## Exam A

### QUESTION 1

In addition to the expanded capacity for NPCs, what else is improved in the PA - 7080 over the PA - 7050?

- A. A second LPC is standard.
- B. A second SMC is standard.
- C. Front - to - back airflow is standard.
- D. Available 100Gb p s interfaces , but only with PAN - OS 7.0 and higher

**Correct Answer: C**

**Section:**

### QUESTION 2

What is the maximum number of QSFP+ interfaces that can be supported in a PA - 7080, and what is the minimum version of PAN - OS required to support them?

- A. 12, PAN - OS 6.0
- B. 12, PAN - OS 6.1
- C. 12, PAN - OS 7.0
- D. 20, PAN - OS 6.0
- E. 20, PAN - OS 6.1
- F. 20, PAN - OS 7.0

**Correct Answer: F**

**Section:**

### QUESTION 3

A Company needs to preconfigured firewalls to be sent to remote sites with the least amount of preconfiguration. Once deployed, each firewall must establish secure tunnels back to multiple regional data centers to include the future regional data centers.

Which VPN configuration would adapt to changes when deployed to Hie future site?

- A. preconfigured GlobalProtcet satellite
- B. preconfigured GlobalProtcet client
- C. preconfigured iPsec tunnels
- D. preconfigured PPTP Tunnels

**Correct Answer: A**

**Section:**

### QUESTION 4

A client has a sensitive application server in their data center and is particularly concerned about resource exhaustion because of distributed denial-of-service attacks. How can the Palo Alto Networks NGFW be configured to specifically protect tins server against resource exhaustion originating from multiple IP address (DDoS attack)?

- A. Define a custom App-ID to ensure that only legitimate application traffic reaches the server

- B. Add a DoS Protection Profile with defined session count.
- C. Add a Vulnerability Protection Profile to block the attack.
- D. Add QoS Profiles to throttle incoming requests.

**Correct Answer: B**

**Section:**

#### QUESTION 5

What is the result of deploying virtualization in your data center?

- A. reduced security threat
- B. reduced operational costs
- C. increased hardware capital costs
- D. increased host provisioning

**Correct Answer: B**

**Section:**

#### QUESTION 6

Which security component can detect command-and-control traffic sent from multiple endpoints within a corporate data center?

- A. stateless firewall
- B. next-generation firewall
- C. personal endpoint firewall
- D. port-based firewall

**Correct Answer: B**

**Section:**

#### QUESTION 7

What are two benefits of using Panorama for a customer who is deploying virtual firewalls to secure data center traffic? (Choose two.)

- A. It can monitor the virtual firewalls' physical hosts and Vmotion them as necessary.
- B. It can bootstrap the virtual firewall for dynamic deployment scenarios
- C. It can manage the virtual firewalls' resource use, allowing for VM resource over-subscription.
- D. It can provide the Automated Correlation Engine functionality, which the virtual firewalls do not support

**Correct Answer: B, D**

**Section:**

#### QUESTION 8

How many more NPCs can fit in a PA - 7080 compared to a PA - 7050?

- A. Four
- B. Six
- C. Eight
- D. It depends upon whether the front - to - back airflow duct is in use.

**Correct Answer: A**

**Section:**

**QUESTION 9**

Which of these statements is true about Dynamic Address Groups?

- A. They allow you to create a policy that automatically adapts to changes --- adds, moves, or deletions of servers.
- B. They enable the flexibility to apply different rules to the same server based on tags that define its role on the network, the operating system, or the different kinds of traffic it processes.
- C. A dynamic address group uses tags as a filtering criterion to determine its members.
- D. The filtering criteria uses logical and, or, and not operators.

**Correct Answer: A, B, C**

**Section:**

**QUESTION 10**

What is the difference between static and dynamic tags?

- A. Static tags exist, but dynamic tags do not.
- B. Dynamic tags exist, but static tags do not.
- C. Static tags are part of the configuration on the firewall, but dynamic tags are part of the runtime configuration.
- D. Static tags are hard coded into each VM, but dynamic tags are assigned by the firewall during runtime.

**Correct Answer: C**

**Section:**

**QUESTION 11**

Which statement is true regarding the HA3 interface on VM - Series firewalls in an HA configuration?

- A. The second VM - Series firewall should be in a different host and the HA3 connection should be over a dedicated high - speed link .
- B. The second VM - Series firewall should be in the same virtual machine so the HA3 connection does not have to travel over a physical connection .
- C. The HA3 connection should traverse no more than a single virtual switch.
- D. There is no HA3 connection on a VM - Series firewall.

**Correct Answer: D**

**Section:**

**QUESTION 12**

Which three of these are valid profiles for configuring HA timers?

- A. Recommended
- B. Custom
- C. Aggressive
- D. Low - latency
- E. Advanced

**Correct Answer: A, C, E**

**Section:**

**QUESTION 13**

What is the default interval for the HA heartbeat ? :

- A. 100 milliseconds
- B. 1000 milliseconds
- C. 2 seconds
- D. 5 seconds

**Correct Answer: B**  
**Section:**
