon island of the Philippines in the 21st century in the first six months of each year. You can also use the map view to get the results, here I added the month filter as well and drop the count of records to the text.

QUESTION 6

Blend the Significant Volcano Eruption dataset with the Country population dataset using year and country. Find out which country is having 4 volcano eruptions in the year 1963 and what was the population of this country in the same year?

- A. Indonesia and 95,055,669
- B. Japan and 96,812,000
- C. Indonesia and 9,103,406,453
- D. Japan and 9,103,406,453

Correct Answer: A

Section:

Explanation:

Add the Country population excel sheet as a New Data Source.
Select column 1960 to 2013, click on Pivot.

Sort fields Data source order Show aliases Show hidden fields 215 rows

Country Co...	Indicator N...	Indicator C...	1960	1963	1964	1965	1966	1967	1968	1969

Rename the new fields as Year and population.
Go to Data ->Edit Blend Relationship
Click on Custom and Add

Blend Relationships

Blend relationships determine how data from secondary data sources are joined with primary data sources.

Primary data source:
volerup (significantvolcanoeruptions)

Secondary data source: Automatic Custom

Data (Country-Population)	Country	Country Name
	Year	Year

Add... Edit... Remove

OK Cancel

Ensure the blend relationship exists in Country & Country Name, and year & year between primary and secondary data sources. Drop the year to the filters shelf and only enter 1963.

Filter [Year]

Range of values At least At most Special

Range of values

1,963 1,963

-4360 2014

Show: Only Relevant Values Include Null Values

Reset OK Cancel Apply

Drop Country and Number of Records / volerup(Count) field to the view. And drop population to the view from the secondary data source. Your view will look like this:

The screenshot shows the Tableau Desktop interface. On the left, the 'Dimensions' shelf contains Country Code, Country Name, Indicator Code, Indicator Name, Year, and Measure Names. The 'Measures' shelf contains Population, Latitude (generated), Longitude (generated), Number of Records, and Measure Values. The central Marks card is set to 'Automatic' and includes Color, Size, Text, Detail, and Tooltip. The right pane shows the Columns shelf with 'Measure Names' and the Rows shelf with 'Country'. The main view displays a table with the following data:

Country	Number of ..	Population
Chile	1	8,237,555
Costa Rica	1	1,484,512
Guatemala	1	4,476,923
Indonesia	4	95,055,669

QUESTION 7

How to create custom territories on a map?

- A. Create a territory from a geographic field
- B. By using a background image on a map
- C. Select and group locations on a map
- D. Geocode a territory field using another geographic field

Correct Answer: A, C, D

Section:

Explanation:

Refer: https://help.tableau.com/current/pro/desktop/en-us/maps_custom_territories.htm

QUESTION 8

Using which options you can automatically add the phone layouts on your dashboard?

- A. choose Dashboard > Add Phone Layouts to Existing Dashboards
- B. In device preview mode, check the Tableau mobile app
- C. choose Dashboard > Add Phone Layouts to New Dashboards
- D. Select Size and then choose Phone

Correct Answer: A, C

Section:

Explanation:

Automatically add phone layouts

Two options let you automatically add phone layouts:

To create phone layouts whenever you open old dashboards that lack them, choose Dashboard > Add Phone Layouts to Existing Dashboards

To create phone layouts whenever you create a new dashboard, choose Dashboard > Add Phone Layouts to New Dashboards. (This option is on by default.)

Refer: https://help.tableau.com/current/pro/desktop/en-us/dashboards_dsd_create.htm

QUESTION 9

Using the Profit Analysis Dashboard twbx file, find out the 5th most profitable product in the state of New York? You can add the functionality to the dashboard.

- A. GBC DocuBind TL300 Electric Binding System
- B. Canon imageCLASS 2200 Advanced Copier
- C. Fellowes PB500 Electric Punch Plastic Comb Binding Machine with Manual Bind
- D. HP Designjet T520 Inkjet Large Format Printer - 24" Color

Correct Answer: A

Section:

Explanation:

Select New York State, you are getting only 3 products, and not 5.

Profit Analysis Dashboard

Select the year

Select the region

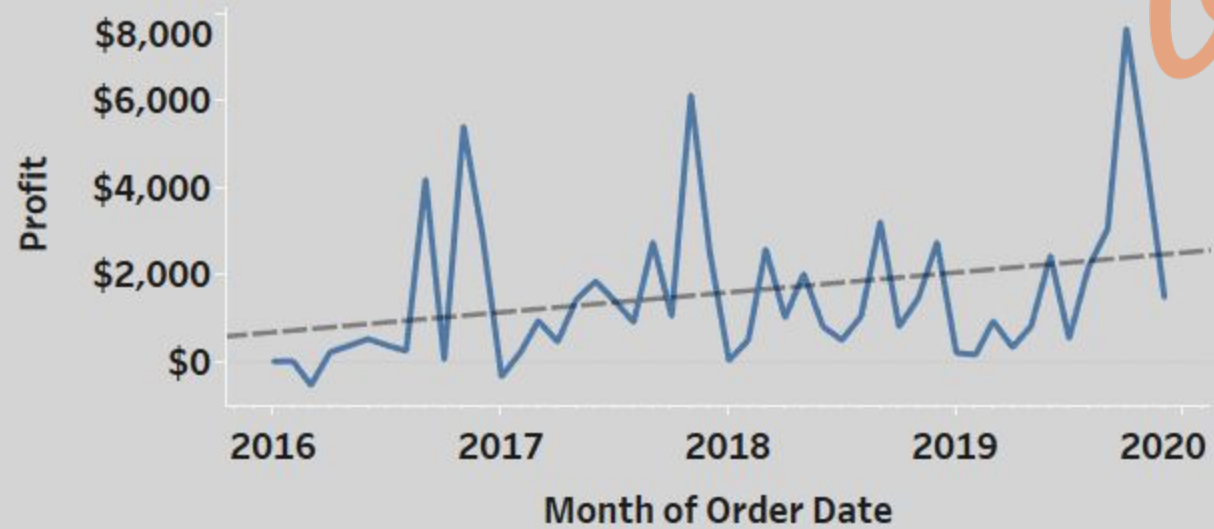

- (All)
- Central
- East
- South
- West

Profit by State

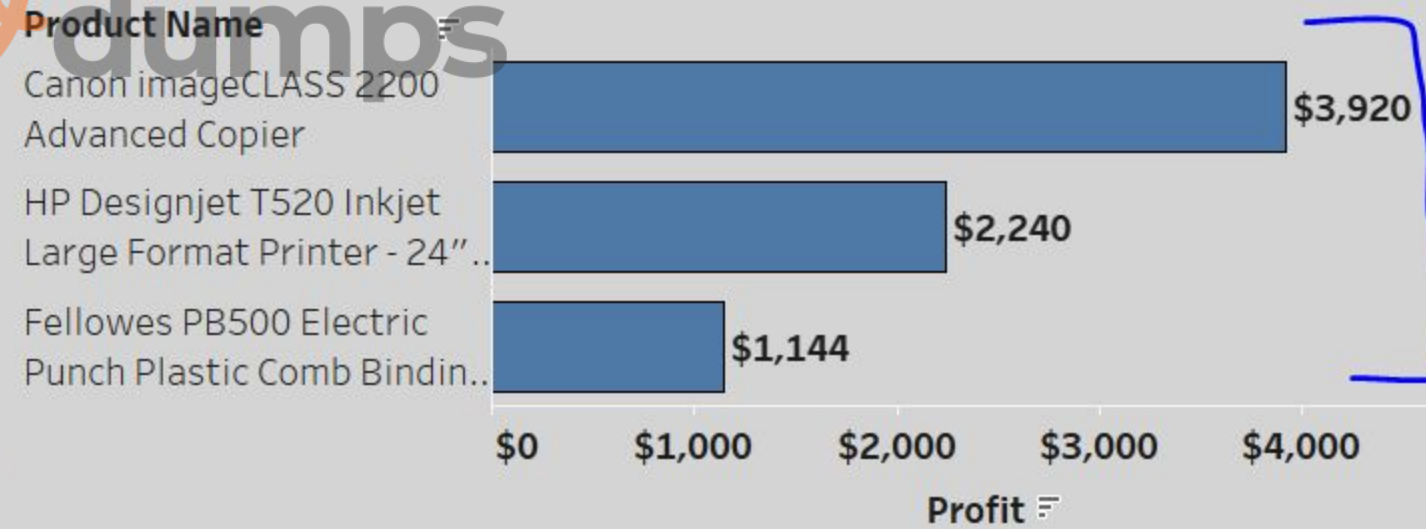

Select the state(s) on the map to drill down

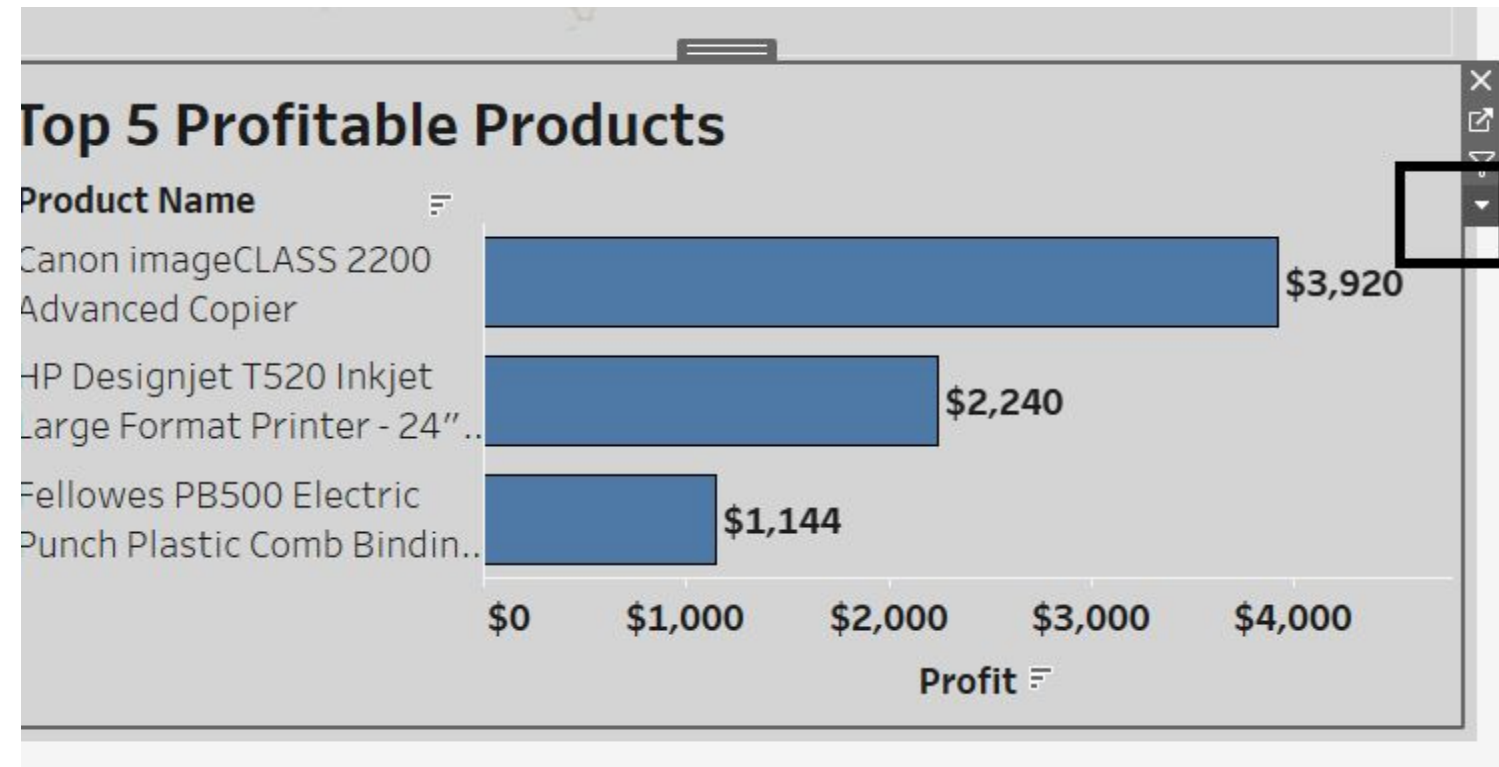

Profit over time

Top 5 Profitable Products

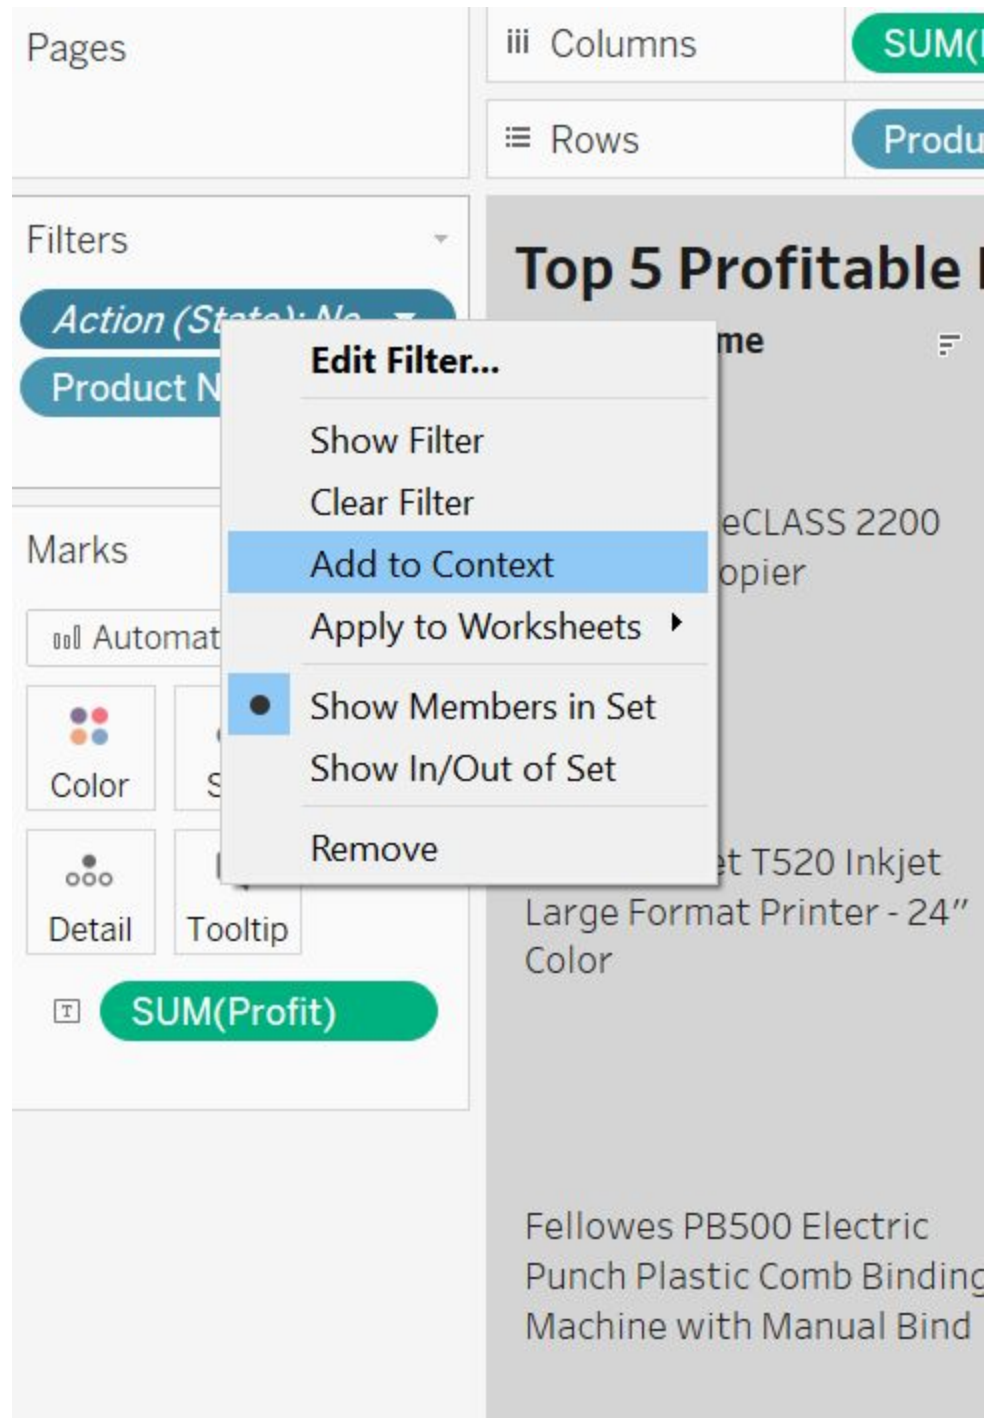

You need to add State as a Context filter in the Top 5 profitable products View. For that, go to the Top 5 profitable products sheet. (click on small arrow)

Select Add to Context on the State filter

 **vdumps**

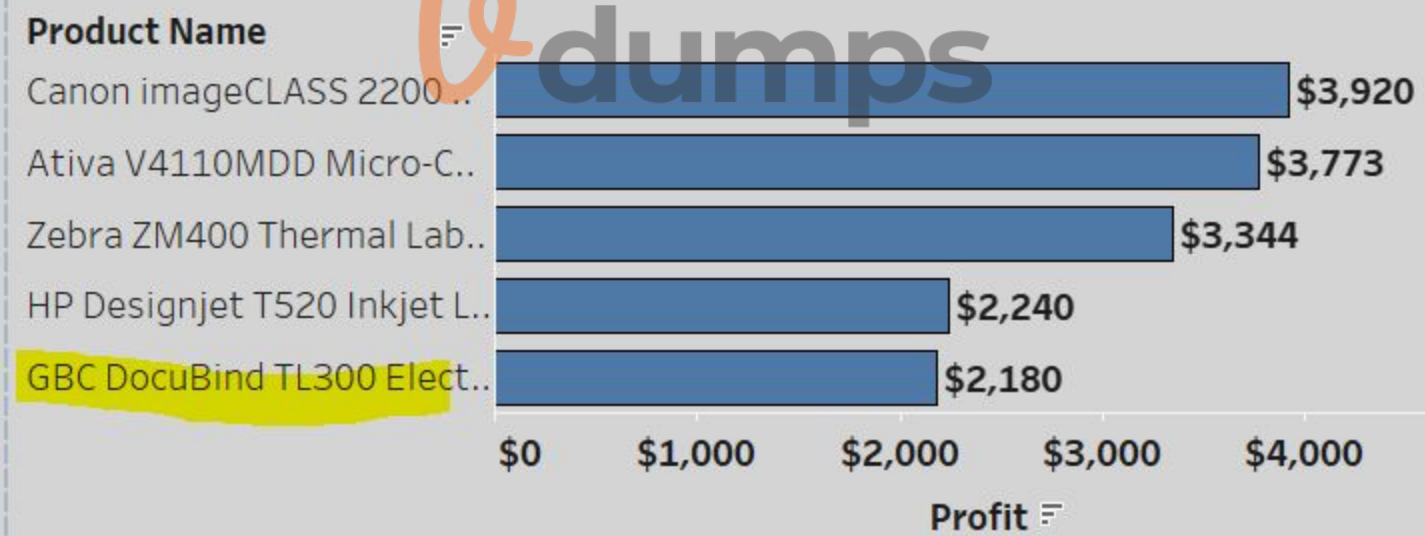

Profit Analysis Dashboard

Profit by State

Select the state(s) on the map to drill down

Top 5 Profitable Products

QUESTION 10

Connect to the 'Significant Volcano Eruption' data source. How many volcano eruptions took place within 30 miles of the Black Peak volcano in the Alaska Peninsula?

- A. 0
- B. 1
- C. 2
- D. 3

Correct Answer: A

Section:

Explanation:

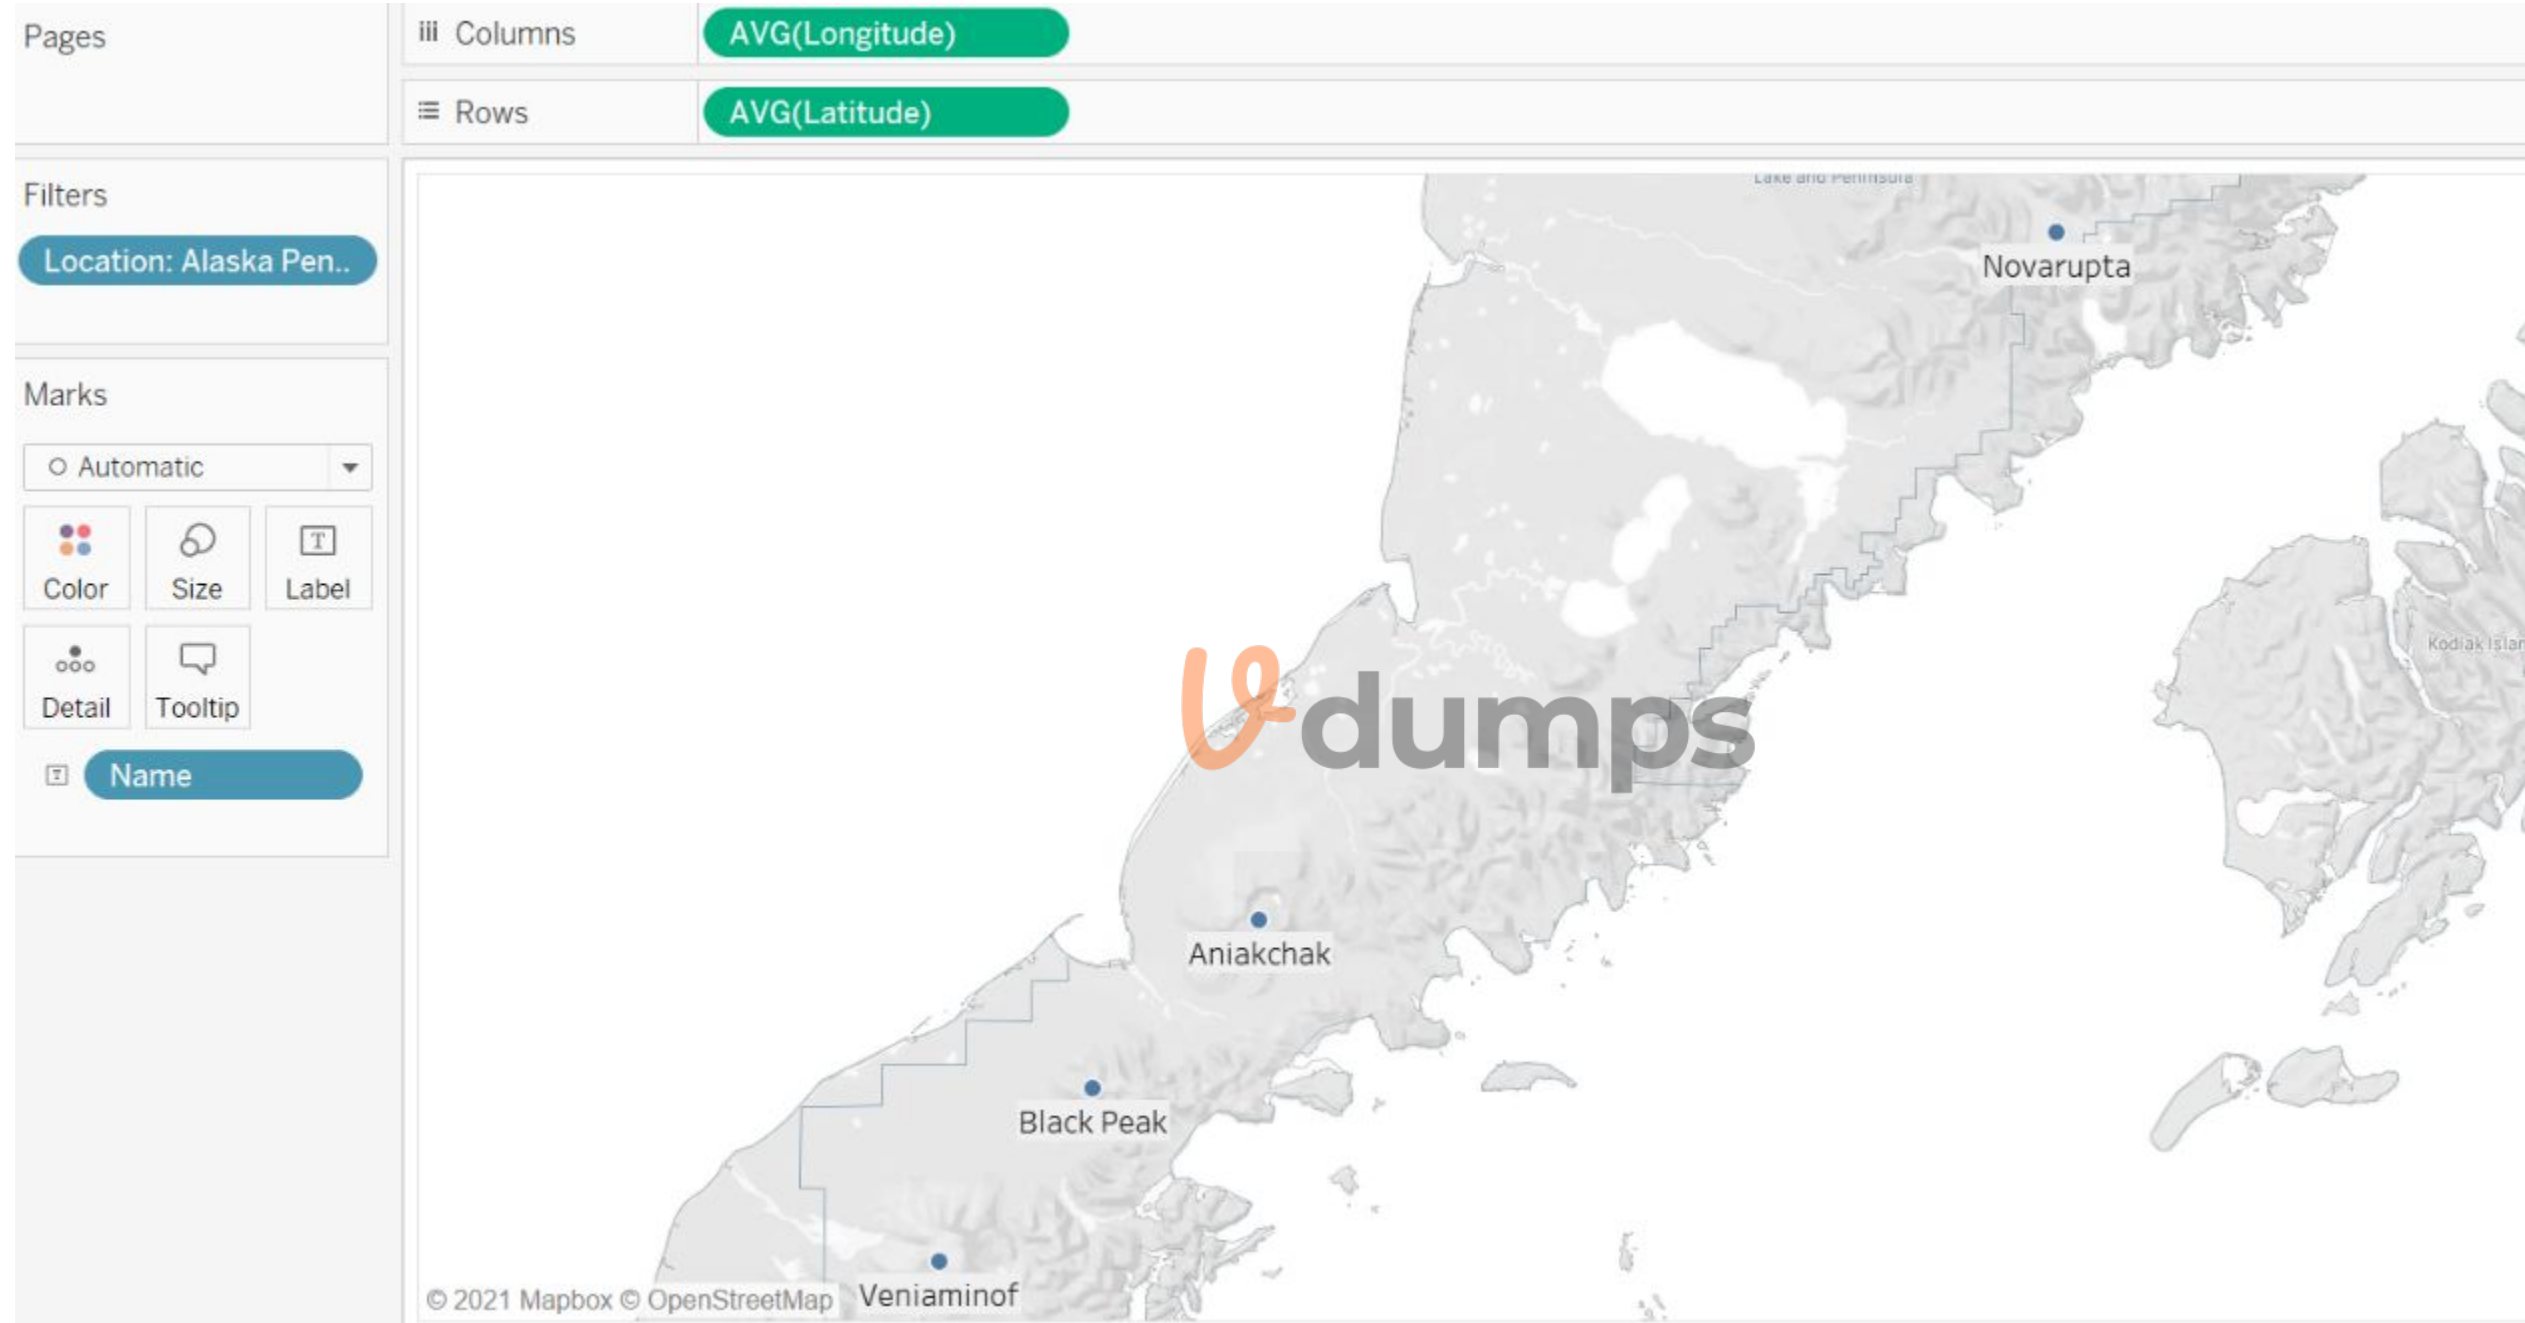

Add the Latitude to Rows and Longitude to columns. Or double click on these fields.

Don't use Latitude (generated)/Longitude (generated) fields.

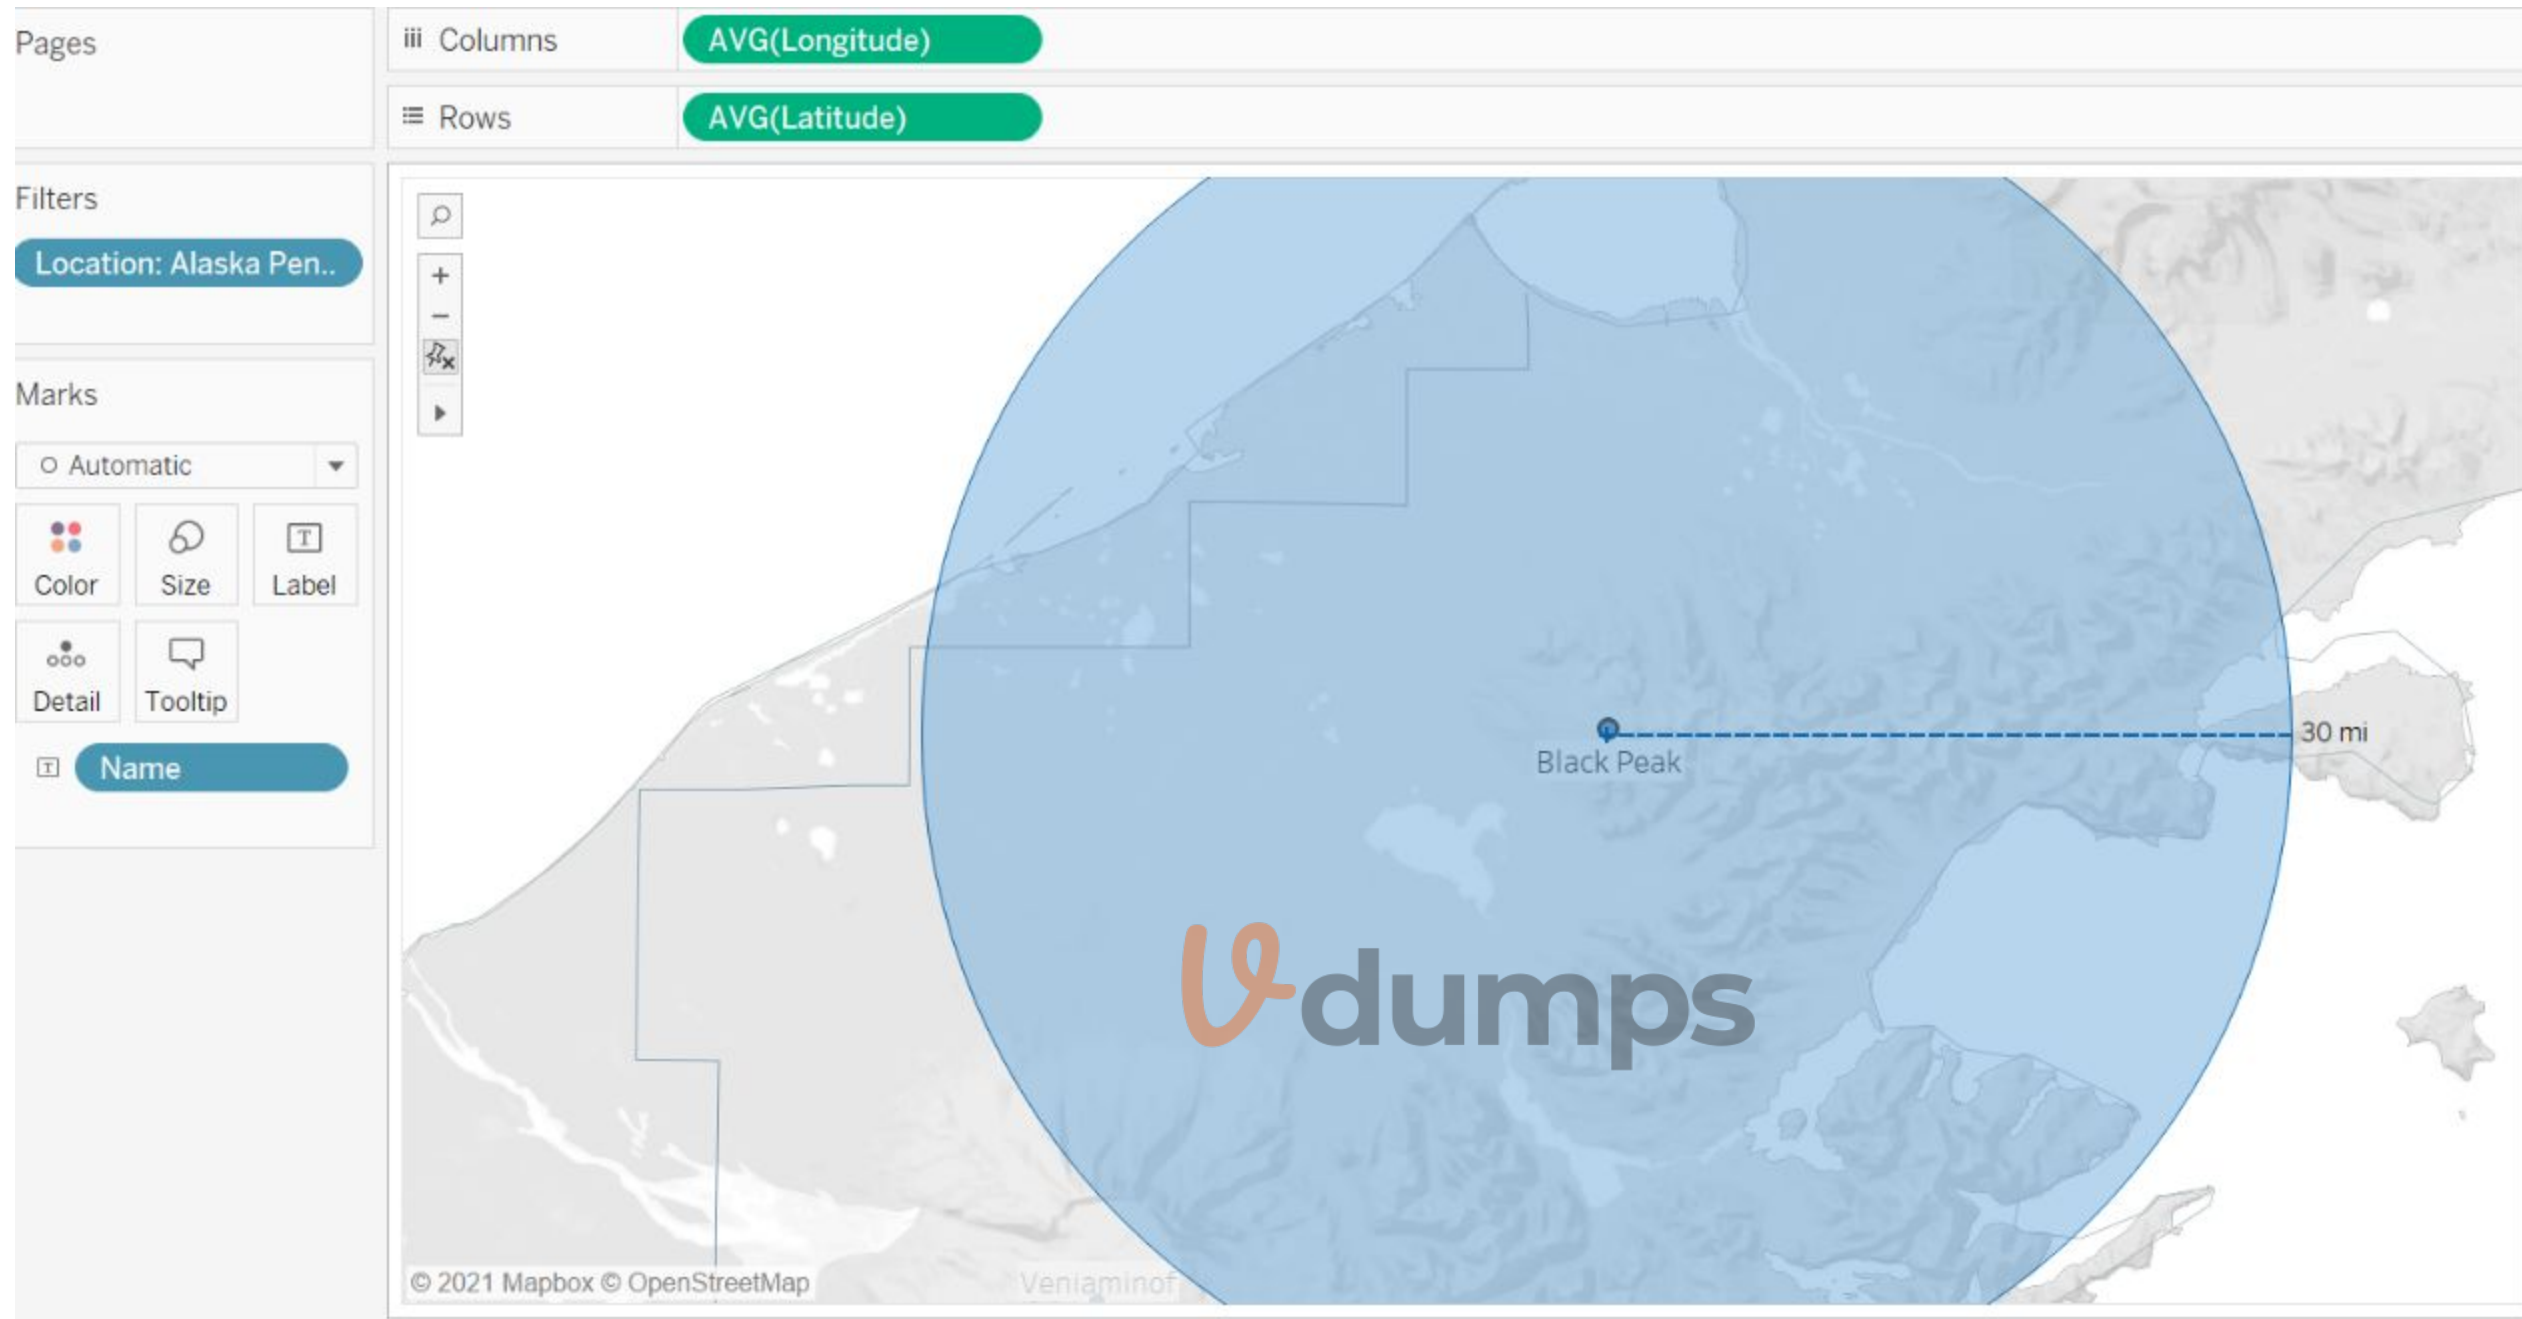

Drop Location to filter and select 'Alaska Peninsula'

Drop Name to the Label Marks card.

Your view will look like this:

Use the radial selection tool to find the number of volcano eruptions that took place within 30 miles of the Black Peak volcano. You need to zoom-in first, only then you would be able to find the distance using a radial selection tool.

There were no eruptions that took place with 30 miles of Black Peak.

QUESTION 11

Which of the following map layers are available in Tableau?

- A. Neighborhoods
- B. Points of Interest
- C. Cities Borders
- D. Area Code Labels

Correct Answer: A, B, D

Section:

Explanation:

Go to the Map -> Map Layer
Cities Borders is not valid.

Map Layers

- County Names
- Zip Code Boundaries
- Zip Code Labels
- Area Code Boundaries
- Area Code Labels
- US Metro Boundaries (...)
- US Metro Labels (CBSA)
- Water Labels
- Cities
- Points of Interest
- Neighborhoods
- Building Footprints

QUESTION 12

Connect to the Olympic Athletes data source, find out how many countries participated in 5 different sports from 2000 to 2012?

- A. 7
- B. 8
- C. 9
- D. 10

Correct Answer: B

Section:

Explanation:

First, find the distinct sports for each country:

OlympicAthletes (Olympic Athletes)

```
{FIXED [Country] : COUNTD([Sport]) }
```

It will be created as a Measure, move this to Dimension

Get the distinct countries:

OlympicAthletes (Olympic Athletes)

```
{FIXED [Country] : COUNTD([Sport]) }
```

drop these columns to the view, final view will look like this:

The X-axis represents a number of distinct sports. As the data set contains data from 2000 to 2012, so even if you don't include the filter, your answer would remain the same.

QUESTION 13

Connect to the Olympic Athletes data source, find out the average age of players who won at least one gold medal for the country?

- A. 26.33 (Correct)
- B. 26.41
- C. 26.72
- D. 26.02

Correct Answer: A

Section:

Explanation:

Drop the Age to the columns and change the aggregation to AVG.

Drop Gold Medals field to filter and select All values ->

Filter [Gold Medals]

Range of values

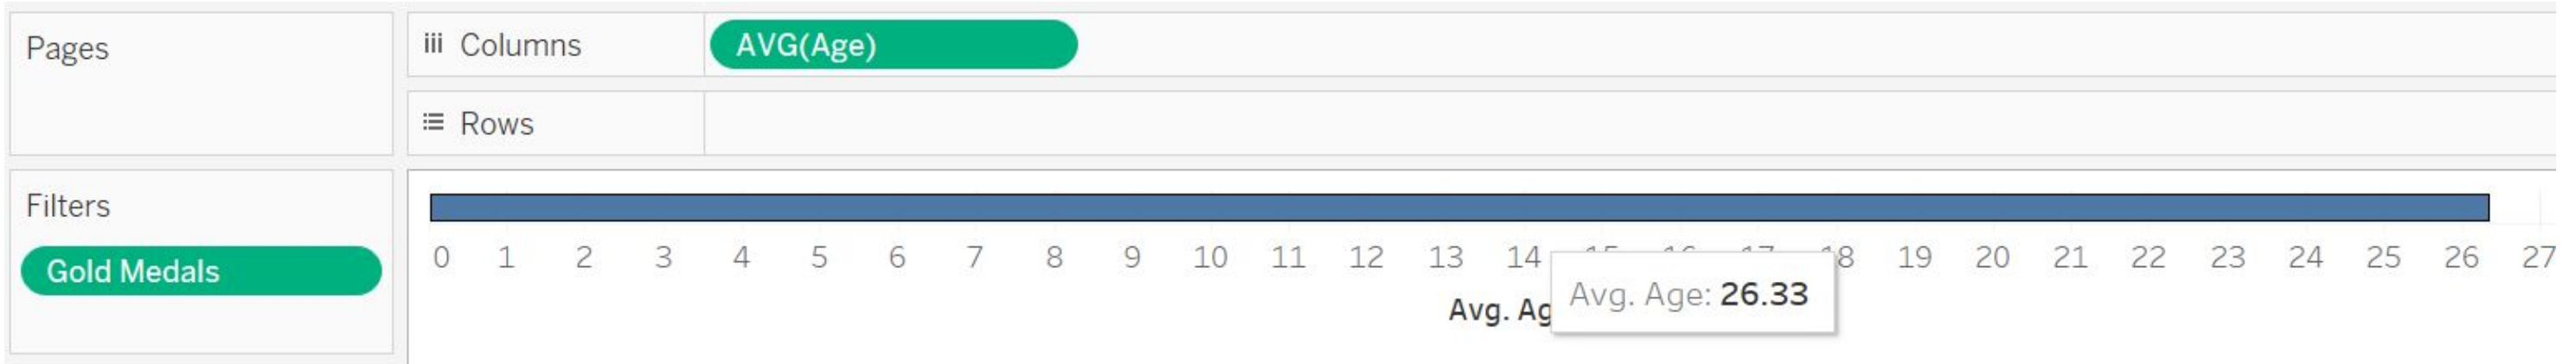

1 8

0 8

Show: Only Relevant Values Include Null Values

Reset OK Cancel Apply

Change 1 from 0.

QUESTION 14

Connect to the 'Significant Volcano Eruption' data source. What is the interquartile range of the distribution of Total Injuries data of the 21st century (show null values at default location)?

- A. 32
- B. 48
- C. 30
- D. 42

Correct Answer: C

Section:

Explanation:

Drop year to filter shelf and select from 2000.

Filter [Year] ✕

Range of values At least At most Special

Range of values

2,000 2,014

-4360 2014

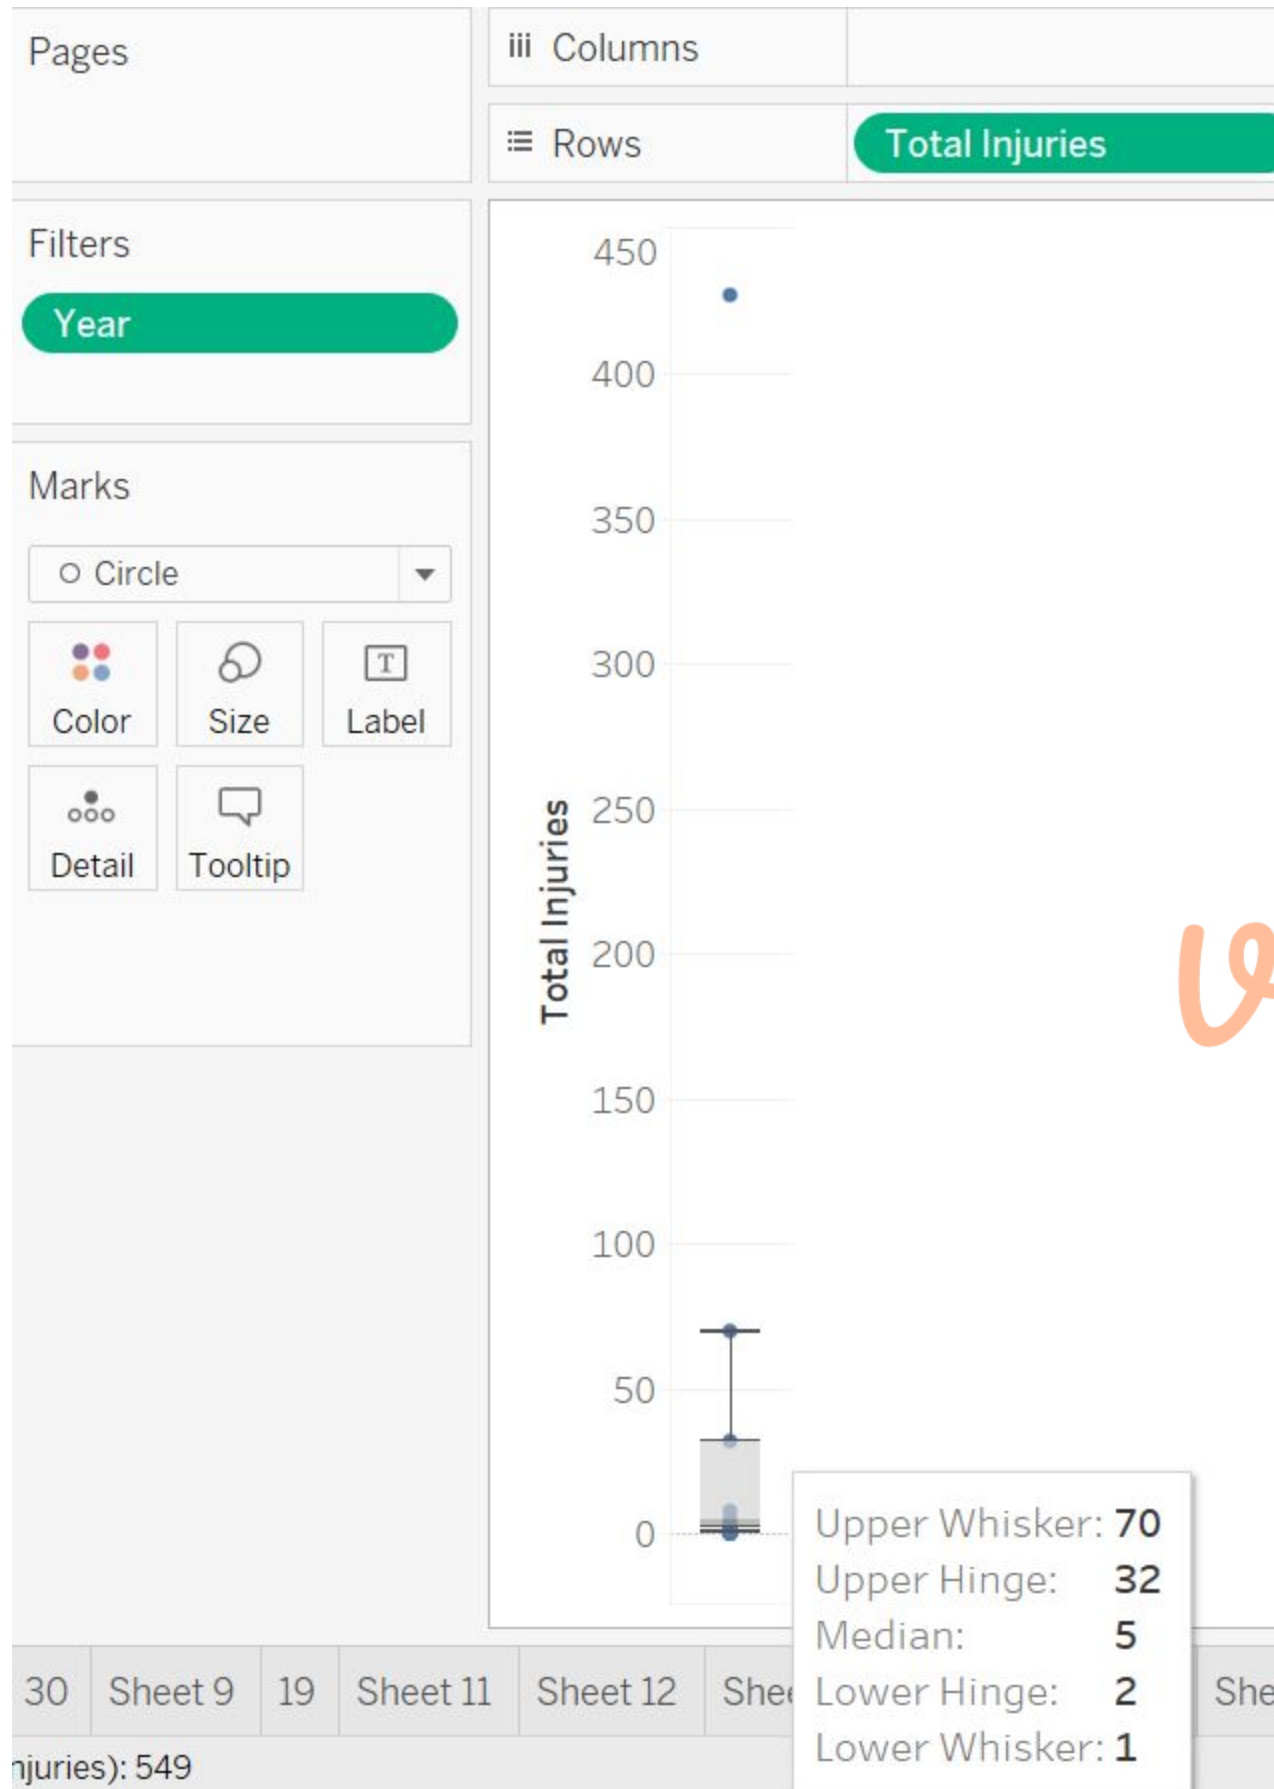

Show: Include Null Values

Drop Total injuries field to rows, go to Analysis -> Aggregated Measures (Untick this, it will disaggregate the total injuries field.

Click on Show Me, and select Box and whisker Plot.

IQR = Upper hinge - Lower hinge

Injuries): 549

Here IQR = 32 - 2 = 30

QUESTION 15

Using the Sales Analysis Dashboard, If you click on any of the products, it should navigate to the All Products worksheet. How you will accomplish it?

- A. Go to Dashboard->Actions and create the go to URL action
- B. Go to Dashboard->Actions and create the go to sheet action
- C. Go to Dashboard->Actions and create the Highlight action
- D. Right-click on the view, go to format, and provide the URL.

Correct Answer: D

Section:

Explanation:

Go to Dashboard->Actions and create the go to sheet action

Add Sheet Navigation Action

Name: GoToSheet1

Source Sheets

Sales Analysis

Profit Vs Sales

Sales by State

vdumps

QUESTION 16

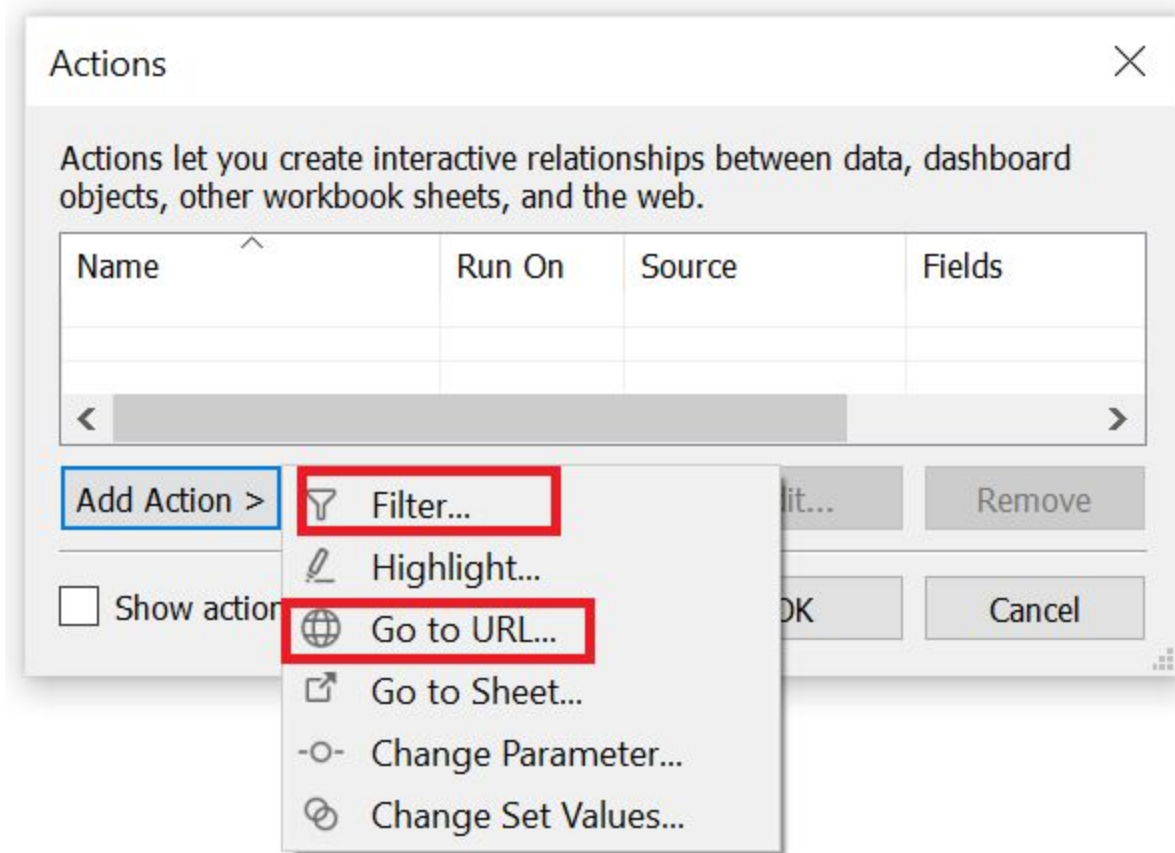

Which of the following are the valid dashboard actions in Tableau?

- A. URL action
- B. Filter action
- C. Hover action
- D. Select action

Correct Answer: A, B

Section:

Explanation:

QUESTION 17

Extract can't be created in which of the scenario?

- A. When you perform cross-database joins
- B. When you perform the blend
- C. When you perform the union
- D. When you perform the traditional join

Correct Answer: B

Section:

Explanation:

A blend is worksheet-specific, so you cannot create the extract while creating a blend.

QUESTION 18

Connect to the 'Global Superstore' data source and use the Orders table. Create a bar in bar chart and compare the profit against the target profit for Canada Region. Consider target profit is 30% of the sales. Which of the following sub-categories has met or exceed the target profit?

- A. Tables
- B. Paper
- C. Labels
- D. Copiers

Correct Answer: A, C, D

Section:

Explanation:

target profit

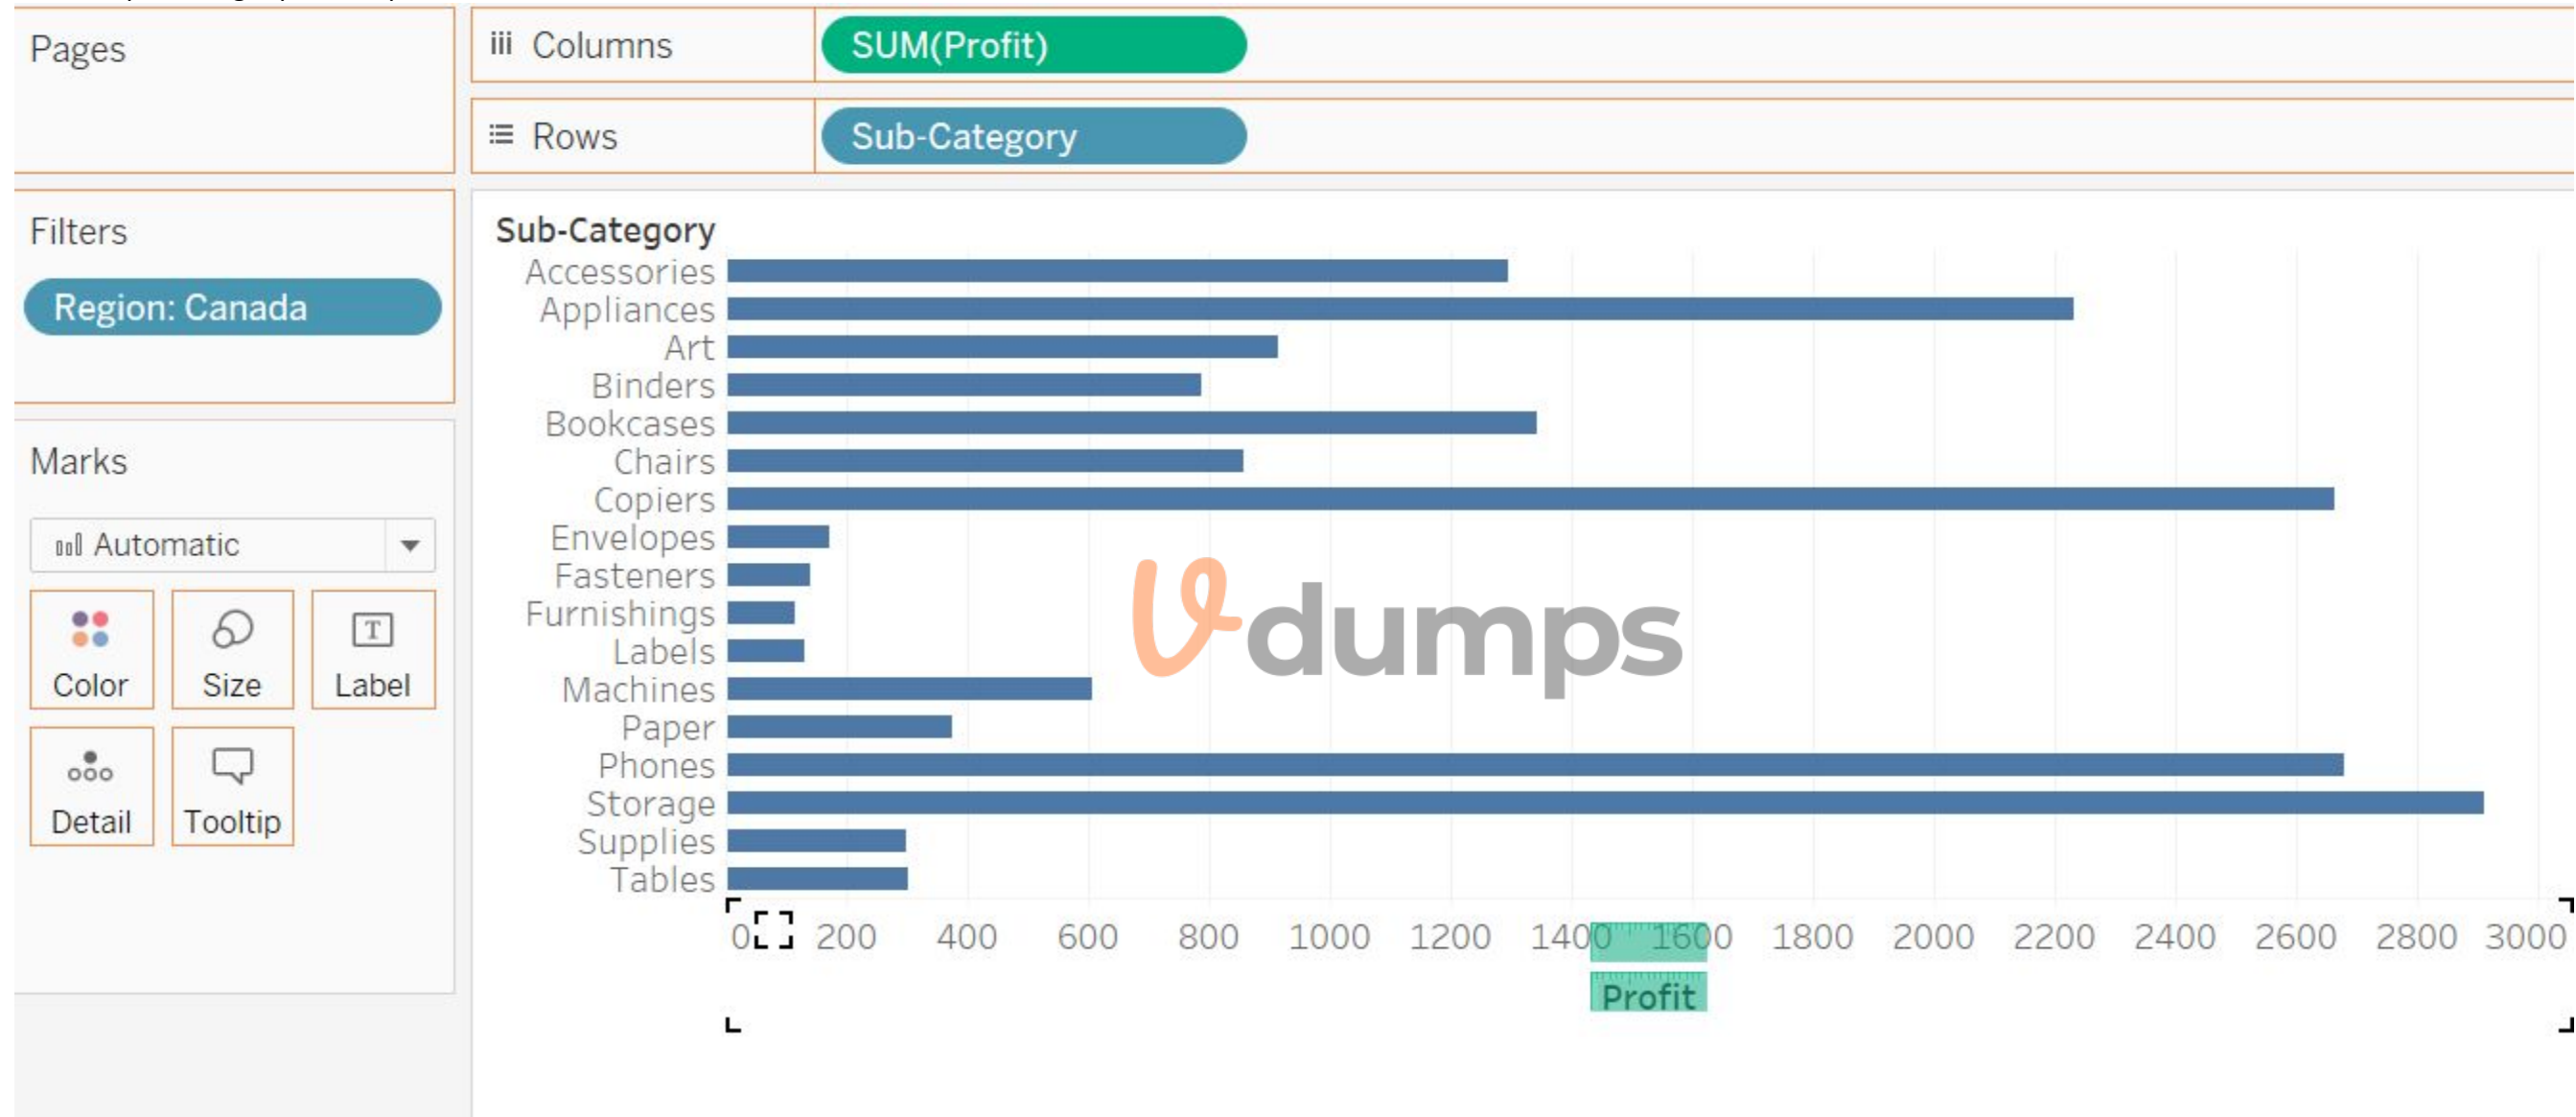

Orders (global_superstore)

[Sales] * .30

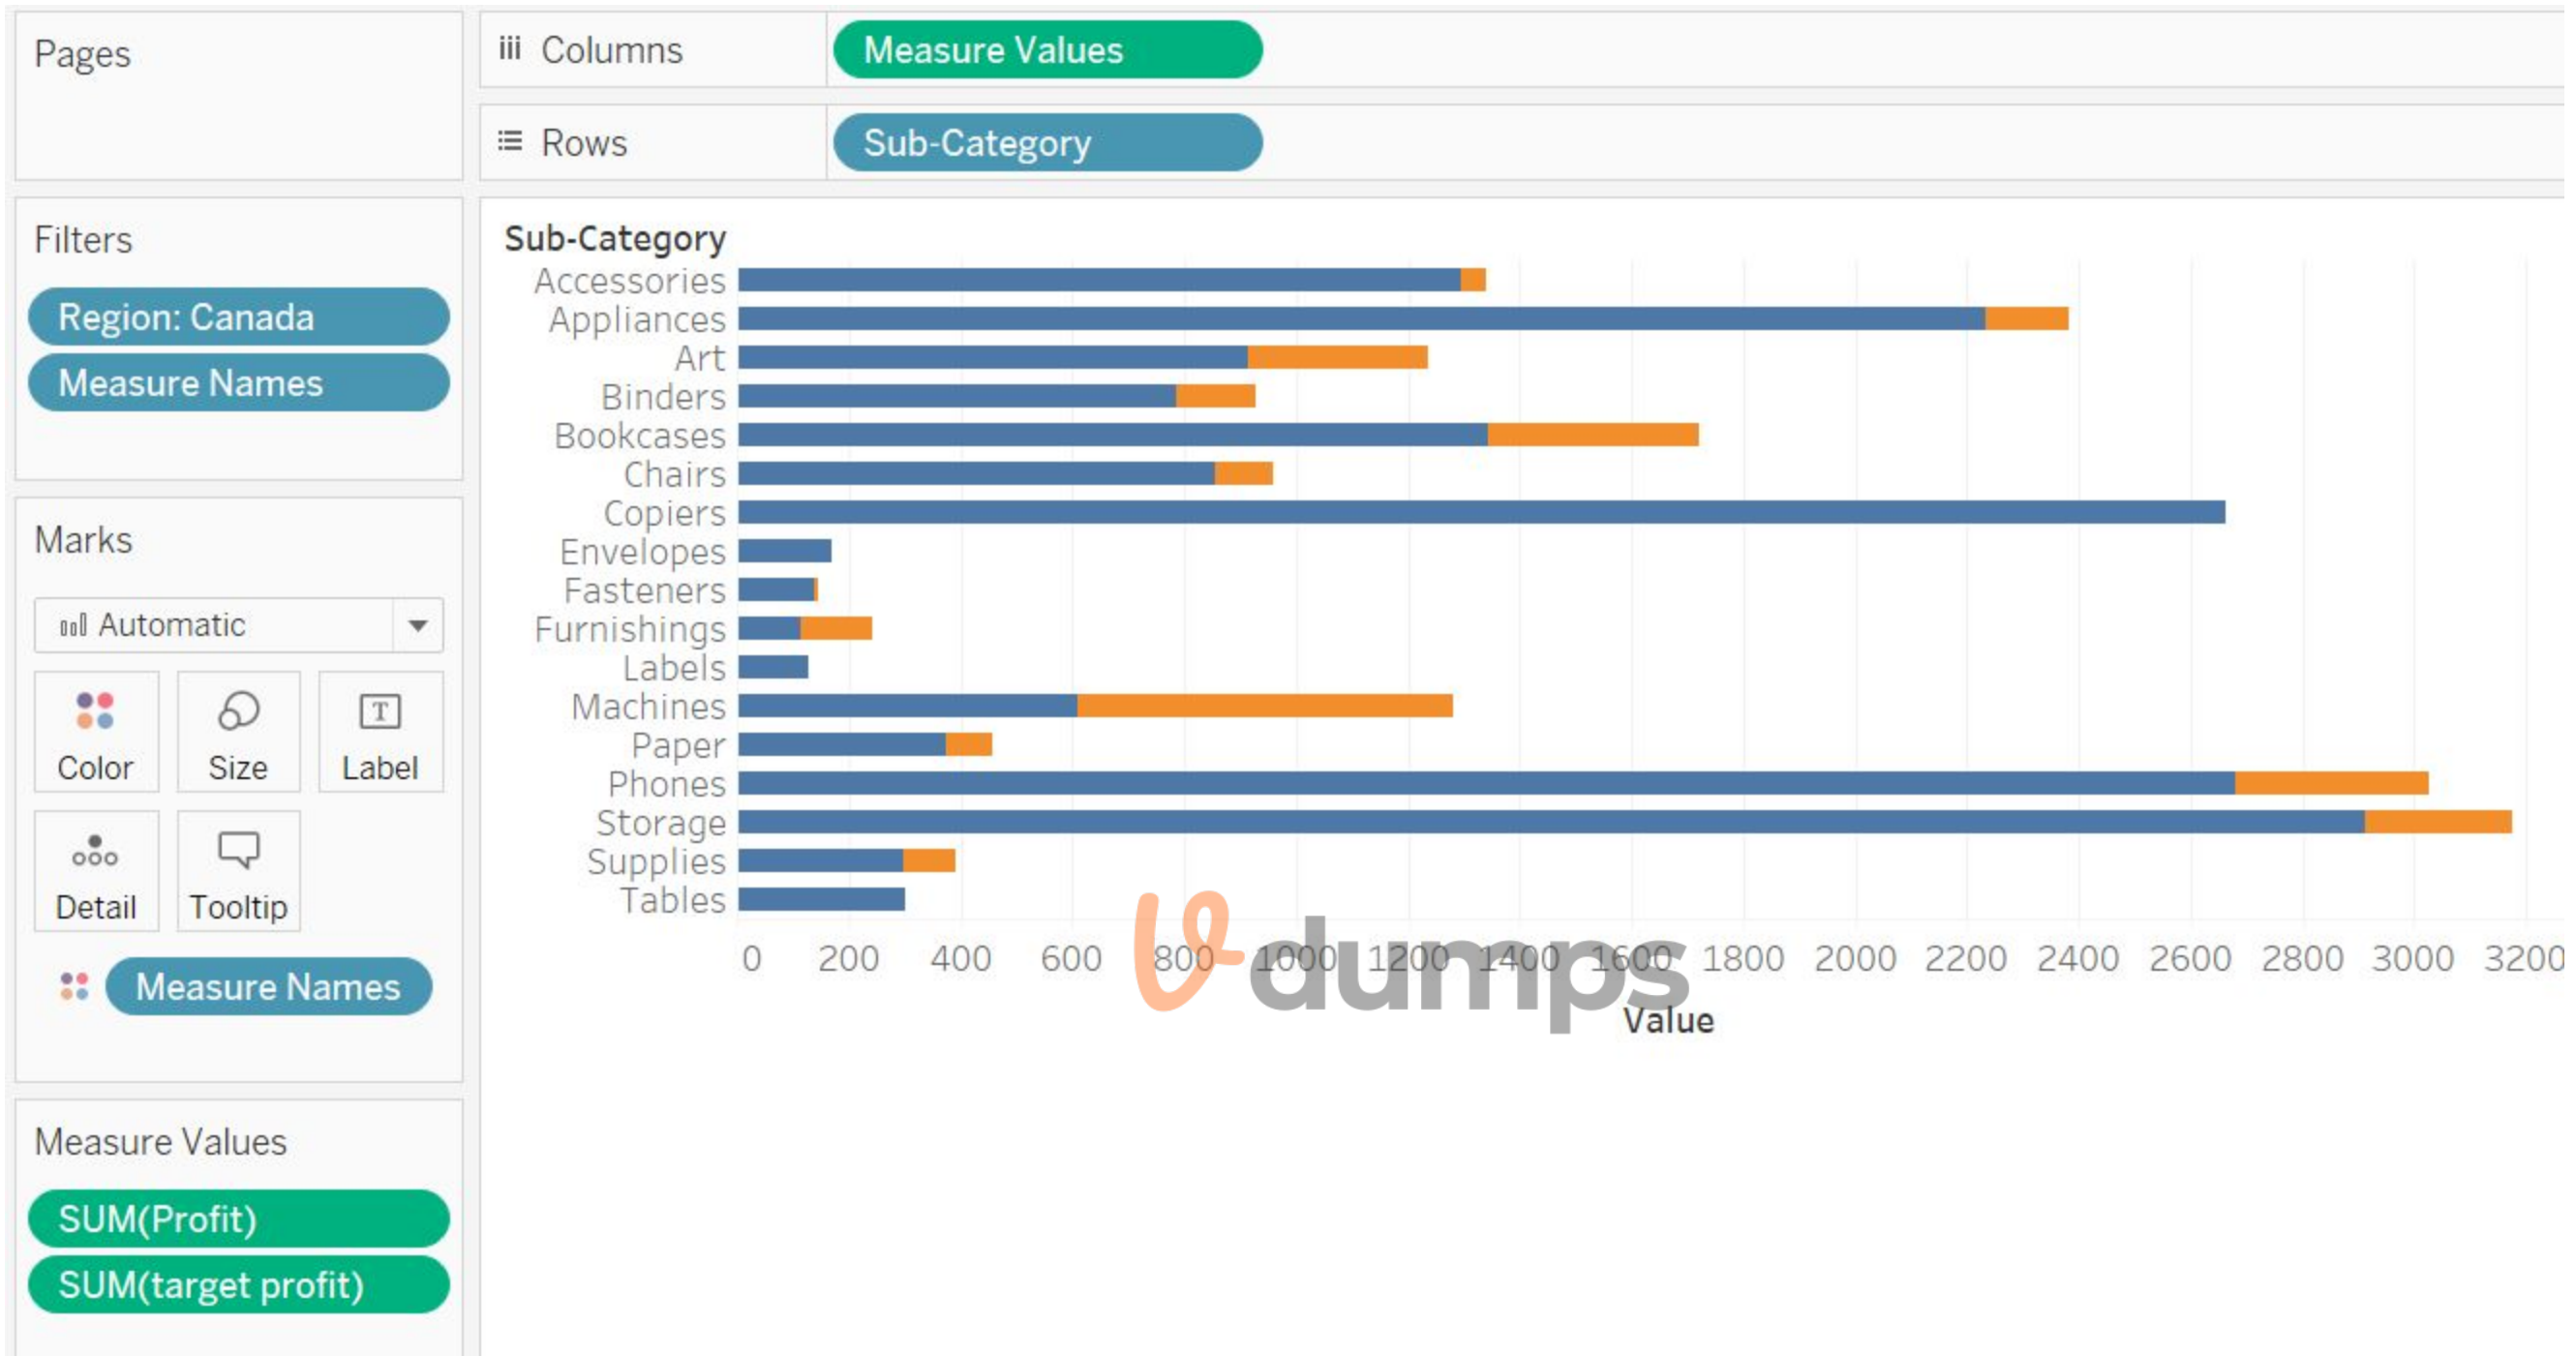

Drop Region at the filter and Select Canada

Drop Profit to columns and Sub-Category to Rows

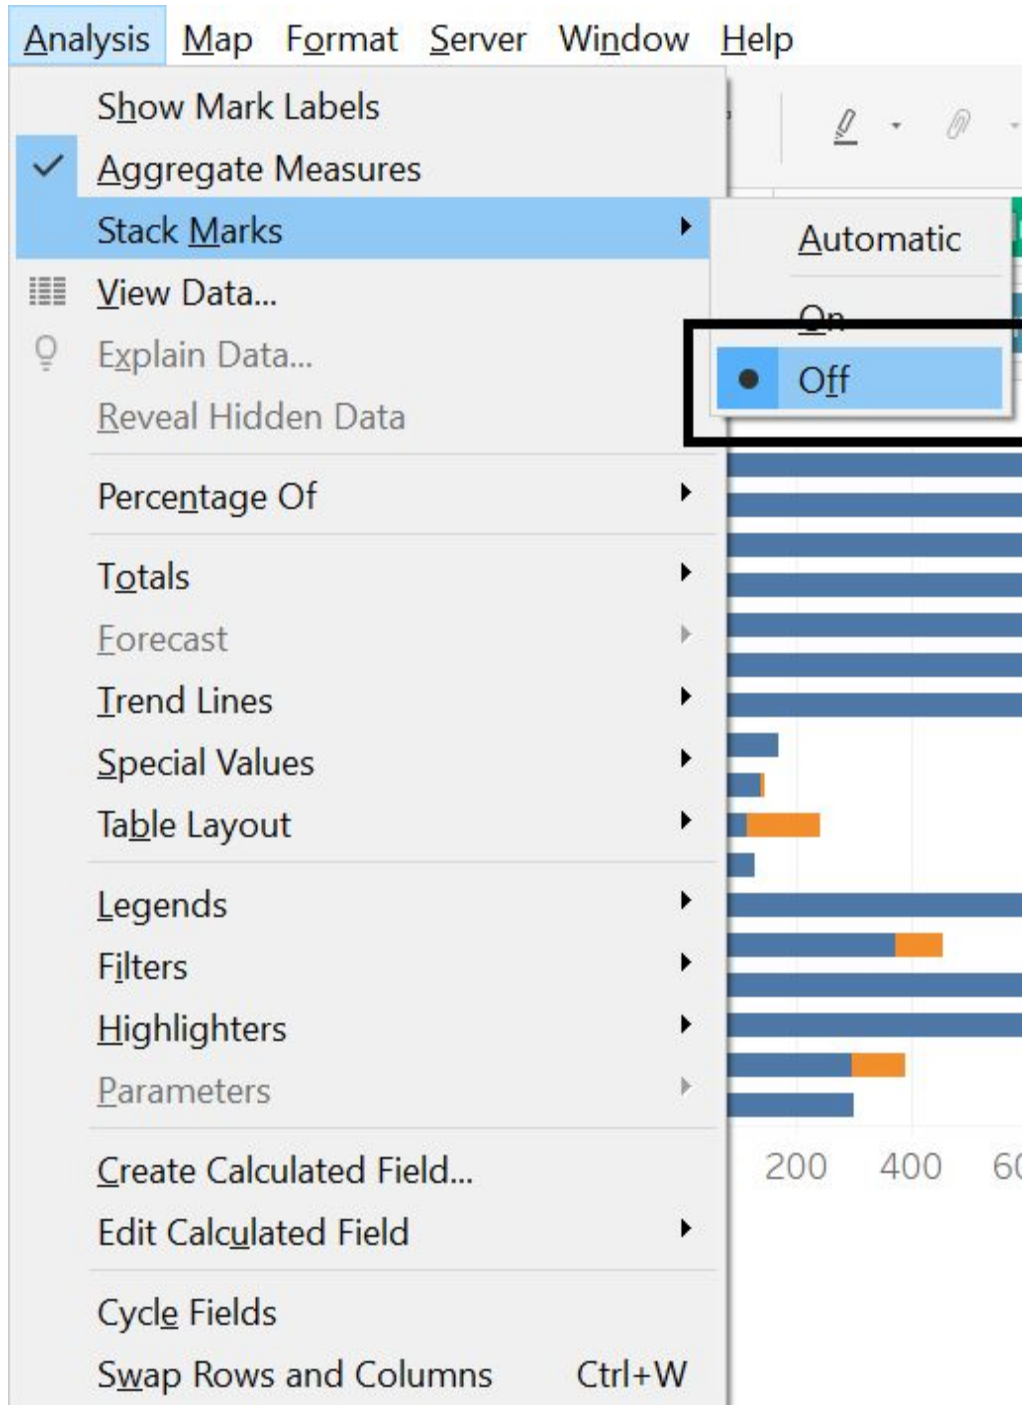

Then drop the target profit to profit axis, it will create the combined axis chart.

Now drop the Measure Names field from the Rows to the Color Marks Card.

Go to the Analysis menu -> Stack Marks -> Off (so that your both profit and target profit bars will start from 0)

Tables, Labels and Copiers sub-categories has met or exceed the target profit.

QUESTION 19

Connect to the 'Global Superstore' data source and use the Orders table. Create a view using Profit and Sales. Find out which sub-category is above the profit median but below the sales median value?

- A. Appliances
- B. Binders
- C. Storage
- D. Tables

Correct Answer: B

Section:

Explanation:

Drop Sales to columns and profit to rows, and Sub-Category to details.

Add two reference lines, one on the sales axis:

Edit Reference Line, Band, or Box ✕

Line
 Band
 Distribution
 Box Plot

Scope

Entire Table
 Per Pane
 Per Cell

Line

Value:

Label:

Tooltip:

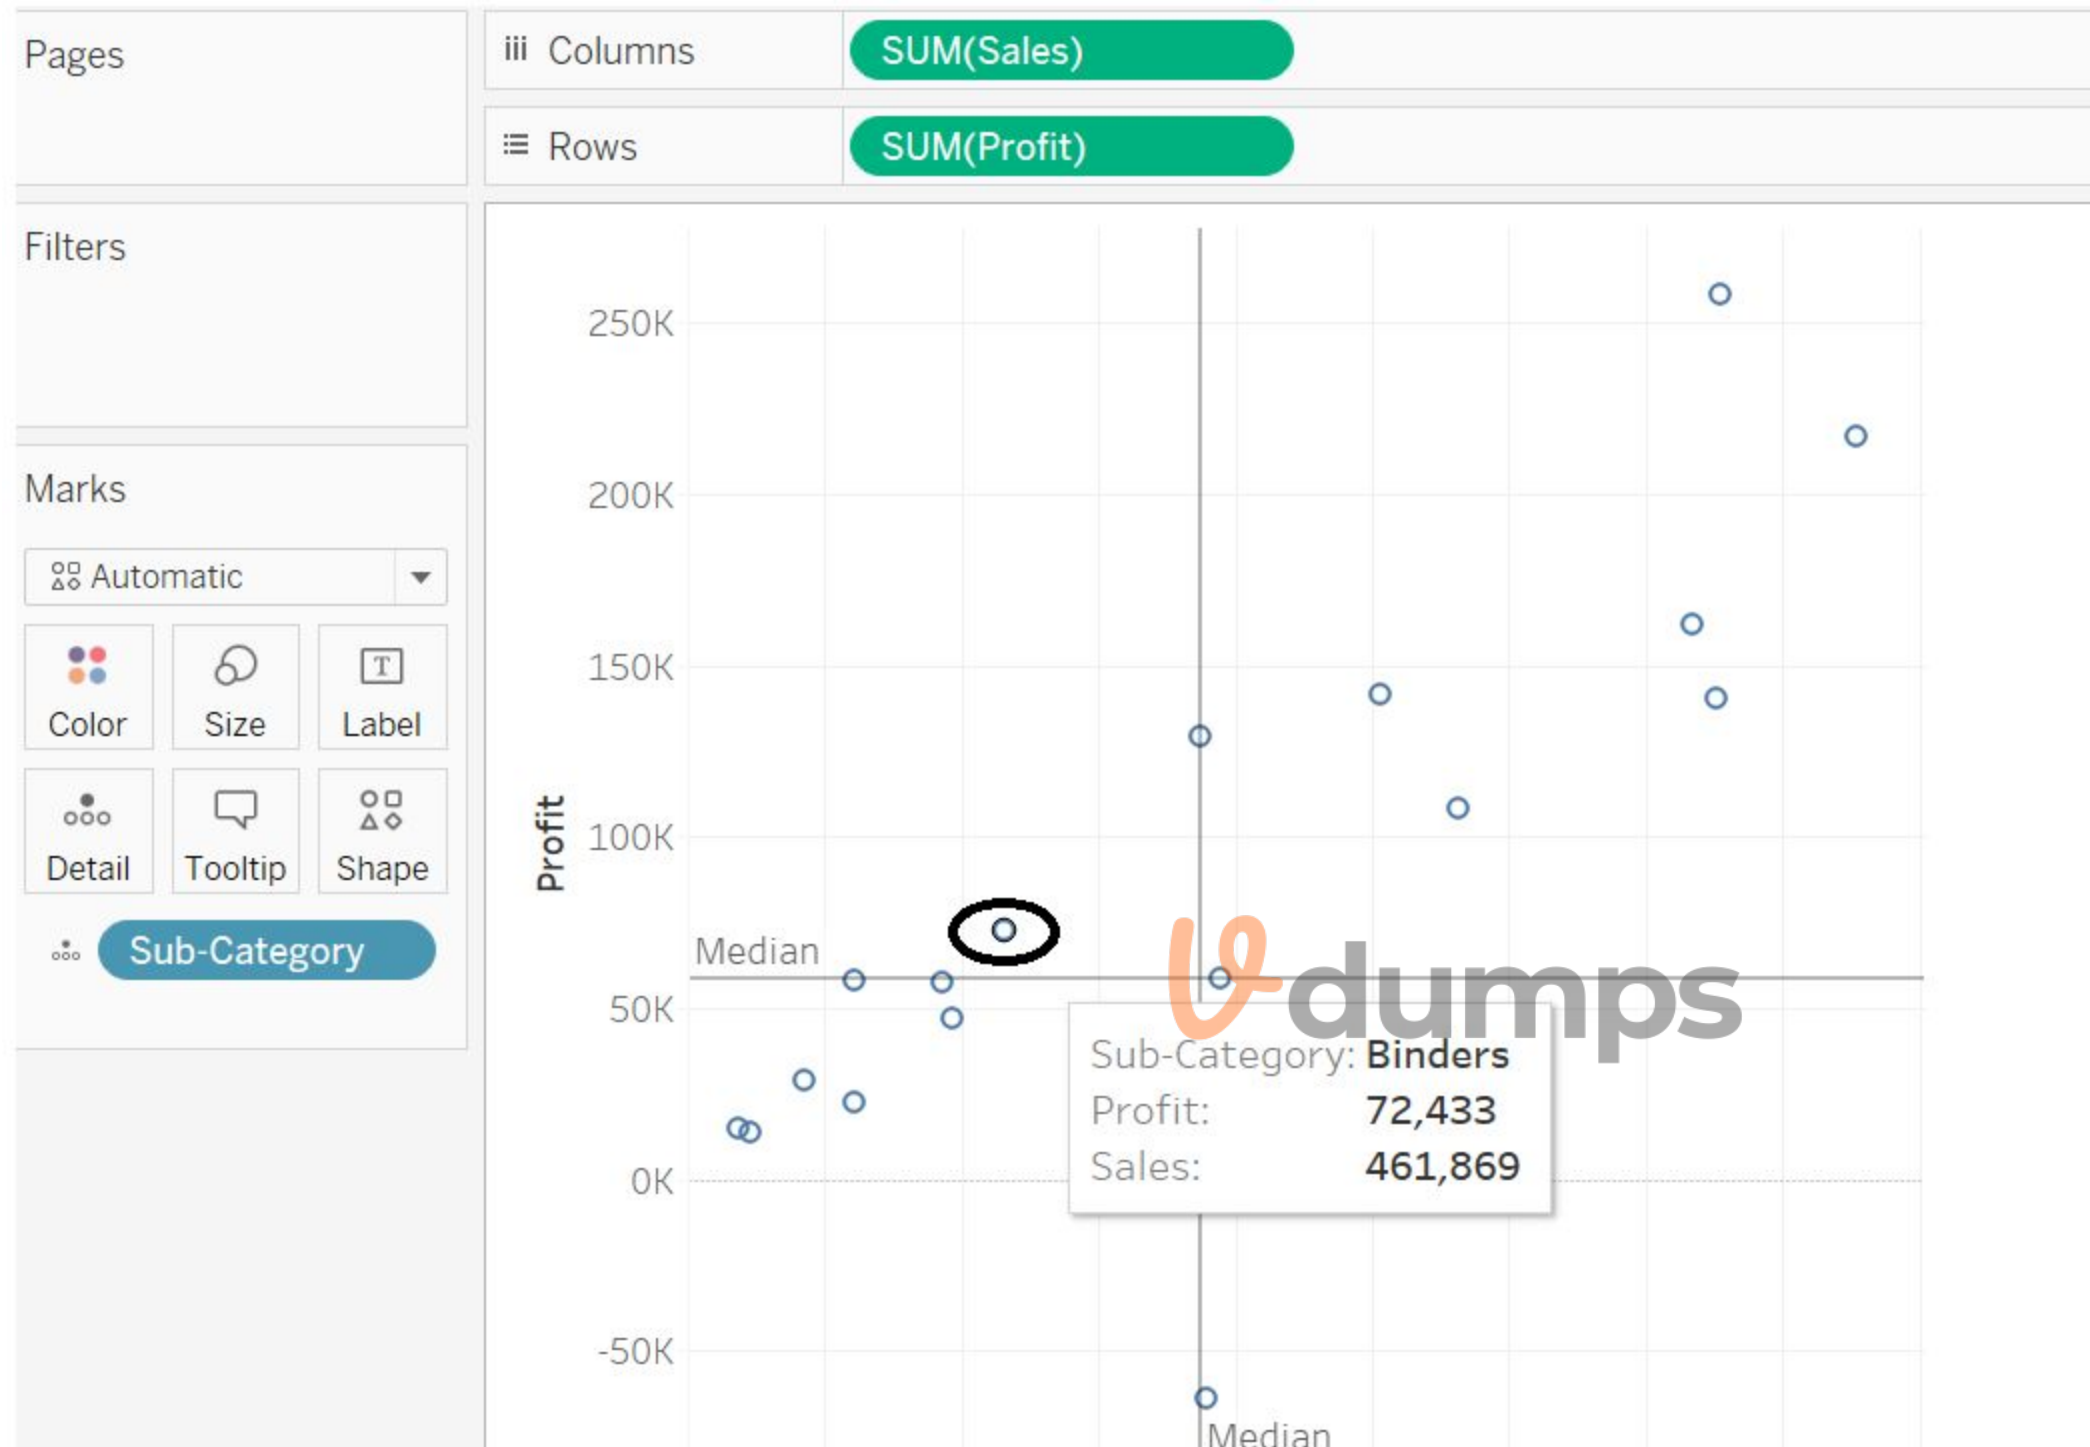

- Total
- Sum
- Constant
- Minimum
- Maximum
- Average
- Median

Formatting

Add similarly on profit axis as well.

Out of the following options, only the Binders sub-category is above the profit median but below the sales median value.

Vdumps

QUESTION 20

Connect to the 'Covid data' source. What is the percentage increase in the new cases from July 2020 to Jan 2021?

- A. 118.50%
- B. 125%
- C. 113.50%
- D. 98%

Correct Answer: C

Section:

Explanation:

Create a filter on date field and select only July 2020 and Jan 2021.

QUESTION 21

To create this view, what all you have to do from the following options?

Larger image

Market	Category	Profit	Quantity	Sales
Africa	Furniture	16,262	1,431	194,651
	Office Supplies	28,480	7,102	266,756
	Technology	44,129	2,031	322,367
Asia	Furniture	113,375	10,169	1,461,551
Pacific	Office Supplies	92,731	27,948	1,043,652
	Technology	197,070	10,480	1,537,455
Europe	Furniture	92,905	6,381	890,107
	Office Supplies	187,356	27,547	1,163,661
	Technology	169,291	7,991	1,233,569
LATAM	Furniture	41,598	8,867	811,971
	Office Supplies	79,459	22,066	563,921
	Technology	100,587	7,593	788,714
USCA	Furniture	20,943	8,044	752,173
	Office Supplies	130,570	23,581	749,503
	Technology	152,702	7,081	862,453
Grand Total		1,467,457	178,312	12,642,502

- A. Add the Columns Totals on Top from Analysis Menu
- B. Go to the border in format menu and then go to the Rows tab and update the Row Divider settings
- C. Go to the border in format menu and then go to the Columns tab and update the Column Divider settings
- D. Drop the measure to the color marks card

Correct Answer: B, D

Section:

Explanation:

Option 1 - It is not valid, as we are not showing Columns Totals on Top.

Option 3 - It is not valid, as we are modifying the row divider settings and not the column divider settings.

Rest are true.

QUESTION 22

Connect to the 'Significant Volcano Eruption' data source. Create a histogram using field Death and having a bin size of 500. Find out which country reported 9 deaths in the bin of 0-500?

- A. United States
- B. Chile
- C. Japan
- D. Indonesia

Correct Answer: A

Section:

Explanation:

Select the measure "Death" and go to the Show Me and Click on Histogram

When we are binning the measure, it will create the dimension, so you get a new dimension as Death (bin). Right-click on this and click on Edit. Update the size of bins to 500.

Edit Bins [Deaths] [X]

New field name:

Size of bins:

Range of Values:

Min: Diff:

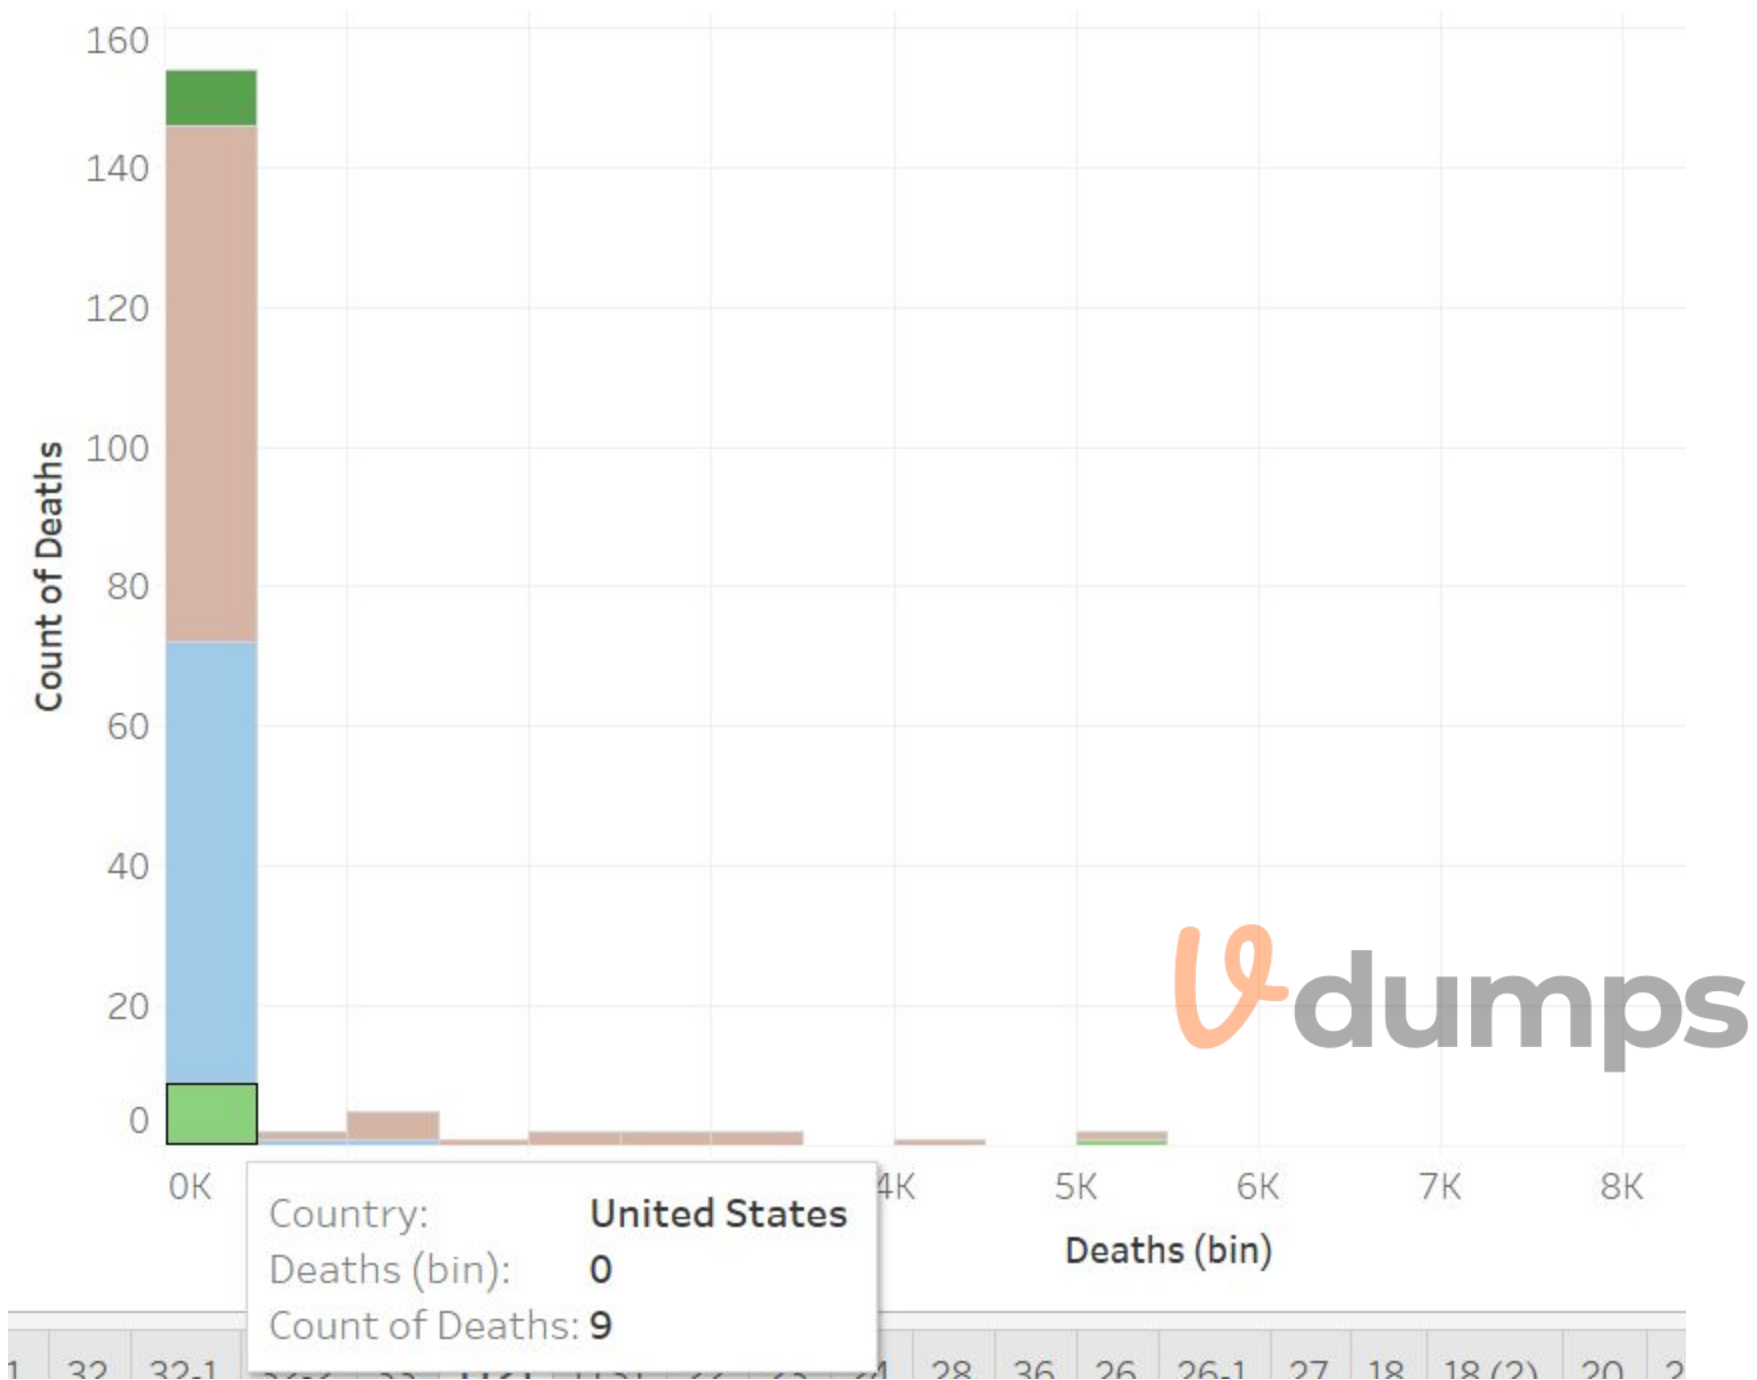

Max: CntD:

Drop the Country to the color, so our view will look like this:

Now drop the Country to the filter and select 4 countries mentioned in our options. Hover the bar, it shows the United States has reported 9 deaths.

QUESTION 23

In which of the following scenarios you should use the blend?

- A. The data to combine has the same structure but consists of data of different years.
- B. The combined data will be used in many worksheets in the current workbook.
- C. The data to combine is at a different level of detail.
- D. All of the above.

Correct Answer: C

Section:

Explanation:

Union - The data to combine has the same structure but consists of data of different years.

Blend - The data to combine is at a different level of detail.

QUESTION 24

How the ATTR() is defined in Tableau?

- A. IF MIN ([dimension]) = MAX ([dimension]) THEN MIN ([dimension]) ELSE '*' END
- B. IF MIN ([dimension]) = MAX ([dimension]) THEN MAX ([dimension]) ELSE '*' END
- C. IF MIN ([dimension]) = MAX ([dimension]) THEN MIN ([dimension]) ELSE MAX ([dimension]) END
- D. IF MIN ([dimension]) = MAX ([dimension]) THEN MIN ([dimension]) ELSE NULL END

Correct Answer: A

Section:

Explanation:

IF MIN ([dimension]) = MAX ([dimension]) THEN MIN ([dimension]) ELSE '*' END

Refer: <https://kb.tableau.com/articles/howto/when-to-use-the-attribute-attr-function>

QUESTION 25

To create a choropleth map, your data source should include the following types of information?

- A. Quantitative or qualitative values
- B. Location names or custom polygons
- C. Background image
- D. Custom Territories

Correct Answer: A, B

Section:

Explanation:

Refer: https://help.tableau.com/current/pro/desktop/en-us/maps_howto_choropleth.htm

**QUESTION 26**

How to add reference lines in a view? (Select correct two answers)

- A. Using Analytics pane
- B. Using Data Pane
- C. Using Analysis Menu
- D. Right Click on Axis and Add Reference Line

Correct Answer: A, D

Section:

Explanation:

Using Analytics pane:

Data Analytics

Summarize

- Constant Line
- Average Line
- Median with Quartiles
- Box Plot
- Totals

Model

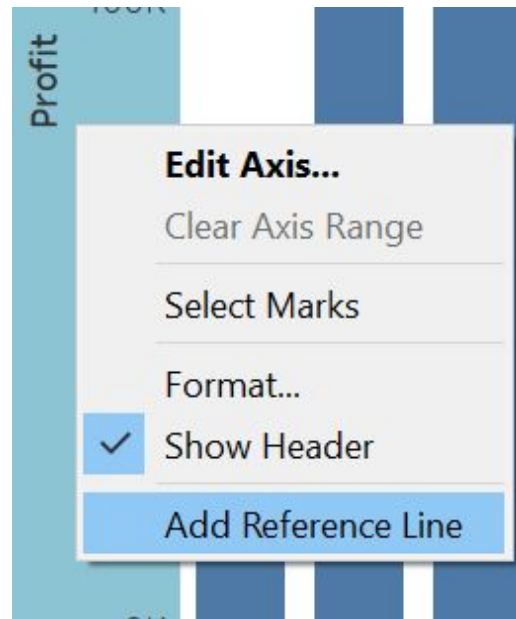

- Average with 95% CI
- Median with 95% CI

- Cluster

Custom

- Reference Line
- Reference Band
- Distribution Band
- Box Plot

Right Click on Axis and Add Reference Line:

QUESTION 27

When it is recommended to create multiple table extracts?

- A. If incremental refresh is configured
- B. If we are using extract filters to limit the data
- C. If row-level security needs to be enforced
- D. None of the above

Correct Answer: C

Section:

Explanation:

It is recommended to create multiple table extracts when row-level security needs to be enforced.

Refer: <https://www.tableau.com/about/blog/2018/10/you-can-now-choose-multiple-table-storage-extracts-94776>

QUESTION 28

Connect to the 'Global Superstore' data source and use the Orders table. Find out in which year the furniture sales were more than the average sales of that year?

- A. 2012
- B. 2013
- C. 2014
- D. 2015

Correct Answer: A

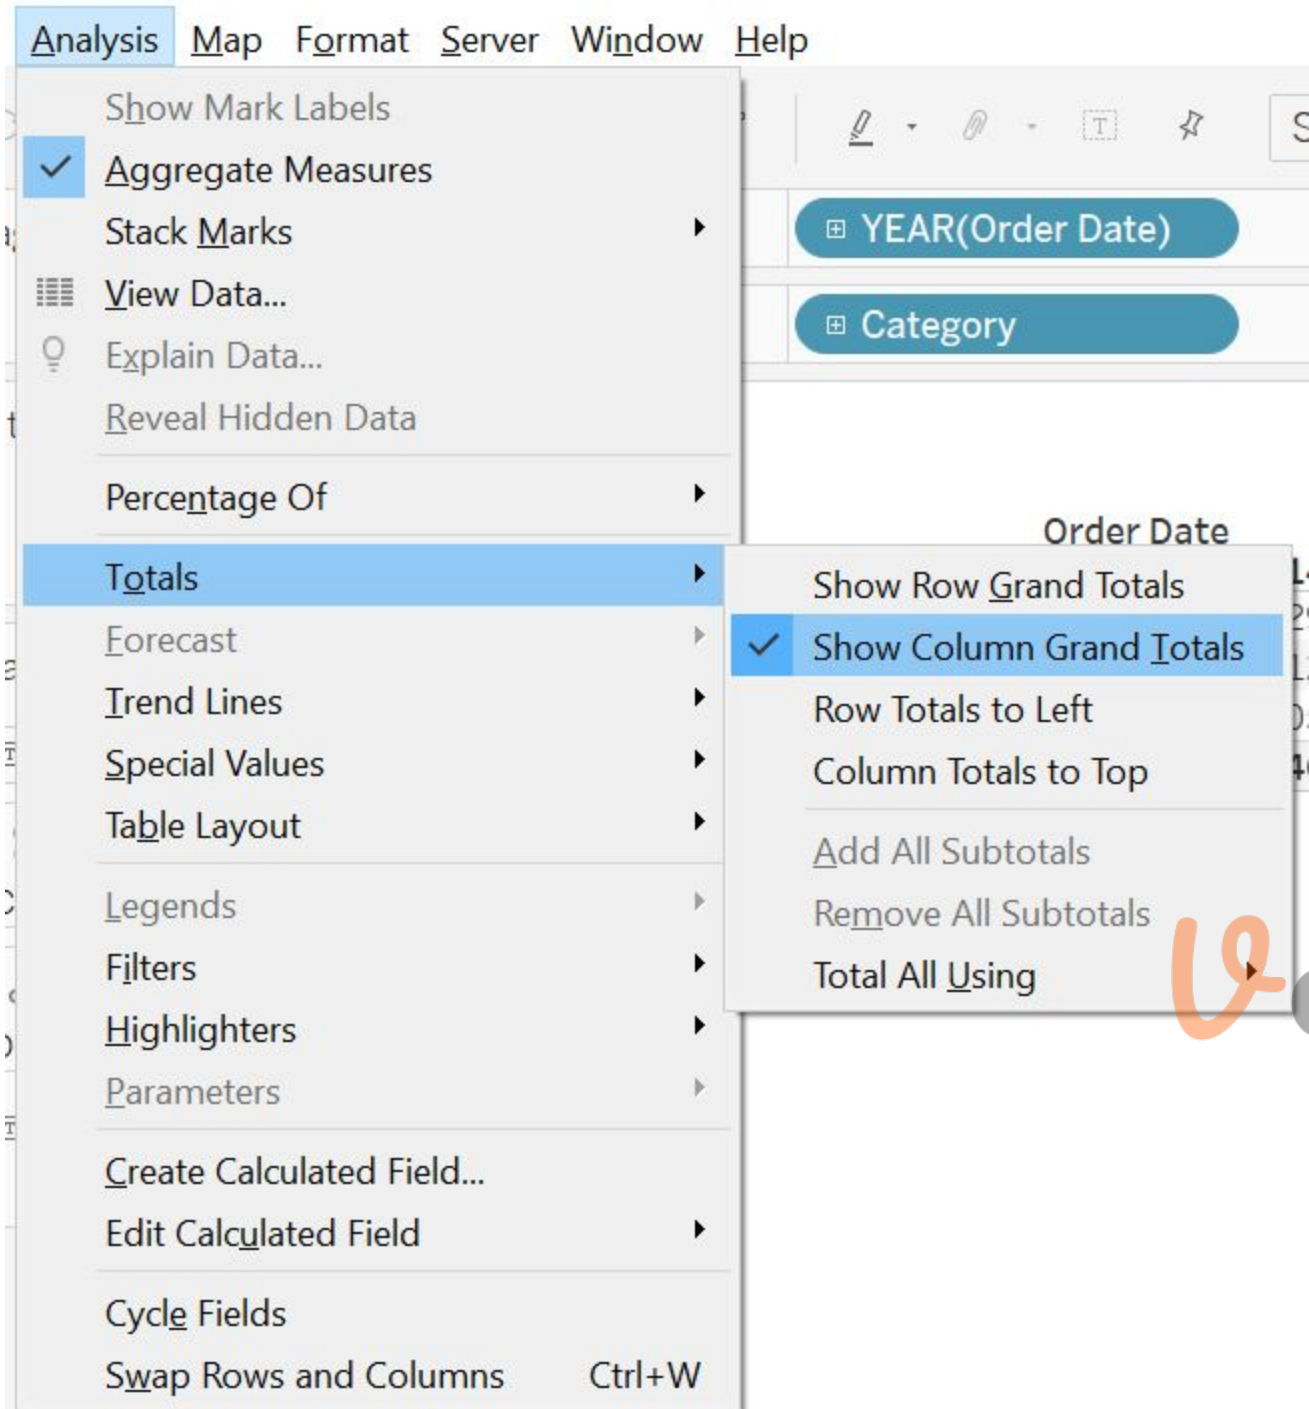

Section:

Explanation:

Drop Order Date to columns, Category to Rows, and Sales to Text.

Go to Analysis -> Totals -> Show Columns Grand Total

Update Total All Using to Average:

YEAR(Order Date)

Category

Order Date

	2014	2015
	29	1,377,917
	12	1,305,790
	05	1,616,159
	16	4,299,866

Category	Order Date			
	2012	2013	2014	2015
Furniture	756,084	858,822	1,117,629	1,377,917
Office Supplies	675,715	795,175	1,010,812	1,305,790
Technology	827,652	1,023,442	1,277,305	1,616,159
Grand Total	753,150	892,480	1,135,249	1,433,289

In the year 2012, the furniture sales were more than the average sales of that year.

QUESTION 29

Which of the following is true about spatial files?

- A. You cannot create a dual-axis chart using spatial data
- B. You cannot join spatial data source with the non-spatial data source
- C. You cannot apply filters in your view if it is created using the spatial data source
- D. None of the above

Correct Answer: D

Section:

Explanation:

All are false here.

Refer: https://help.tableau.com/current/pro/desktop/en-us/maps_shapefiles.htm

QUESTION 30

When we create a filter action in a dashboard, what all we must specify so that it will work?

- A. Source Sheet
- B. Target Sheet
- C. Run action on
- D. Target filter on Selected fields

Correct Answer: A, B, C

Section:

Explanation:

Even if you don't select the target filters, your filter action will work. Rest all you need to provide so that it will work.

Edit Filter Action

Name:

Source Sheets

Dashboard 1

Run action on:

12

15

Run on single select only

Target Sheets

Dashboard 1

Clearing the selection will:

Leave the filter

Show all values

Exclude all values

Target Filters

Selected Fields All Fields

Source Field	Target Field	Target Data Source

QUESTION 31

Which type of sort is applied in the Ship Mode field?

Larger image

Market	Ship Mode	
Africa	Standard Class	36,520
	Second Class	23,025
	First Class	19,796
	Same Day	8,798
APAC	Standard Class	183,621
	First Class	88,202
	Second Class	86,365
	Same Day	28,976
Canada	Second Class	2,688
	Standard Class	2,151
	First Class	1,934
	Same Day	632
EMEA	Standard Class	39,305
	Second Class	22,882
	First Class	18,055
	Same Day	8,134
EU	Standard Class	142,607
	Second Class	71,513
	First Class	67,928
	Same Day	27,374
LATAM	Standard Class	104,959
	First Class	57,481
	Second Class	52,623
	Same Day	19,071

- A. Field Sort
- B. Nested Sort
- C. Alphabetic Sort
- D. Data Source Order

Correct Answer: B

Section:

Explanation:

Refer to Nested Sort section: https://help.tableau.com/current/pro/desktop/en-us/sortgroup_sorting_computed_howto.htm

QUESTION 32

Which of the following are forecast quality metrics available in Tableau?

- A. RMSE
- B. MAPE
- C. AISE

D. MASE

Correct Answer: A, B, D

Section:

Explanation:

Refer section "Quality Metrics" at https://help.tableau.com/current/pro/desktop/enus/forecast_describe.htm

QUESTION 33

What is the default join type when you blend two data sources?

- A. Inner join
- B. Outer join
- C. Left outer join
- D. Right join

Correct Answer: C

Section:

Explanation:

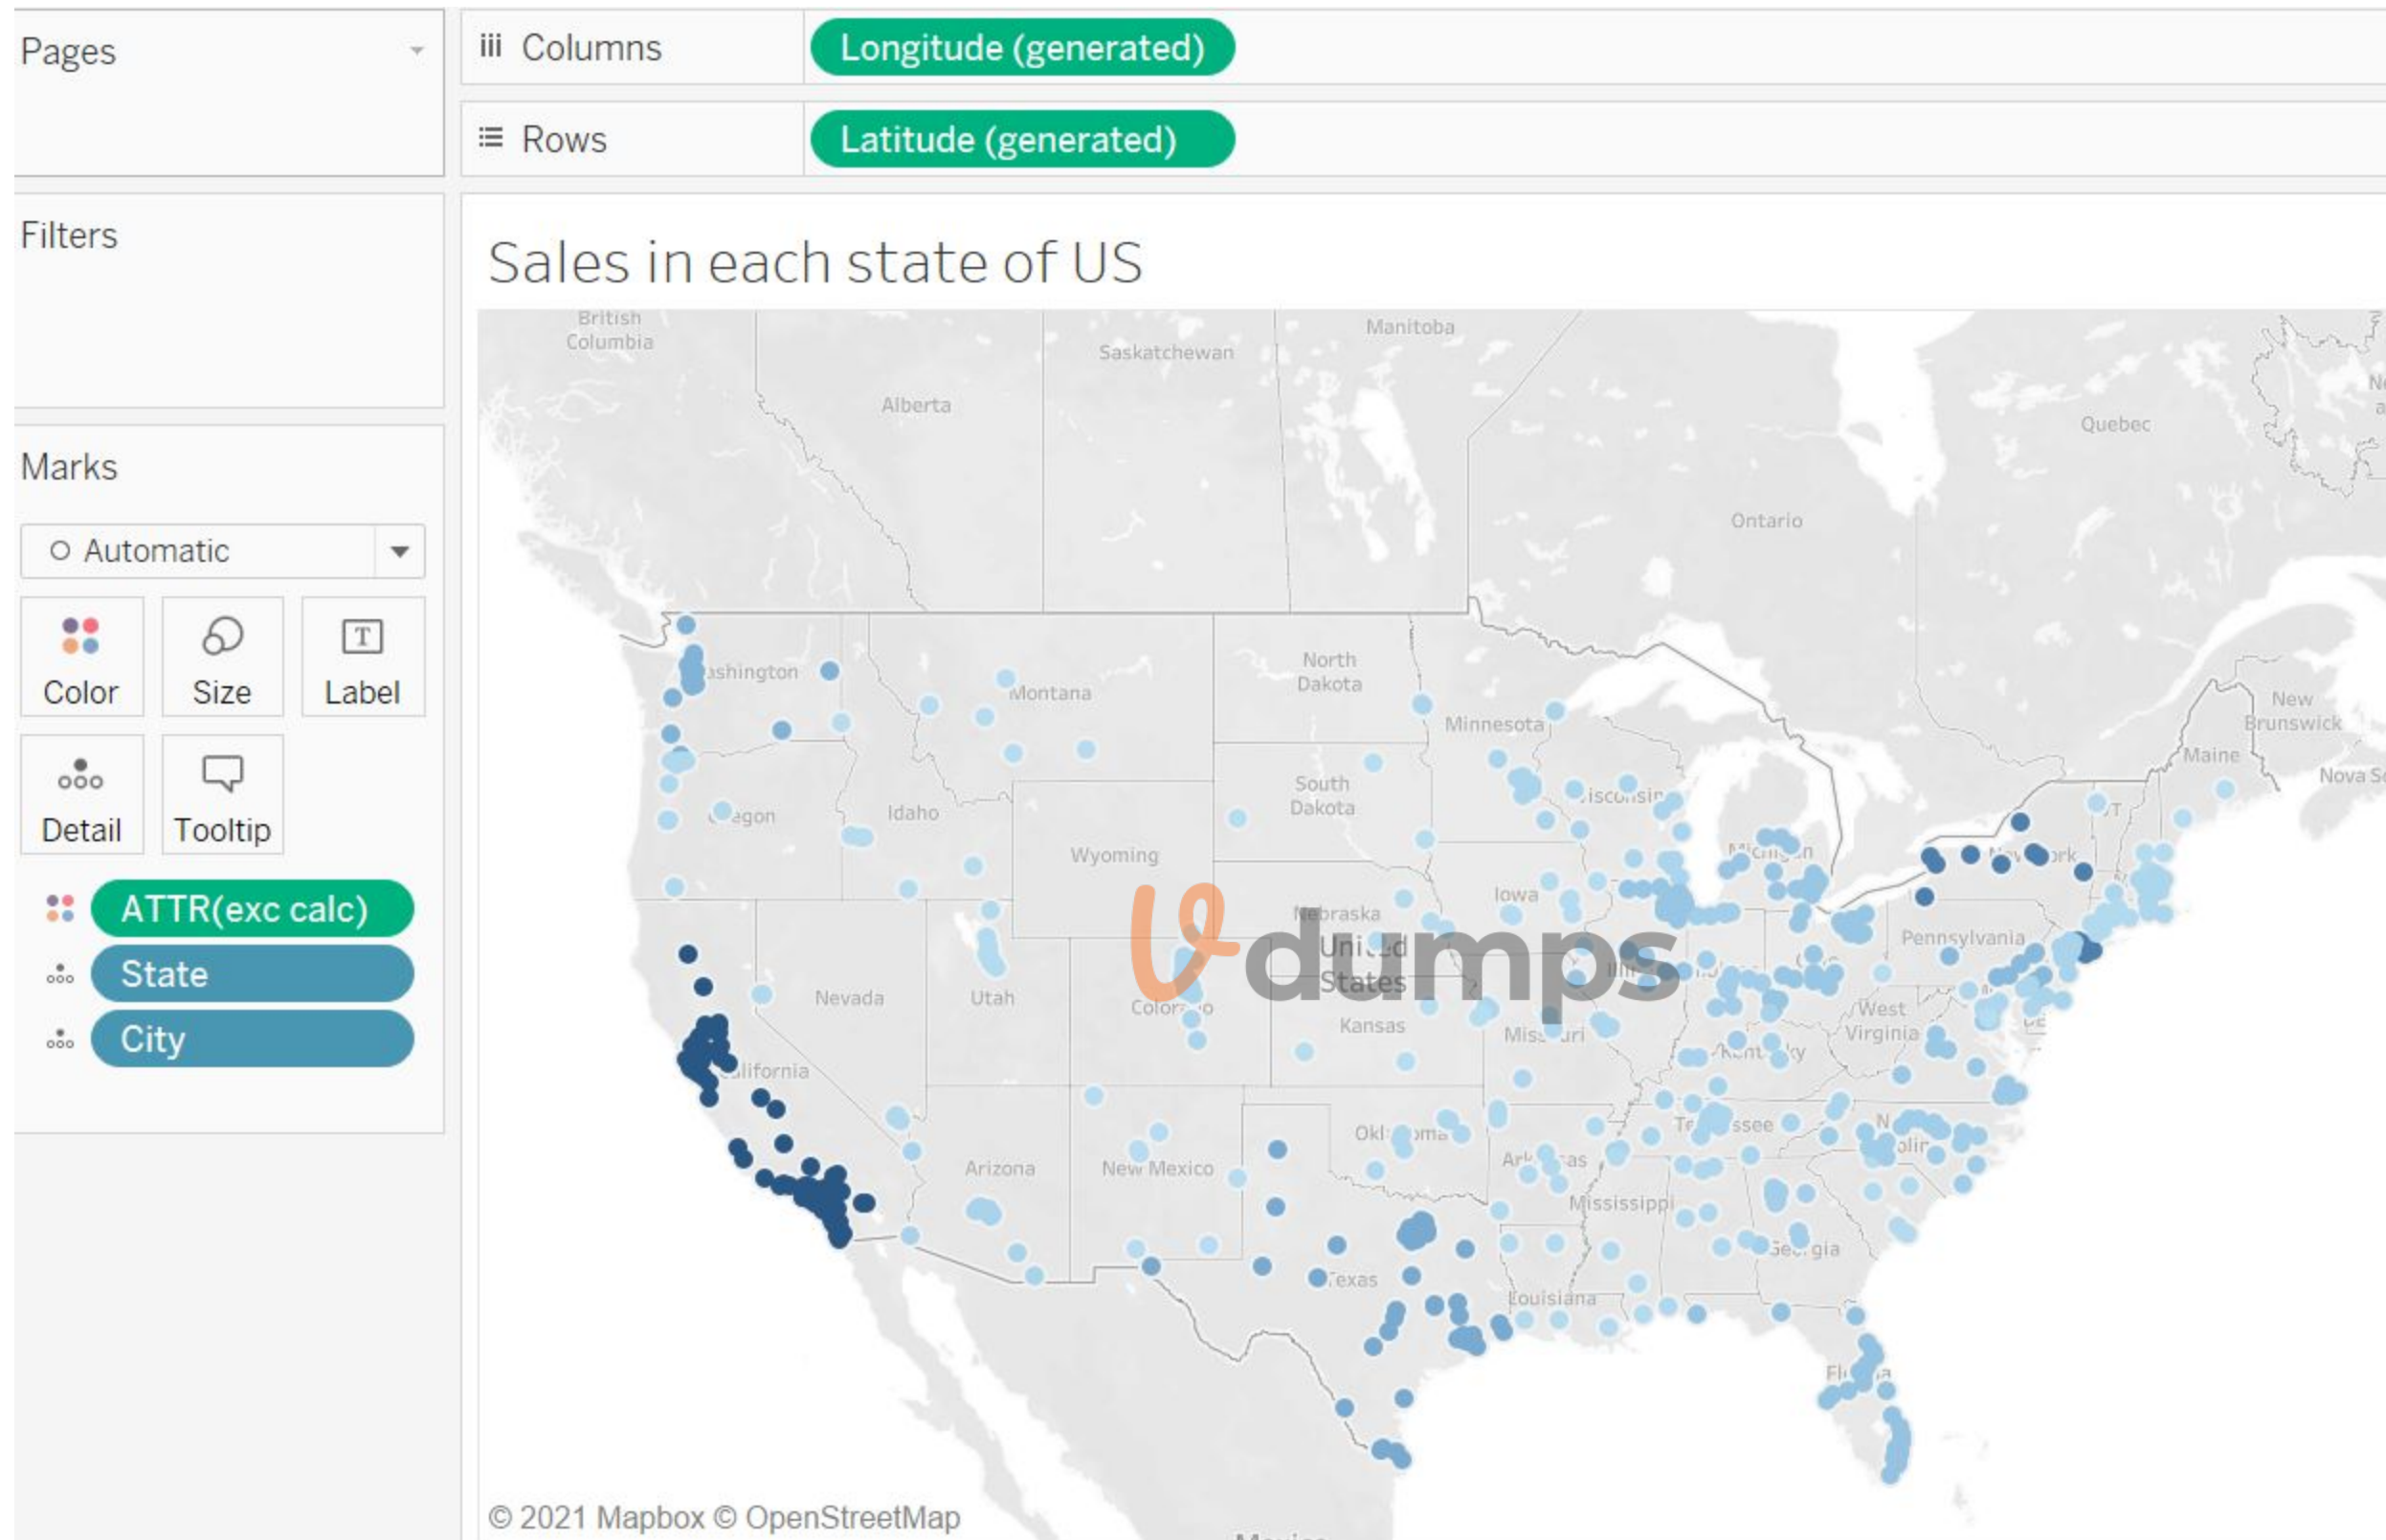

Blend is the left outer join after aggregation at the level of granularity.

QUESTION 34

Which calculation will color the sales by state, while the city is on the Marks card, as shown in this view?

Larger image

- A. {SUM([Sales])}
- B. { Exclude [City] : SUM([Sales])}
- C. { Exclude [State] : SUM([Sales])}
- D. { Exclude : SUM([Sales])}

Correct Answer: B
Section:

Explanation:

{ Exclude [City] : SUM([Sales])} => using this calculation we can exclude the City dimension from all the dimensions present in the view. So here SUM(sales) would be the aggregation of sales in the state level only, even though city field is available in the view.

QUESTION 35

Connect to the 'Global Superstore' data source and use the Orders table. Which of the customer names are in the Top 20 by sales, calculate the profit ratio for these customers and find out who all are in the bottom 5 in profit ratio (within these customers)?

- A. Sean Miller
- B. Raymond Buch
- C. Art Ferguson
- D. Bart Watters

Correct Answer: A, C

Section:

Explanation:

Right Click on the Customer Name -> Create -> Set

The screenshot shows the 'Create Set' dialog box with the following configuration:

- Name: Top 20 By Sales
- Tab: Top
- Radio button: By field:
- Dropdown: Top
- Text: 20
- Text: by
- Dropdown: Sales
- Dropdown: Sum
- Radio button: By formula:
- Dropdown: Top
- Text: 10
- Text: by

Create a calculated field:

Profit Ratio Orders (global_superstore)

```
SUM([Profit])/SUM([Sales])
```

Drop the Top 20 by Sales set, Customer Name to Rows.

Drop Sales and Profit Ratio to the view. Format the profit ratio so it will show the percentage.

Topic 2, Exam Pool B

Download the Dataset from here:

https://drive.google.com/file/d/1z7LPBQNPWHChteShI0QL3yu_JcvstLGI/view?usp=sharing

Use the above data set to answers the questions under Exam Pool B.

QUESTION 37

Connect to the 'Global Superstore' data source and use the Orders table. Find out the average quantity ordered by customers whose first name starts with an 'S' alphabet?

- A. 3.43
- B. 3.56
- C. 4.02
- D. 3.39

Correct Answer: B

Section:

Explanation:

Create a Calculation to get the first alphabet of the customer name.

First Alphabet Orders (global_superstore)

```
LEFT ([Customer Name], 1)
```

Now drop the First Alphabet field to Rows and Quantity field to the Text on the Marks card. Change the aggregation from SUM to AVG. Your view will look like this:

QUESTION 38

Connect to the 'Global Superstore' data source and use the Orders table. What is the total profit earned by all the cities in Wake County, North Carolina from the year 2012 to 2014?

- A. \$527
- B. \$403
- C. \$427
- D. \$503

Correct Answer: B

Section:

Explanation:

Drop the State to the View. And drop the Country to the Filter Shelf and Select the United States.

Drop the City to the view, and add the State to the Filter shelf and select North Carolina.

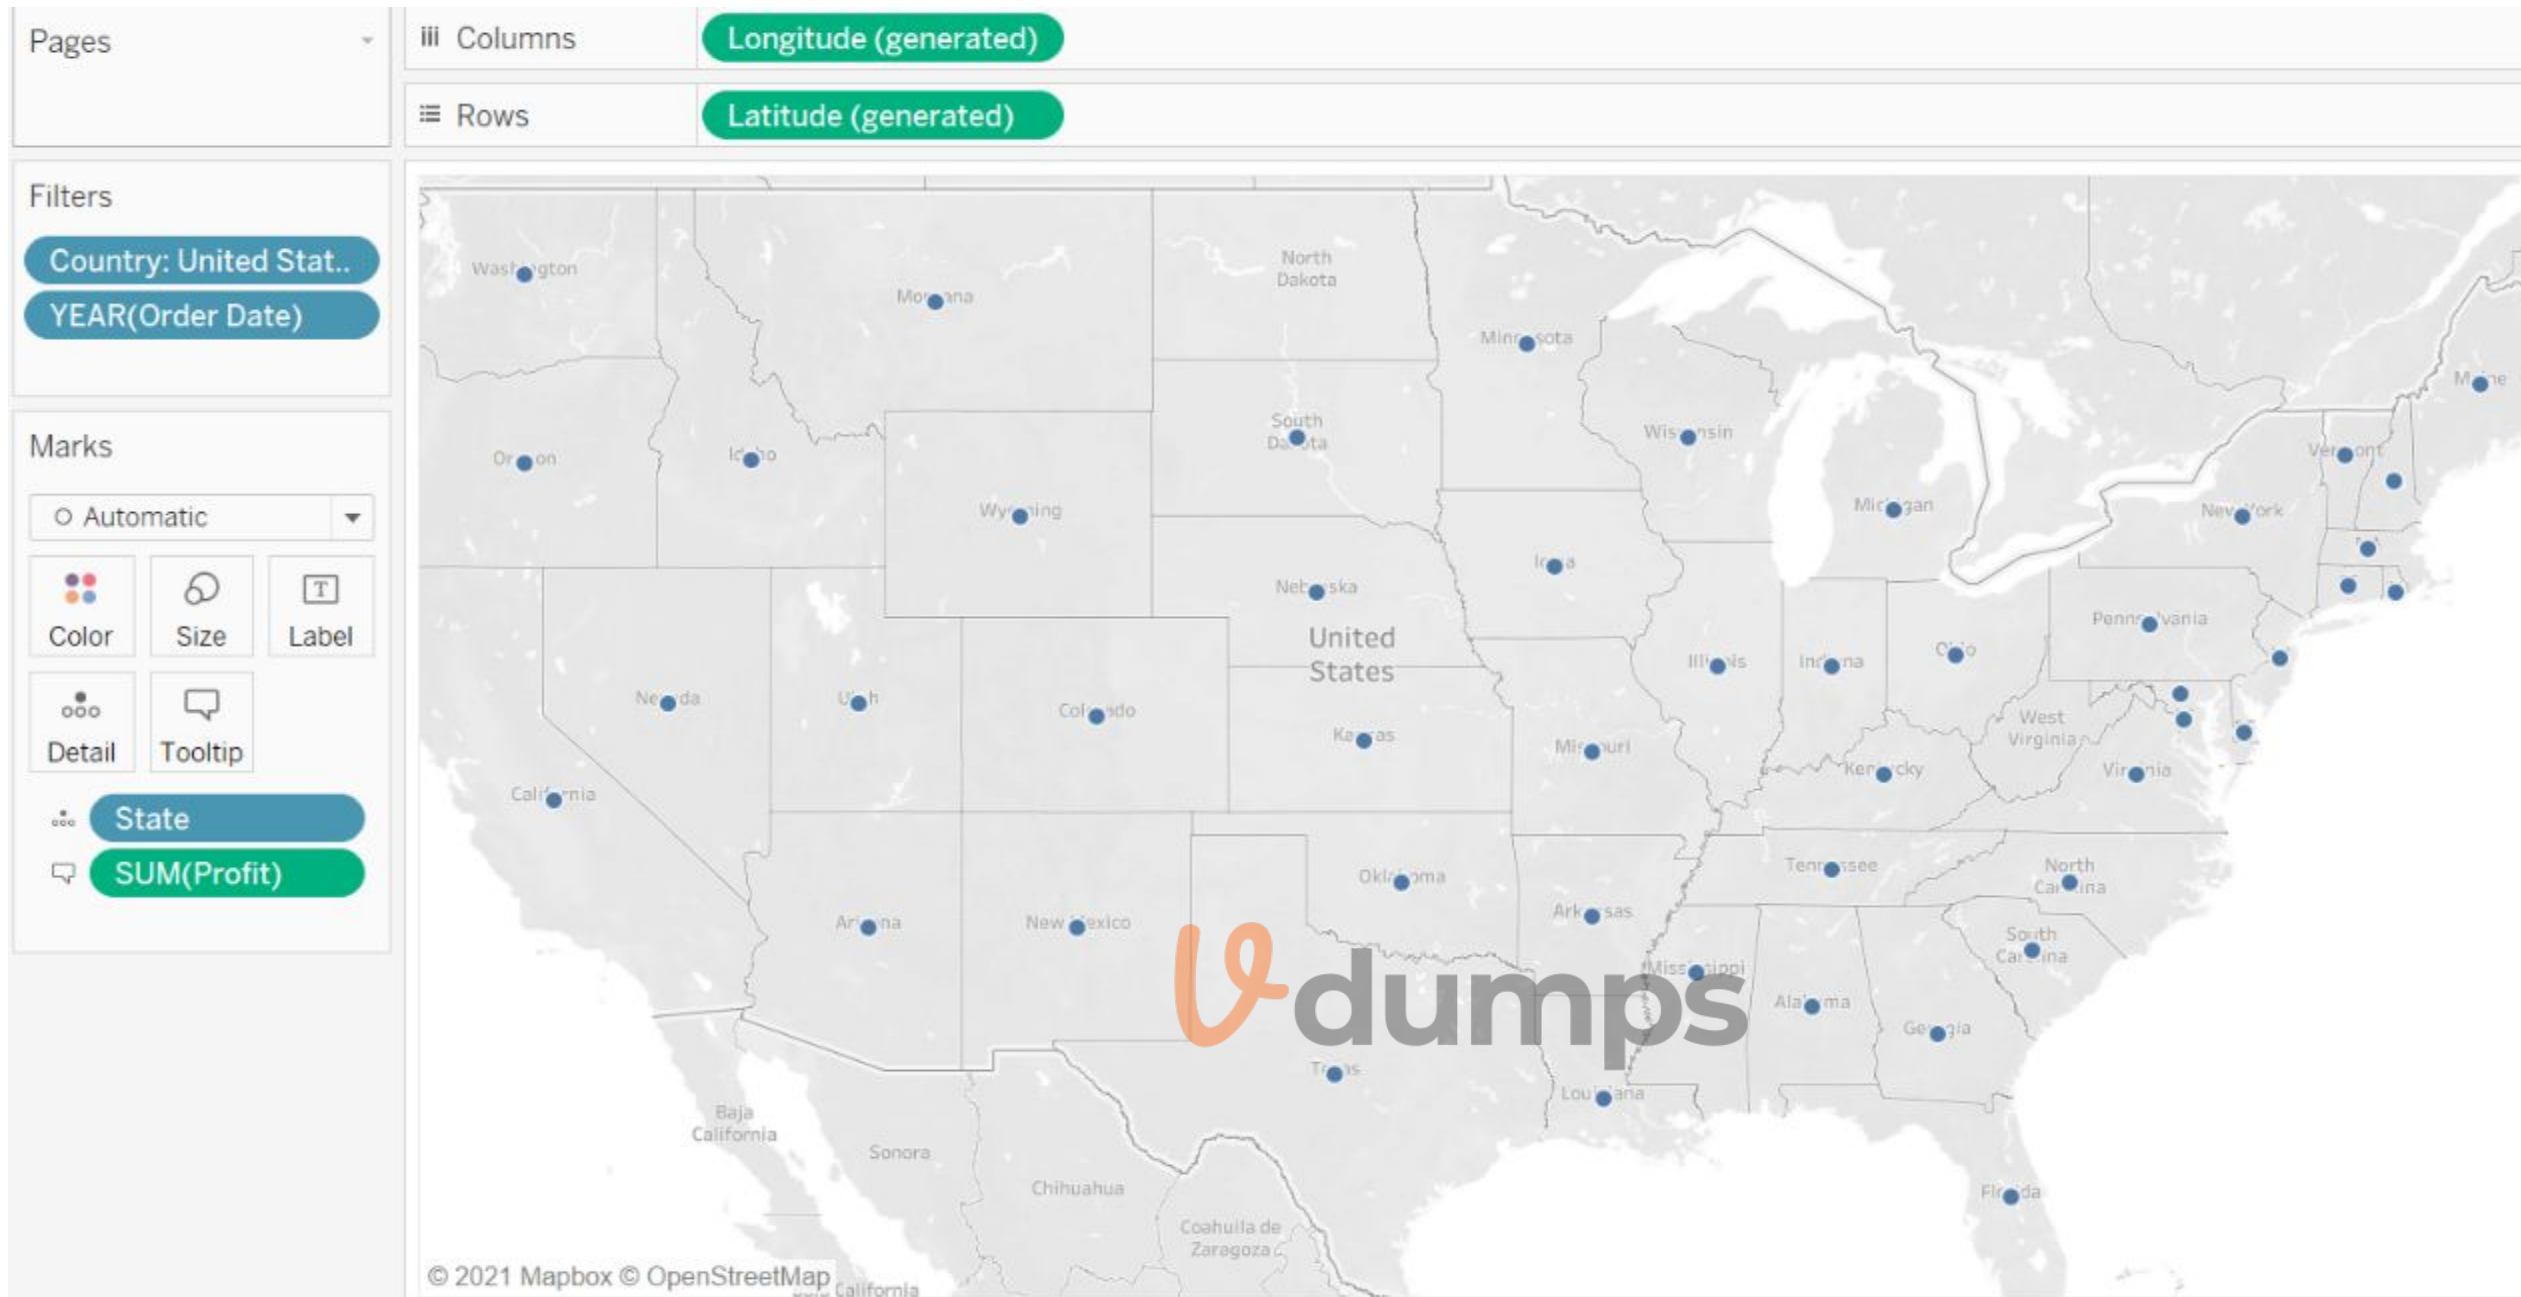

Also, drop the Order Date to the Filters and select year 2012, 2013, 2014

Filter [Year of Order Date]

The screenshot shows a filter configuration panel for 'Year of Order Date'. It has three tabs: 'General', 'Condition', and 'Top'. Under the 'General' tab, there are three radio button options: 'Select from list' (which is selected), 'Custom value list', and 'Use all'. Below these options is a search input field with the placeholder text 'Enter search text'. Underneath the search field is a list of years with checkboxes: 2012 (checked), 2013 (checked), 2014 (checked), and 2015 (unchecked).

Now, drop the Profit field to the tooltip. As of now, your view should look like this:

Vdumps

Now, we have to find the total profit earned by all the cities in Wake County.
 Drop the City field to the view and drop the state to the Filters shelf and Select North Carolina only.

The image shows a software interface with a map and a 'Filter [State]' dialog box. The dialog box has tabs for 'General', 'Wildcard', 'Condition', and 'Top'. Under the 'General' tab, there are three radio buttons: 'Select from list' (selected), 'Custom value list', and 'Use all'. Below this is a search bar with the text 'Enter search text'. A list of states is shown with checkboxes: Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina (checked), Ohio, Oklahoma, Oregon, Pennsylvania, and Rhode Island. At the bottom of the list are buttons for 'All', 'None', and 'Exclude'. A 'Summary' section at the bottom of the dialog shows: Field: [State], Selection: Selected 1 of 47 values, Wildcard: All, Condition: None, Limit: None. At the very bottom of the dialog are buttons for 'Reset', 'OK', 'Cancel', and 'Apply'.

To show the County go to the Map->Map Layers.
 Check County Names and County Borders.

the total profit earned by all the cities in Wake County is \$403.

QUESTION 39

Connect to the 'Significant Volcano Eruption' data source. What percentage of total deaths caused by volcanoes which were having a volcano index greater than 2 and elevation greater than 5000?

- A. 6.58%
- B. 0.27%
- C. 3.45%
- D. 5.61%

Correct Answer: A

Section:

Explanation:

Create a calculated field as:

Vol Index and elevati vulerup (significantvolcanoeruptions)

```
[Volcano Explosivity Index (VEI)] >2 AND [Elevation] >5000
```

Drop this field to Rows and Total Death to the Columns. And Select the Quick Table Calculation-> Percent of Total.

QUESTION 40

Which of the following are true regarding parameter actions?

- A. While creating the parameter action, you must specify the aggregation.
- B. The aggregation that you choose for the parameter action can be different than the aggregation used for the field in the view.
- C. You can create multiple parameter actions in your dashboard.
- D. Using parameter action, you can update the reference line.

Correct Answer: B, C, D

Section:

Explanation:

While creating the parameter action, it is not mandatory to specify the aggregation.

All others are true.

Refer: https://help.tableau.com/current/pro/desktop/en-us/actions_parameters.htm

QUESTION 41

You are unable to join two tables because tableau throws the type mismatch error. How you can solve it most likely?

- A. Using Union
- B. Using Blend
- C. Using Join Calculations
- D. Using cross-database join

Correct Answer: C

Section:

Explanation:

Use join Calculations while joining two tables.

**QUESTION 42**

While creating which of the chart type, we turn off the stack marks from the analysis menu?

- A. Box and whisker plots
- B. Bar in bar chart
- C. Bullet graphs
- D. Combined Axis chart

Correct Answer: B

Section:

Explanation:

While creating Bar in bar chart, we turn off the stacked marks so that both the bars will start from 0.

QUESTION 43

You have connected to the employee table in your data source and are adding a join on the Employee Manager table. If you would like to see all of the records from the employee table and only matching records from the employee manager table. Which join type will you use?

- A. Inner join
- B. Outer join

- C. Left join
- D. Right join

Correct Answer: C

Section:

Explanation:

When you use a left join to combine tables, the result is a table that contains all values from the left table and corresponding matches from the right table.

Refer Join Types: https://help.tableau.com/current/pro/desktop/en-us/joining_tables.htm

QUESTION 44

Connect to the 'Kiva Loans - India' data source, which sector's funded amount is closest to the median of all the sectors?

- A. Education
- B. Clothing
- C. Construction
- D. Retail

Correct Answer: B

Section:

Explanation:

Drop Sector to columns and Funded Amount to Rows.

From Analytics, drop the Median with Quartiles to your view or drop the reference line, select the Median.

Your view will look like this:

Here, the Clothing funded amount is exactly similar to the Median.

QUESTION 45

What are the types of annotations available in Tableau?

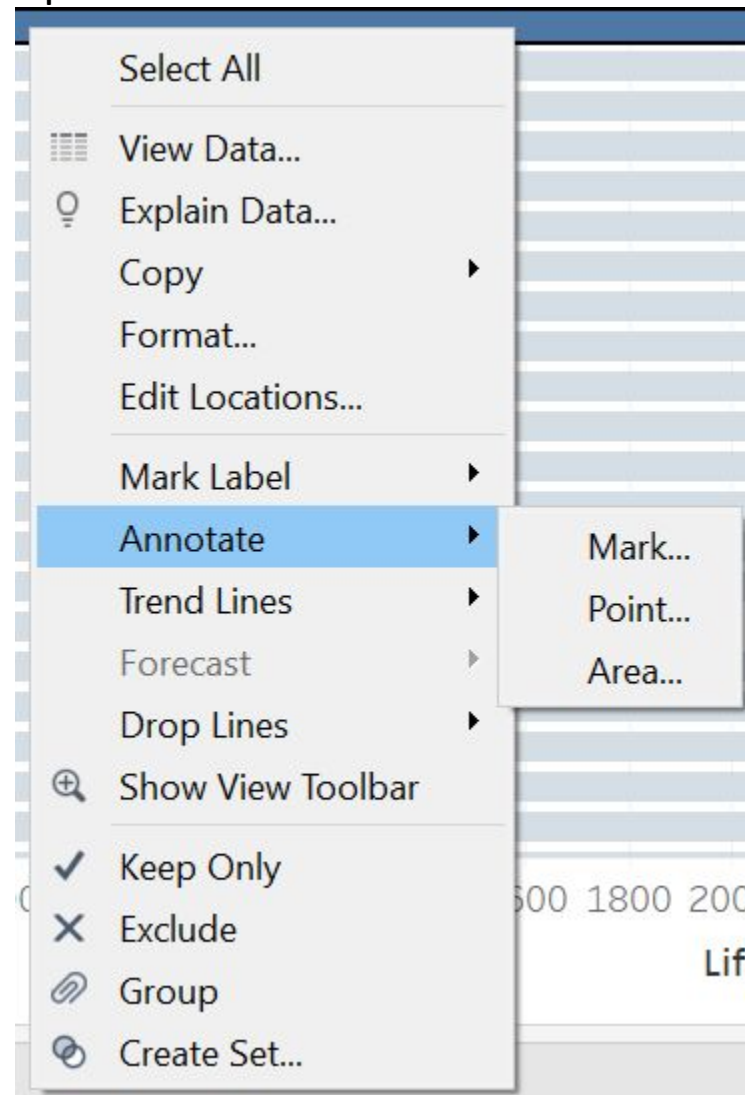

- A. Mark
- B. Point
- C. Circle

D. Area

Correct Answer: A, B, D

Section:

Explanation:

The logo for 'Vdumps' features a stylized orange 'V' followed by the word 'dumps' in a grey, sans-serif font.

QUESTION 46

Connect to the 'Kiva Loans - India' data source, find out the average number of days it took to disburse the funded amount in catering activity, and what is the total funded amount?

- A. 26.5, \$2275
- B. 26, \$2275
- C. 26.5, \$325
- D. 26, \$325

Correct Answer: A

Section:

Explanation:

No of days

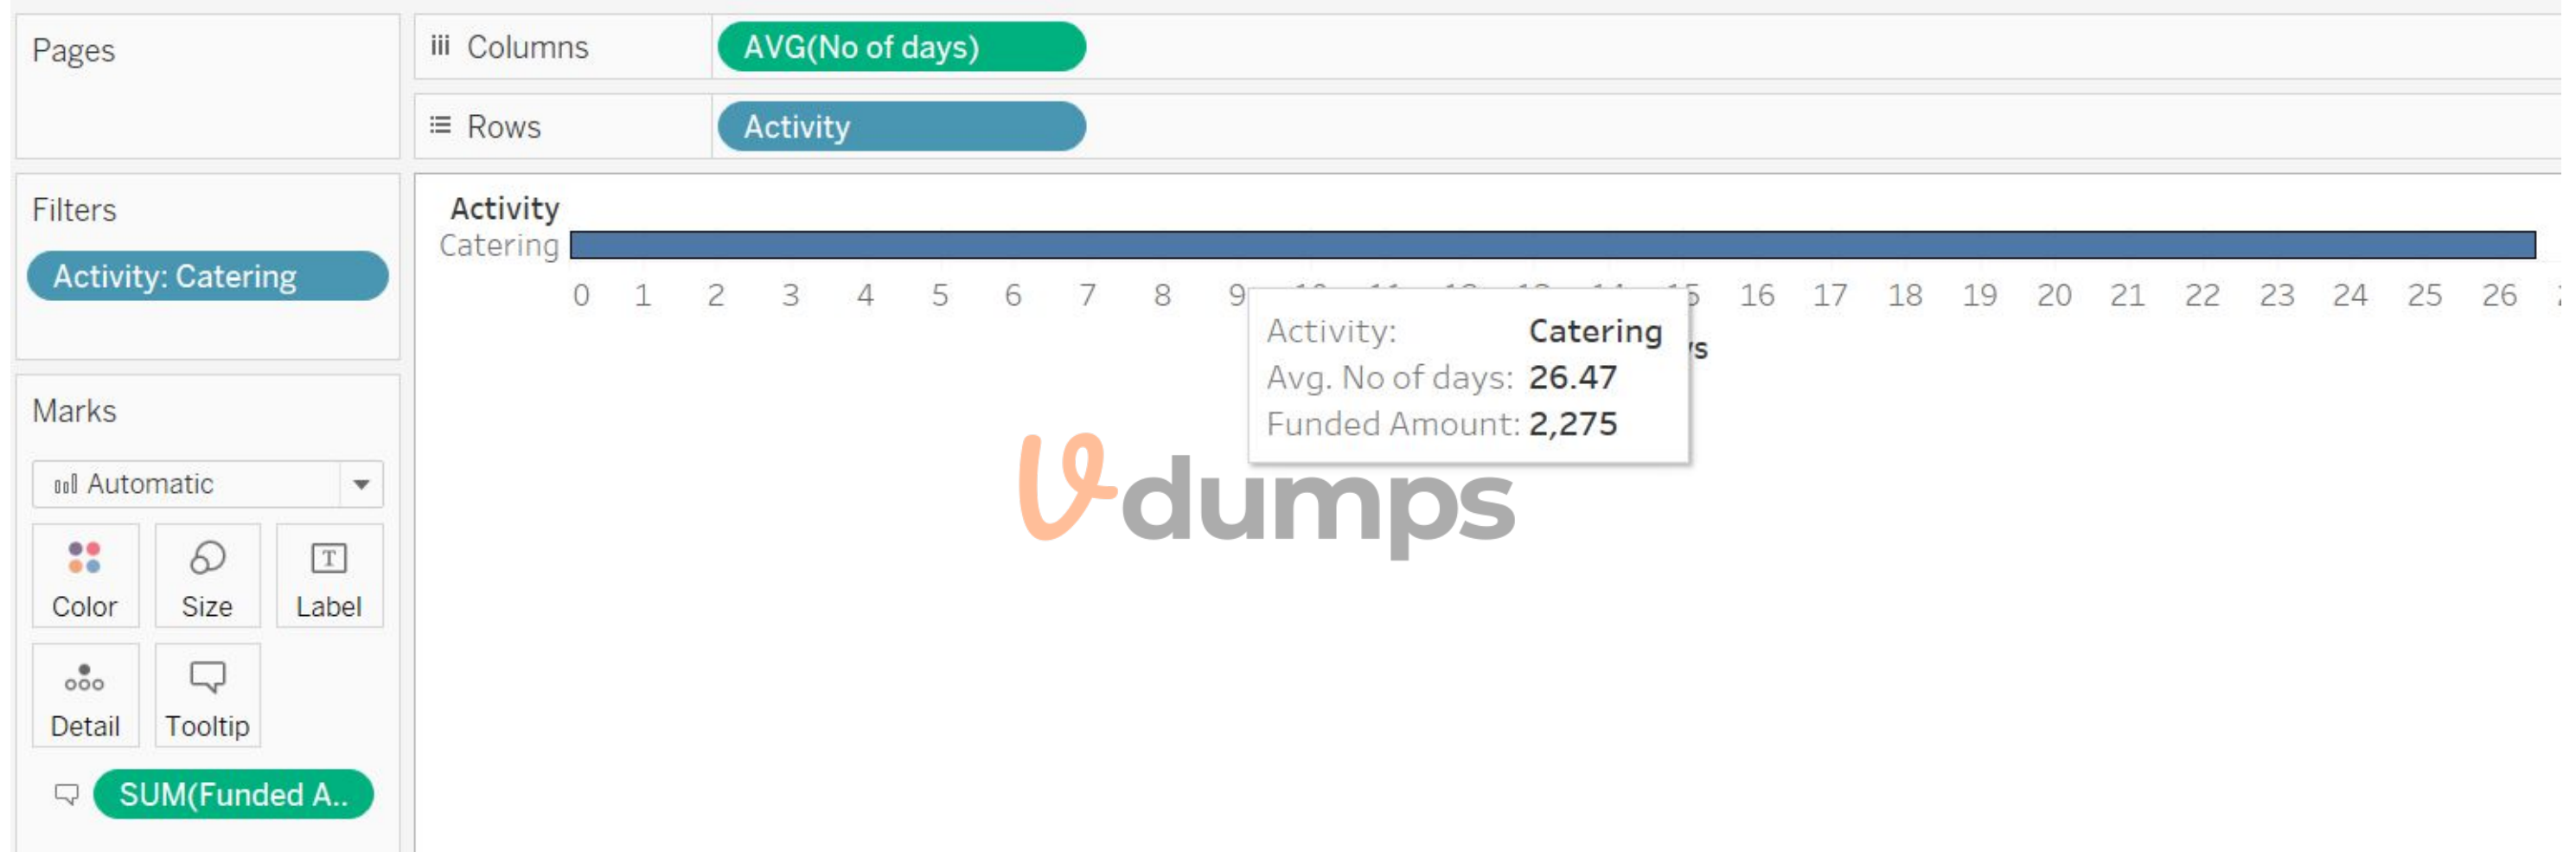

Kiva Loans - India

[Disbursed Time] - [Funded Time]

Filter the Activity = Catering

Drop the activity to rows, and no of days to columns, change the aggregation to AVG.

Also, drop the Funded Amount to the Tooltip.

QUESTION 47

Connect to the 'Global Superstore' data source and use the Orders table. Find out how many new customers were acquired in the year 2014?

- A. 4419
- B. 5412
- C. 4719
- D. 5216

Correct Answer: A

Section:

Explanation:

If customer first order is equal to the order date, then this is the new customer.

Create a calculated field to find the first order date:

Find If the order date is equal to the day of first purchase for that customer, flag that row as a 'New Customer'

Find the unique customers:

Drop the Order date to filter shelf and select the year 2014 to find out the new customer acquired in 2014.

Drop New Customer field to Rows and Unique customer field to Text marks card.

QUESTION 48

Use custom geocoding, when you need _____ locations to map your data.

- A. Default
- B. States
- C. User-defined
- D. Tableau generated

Correct Answer: C

Section:

Explanation:

Custom geocoding means that you assign latitude and longitude coordinates to your locations so Tableau can plot them accurately.

Refer: https://help.tableau.com/current/pro/desktop/en-us/custom_geocoding.htm

QUESTION 49

Connect to the 'Global Superstore' data source and use the Orders table. Predict the profit of January 2016 using the profit data through December 2015. What is the profit value of January 2016?

- A. \$35,152
- B. \$33,759
- C. \$46,917
- D. \$39,921

Correct Answer: A

Section:

Explanation:

Drop the Orders Date to the Columns shelf and change it to the Month Date Value and drop the profit to the rows shelf. Your view will look like this:

Pages

Show prediction intervals 95%

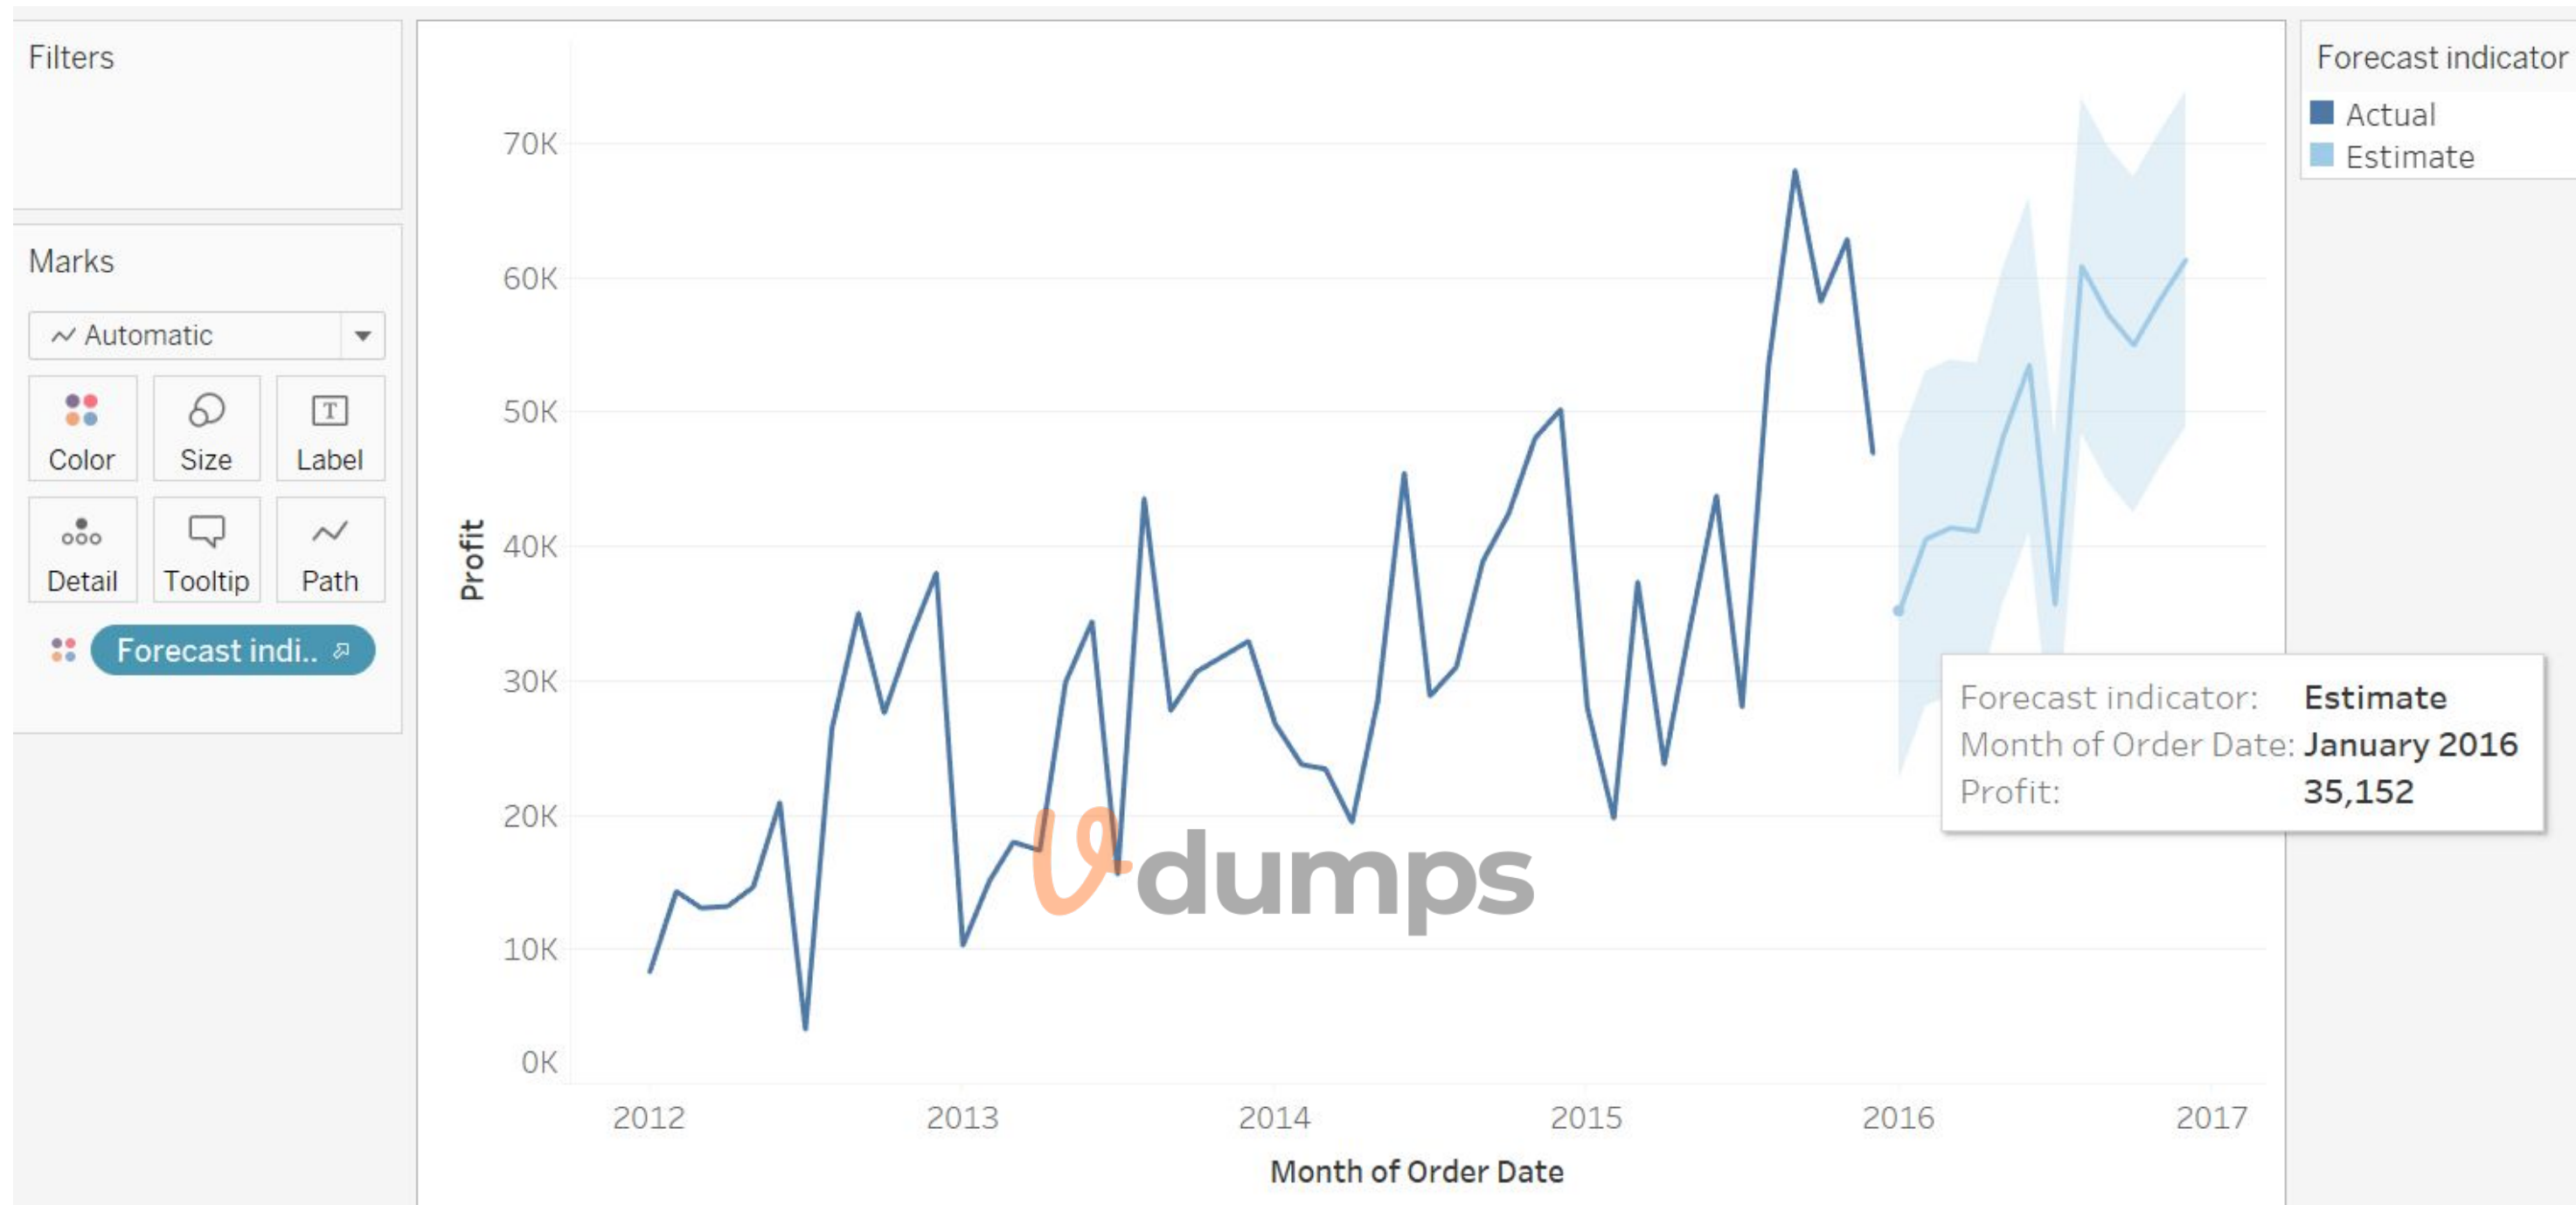

Currently using source data from January 2012 to December 2015 to create a forecast through December 2016. Looking for potential seasonal patterns every 12 Months.

[Learn more about forecast options](#)

OK

\$35,152 is the correct answer.

QUESTION 50

Why we convert a numeric measure to a dimension?

- A. To aggregate the field
- B. To show the labels in your view
- C. To use this field in LOD
- D. To disaggregate the field

Correct Answer: D

Section:

Explanation:

Measures are by default aggregated. We can change measures to dimensions if we want disaggregate that field.

QUESTION 51

Connect to the 'Significant Volcano Eruption' data source. In 1899, the Dona Juana volcano erupted in Colombia. Find out which volcano in the Popayn city is the closest to Dona Juana and how many death Dona Juana volcano caused?

- A. Purace, 55
- B. Galeras, 55
- C. Purace, 0
- D. Galeras, 0

Correct Answer: A

Section:

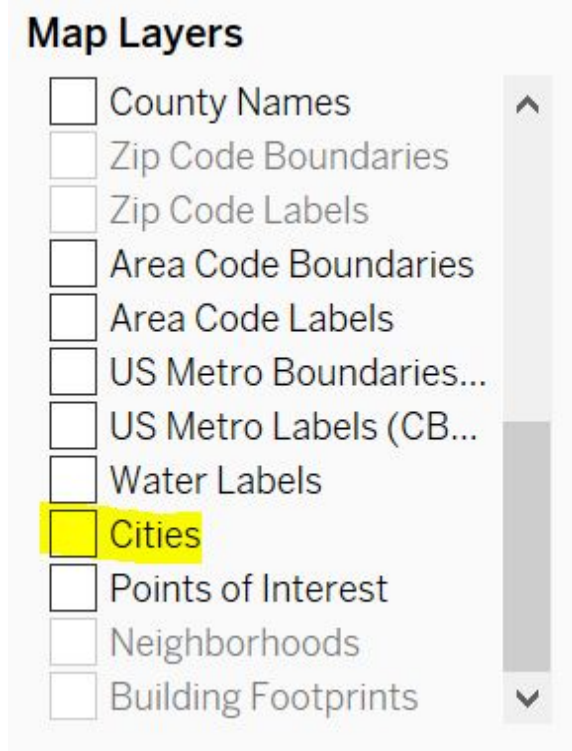

Explanation:

Drop the Latitude and Longitude fields to Rows and Columns shelf respectively. Or double click on these fields.

Drop the Location field to Filter shelf, select the Location as Colombia.

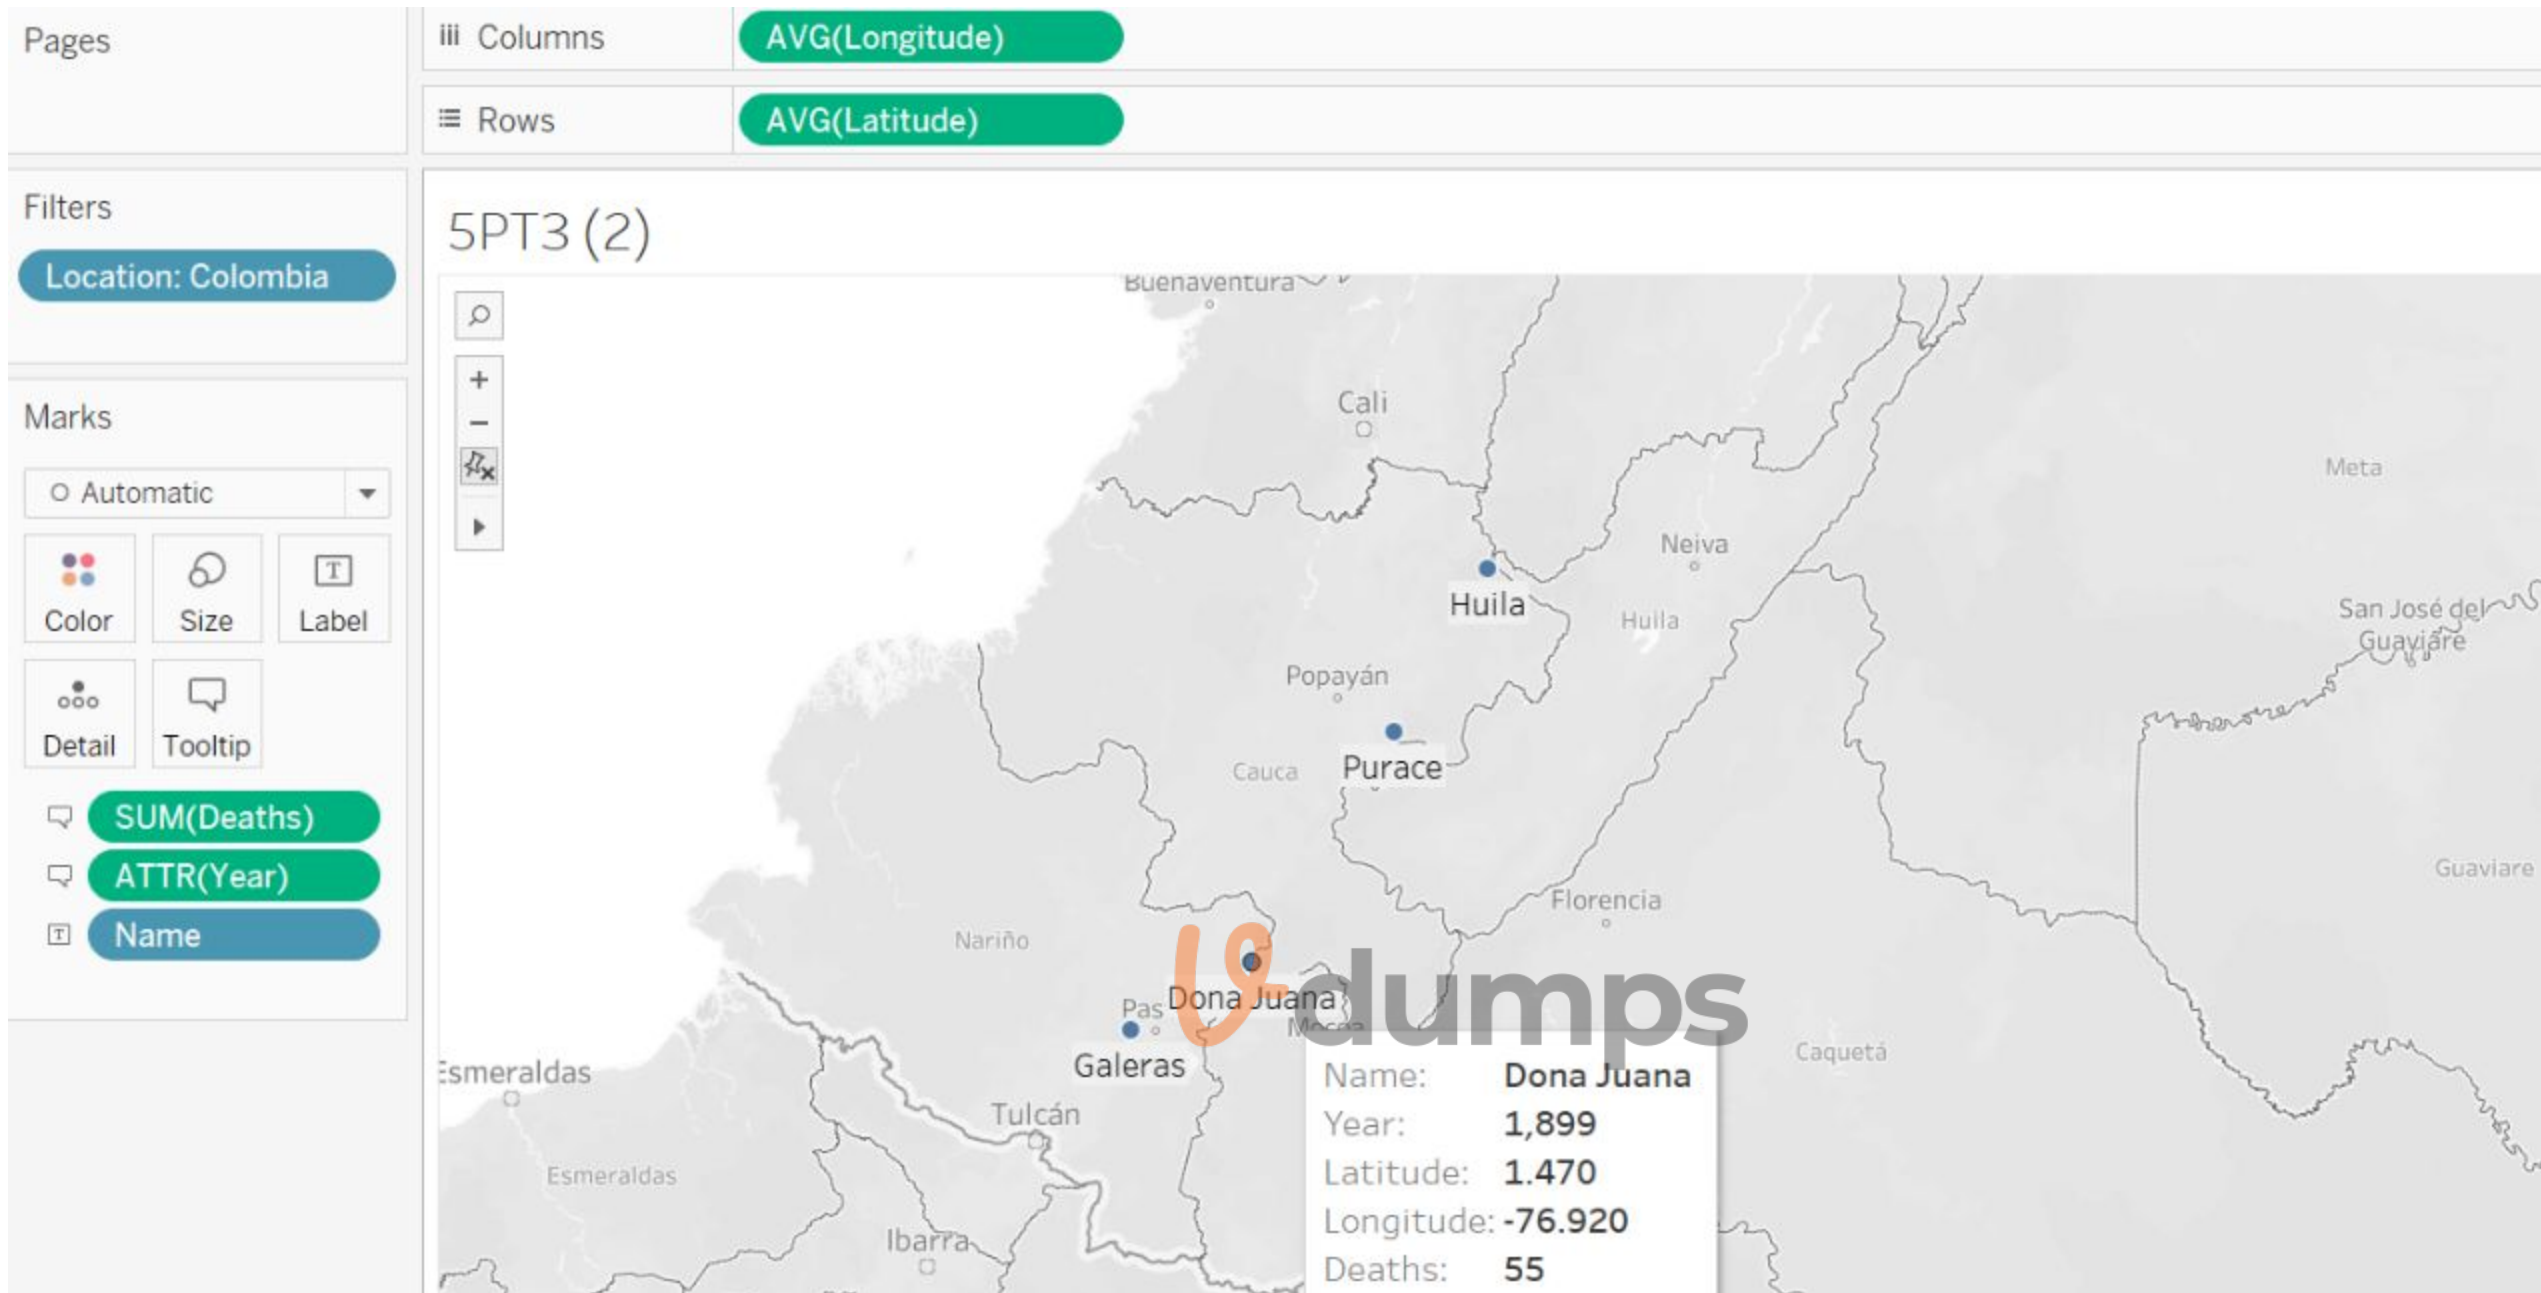

Drop the Name field to the Label.

To show the cities go to the Map -> Map layer and Check the Cities.

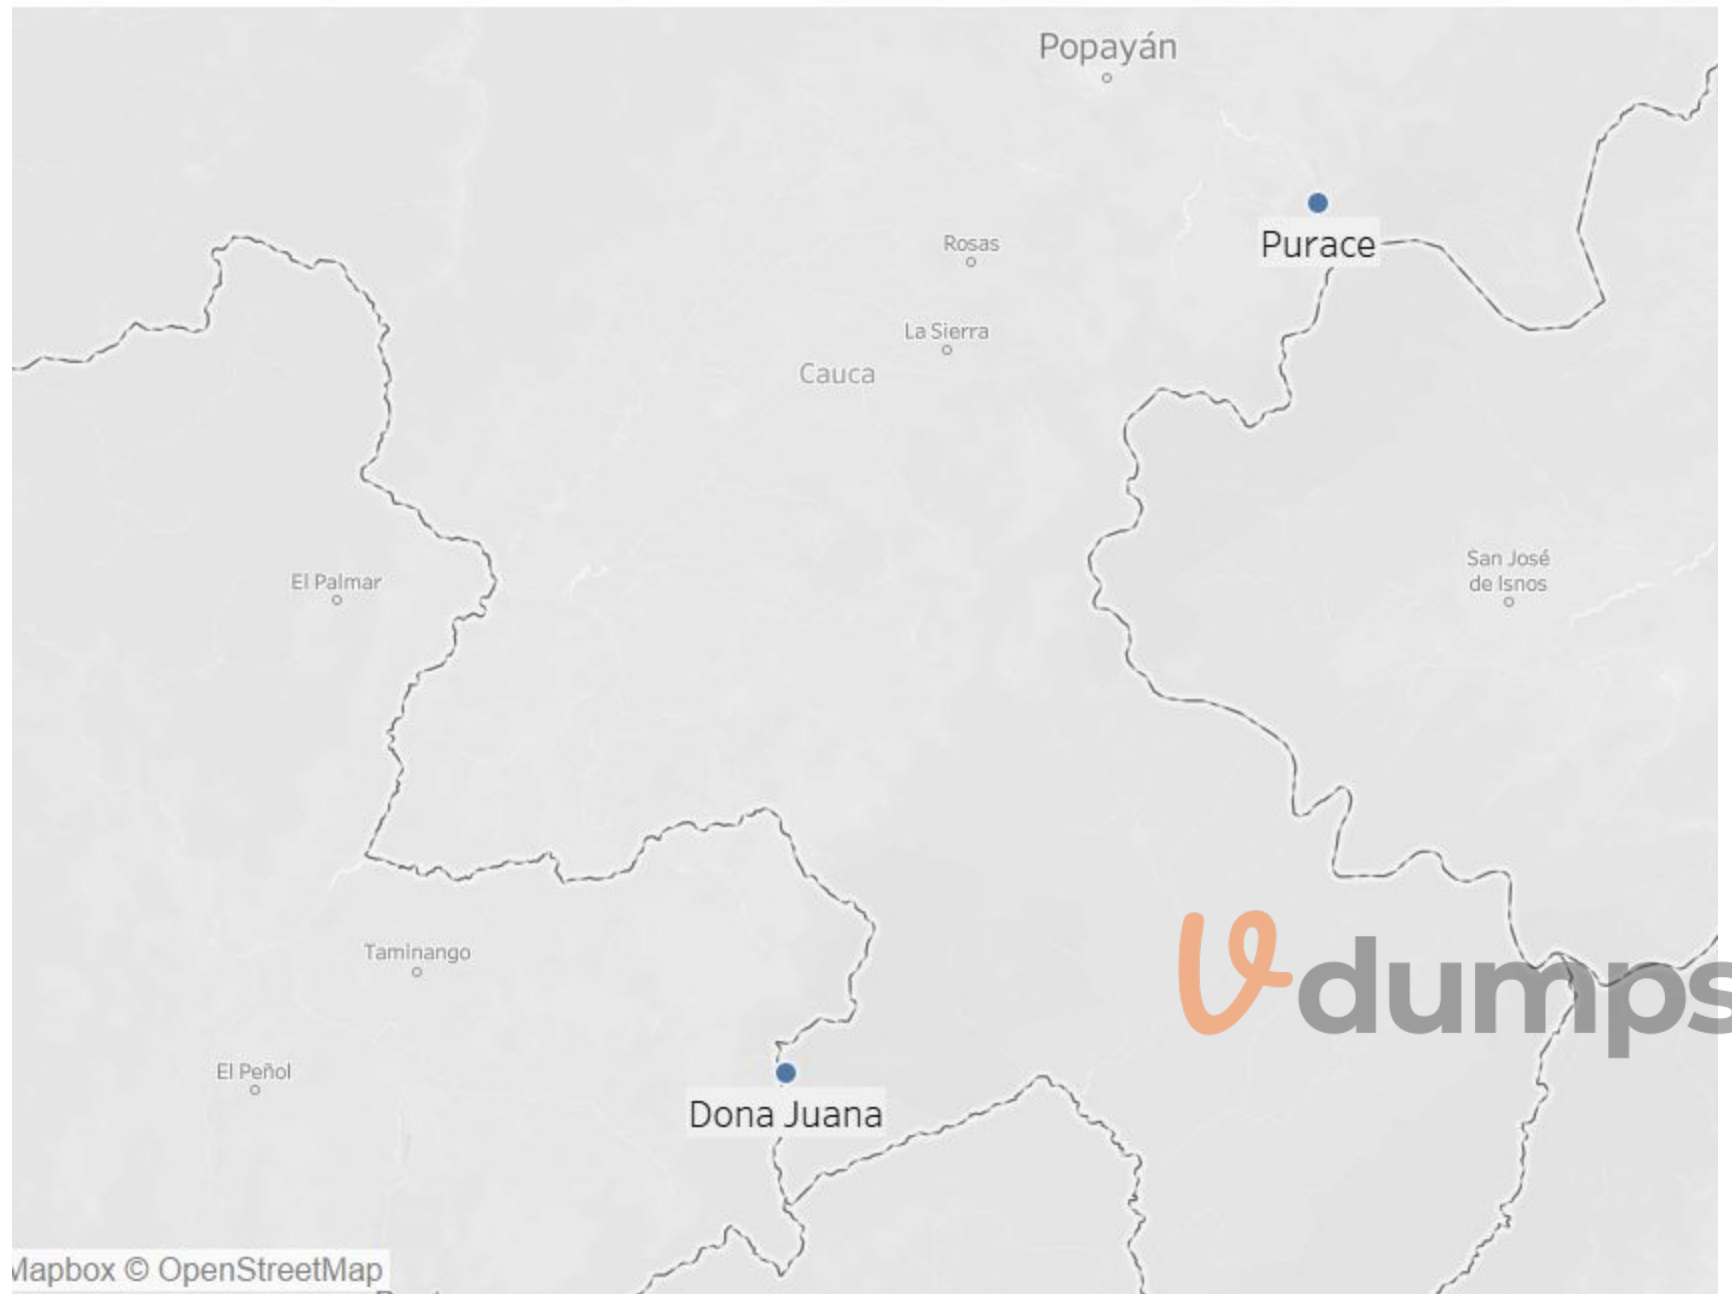

Drop the Deaths and Year fields to the Tooltip. Now your view looks like this:

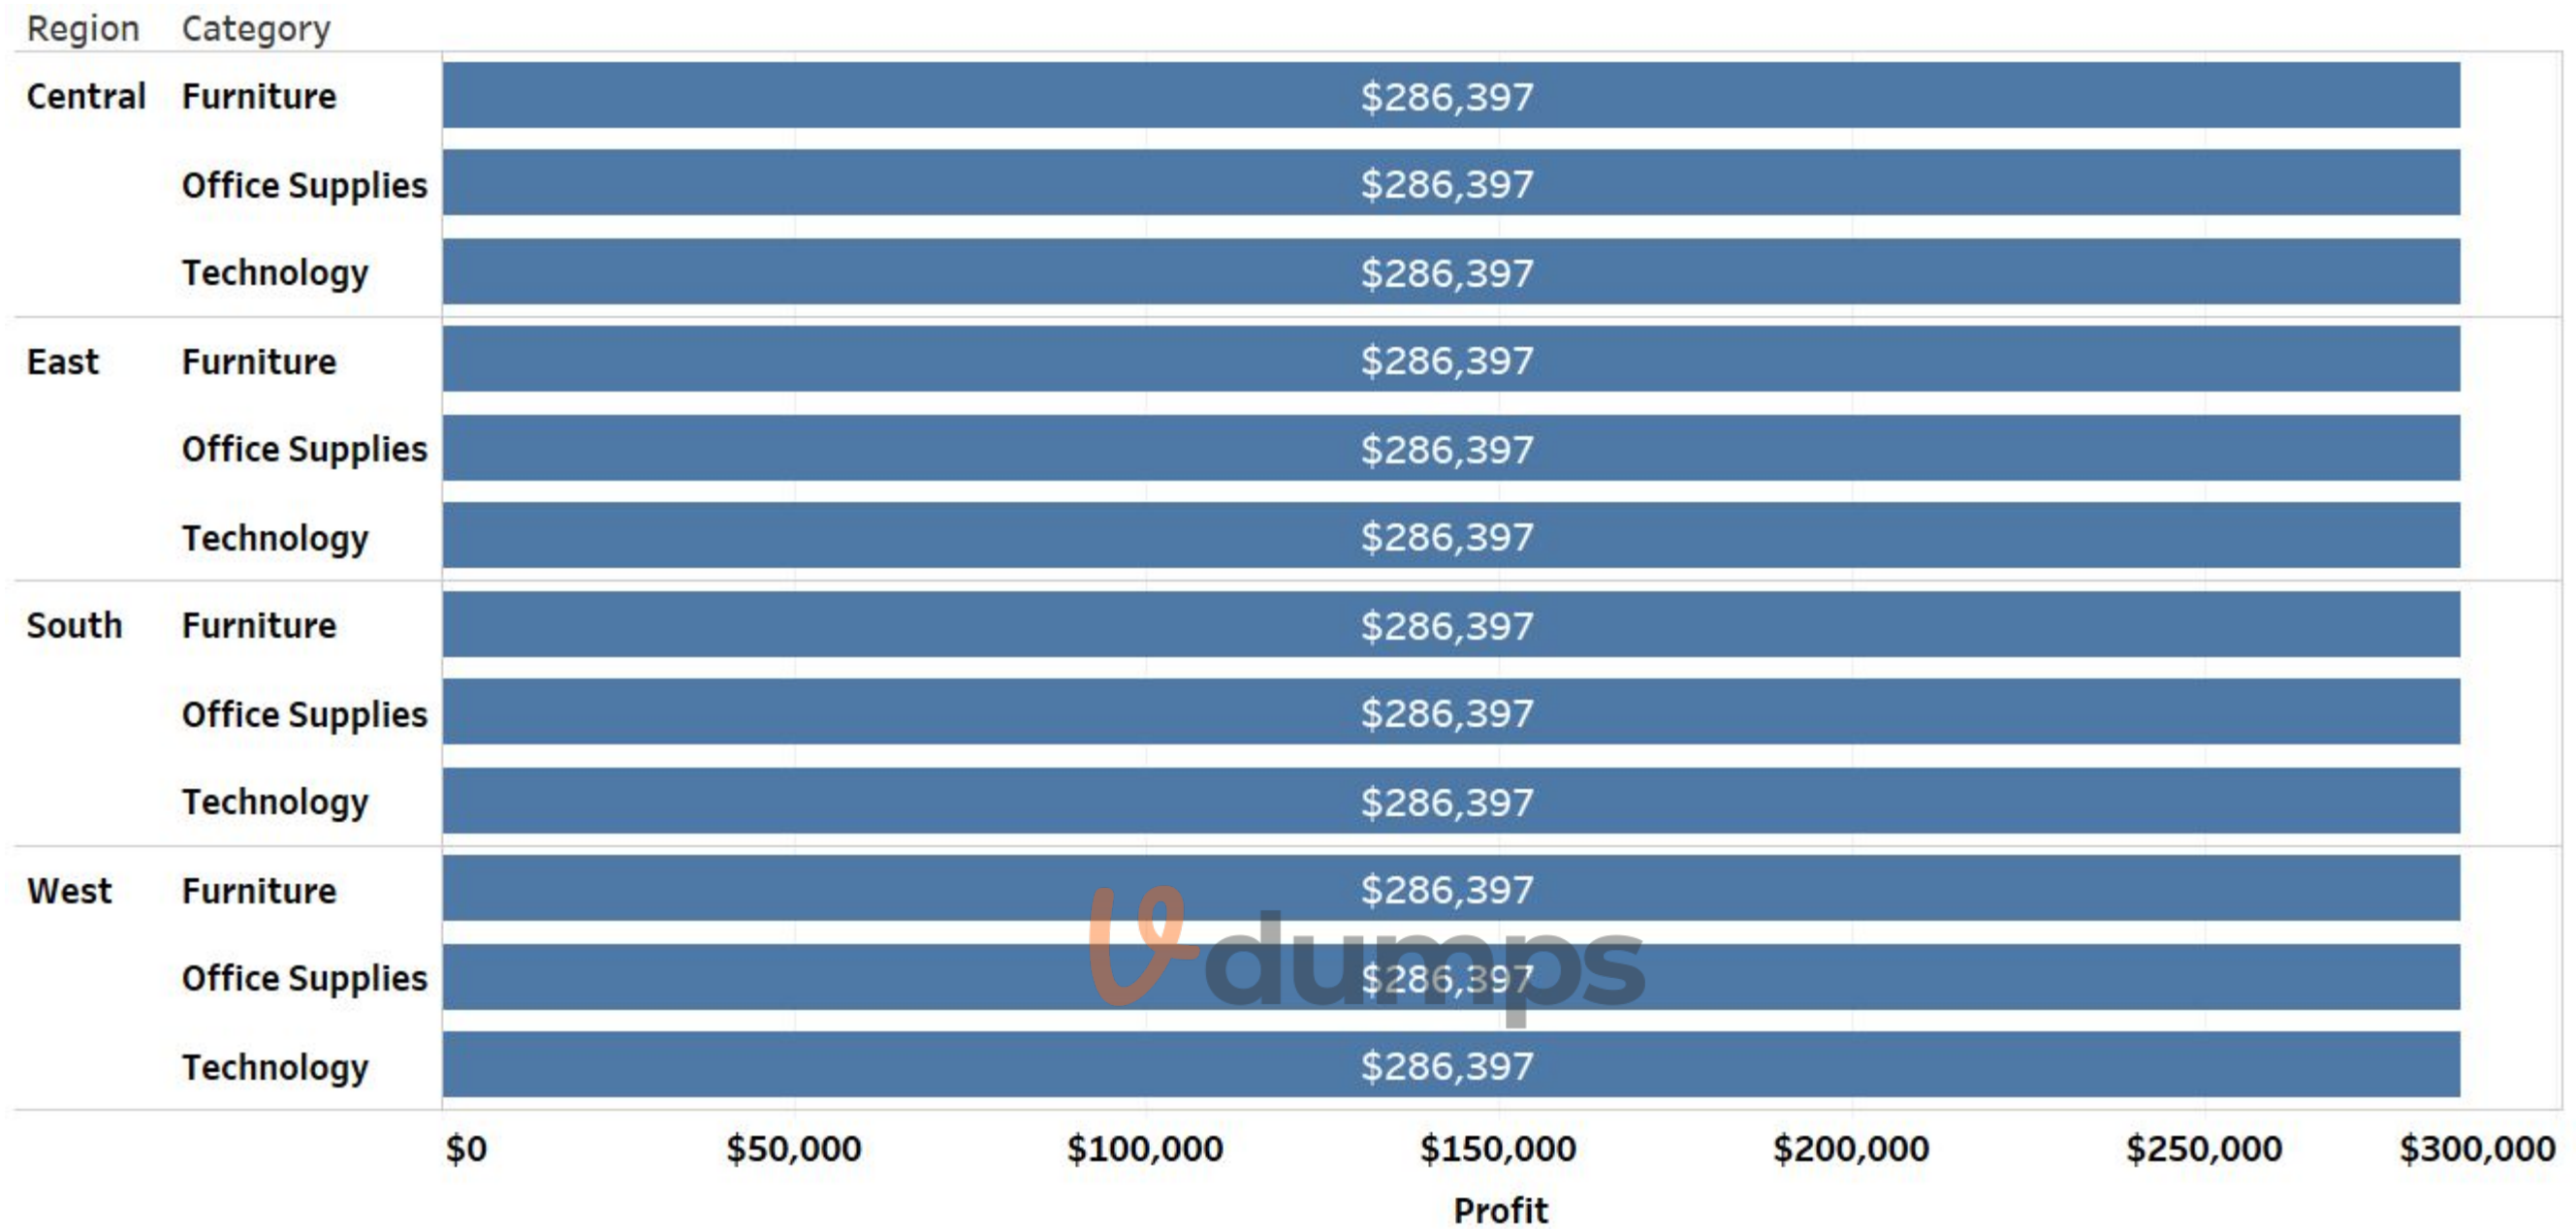

Zoom-in the map, you will find Purace is the nearest one in the Popayn city and Dona Juana was having 55 deaths.

QUESTION 52

Which of the following are true regarding the data highlighter in Tableau?

- A. You can turn on the highlighter for any field available in your view.

- B. If you update the underlying data source for your view the data shown in the highlighter is automatically updated too.
- C. If you have multiple highlighters showing on a dashboard, only one highlighter can be active at a time.
- D. If you want to change the format for the highlighter card after you turn it on, select Format > Highlighter.

Correct Answer: B, C, D

Section:

Explanation:

The first option is wrong here, you can turn on the highlighter only for the discrete fields in your view.

Refer: https://help.tableau.com/current/pro/desktop/en-us/actions_highlight_highlighter.htm

QUESTION 53

Which LOD calculations can be used in Columns shelf to create this view?

Larger image

- A. { FIXED [Category] : SUM([Profit])}
- B. { FIXED [Region] : SUM([Profit])}
- C. { FIXED : SUM([Profit])}
- D. {SUM([Profit])}

Correct Answer: C, D

Section:

Explanation:

{ FIXED [Category] : SUM([Profit])} - It calculates the profit of each category. In our view, all the profits values are the same, so it is not the right answer.

{ FIXED [Region] : SUM([Profit])} - It calculates the profit of each region.

{SUM([Profit])} is equivalent to {FIXED : SUM([Profit])}. It is the table level scope, which means this is the profit of the entire dataset.

QUESTION 54

Connect to the 'Significant Volcano Eruption' data source. Using the elevations field, create bins of size 1000 and find out in which bin has the most total deaths?

- A. 0
- B. 1000
- C. 2000
- D. 3000

Correct Answer: C

Section:

Explanation:

Select the 'Elevation' field from measures, and go to show me. Click on Histogram.

Right-Click on the 'Elevation (bin)' dimension and select Edit. Change the size of bins to 1000.

Dialog box titled "Edit Bins [Elevation]".

New field name:

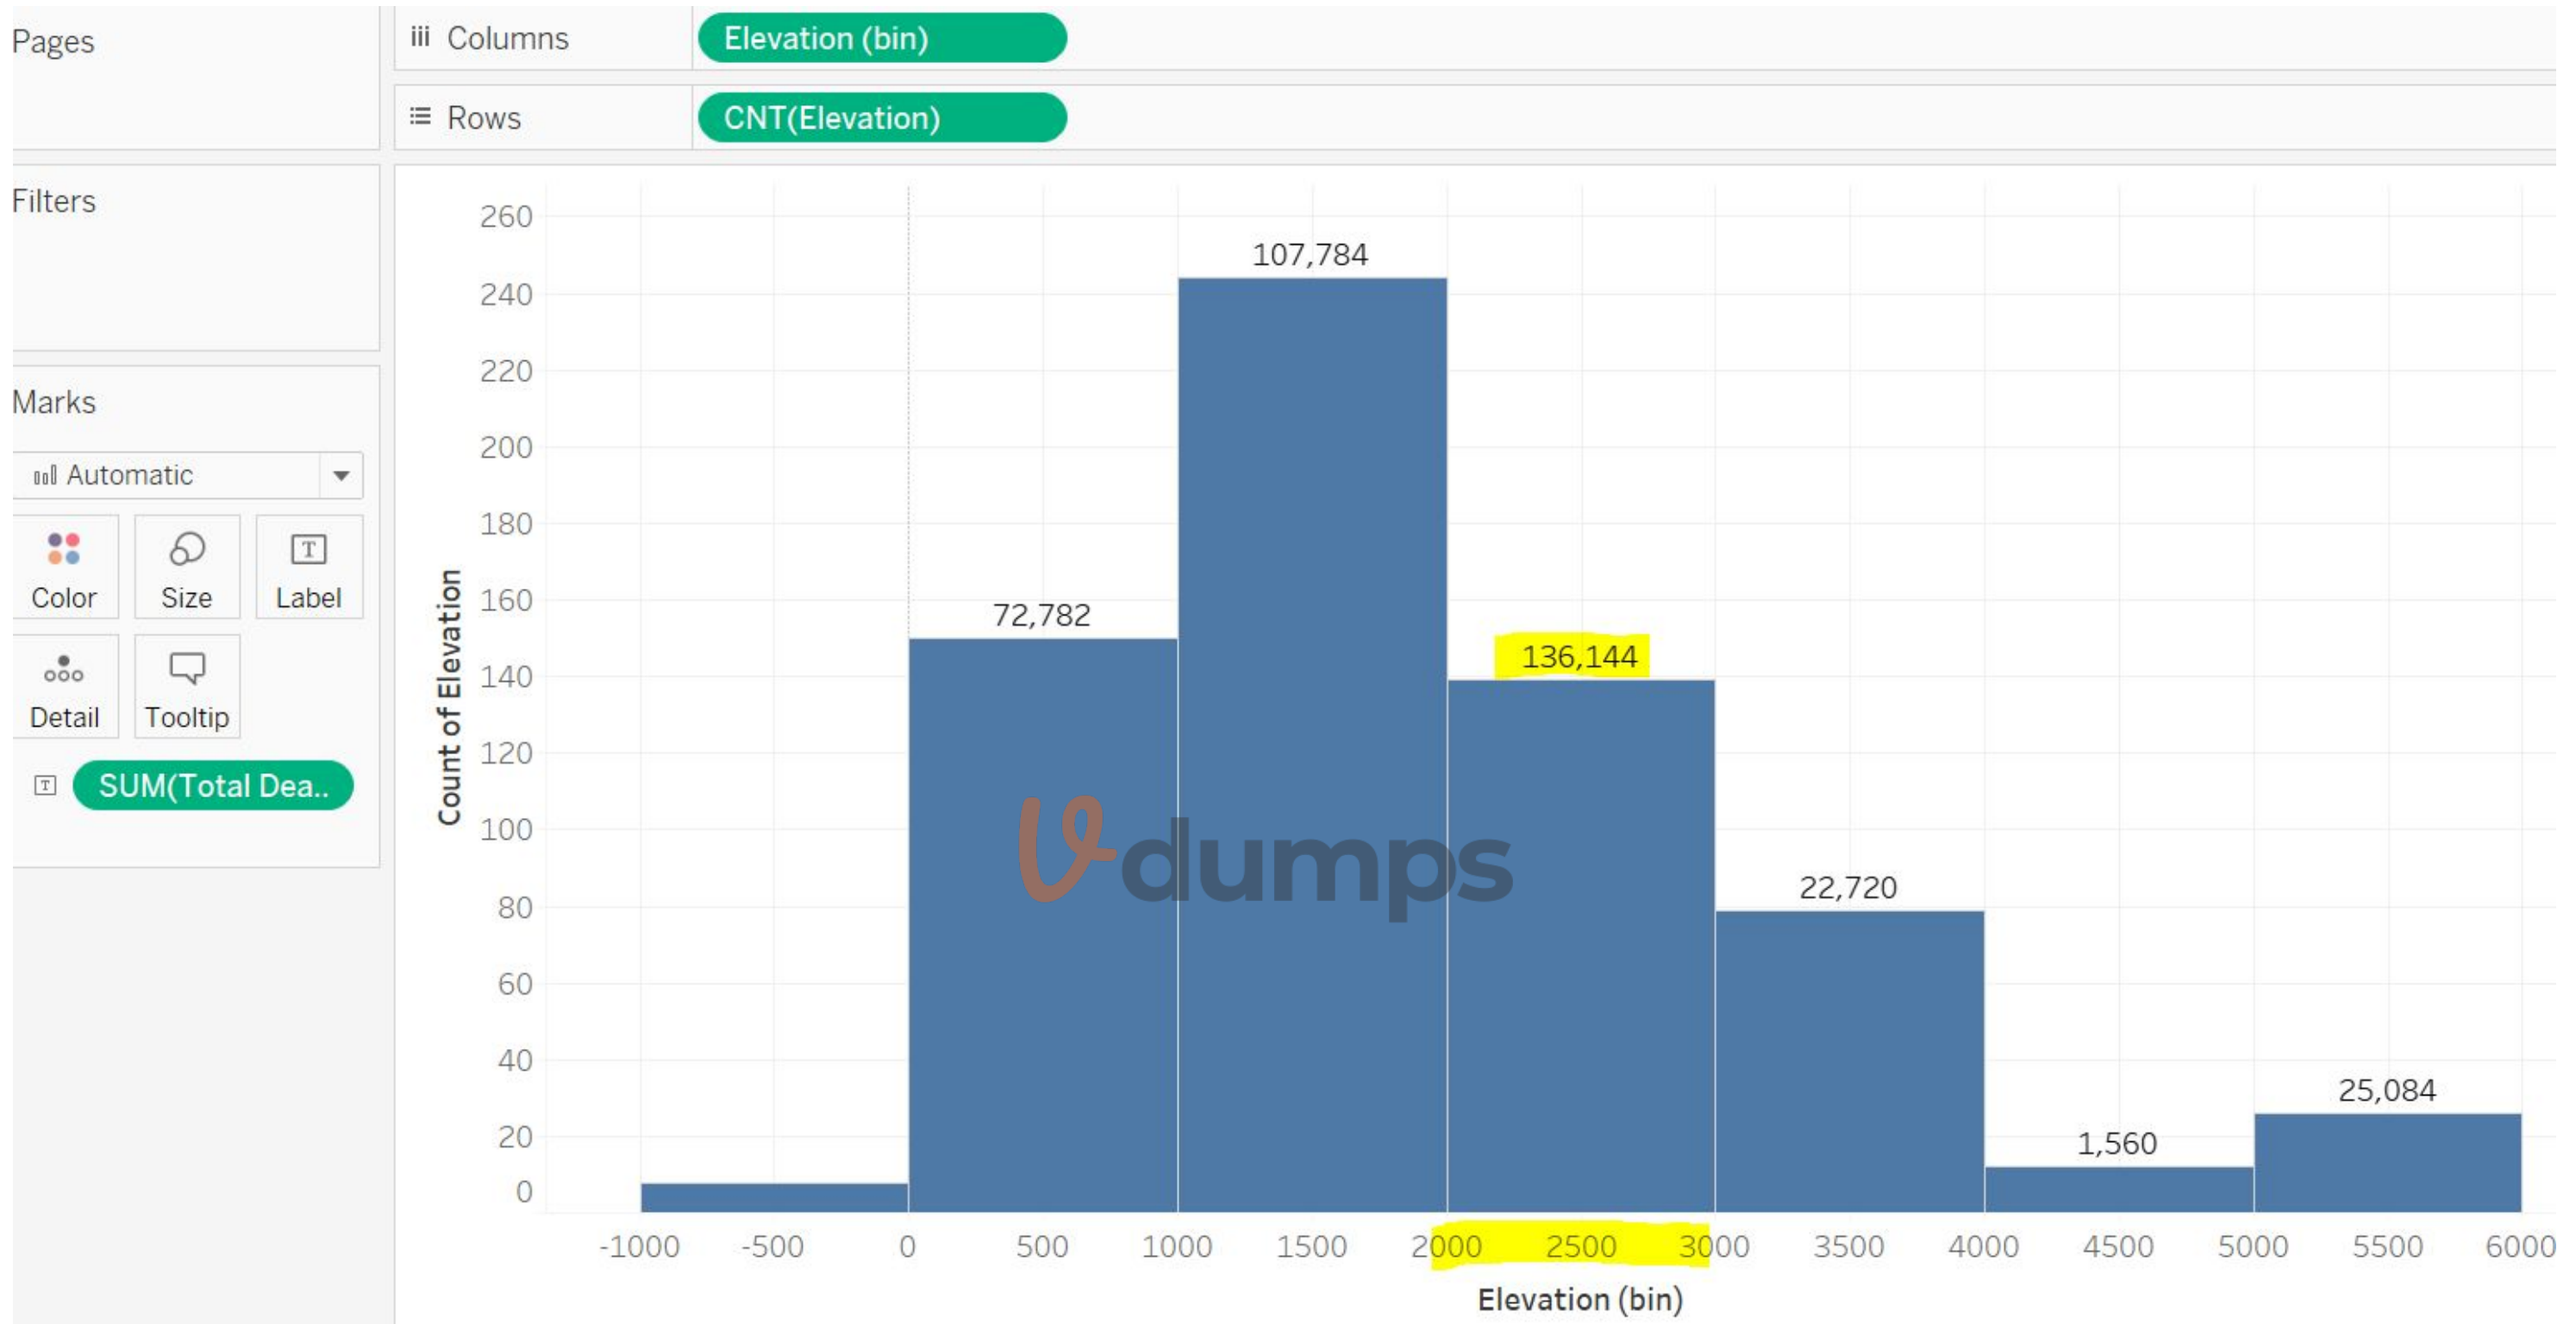

Size of bins:

Range of Values:

Min:	<input type="text" value="-642"/>	Diff:	<input type="text" value="6,609"/>
Max:	<input type="text" value="5,967"/>	CntD:	<input type="text" value="229"/>

Drop the Total Death to Label.

The total number of deaths reported in the bin of 2000.
 Note that the lower limit is inclusive. So 2000 bin means 2000 to 2999.

QUESTION 55

Tableau automatically associates continuous fields with categorical palettes.

- A. True
- B. False

Correct Answer: B

Section:

Explanation:

Tableau automatically associates discrete fields with categorical palettes

Refer: https://help.tableau.com/current/pro/desktop/en-us/visual_best_practices.htm

QUESTION 56

In LOD calculation, we can use fields from multiple data sources (blended data source)?

- A. True
- B. False

Correct Answer: B

Section:

Explanation:

The screenshot shows a Tableau calculation editor window titled "Calculation1" with a close button (X) in the top right corner. The window contains the following text: "volerup (significantvolcanoeruptions)" and a calculation field containing the formula: `{FIXED [Location] : (SUM([Data (Country-Population)].[Population]))}`. Below the formula, there is a large watermark logo for "Vdumps". At the bottom left of the window, a red-bordered box contains the error message: "The calculation contains errors". Below this box, a larger grey-bordered box contains the text: "All fields in a level of detail expression must come from the same datasource." At the bottom right of the window, there are two buttons: "Apply" and "OK".

Here, the Location is in a primary data source, and the population field is in a secondary data source.
So the answer is FALSE.
